The incident occurred Sunday when an unidentified young man entered the Greek Embassy compound in the Albanian capital of Tirana, calling for help and saying he sought political asylum. Five Albanian security men followed him onto the premises, beat him severely and dragged him away, officials said.

Greece's ambassador to Albania, Spyros Dokianos, and the entire embassy staff witnessed the incident and the ambassador immediately protested to the Tirana authorities.

Greek Foreign Minister Antonis Samaras, who returned to Athens late Sunday from the European Community summit in Ireland, summoned the Albanian charge d'affaires and sent a second strong protest to Albania about the unauthorized entry into the embassy compound.

The identity and other details of the asylum seeker were not available.

Albania is the only Eastern European country in which a Stalinist-style communist government still rules despite democratic reforms sweeping other states in the region.

Since the Communist Party came to power after World War II, scores of Albanians, many of them ethnic Greeks, have crossed the border or have swum to the Greek island of Corfu, about a mile from the Albanian coast at its nearest point.

Some of the asylum seekers, mainly men and women in their 20s and 30s, have drowned in the effort to swim to Corfu, but others made it to the

island after swimming for hours in the dark.

A barbed wire fence, charged with high voltage electricity, runs along the land border between the two countries, and Albanians are forbidden to approach it.

The latest incident followed one which occurred in early March when Sotiris Antoniou, an ethnic Greek Albanian, entered the embassy in Tirana and sought political asylum. Two days later, members of the Sigurimi, or Albanian security police, tried to enter the embassy to drag him out, but embassy employees stopped them. Two of the employees were injured in the scuffle.

Antoniou was eventually allowed to fly to Athens.

Two weeks ago, Bernard Kici, 38, an Albanian Catholic from Shkodra in northern Albania, entered the Greek Embassy and sought asylum, saying he wanted political freedom as well as freedom to practice his religion. Making the sign of the cross in public in Albania carries a jail sentence.

Greece asked Albania to follow international procedures and allow him to be flown to Athens, but Kici was still in the embassy when the latest incident occurred.

A day after Kici entered the embassy, an Albanian soldier crossed the border into northwestern Greece and asked for political asylum.

WASHINGTON (APRIL 30) UPI - President Bush, defending his decision to remove Japan from an unfair trade list, said Monday he will ''use all the tools at our disposal,'' including the possibilty of retaliation, to open Japanese markets.

In a speech to the U.S. Chamber of Commerce, Bush said his decision last Friday to no longer cite Japan for unfair trading practices ''does not mean that all of our problems with Japan have disappeared.''

However, he pointed to recent concessions from Japan as evidence of progress in easing trade tensions and said Japanese Prime Minister Toshiki Kaifu ''shares our commitment to ensuring that trade strengthens rather than undermines the friendship between our nations.''

''We know that we could sell more American products if Japan's market were truly open,'' Bush said, ''but we've been working hard on it and I think with impressive results.''

Under the Super 301 section of the 1988 trade law, the administration is required to identify countries suspected of unfair trading practices and in line for possible retaliation if negotiations fail to resolve the disputes.

Last year, Japan, India and Brazil were all designated as priority countries. Facing an April 30 deadline for a new round of Super 301 cases, Bush said Friday that only India, because of its refusal to enter into negotiations, would continue to be cited.

His decision angered some members of Congress urging tougher treatment of the Japanese. However, Bush said resolution of last year's three specific complaints against Japan - over supercomputers, satellites and forest products - and recent promises of economic reforms to make the Japanese market more competitive and stimulate demand for imported goods provide reason to ''look forward to substantial progress.''

To those who accused him of being too quick to accept Japanese promises in place of concrete action, Bush told the Chamber of Commerce audience, ''We're going to continue to press for progress.''

''Keep in mind, Section 301 and other trade law authority remain available to the president,'' he said, ''and we will use all the tools at our disposal to open markets and ensure fairer treatment for American products services, American investment and ideas.''

#90120u1243 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - The Supreme Court, in a case involving the 1983 $7.2 million Wells Fargo robbery in West Hartford, Conn., rejected Monday the government's view of the proper standard for handling wiretap recordings.

The court, in a 6-3 decision by Justice Byron White, rejected government interpretations of a federal law dealing with the handling of wiretap evidence gathered in the investigation of the Connecticut robbery and other crimes, but was barred from being used at trial because of delays in having the tape recordings sealed.

However, the court left open the possibility that the government may still be able to use the wiretap evidence at trial, ruling that while the government's interpretations of the law were wrong, they were ''objectively reasonable.''

White said if the government can prove it had argued in district court, as it did before the appeals court, that its delay in sealing the tapes was the result of a good-faith misunderstanding of the law, the material may

be allowed at trial.

Justices John Paul Stevens, William Brennan and Thurgood Marshall dissented.

The case was brought to the court by the government in seeking review of a ruling by the 2nd U.S. Circuit Court of Appeals that ordered some of the wiretaps supressed.

The case involves wiretaps first conducted as part of the investigation into a 1983 rocket attack on an FBI office in Puerto Rico by the alleged terrorist group Los Macheteros, the machete wielders. As a result of extensive electronic surveillance, the FBI uncovered evidence that implicated the group in the 1983 Wells Fargo robbery.

A grand jury eventually issued indictments against a number of Puerto Ricans, who were arrested in 1985, most notably Filiberto Ojeda Rios.

Those arrested moved to suppress the tapes, arguing they were not handled properly or according to federal law requirements, such as having them sealed by the court immediately after the surveillance ended.

Courts eventually refused to allow the government to use in court 344 tapes from one surveillance and 34 tapes from another location on grounds they were not presented to the court soon enough for sealing. In all, the government recorded more than 1,000 tapes.

In seeking high court review, the government called on the justices to decide the ''proper standard to be used in determining when a delay in sealing the products of court-authorized electronic surveillance should lead to suppression.''

Ojeda, 56, an alleged terrorist and the key defendent in the $7 million Wells Fargo robbery, has returned to his native Puerto Rico while awaiting trial.

The self-proclaimed founder of a clandestine Puerto Rican independence group called Los Macheteros, Ojeda was acquitted Aug. 26 in Puerto Rico on eight charges related to the shooting of an FBI agent.

The incident occurred during Ojeda's arrest in August 1985 along with several other suspects in the Wells Fargo heist in a series of raids in Puerto Rico.

Ojeda, who the FBI has claimed is a Cuban intelligence agent, and most of the other defendants were accused of conspiracy in the planning of the Sept. 12, 1983, robbery at a Wells Fargo depot in West Hartford, Conn.

Federal prosecutors claim the robbery was staged to finance a violent campaign for Puerto Rican independence through the Los Macheteros, which the FBI claims is linked to several acts of violence against the United States.

Four defendants in the Wells Fargo robbery already have been convicted of conspiracy and interstate transportation of stolen money, two others pleaded guilty to lesser charges and nine others, including Ojeda, await trial.

The former Wells Fargo guard accused of actually carrying out the robbery, Victor M. Gerena of Hartford, remains a fugitive and the FBI has claimed he is hiding in Cuba with part of the loot.

Besides the Wells Fargo robbery, the Macheteros also claimed responsibility for a December 1979 attack near San Juan on a bus transporting U.S. Marines that left two Marines dead and 10 wounded, and the January 1981 bombing at the Muniz air base that destroyed nine combat planes of the Puerto Rican Air National Guard.

#90120u1276 04/30/1990 ~United Press International

NEW YORK (APRIL 30) UPI - Former Philippines first lady Imelda Marcos was back in court Monday at her racketeering trial, wearing heart and blood pressure monitors she said she was ''trying to hide.''

Mrs. Marcos, smiling and looking much better than she did when she left the courtroom Friday pale and sobbing, wore a black suit with the jacket and a black lace scarf thrown over her shoulders.

On her upper right arm she wore a blood pressure cuff, and indicated she also was wearing an electronic heart monitor.

''That's why I'm wearing this,'' she said to reporters. ''I'm embarrassed. I'm trying to hide it.''

Her composure regained, she sat holding her rosary beads as U.S. Customs Service official Leslie Kinney described a suitcase seized from the Marcoses containing negotiable stocks.

On Friday, as Kinney testified about a companion suitcase he said contained more than 50 pounds in gold bars that were a present to her husband, deposed president Ferdinand Marcos, Mrs. Marcos became upset and left the courtroom.

Her illness was diagnosed as high-blood pressure, and U.S. District Judge John Kennan recessed the trial.

Marcos, 60, is charged with racketeering, conspiracy, fraud and obstruction of justice for allegedly plotting with her husband to divert more than $200 million from the Philippines treasury for personal use.

The money was allegedly used for art and real estate investments around the world, including the purchase of the Crown Building in Manhattan.

Before the Monday's testimony got started, Judge Kennan told members of the jury that Mrs. Marcos was wearing the monitoring device, and told them ''If you hear a sound, or a beep, it has nothing to do with the case. Please don't speculate.''

Kinney described the contents of one of four suitcases seized when the Marcoses arrived in Hawaii from the Philippines Feb. 26, 1986, that contained negotiable stocks.

He said on the outside of the suitcase was a piece of tape marked ''Properties New York.''

''Did you see any negotiable instruments?'' asked prosecutor Debra Livingston.

''Yes,'' he replied. ''The vast majority were capital stockholdings. ... They appeared to be in bearer form,'' which means that whoever possesses them can trade them.

#90120u1315 04/30/1990 ~United Press International

NEW DELHI, INDIA (APRIL 30) UPI - Japanese Prime Minister To- shiki Kaifu told India and Pakistan Monday that their economic well-being depends on a ''relaxation of tension,'' adding that Tokyo will boost financial aid as part of a bid to play a larger role in promoting regional stability.

Kaifu also took aim at New Delhi's economic policies, in- directly criticizing its position in the Uruguay round of talks on global trade and urging fiscal reforms to open its markets and permit greater foreign investment.

The Japanese prime minister made the comments in a speech to a joint session of India's bicameral Parliament that spelled out a more activist Japanese policy on relations with the rest of Asia, particu- larly the subcontinent and its 1 billion people.

''I shall positively implement the following concrete meas- ures in order to give further depth and breadth to Japan's relations with South Asian countries. These are ... the promotion of political and economic dialogue, the expan- sion of development assistance and the promotion of cultural exchange and cooperation,'' he said.

Kaifu said Japan also intends to ''contribute positively to the relaxation of tension and peaceful resolution of conflicts in Asia.''

The speech came as Kaifu wound up a two-day visit to New Delhi, the first stop on a nine-day regional tour by the Japanese leader, who was to depart early Tuesday for Bangladesh. He is the first Japanese premier to visit India since 1984.

The tour is seen by diplomat- ic observers as a bid by Japan to reassure aid recipients that Tokyo will not divert political attention or financial assistance to the emerging, economically hard-pressed democracies of Eastern Europe.

In his speech, Kaifu dealt extensively with what he called the emergence of a ''new international order'' and he urged South Asian nations to follow the superpowers by ending their historical and religious confrontations and opening dialogues.

He reiterated Japan's call for India and Pakistan to soothe rising frictions over the disput- ed Himalayan Kashmir region that have spawned fears of a fourth war between the rivals since 1948.

Kaifu said he believed that peace and democracy in the region depended on regional economic growth, which he said also hinged on integration with the world economy through the reduction of domestic market impediments, trade barriers and bureaucratic interference, references to India's regulated, mixed fiscal system.

''One of the keys to vigorous economic develpment of South Asia will be the minimization of government regulation, privati- zation of state-owned corpora- tions as well as improved industrial infrastructure and stimulation of investment inside and outside the country,'' he said.

He also said he believed that the General Agreement on Trade and Tariffs, or GATT, the system regulating interna- tional commerce, should be strengthened and expanded to cover ''trade-in services, intel- lectual

property rights and trade-related investment tran- sactions,'' a proposal that has been opposed by India and other developing countries during the ongoing Uruguay round of global trade talks.

(APRIL 30) UPI - Syria says another American hostage will be freed within the next few hours. Syrian ambassador Farouk Al Sharaa made the announcement today as he emerged from a meeting with his Iranian counterpart in Damascus. Also today, Iran backed up a radical Moslem group's promise that American hostage Frank Reed would be freed within hours... and added it is seeking freedom for all 17 Western hostages held in Lebanon. Iran's official Islamic Republic News Agency said in a three-sentence dispatch that ''American Frank Reed is to be released in the next few hours.

A published report says a top aide to former Housing Secretary Samuel Pierce is ready to tell how Reagan White House officials were involved in giving HUD programs as political favors. The report says DuBois Gilliam is expected to appear on Capitol Hill today with allegations about his former boss and other officials. The paper says Gilliam is serving an 18-month jail term for conspiracy and taking bribes.

Panama's recently installed President Guillermo Endara appears in Washington, D-C, today to personally thank President Bush for helping the Central American nation. The two presidents are scheduled to meet in the Oval Office and then have lunch together. Endara arrived yesterday for a five-day visit. He told reporters at Andrews Air Force base that he has ''every confidence'' that the U-S Congress will help Panama financially.

A plastic bag factory erupted in flames early today creating a cloud of smoke that could be seem for miles around Hillside, New Jersey... 15 miles west of New York. At least one firefighter suffered minor injuries in the extra-alarm fire that destroyed the Superior Poly Bag factory. Police blocked off the industrial area to traffic. NO other buildings in the complex were affected. The cause of the fire has NOT been determined.

#90120u1392 04/30/1990 ~United Press International

NEW DELHI, INDIA (APRIL 30) UPI - Indian lawmakers united despite their political differences Monday and urged the government of Prime Minister V.P. Singh not to buckle to U.S. pressure to implement trade reforms.

Legislators in the upper house of Parliament, or Rajya Sabha, took turns condemning the Bush administration for maintaining India on a list of unfair trading partners under legislation known as ''Super 301.''

The U.S. administration removed Japan and Brazil from the list Friday, making only India liable for retaliation if it does not show signs of meeting American concerns by June 16.

Lawmakers described the U.S. action as ''unfortunate'' and ''sheer blackmail.''

''The entire house agrees with the sentiments that under no circumstances should India bow down to U.S. pressure,'' said Najma Heptullah, chairman of the Rajya Sabha and a member of the opposition Congress (I) Party.

''The U.S. administration's step in singling out India under Super 301 is a ploy to blackmail India in view of the acute foreign exchange crisis being faced by it,'' said N. Thualsi, a member of the Telugu Desam party, one of five components of Singh's minority National Front government.

He said Washington was exploiting New Delhi's foreign exchange shortage as leverage to gain greater investment opportunities in India, which is potentially one of the world's largest markets for U.S. multinationals.

Kapil Verma of the Congress (I) Party said that under no circumstances should the government drop its refusal to open talks with Washington on trade friction under the threat of retaliation.

In retaining India on the Super 301 list, Washington cited New Delhi's policies of barring foreign insurance companies from its $3 billion market imposing export requirements on foreign firms and requiring all companies to purchase local components before allowing them to be imported.

Trade ties between the world's two largest democracies have blossomed over the past five years, with two-way commerce crossing the $6 billion mark in fiscal 1989-90. India is estimated to have run up a trade surplus of nearly $1 billion.

The United States in mid-1989 cited Japan, Brazil and India as unfair trading partners under Super 301.

The provision called for negotiations to be held with the named countries over a period of one year under threat of retaliation by Washington if no progress was made.

Washington last week claimed that Brazil had opened up its economy to the satisfaction of the United States and that Japan had begun talks that proceeded satisfactory, but that India had refused to negotiate.

New Delhi claims that legislation passed abroad cannot be unilaterally imposed on India and any forced change in trade laws would amount to violation of its sovereignty.

The continued listing of India under Super 301 is seen by many Indians as a way to pressure the country to relax its demands on the General Agreement on Tariff and Trade, an organization that sets standards for world trading practices.

The United States has long regarded India as one of its chief opponents in the multilateral GATT trade negotiations.

President Bush and U.S. Trade Representative Carla Hills have stressed the need for the successful culmination in December of the Uruguay Round of GATT talks, which is aimed at enlarging the GATT structure to cover other industries.

India and other developing countries have resisted broadening the GATT structure, saying they must first receive concessions from Western nations. India is demanding that the United States lower its barriers in the textile sector.

WASHINGTON (APRIL 30) UPI - U.S. Park Police, although ''bombarded'' by protests, said Monday they had no reason to increase their estimate that 200,000 persons attended a weekend anti-abortion rally at the Washington Monument.

Sgt. Karl Ore, answering the telephone in the Park Police chief's office, said the lines had been flooded by calls since the estimate was made at 4 p.m. Saturday. The callers claimed a larger crowd attended the event.

''We've been bombarded by calls, but that won't change a thing,'' he said. Ore noted ''we've been making these estimates for 30 years'' and sponsors have been disputing them for the same amount of time.

''The estimate is one we can justify,'' he said.

Organizers of the rally claimed the crowd reached at least 500,000. John C. Willke, president of the National Right to Life Committee, was quoted in The Washington Post Monday as noting that pro-abortion rights forces

had made much of the crowd estimate of 300,000 from their rally last year and saying, ''The major reason for our rally was to show we could outdo them by a factor of two or three.''

Willke was quoted as saying photographs taken of the crowd Saturday would be analyzed in an effort to verify that attendance was much larger than the police estimate, with some supporters' figures ranging as high as 700,000.

A number of telephone calls protesting use of the Park Police crowd estimate also were received by news organizations in Washington and elsewhere.

CORVALLIS, OR (APRIL 30) UPI - If at first your ''group kiss'' won't make the Guinness Book of World Records, smooch, smooch again - at least, that's what Oregon State University students decided.

OSU held a ''Kiss of 1990'' event last Wednesday that drew 1,210 people willing to pucker for posterity, said Missy Talley, one of the event's organizers. The couples lined up at the Memorial Union quad in an effort to set a record for the most folks kissing at one time and place.

''I guess 1,210 is pretty high, considering it was raining that day,'' Talley said Monday. ''We just wanted to promote the university and get OSU on the map with a fun activity for people to participate in.''

A similar event at the school five years ago drew 1,190 participants, Talley said. But the efforts of student leaders to have that group smooch grace the pages of Guinness failed. Organizers are hoping for a different result this time.

''We'll give it a try, anyway,'' Talley said.

#90120u1472 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - People who receive a common local anesthetic may test positive for illegal cocaine use up to two days after treatment, doctors warned Monday.

Doctors at Fairfax Hospital in Falls Church, Va., said they found applying a half-teaspoon of tetracaine, adrenalin and cocaine solution, called TAC, to the skin for local anesthesia before stitching up a cut or wound will produce a positive urine test for cocaine for up to 48 hours.

Similar effects can occur when the topical cocaine solution is used before surgery on the eye or nose, as well as for certain dental procedures, the doctors reported in a study published in Annals of Emergency Medicine.

One day after receiving TAC, more than three-quarters of the 18 patients in the study ''clearly failed'' a standard test used to screen people for illegal drug use, said Dr. Michael Altieri, who directed the study.

Based on their findings, Altieri and his colleagues recommended doctors and dentists who use cocaine-based topical anesthetics warn patients that they may fail urine screening tests for illegal drugs for up to 48 hours after treatment. Traces of cocaine metabolites were found in the urine up to 72 hours after treatment, they added.

It has been estimated that up to 25 percent of the largest U.S. companies require prospective employees to undergo urine tests to screen for drug abuse. Athletes, transportation workers, military personnel and people employed in sensitive government positions are also subject to random drug testing.

Dr. Richard H. Schwartz, co-author of the study, said TAC is a ''very common'' anesthetic in doctor's offices, clinics and hospital emergency rooms.

In his emergency room experience, Altieri said an adult with a cut requiring stitches would have about a one-in-four chance of being offered a choice between the topical anesthetic and an injectable type of local anesthetic. TAC, which works slower than injectable anesthetics, is used particularily often in treatment of facial or scalp injuries, he said.

Until the new study, Schwartz said doctors generally did not think TAC, which many hospital pharmacies mix themselves and is also manufactured by Mallinckrodt Inc. of St. Louis, contained enough cocaine to alter results of tests for illegal drug use. The cocaine is used in the anesthetic to help deaden pain and reduce bleeding by constricting blood vessels.

In addition to failing routine screening tests, urine specimens from TAC-treated patients also tested positive for cocaine when analyzed by more sophisticated tests, called gas chromatography and mass spectrometry, sometimes used to double-check results.

The Virginia doctors said they had not heard of any incidents in which people have lost jobs because they tested positive for cocaine after receiving TAC. But Altieri said the growing popularity of TAC - and the increasing prevalence of drug testing at the workplace - makes it essential that people be aware that the anesthetic has the power to throw off drug tests.

#90120u1476 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - An agreement for freer world trade in agriculture is within grasp of negotiators, a group of observers said Monday and suggested the pact should include the removal or reduction of export subsidies.

The group, the International Policy Council on Agriculture and Trade, also said ''rebalancing,'' a key element in the European Community's proposal, should be dealt with as a so-called special case that would not impede the reaching of an agreement.

Negotiators face a December deadline for concluding a four-year round of trade liberalization talks. Agriculture has become one of the thorniest issues in the round.

Although Europe and the United States have been adversaries, top-rank leaders from both sides agreed last week to step up efforts to find an agreement. The United States wants to eliminate trade-distorting subsidies and trade barriers worldwide. The European Community says a reduction is the only practical goal.

During a news conference, leaders of the Policy Council said an agreement was within reach, considering the commitments already made by all sides. The Policy Council is a private group composed of farm, business, academic and government officials from 19 nations.

''The search for a final agreement by the end of 1990 can capitalize upon the broad consensus which already has been reached,'' the Policy Council said in a communique.

''I hope there will be a settlement in July. I am optimistic there will be a settlement in July,'' said Lord Henry Plumb, the council chairman, referring to a meeting of trade ministers scheduled for July.

The Policy Council said all sides ''have already agreed to a substantial and progressive reduction'' in three major areas - export subsidies, trade barriers and farm support programs.

To be successful, it said, an agreement should include a ''significant'' reduction in domestic supports and trade barriers, with export subsidies to be eliminated or reduced ''by an amount at least equal to'' the overall reduction in agricultural supports.

The council said some aggregate measure of support - a European idea - could be used to monitor trade reforms and that tariffication - a U.S. idea - could be used for the dismantling of trade barriers. It also said a

farm support programs could be classified on the basis of their effect on trade with injurious policies to be curtailed. The U.S. proposal included such a ''traffic light'' idea.

Economist Stefan Tangermann of West Germany said Europe favored trade reform despite its disagreement with U.S. ideas.

''It is important not to lose sight of the need to make some progress,'' he said. ''The desire to make a 'big deal' may mean this side of the Atlantic and the Cairns group (of non-subisidizing nations) are not prepared to make a 'medium' deal. A medium-sized deal is more than is being done now.''

#90120u1477 04/30/1990 ~United Press International

MILWAUKEE (APRIL 30) UPI - Milwaukee Bucks guard Ricky Pierce, whose 23-point scoring average led his team and all NBA reserves, Monday won the 1990 NBA Sixth Man Award.

It's the second time Pierce has won the award - the first came in 1987. Boston's Kevin McHale is the only other two-time winner of the award.

Pierce received 77 of a possible 92 votes from a nationwide panel of sports writers and broadcasters - three from each NBA city and 11 representing the national media.

Indiana's Detlef Schrempf received eight votes to finish second in the balloting, followed by Phoenix's Eddie Johnson, Cleveland's John Williams and the L.A. Lakers' Orlando Woolridge with two votes each and Sacramento's Antoine Carr with one.

Pierce established a career-high scoring average this season, but he also connected on 46 of 133 (.346) 3-pointers after shooting a combined 19 of 121 (.157) in his previous seven seasons.

The 6-foot-4 guard averaged 29 minutes while coming off the bench in all 59 games he played. He also shot a team-high 51 percent from the field while leading the Bucks to their 11th straight NBA playoff appearance.

Pierce dedicated the award to his late father, Carl, who died last summer of leukemia.

''It's a great honor for me. I'm especially happy for my dad because I told him that the award was going to be for him if I won it this year,'' Pierce said.

Bucks Coach Del Harris said there was ''no question'' Pierce was his

choice for the award.

''There are some other good ones, but all things considered, he's the most qualified this year,'' Harris said.

''He's virtually unstoppable,'' said New York Knicks Coach Stu Jackson. ''If there's a better sixth man, you'd have to show me.''

#90120u1490 04/30/1990 ~United Press International

LONDON (APRIL 30) UPI - Stock prices closed slightly lower in light

trading Monday on the London International stock exchange.

The blue-chip Financial Times 100-stock index, which fell 27.0 points Friday, eased 3.2 points to 2,103.4. The closely watched index had been off more than 22 points shortly after the market opened.

The narrower top 30 industrial average slipped 5.1 points to 1,653.6.

Volume was around 326 million shares, compared with 536 million shares Friday.

Analysts said investors attempted a rally as stocks rebounded from their opening lows following news of better-than-expected first-quarter earnings from Britain's largest chemical company, Imperial Chemical Industries.

ICI, considered a barometer of British industry, reported latest profits dropped 6 percent to $674 million.

ICI jumped 34 cents to $17.30 on the results, which surprised the market given the deep economic uncertainty that has marked most of Britain's companies during the first quarter, analysts said.

Among the day's other highlights, Warburg eased 16 cents to $6.40, Rolls-Royce added 6 cents to $3.14, Unigate gained 8 cents to $4.24 and Fairline climbed 48 cents to $11.84.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed broadly lower in thin trading.

The closely watched German Stock Index, which eased 1.55 points Friday, lost 12.27 points to 1,813.25.

#90120u1504 04/30/1990 ~United Press International

KATMANDU, NEPAL (APRIL 30) UPI - Citizens angry that arsonists burned files possibly incriminating to the past government mobbed the west Nepal home of an official demanding an investigation but the man opened fire, killing two people and wounding six, witnesses said Monday.

A different account by Nepal's official news agency said two people were wounded when the official's guards opened fire in the western resort town of Pokhara. Residents and official sources said after the incident, the military deployed troops Monday to patrol the town, where shops were closed.

''The incident in Pokhara was ugly,'' said Prime Minister Kirshna Prasad Bhattarai, who took power a week ago in an interim government formed after

King Birendra acquiesced amid mass pro-democracy demonstrations.

Bhattarai said Home Minister Yog Prasad Upadhaya was flying to the town about 115 miles west of the capital, Katmandu, to investigate. Forestry Minister Jalnath Khanal also was dispatched to the scene.

''The home minister has been given all powers to take action against those responsible to defuse the situation,'' Bhattarai said.

Sunday night, people believed loyal to the former partyless ''panchayat'' system of government in the Himalayan kingdom set fire to a panchayat office, local residents said in telephone interviews.

No one was injured in the fire and reports from the area said it was believed it was an attempt to destroy possibly incriminating records before they could be turned over Monday to current officials. Witnesses said those setting the fire included a former district panchayat official, Amar Bahadur Karki.

The fire came amid calls for Nepal's new multi-party government - installed earlier this month after 29 years of a monarch-dominated partyless system - to investigate alleged abuses and corruption by the previous government.

After the fire, people angry the records were destroyed mobbed the home of district chief Nanda Kumar Karki, a civilian administrator who supervises the local police force among other duties. The two Karkis are not related.

The National News Agency said the crowd was ''demanding the arrests of the persons behind the arson.''

Residents from the town reported Karki opened fire on the crowd, killing two people and wounding six others.

The National News Agency, however, said police guards protecting Karki opened fire on the crowd and wounded two people, at least one seriously.

The government, meanwhile, increased financial assistance to the families to those killed in the pro-democracy movement from $517 to $863.

#90120u1572 04/30/1990 ~United Press International

LOS ANGELES (APRIL 30) UPI - Unocal Corp. reported Monday first-quarter earnings fell 11.5 percent to $77 million, or 33 cents a share, from $87 million, or 37 cents a share, for the same period in 1989, when the company saw a gain in contract settlements.

First-quarter revenues rose slightly to $2.64 billion from $2.63 billion for the year-ago quarter. The 1989 earnings included a $46 million after-tax gain from various natural gas contract settlements, the company said.

The Los Angeles-based energy and chemical company said the 1990 earnings increased, excluding the special item last year, because of higher worldwide crude oil prices and improved natural gas prices in the United States. These positive factors were offset by lower domestic crude oil production and higher domestic production costs, Unocal said.

The net crude oil and condensate production averaged 232,000 barrels per day during the quarter, off 9,000 barrels per day from the year-ago quarter. Daily production was 136,000 barrels domestically and 96,000 barrels from foreign sources.

The natural gas production during the quarter averaged 1.31 billion cubic feet per day, up from 1.28 billion cubic feet in the year-ago quarter. Chemical operations earned $6 million, a $10 million decline which the company said was due to decreased nitrogen fertilizer earnings.

The company also said earnings from its geothermal operations were $6 million, off $2 million from the 1989 quarter because of lower foreign sales prices.

Capital expenditures for the quarter were $242 million, a $40 million

increase from 1989, due mainly to higher spending for worldwide oil and gas operations, Unocal said.

#90120u1587 04/30/1990 ~United Press International

(APRIL 30) UPI - Efforts appear to be intensifying regarding the freedom of Western hostages held in Lebanon. In the Syrian capital of Damascus, the Syrian ambassador and his Iranian counterpart announced after meeting together that ''another American hostage is likely to be freed within the next few hours.'' Iran's official news agency says U-S hostage Frank Reed will be freed.

The White House is closely monitoring the hostage situation in Lebanon. Spokesman Marlin Fitzwater says Washington has NO way of confirming word that Reed will be released today. But he says Syria has informed the U-S ambassador in Damascus that ''a hostage will be released in a few hours.'' Fitzwater says Syria has been reliable on hostage information.

A published report in Miami says lawyers representing deposed Panamanian dictator Manuel Noriega plan to ask a federal judge to grant them permission to withdraw from Noriega's case. The reported bid to step down from Noriega's case is said to stem from Noriega's inability to pay his legal bills.

A published report in New York quotes unidentified senior G-O-P sources as saying Commerce Secretary Robert Mosbacher plans to resign his post to head the Republican National Committee. The sources say Mosbacher's course of action relies on whether ailing R-N-C head Lee Atwater rebounds from a brain tumor.

NEW YORK (APRIL 30) UPI - A key figure in the Bensonhurst racial killing warned murder suspect Keith Mondello ''her black friends were going to come and beat'' him and his white friends, a defense witness testified Monday.

Tanya Moore, 16, testified she was smoking marijuana with Gina Feliciano the night of the Aug. 23 killing of a black teenager.

Yusuf Hawkins, 16, and three friends ventured into the predominantly white Brooklyn neighborhood to look at a used car when they were attacked by a group of white youths, some wielding baseball bats, who according to testimony had worked themselves into a frenzy over Feliciano's plans to invite blacks and Hispanics to her birthday party.

Mondello, 19, is on trial on second-degree murder charges in the fatal shooting of Hawkins, whose slaying inflamed racial tensions throughout the city.

Moore, a defense witness, testified she was with Feliciano at a local candy store, planning the party, when they encountered Mondello and his friends.

Feliciano, 18, who had begun dating blacks and Hispanics, told a group of youths including Mondello that ''her black friends were going to come and beat up Keith and his friends,'' Moore said.

Prosecutor Paul Burns tried to get Moore to admit she changed her story several times. She began to cry when questioned about a press conference she gave on the steps of the courthouse apparently calling Feliciano a liar.

Earlier, Tanya Moore's mother, Pamela Moore, testified that she, her daughter, Feliciano and Feliciano's mother were smoking marijuana up to an hour before the attack at the Feliciano home. She said neither Gina Feliciano nor her mother went near a window overlooking the street where the shooting took place.

On Friday, the prosecution rested their case against accused triggerman Joseph Fama after a neighborhood buddy of his told the jury he saw Fama fire a pistol four times at Hawkins.

Both Fama and Mondello are charged with second-degree murder. They are the first of eight men to be tried in the case.

(APRIL 30) UPI - Police in Middletown, Connecticut, are investigating the possible connection between a weekend firebombing on the campus of Wesleyan University and a similar attack April 7th that damaged the office of the school's president. Wesleyan officials are unsure who is responsible for the attacks, but maintain the campus is safe.

The trial resumes today in New York in the August racial-killing case in the Bensonhurst neighborhood. Lawyers for the alleged triggerman, Joseph Fama, and Keith Mondello, are expected to begin presenting their case today. The men are charged with murder in the slaying of a black teen-ager during a racial melee in the predominantly white Brooklyn neighborhood.

The Asian Development Bank says the region's growth rate fell sharply in 1989 and it projects a marginal recovery in the next two years. The growth rate fell to five-point-four percent in 1989 from nine-point-three percent

the year before. The Asian Development Outlook is the New Delhi bank's publication analyzing trends in major developing countries.

A 55-year-old Canadian man was found alive and in good condition after more than one week on Mount Ranier in Washington state. Park Service officials say Christopher Trump of Toronto weathered five feet of new snowfall before he was located by a helicopter yesterday near Paradise. He was hiking on the mountain when a blinding snowstorm hit UNexpectedly April 21st.

#90120u1626 04/30/1990 ~United Press International

GENEVA (APRIL 30) UPI - Many of the 40 million people who die from disease each year could be saved by greater use of inexpensive vaccines, antibiotics and other therapy, the World Health Organization said Monday.

''With the decrease in global military tensions, there may be more money to fight the world war war on disease,'' WHO Director General Hiroshi Nakajima said. ''We are looking for a health dividend.''

In a report prepared for WHO's annual assembly opening May 7, Nakajima said disease ''is the most destructive force in the world today.''

Around 50 million or so people die each year from all causes, with 80 percent occurring in developing countries and disease causing 40 million out of the total, he said. Nearly 15 million of all deaths involve children under five.

''If the current trends continue, 200 million people may die prematurely from preventable causes in 1990's,'' the report said.

''More than 8,000 children die each day because they are not immunized,'' it said. ''Almost 11,000 a day die of dehydration caused by diarrhea and about 8,000 a day of pneumonia.''

Big killer diseases range from malaria, tuberculosis and hepatitis to anemia, hookworm, measles and AIDS and other sexually-transmitted afflictions.

''Worldwide, the biggest single killer is cardiovascular disease with 12 million deaths annually, followed by five million deaths due to diarrhoeal diseases,'' the report said. ''Cancer causes 4.8 million deaths and tuberculosis is responsible for three million deaths.''

WHO said as many as 7.5 million children a year could be saved by spending some $2.5 billion annually on immunization and medication for dehydration and pneumonia.

''At least 50 percent of the early deaths due to cardiovascular diseases could be eliminated with changes in lifestyles and about three million adults die from tobacco-related diseases annually,'' it said.

The U.N. specialized agency said yearly health care expenditures in the poorest countries average just $5 per person but $460 in Western Europe and $1,900 in the United States.

''Despite the gloomy picture the global health situation has all the same improved over the past decade,'' WHO said.

''Life expectancy has risen sharply, especially in the developing countries,'' it said.

''Worldwide, average life expectancy is 61.5 years - 73.4 years for developed countries and 59.7 years for the developing countries.''

Immunization of children has also improved sharply in developing countries the report said, rising to more than 60 percent from less than five percent one decade ago.

#90120u1646 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - Reza Pahlavi, claimant to Iran's Peacock Throne, called Monday for the United States to put pressure on the Islamic government in Tehran to ease its repression and allow democratic elections.

Pahlavi, 30, eldest son of the late shah, is backed by Iranians who want to replace the current fundamentalist Moslem government with a constitutional monarchy.

He said the Tehran government ''is facing an explosive situation'' and is trying to divert attention from internal problems by such actions as working for the release of some hostages.

Pahlavi, now living in the exile in the United States, told a National Press Club news conference that the international media is helping the Iranian clergy hold power by playing up small acts of moderation while ignoring the government's continuing oppression.

He said, ''Today the scam has become naked for all to see. Ineffectual in war, the regime is now demonstrating its ineptitude in peacetime.''

His contacts in Iran, Pahlavi said, have been reporting widespread street demonstrations against the Islamic Republic authorities and continuing acts of civil disobedience, including disruption of state radio and

television broadcasts.

The Iranian people need ''tangible signs that Americans are not giving in to Iran's oppressors and that the United States is on the side of freedom, not only in rhetoric but also in practice,'' Pahlavi said.

He suggested one way would be for the United States to step up its broadcasts to Iran, as it did with China.

Pahlavi has published a 14-point plan to bring the Iranian opposition together on the basis of free and fair elections and a genuine multi-party electoral system.

Under questioning, Pahlavi said he had not heard about a report that Tehran has made his expulsion from the United States a condition for further hostage releases. ''But,'' he continued, ''I'm flattered to be considered a major stumbling block.''

Pahlavi, accompanied by a platoon of security men, was asked whether Iran should continue as a religious state. ''That is not for me to say,'' he replied. ''That is for the people to determine. But I believe in the separation of church and state.''

#90120u1647 04/30/1990 ~United Press International

KALAPANA, HI (APRIL 30) UPI - Fingers of lava inched through a rural housing area on the Island of Hawaii Monday, threatening a temporary shelter for people forced from their homes by the erupting Kilauea Volcano.

''There are three active sections along the flow front,'' Bruce Butts, assistant administrator of Hawaii County Civil Defense, said. ''They are in the northern, middle and southern portions of the flow that is headed easterward through Kalapana Gardens.''

The active molten rock on the southern edge of the flow destroyed a house at about 10 p.m. HST Sunday (4 a.m. EDT Monday), the 118th structure incinerated since the eruption began in January 1983.

The toll in the rural housing area on the southeast side of the island of Hawaii some 200 miles from Honolulu in the month of April reached 41.

The searing lava, with a front of a third of a mile, was inching toward several other homes scattered throughout the embattled settlement, Butts said.

A temporary shelter for Kalapana Gardens residents forced from their homes by the molten rock was also threatened, officials said.

CD Director Harry Kim asked the Red Cross to be ready to move its operation and shelter, in Harry K. Brown Park about a half-mile east of Kalapana Gardens, by Monday night.

An estimated 50 to 60 Kalapana Gardens residents have been staying at the park and will be moved to a new shelter if they do not find housing on their own.

The number of people sleeping in the park is about 90, but that figure includes visitors and transients from other areas, Red Cross volunteers said.

Arrangements have been made to set up a new shelter, some 10 miles away at the Pahoa Community Center, which can comfortably sleep 50 people in two buildings, Red Cross spokesman Robert Burns said.

The lava was within 400 yards of the Kalapana store and two churches. Parishoners of the Star of the Sea Church, which is also known as the Painted Church, have decided to move the 60-year-old structure.

The store and the other church will remain where they are.

#90120u1694 04/30/1990 ~United Press International

EDWARDS AIR FORCE BASE, CA (APRIL 30) UPI - The shuttle Discovery's new all-carbon brakes showed no signs of damage after landing Sunday, but officials said Monday many more California touchdowns are needed before shuttles can resume landings in Florida.

''The brakes, they were excellent,'' said John ''Tip'' Talone, the engineer in charge of Discovery's ground processing. ''There was no sign of any heating, no sign of any damage and they looked essentially just like they looked when we put them on the ship.

But Discovery skipper Loren Shriver did not pump the brakes very hard for their first test and while their post-landing condition is encouraging, ''obviously we're going to need several more data points on carbon brakes'' for shuttle landings resume in Florida, Talone said.

''I think carbon brakes still have to prove themselves and I know that is a big condition to landing at the Kennedy Space Center,'' he said. ''But I think everybody believes they're one of the best things that have happened to us in the brake world.''

Discovery and its four-man, one-woman crew blasted off Apr. 24 and landed Sunday at Edwards to close out a successful five-day mission highlighted by the deployment of the $1.5 billion Hubble Space Telescope last Wednesday.

Talone said the veteran spaceplane came through its 10th mission in good condition with minimal tire damage and only a half-dozen heat-heat shield tiles that might need replacement.

Other than a small rocket thruster that developed a leak shortly after launch and work to troubleshoot an apparently minor glitch with one of the shuttle's three electrical generators, Talone said Discovery was in the best shape of any shuttle to date after a landing.

''It is the best yet,'' he said. ''The fact of the matter is, each time we fly one of these things it appears that it gets even better. We're really getting a clean vehicle back, we really are. It was an excellent flight.''

The final objective of Discovery's mission was the first flight test of the new all-carbon brakes, developed as part of an extensive program to improve safety and to allow shuttles eventually to resume landing at the Kennedy Space Center in Florida.

Landings in Florida have been banned since 1985 when one of Discovery's right-side brakes locked up after touchdown in a stiff crosswind. The new

brakes tested Sunday brought Discovery to a smooth stop after being subjected to relatively minimal braking energy.

''Our intent was not to work them real hard, but to put normal pressure on them,'' shuttle chief William Lenoir said Sunday. ''They worked very well. Loren Shriver said they felt good. They felt firm and comfortable.''

The new carbon brakes are the result of a major drive by NASA to eliminate potentially dangerous and definitely costly wear and tear that had become routine during the pre-Challenger era.

The last shuttle landing in Florida came April 19, 1985, the two brakes on Discovery's right landing gear locked up and a tire blew out after commander Karol Bobko used varying brake power during the crosswind to bring the spaceship back to the runway's centerline.

With the wind blowing from the right, Bobko applied about 40 million foot pounds of energy to the shuttle's right-side brakes - twice as much as on the left side - to steer the big space freighter down the runway.

The brakes locked up and the tire blew out seconds before the shuttle rolled to a stop and as a result, all subsequent shuttle flights have been diverted to the broad, more forgiving runways at Edwards until the landing gear system can be beefed up to improve safety.

The first stage involved the implementation of nose wheel steering, thicker axles less susceptible to flexing at touchdown and improvements to the landing gear hydraulic system to ensure even braking.

The second stage was the design, manufacture and test of the new all-carbon brakes, which debuted Sunday with Discovery's landing at Edwards.

While similar to the older carbon-lined beryllium brakes used in the past, the new design has a longer life expectancy - up to 20 landings or more before replacement - and can withstand temperatures of up to 2,100 degrees. The normal operating range for a shuttle landing is just 1,200 degrees.

In addition, shuttle commanders will be able to apply the new brakes at landing speeds of up to 260 mph. The old brakes could not be used above about 207 mph.

#90120u1704 04/30/1990 ~United Press International

CHICAGO (APRIL 30) UPI - Grain futures rallied to session highs late Monday and were at or near those levels at the close on the Chicago Board

of Trade.

Soybean complex futures were lower across the board, although losses were trimmed by active buying during the final minutes of trading.

July wheat gained 4 3/4 cents on short-covering and concern over possible frost damage during the weekend. Preliminary reports indicated light damage in parts of southern and central Kansas and eastern Colorado.

Commercials dominated the buying in wheat, but gains were tempered by professional selling.

Corn prices were mixed with the nearbys higher and the new-crop lower. Trading in corn was relativey quiet.

Soybeans were pressured by profit-taking following the sharp gains last week. Heavier-than-expected delivery notices for May soybeans also weighed on the market, as did widespread protection of up to 5 cents per bushel.

Country movement of corn and soybeans was described as light to moderate.

Basis levels generally were lower.

At the close, corn was up 1 1/4 to off 1 1/2, soybeans down 1 1/2 to 4, wheat up 3 3/4 to 5 and oats up 2 1/4 to 3.

#90120u1706 04/30/1990 ~United Press International

JERUSALEM (APRIL 30) UPI - In sharp language, the State Department warned Monday that Prime Minister Yitzhak Shamir's rejection of a U.S. negotiating proposal ''means losing an important opportunity'' for Middle East peace.

The indirect exchange between Shamir and the State Department continues a steady increase in tensions between the two governments.

In a Radio Israel interview, Shamir said Israel is ''cooperating with the United States ... but one cannot expect we accept every proposal, every idea of every American secretary of state, whoever that may be.''

Shamir's opposition to Secretary of State James Baker's formula brought about the collapse of the Israeli coalition government of the Likud and Labor parties six weeks ago.

Shamir, the caretaker prime minister, said it is ''ridiculous'' for anyone to insist on his approving the Baker proposal, which calls for talks in Cairo, as a necessary step in the peace process.

At the State Department, spokeswoman Margaret Tutwiler read a statement that said, ''We're perplexed by the prime minister's statement in view of the fact that we've been working so closely with the government of Israel on the peace process.''

She said the United States was on the verge of arranging a Palestinian partner acceptable to Israel to discuss Shamir's plan for local elections in the occupied territories.

To pin down the final details, Baker submitted a series of questions to the Shamir government in February. He has not received a direct response.

Tutwiler said, ''Saying yes to Secretary Baker's questions meant saying yes to the Israeli government plan, yes to an Israeli-Palestinian dialogue and yes to peace.''

She went on, ''Continuing to say no will give us very little to work with and will probably mean losing an important opportunity to move toward peace.

''We hope that once the political situation in Israel clarifies, we can work with the Israeli government to move ahead.''

In the past two weeks, ther State Department has been openly critical of Shamir's government for pushing the expansion of Israeli settlements in the occupied territories and East Jerusalem, and for secretly financing one of those settlements.

#90120u1711 04/30/1990 ~United Press International
MIAMI (APRIL 30) UPI - The lawyers for Manuel Noriega asked a federal judge Monday to release them from the deposed Panamanian dictator's drug-trafficking case because they have not been paid and have no money to pursue the defense.

''Today on behalf of Gen. Manuel Noriega we have filed this motion to withdraw as attorneys of record on this case,'' said lead attorney Frank Rubino. ''The U.S. government in its never ending persecution of Manuel Noriega has seized his assets. He has absolutely no assets and no way to finance his defense.''

Rubino, Steve Kollin, Jon May and David Lewis filed the motion with Judge William Hoeveler after being notified Friday by the U.S. Attorney's Office that the government would not agree to release any of the money seized from Noriega's accounts to pay for his defense.

The U.S. and Panamanian governments seized Noriega's assets, claiming they were the profits of his drug-trafficking activity.

''It is ludicrous to think that everything he owns was purchased with drug funds,'' Rubino said. ''The best way to insure his conviction is to make sure he does not have competent counsel.''

Noriega's lawyers said they would stay on the case if they are assured of payment.

Diane Cossin, a spokeswoman in the U.S. Attorney's Office, said the fees were ''a personal matter between Nroiega and his attorneys'' and declined further comment.

If Hoeveler allows the attorneys to withdraw, he would be forced to appoint a public defender, potentially delaying the trial for months.

Asked if the federal government could refuse a request from Hoeveler to release the funds to the defense, Rubino said: ''They federal government invaded a country. They can do anything they want.''

Noriega's trial on 12 counts of drug trafficking and money laundering is scheduled to begin April 1991. The former strongman is being held without bond in a Miami federal prison.

He and 15 others were indicted in February 1988 by a federal grand jury in Miami. Two of the defendants have pleaded guilty and are awaiting sentencing and four, including Noriega, are awaiting trial. The rest remain fugitives.

The indictment accuses Noriega of using his official position as the leader of Panama to foster drug trafficking between Colombia and the United Staes from 1981 to 1986. If convicted, Noriega would face a maximum of 145 years in prison and $1.1 million in fines.

Rubino declined to say how much the lawyers are owed, although they had asked prosecutors two weeks ago to release a sum of about ''six figures'' from Noriega's frozen accounts. Rubino said he had $11,000 in unpaid bills for Noriega's defense on his desk.

Rubino said the government has already spent $12 million, and expected to spend an additional $25 million to prosecute Noriega.

Besides paying outstanding lawyer fees, Rubino said, more money is needed to hire investigators, three additional attorneys, translators and clerks.

Rubino said the defense team has ceased work, pending the receipt of some money.

The lawyers said they would be forced into bankruptcy if the judge ordered them to continue representing Noriega without pay.

DALLAS (APRIL 30) UPI - Community reinvestment activities and relations, while a growing obligation for commercial banks, also represent a business opportunity for the institutions, said a guide released Monday.

Details of the Community Relations Action Guide, prepared by a private consulting group for the American Bankers Association, were outlined at ABA's three-day conference on retail banking which opened in Dallas.

"Banks have always supported the communities in which they are located. This has always been an overriding tenet," said Michael Sullivan, president of Michael P. Sullivan Associates of Charlotte, N.C., a co-author of the guide.

"But in this (guide) we wanted to present a more formal procedure and relate it to the business plans of banks and bridge the gap between community issues and banks," Sullivan said at a news briefing.

The guide was prepared to assist banks in meeting some of the goals of the Community Reinvestment Act, passed in 1977, which requires banks to reinvest a portion of the deposits back into the community from which they were obtained.

The act does not specify how much of the deposits should be reinvested in the community. At the same time, the act requires banks' community reinvestment performance be rated on a complicated scale determined by regulators. Banks are getting concerned that despite their best efforts, their community investment performance may not be able to meet the act's standards.

Recognizing these concerns, the new guide drew up a number of suggestions and recommendations on how banks can create business opportunities for themselves from the act's requirements. "Community relations is both an obligation and an opportunity," Sullivan said.

The guide said a bank's community relations program must do more than provide funding to the United Way or advertise in the local high school year book. "Community relations activities must use the bank's financial and human resources, whether large or small, in a practical and reasonable way while simultaneously responding to whatever needs exist in the market being served by that institution," it said.

The guide said the bank must take "a substantial position" in working to solve community problems, especially those that can impede the bank from

achieving its business goals.

The bank must also be able to identify and assess local consumer issues, social concerns and market needs, ntegrate community needs into bank busines objectives; communicate with various community representatives, and also set up systems to evaluate its own performance and make self-analysis. The guide provides checklists, sample documents, diagrams and flow charts.

NAIROBI, KENYA (APRIL 30) UPI - An estimated 1,800 Ethiopian government soldiers have switched sides in the bloody fight over the country's Eritrea province, the clandestine rebel radio station claimed Monday.

The Voice of Eritrea radio, monitored in Nairobi, said the defecting soldiers who joined the Eritrean People's Liberation Front came mainly from three garrisons south of Massawa port, 470 miles north of the Ethiopian capital of Addis Ababa.

The EPLF, fighting a 29-year war of provincial secession, captured the port in early February, cutting off government access to the Red Sea and depriving troops of military equipment and food.

The fall of the port precipitating a logistical crisis for about 130,000 troops of the Ethiopian Second Army, which were stationed in Eritrea at the time.

The radio said the defectors, including three garrison commanders whom it named, came from encampments at Adi Kayeh, Senafe and Koatit, all about 60 miles south of Massawa.

The EPLF claimed Sunday to have taken Senafe last Wednesday. The town's fall, it said, triggered the latest rush of defections.

''More Dergue (government) soldiers are joining us daily, some with plenty of weapons. This (latest wave) brings to 1,800 the number of defectors in our camps,'' the radio said.

It said said EPLF fighters were now advancing toward the

government-controlled town of Adigrat, 370 miles north of the capital.

There was no government comment on the claims of defections, but western diplomats in Addis Ababa said they believed morale among the Second Army was very low.

One diplomat, who asked not to be identified, said more than 40,000 of the mainly teenage government soldiers in Eritrea may have been killed by the battle-hardened EPLF this year.

''It is getting like the First World War up there,'' the diplomat said.

The Ethiopian government has desperately tried to recapture Massawa in the past two months because of the port's strategic significance and because its loss jeopardizes attempts to feed about 4.5 million people facing the latest in a series of crippling famines in the north.

The government is determined that famine relief stay in its own hands.

The EPLF has said it is willing to allow food through, but Addis Ababa is adamant it will not countenance rebel control of famine relief. As the government still controls the road from Massawa, it has the last word.

-30- 2629

#90120u1815 04/30/1990 ~United Press International

SAN FRANCISCO (APRIL 30) UPI - McDonnell Douglas Corp., one of the nation's biggest defense contractors, can profit from an outbreak of peace its chairman and chief executive officer said Monday.

John F. McDonnell, son of McDonnell Aircraft Co.'s founder, said the end of the Cold War will bring greater demand for his firm's commercial aircraft and space technology as it reduces U.S. defense spending.

"McDonnell Douglas can and will be a major beneficiary of world change," McDonnell told the annual meeting of the Society of American Business Editors and Writers.

Demand for commercial air travel will increase in Eastern Europe, China and the Soviet Union, McDonnell predicted. He said travel restrictions are being lifted in many of the countries and all are increasing their trade with non-communist nations.

If people in the Soviet Union traveled as much by air as they do in the United States, McDonnell said the Soviet Union's air traffic would quadruple; Eastern European airlines would carry 15 times as many people and China's air traffic figures would be multiplied by 118. McDonnell Douglas is already exchanging aircraft parts with China and has employees

working at a plant in Shanghai, he said.

McDonnell said the Chinese government's massacre of student protesters in Tienanmen Square last June led the company to withdraw its employees for several weeks. However, he said the crackdown did not affect the firm's Chinese business ventures in the long run. "We still see China as a tremendous market that's opening," he said.

In response to questions, the chairman said the layoff of 3,000 people from the Douglas Aircraft division was not a sign of trouble for the St. Louis-based company. The firm's main plants are in Long Beach, Calif., with about 37,000 workers, and Torrance, Calif., with about 5,500 employees.

"We expect to do some hiring," he said. "It's just we've got the wrong mix of skills at this point." When Douglas Aircraft announced the layoffs last Thursday, it cited "continued poor fiscal performance" as well as a need for workers with different training.

The chairman acknowledged that McDonnell Douglas has suffered losses in recent years, but he said the losses show that "we are doing the hard things that are going to make us competitive in the future."

McDonnell said the ratio of defense to civilian aircraft demand in the United States has been falling steadily since the 1950s, when it approached a figure of ten-to-one. So while the firm could not predict the current thaw, he said it had been preparing to put more emphasis on civilian aircraft.

Despite his optimistic claims, McDonnell took a swipe at the popular eagerness for a "peace dividend."

"... the U.S. defense budget does not represent a vein of gold which can now be mined for social programs," McDonnell argued. He said cutting the defense budget in half would not balance the federal budget but "we would definitely succeed in destroying the effectiveness of the armed forces."

#90120u1827 04/30/1990 ~United Press International

(APRIL 30) UPI - Syria and Iran say it's only a matter of time before another American hostage held in Lebanon is released. The simultaneous statement by the two Mideast allies supports an announcement made yesterday in Beirut by a previously unheard of Islamic group that it would free U-S captive Frank Reed by tomorrow. The White House is expressing cautious optimism that the reports are valid, citing past reliable declarations by Syria regarding hostages.

NASA officials say the shuttle Discovery sailed through its five-day mission relatively unscathed. Discovery landed yesterday at California's Edwards Air Force Base after successfully deploying the one-point-five-BILLION-dollar Hubble Space Telescope. A space agency official says a superficial examination of the exterior of the spaceplane revealed ''minimal damage. NASA also reports that it has corrected a glitch on one of Hubble's ''high-gain antennas.''

Latvia's nationalist Popular Front says fear on the part of the electorate played a role in the Front's NOT winning 10 needed seats during yesterday's parliamentary elections. The Front says some voters did NOT support the nationalist's bid out of fear that Moscow would repeat what it's doing in Lithuania. A Front official says despite the setback, he believes nationalists comprise a two-thirds majority in Parliament to secede from Moscow.

New York officials are trying to determine what caused a barge loaded with about four-Million gallons of UNleaded gasoline to slam into a Manhattan pier on the East River this morning. Officials say NO leak occurred when the MoraniaS Coast Guard spokesman says the vessel sustained a puncture above the waterline but did NOT suffer any damage to its tanks.

#90120u1831 04/30/1990 ~United Press International

(APRIL 30) UPI - The following is a list of six Americans and 10 other Westerners abducted in Lebanon and believed to be hostages of various Moslem fundamentalist groups:

Americans

-Terry Anderson, 42, chief Middle East correspondent and Beirut bureau manager for The Associated Press and native of Batavia, N.Y., kidnapped March 16, 1985, in Beirut.

-Thomas Sutherland, 58, Scottish-born American from Colorado and dean of the American University of Beirut's agriculture school, seized June 9, 1985, in Beirut.

-Joseph J. Cicippio, Norristown, Pa., American University of Beirut's deputy comptroller, kidnapped Sept. 12, 1986, in Beirut. The Arab Revolutionary Cells - Forces of Omar Al Mukhtar and Revolutionary Justice Organization both claimed responsibility.

-Edward A. Tracy, educator, kidnapped Oct. 21, 1986, in Beirut by Revolutionary Justice Organization.

-Alann Steen, 51, professor of communications at Beirut University College

abducted Jan. 24, 1987. Islamic Jihad for the Liberation of Palestine claimed responsibility.

-Jesse J. Turner, 39, professor of mathematics at Beirut University College, abducted Jan. 24, 1987. Islamic Jihad for the Liberation of Palestine claimed responsibility.

Others

-Briton Jack Mann, former aviation pilot, was kidnapped in Beirut May, 12, 1989. ''The Cells of the Armed Struggle'' claimed responsibility.

-West Germans Thomas Kemptner and Henrich Struebig, workers of West German relief agency, kidnapped in the Sidon May 16, 1989, few hours before Frankfurt court sentenced hijacker Mohammed Ali Hammadi to life sentence.

-Terry Waite, 50, assistant to the Archbishop of Canterbury who negotiated release of a number of Western hostages disappeared Jan. 20, 1987.

-Irishman Brian Keenan, English teacher at the American University of Beirut, disappeared April 11, 1986, in Beirut. No one claimed responsibility.

-Italian Alberto Molinari, businessman and Beirut resident for 20 years, disappeared Sept. 11, 1985. No one claimed responsibility.

-Alec Collett, British free-lance journalist kidnapped March 25, 1985, in Beirut. Revolutionary Organization of Socialist Moslems produced a videotape April 23, 1986, it said showed his hanging to avenge the U.S. air strike on Libya. Collett's body was never found.

-John McCarthy, reporter for British Worldwide Television News agency, kidnapped April 17, 1986, in Beirut. Hilal Ibn Al Khadafy claimed responsibility.

-Swiss Red Cross workers Emmanuel Christen and Elio Erriquez were kidnapped Oct. 6, 1989, on outskirts of Sidon. No one has claimed responsibility.

(APRIL 30) UPI - A Supreme Court ruling today allows the Roman Catholic Church to keep its tax-free status. A coalition of pro-choice abortion activists had sought the repeal of the church's tax-exempt status because of what the groups claim was the church's overt anti-abortion political activities. Federal law gives tax-free status to religious organizations, but NOT groups involved in political campaigns. The ruling supports a lower federal court's decision.

Illinois Health officials report cancer rates in the Chicago area are higher than the statewide average. A three-year study shows Illinois men had an average of nearly 381 cases of cancer per 100-thousand... and women about 424 cases. But for men in the Chicago metropolitan area cancer rates stood between 428 and 479 per 100-thousand.... and for women, the rate ranged between 428 and 565 per 100-thousand.

Authorities in Topsail Beach, North Carolina, are trying to decide how to continue an investigation into Friday's death of a 42-year-old Ohio woman. Joanne Sustar died Friday after losing consciousness Thursday during a New Age soul cleansing ritual. Members of Sustar's group had agreed to cooperate with police. However, the group left yesterday without completing statements regarding their cohort's death. Sustar was buried beneath sand when she lost consciousness.

#90120u1887 04/30/1990 ~United Press International
NEW BRUNSWICK, NJ (APRIL 30) UPI - Television watching tends to make people more tense and less alert than almost any other activity, a major mental health study showed Monday.

A study of 1,200 people found they reported that TV viewing made them ''feel more passive, less alert, and concentrate less'' than when they did other things, said Robert Kubey, an associate professor of communications at Rutgers University.

While many said they felt relaxed while watching TV, they felt less relaxed as soon as the set was turned off, Kubey said.

Kubey and Mihaly Csikszentmihalyi, a University of Chicago psychologist, tracked the 1,200 subjects over periods of several days, giving them beepers and asking them to fill out simple questionnaires when they were beeped. The subjects were told to report on daily activities and on how they felt.

The 13-year study, supported by the National Institute of Mental Health and several non-profit groups, was the first major attempt to track the effects of watching TV in the real world instead of under laboratory conditions, Kubey said. In addition to U.S. residents of all ages, the researchers studied television viewing habits in Italy, Canada and Germany.

Kubey's subjects watched an average of 3 1/2 hours of television each day. But he said that some, including people with full-time jobs, reported spending half their lives in front of the television set.

In their book, ''Television and The Quality of Life: How Viewing Shapes Everyday Experience,'' Kubey and Csikszentmihalyi concluded that people who are lonely and feel their life is empty may use television to fill it. But they suggested that there is a ''spillover effect'' from television that makes the rest of life seem emptier.

On the plus side, television appears to bring families together, Kubey said.

''People who feel good with the family tend to watch a lot of TV,'' he said.

But he found that TV has an insidious effect on its watchers, who reported that they had trouble turning off the set as soon as they would have liked to. He said that many people, especially the retired and the unemployed, use it to fill up empty time.

Both schools and parents must play a greater role in training young people to deal with television, he concluded. Schools in the Canadian province of Ontario have already added television to the required curriculum.

''One may scoff at training people to become better television viewers,'' he said. ''But ... if most children are going to continue to watch 1,000 hours of television for the rest of their young lives, and 1,000 hours every year for the rest of their lives, it is absurd for them not to receive formal education in the medium.''

TV education could include the techniques of mass persuasion and rhetoric, how shows are produced and the economics of television, Kubey said. He also called for a return to active federal regulation of television.

NEW YORK (APRIL 30) UPI - Two St. John's University athletes and another student were named in an indictment unsealed Monday on sodomy and sexual abuse charges stemming from an alleged assault on a female student.

The grand jury indictment, handed up in state Supreme Court, charged juniors Andrew Draghi and Michael Calendrillo, and Walter Grabinowitz, a senior, with numerous counts of sodomy, sexual abuse and unlawful imprisonment.

All three are 20 years old and come from Bethpage in Nassau County. They reportedly surrendered to police Monday.

Draghi and Grabinowitz are members of the lacrosse team at the Roman Catholic university and Calendrillo was a member of the rifle club.

The alleged crimes took place at an off-campus residence house known to students as the ''Trump Tower'', just two blocks from the school in the Jamaica section of Queens.

The charges stem from a report to police by a female student who said she had been sodomized there on Mar. 1 by five or six men.

The young woman, whose name has not been released because of the nature of the crime, told investigators she was forced to perform oral sex and other sex acts with several lacrosse team members and with other young men at the house.

She was then taken to another off-campus house, where she was later rescued by another member of the lacrosse team, authorities said.

Police have said the incident was reported to university officials within a week, but that it was not reported to police until Mar. 31.

University officials, however, said police were called as soon as they learned of the alleged attack.

#90120u1929 04/30/1990 ~United Press International

(APRIL 30) UPI - OPEC is not expected to lower its output ceiling this week and the question is what can the cartel do to prevent members' cheating on quotas and causing a further sag in world oil prices, industry analysts said Monday.

Oil ministers of the 13-nation Organization of Petroleum Exporting Countries are scheduled to meet in Geneva starting Wednesday in an effort to stop overproduction that caused crude prices to drop 14 percent early in April.

"I would expect them to come out and reaffirm the ceiling and deplore the (quota) violations," said Tom Burns, manager of economics for San Francisco-based Chevron Corp., the fourth-largest U.S. oil company.

Asked if OPEC could be expected to lower its current daily output ceiling of 22 million barrels, John Redpath of Energy Security Analysis, Washington, D.C.,said, "Absolutely not."

Redpath said the meeting is expected to result only "in press releases saying the cartel will do a better job of abiding by its ceiling. ... I don't see anything major in the way of impact on the market."

The cartel "might have a bit of a public relations problem" in convincing world markets it is now serious since it has often made such statements in the past while continuing to exceed production limits. OPEC pumps more than a third of the world's oil and attempts to control prices by limiting its output.

Overproduction mainly by Kuwait, the United Arab Emirates, and Saudi Arabia beyond their assigned quotas has led to the current glut in world crude supplies - with prices poised for a further plunge. This ignoring of quotas led to peak OPEC output of about 24 million barrels a day, two million barrels over the cartel's ceiling.

Refiners also have been building their inventories to "abnormally high" levels after they were criticized for being caught with low supplies when the December freeze sent heating oil prices soaring to record levels, Burns said. The inventory buildup problem was aggravated when the near-record December freeze was followed by unusually mild weather in January and February.

The Chevron executive said OPEC output has fallen nearly one million barrels from its peak in recent weeks because with storage facilities flowing over "the oil ministers recognize it can't be sold."

Burns said OPEC needs to reduce output further to near the 22 million-barrel ceiling to maintain firm oil prices. "If they don't flog oil on the market, we could just muddle through," he said.

Burns didn't expect inventories to decline appreciably even as gasoline demand rises during the summer driving season. "It's going to take next winter to really bring those inventories down," he said.

OPEC has set a target price of $18 a barrel as an average for seven Mideast crudes. Burns said the price is currently swinging between $16 and $17 a barrel after falling to near $15 a barrel.

There is "a psychological moment that needs to be watched" in the OPEC meeting, the executive said.

If for some reason the meeting leaves the market with the feeling that prices will decline significantly, the abnormally high inventories could accelerate the decline as refiners unload unneeded crude that is losing value, he said.

"Once people think prices are going to collapse, they start emptying their storage tanks," Burns said.

#90120u1931 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - President Bush welcomed Panamanian President Guillermo Endara to the White House Monday, and said ''it is embarrassing'' Congress has yet to approve an aid package for his newly liberated and struggling nation.

''The people of Panama can't hope to make the leap to liberty and prosperity with only half-hearted support from her neighbors to the north '' Bush said in some of his toughest criticism of Congress yet over the stalled relief.

Bush used Endara's U.S. visit - his first since the Dec. 20 U.S. invasion of Panama that ousted military dictator Manuel Noriega from power and allowed Endara to take elected office - to again urge Congress to pass a $720 million package for Panama and Nicaragua.

During a two-hour meeting, Bush and Endara discussed the proposed assistance, as well as emerging U.S.-Panamanian relations.

Afterward, Bush announced four new accords with Panama, three involving joint drug-fighting efforts and one for the return of the Peace Corps to the Central American nation.

In addition, Bush announced he intends to nominate Gilberto Guardia Fabrega as the first Panamanian administrator of the Panama Canal Commission. The United States is to turn over the canal to Panama in the

year 2000.

''We're committed to cooperation with Panama across the entire range of our relations - diplomatic, cultural and economic,'' Bush said.

Endara said, ''The people of Panama will always be grateful for the support and friendship of the American people, and for the sunshine of freedom that we currently enjoy.''

Earlier, at a picture-taking session in the Oval Office, Endara drew a big smile to Bush's face when he said, ''Everyone in Panama loves President Bush.''

Bush initially proposed $500 million in aid for Panama in January. On March 13, he recommended that Congress approve that plus another $300 million for a total of $800 million.

The House and Senate have yet to reach agreement on the legislation, although both have cut the assistance to $720 million.

Over objections from the White House, they have also amended the measure to include hundreds of millions of dollars in additional domestic spending. In the Senate, an abortion provision has also been tacked on.

Democratic leader George Mitchell of Maine said he hoped the Senate could finish the bill Tuesday, but the prospects are clouded by controversial amendments and the threat of a filibuster.

The administration has promised a veto if Congress retains a provision allowing the District of Columbia to use its own money for abortions. The Senate planned to act on a series of amendments Monday.

''It is frustrating to see the Congress delaying its work,'' Bush said in an address to the U.S. Chamber of Commerce shortly before Endara arrived.

''It is embarrassing,'' Bush said. ''No wonder the American people get so frustrated with the way that Congress operates.''

Assistant Secretary of State Bernard Aronson said Bush telephoned Senate leaders Monday to press for action on the bill and explained to Endara ''that the delay was not any lack of support for Panama'' but due to domestic politics.

''It's really unfair to make fledgling democracies in Nicaragua and Panama ... vulnerable to social forces because the Congress wants to add extraneous items to this bill,'' Aronson said.

Aronson said Endara told Bush that his government is in dire need of help

not only to battle unemployment of 30 percent to 40 percent, but to instill political confidence ''that democracy in fact meant a better life for ordinary people.''

Although he said it would be ''an exaggeration'' to depict the Endara government as ''in jeopardy,'' Aronson also noted that as long as former loyalists of Noriega are among those out of work, the situation is ''risking danger.''

Endara, who arrived in the United States late Sunday for a five-day visit, is to meet Tuesday with Vice President Dan Quayle, address the National Press Club, and confer with members of Congress.

BUCHAREST, ROMANIA (APRIL 30) UPI - Romanians will have to muddle through phone book-like ballots packed with more than 7,600 candidates when they vote in the nation's first democratic elections in 40 years, documents showed Monday.

And among the 73 parties that have emerged since the toppling of Communist dictator Nicolae Ceausescu, each boasting candidates for the available 606 parliamentary seats, is one group calling itself the ''Party for Shy People.''

Central Election Bureau President Ovidiu Zarnescu insisted the elections will be absolutely fair, although he conceded the ballots will look somewhat like ''telephone directories.''

The complexity of the ballot became apparent with the passing of the Sunday night deadline for registering candidates for the May 20 elections.

Election bureau documents showed 5,912 candidates registered for 487 seats in the new House of Deputies and 1,706 for 119 positions in the Senate.

The names of the 7,618 parliamentary candidates will be listed on two of three ballots voters must mark on Election Day, bureau officials said. The third ballot will list names of presidential candidates.

The candidates represent 73 political parties that have sprung up since the December uprising that uprooted Ceausescu who was later executed.

Most of the parties are allied with three main blocs led by the National Salvation Front, the National Liberal Party and the Peasant Party. But many others are independent and still others, like the shy people's party are making a less-than-serious bid for power.

Partly because of the complexity of the ballots, results from the election are not expected to be known until five days after the polls close, bureau officials said.

''We have taken all the necessary precautions to prevent foul play,'' Zarnescu said.

He made the comments as thousands of anti-government demonstrators continued their weeklong protest in Bucharest's University Square. The demonstration spread Sunday to three other cities, with protesters demanding the removal of former Communists from the government.

In the first sign of dissension among the protesters in Bucharest, two youth organizations that helped organize the demonstration criticized a decision by prominent anti-government activist Dumitru Dinca to call a hunger strike to dramatize the protesters' demands.

''He doesn't represent the crowd here,'' Independent Group for Democracy President Cornel Feroiu. ''We still believe a hunger strike is premature, because we still believe a dialogue with the government is possible.''

#90120u1948 04/30/1990 ~United Press International

HILLSIDE, NJ (APRIL 30) UPI - A five-alarm fire that ''lit up the sky for miles around'' Monday destroyed a plastic bag factory and sent at least 11 firefighters to the hospital, police said.

The blaze was under control Monday afternoon, but firefighters continued to pour water on the remains to avoid rekindling and expected to be at the site past midnight, said Sgt. Jack King, a Hillside police spokesman.

''They'll have to keep an eye on it,'' King said.

The fire sent billows of black smoke over the area, he said.

The state Department of Environmental Protection conducted air quality samples at the site of the fire and found no problems, said Jeanine Mosley a spokeswoman.

The blaze was discovered by police at 2:28 a.m. at the Superior Poly Bag factory, located on a block comprised entirely of industrial plants in the center of Hillside in Union County, about 15 miles west of New York, said Lt. John Bercaw, a police spokesman.

''The flames lit up the sky for miles around,'' he said.

No residents had to be evacuated from homes about a block away from the factory, Bercaw said.

Firefighters from Hillside, Roselle, Union, Linden and Elizabeth were called in to battle the blaze, he said.

Two of 11 firefighters were admitted to Union Hospital for treatment of smoke inhalation, said Susan Alcorn, a hospital spokeswoman.

Glen DeSanto, 40, Hillside, and Jonathan Young, 28, Roselle, were both listed in stable condition.

Frank Caswell, 40, Toms River, and Douglas Ferrigno, 32, Union, were being treated in the emergency room, she said.

Treated for smoke inhalation and released were Jude Delaney, 30, of Hillside; Kenneth Hellegers, 41, of Totowa; Tom Matter, 25, of Hillside; Syl Madurski, 49, of Manville; Joseph Moran, 28, of Highland Lake; George Morrell, 37, of Roselle and Joseph Zelotek, 34, of Forked River.

Bercaw said the fire had been difficult to contain because of ''flammables and plastic'' in the facility. Although the factory is on a block of

industrial buildings, just one plant was engulfed by the flames.

''There's just one wall left of the building, which is several hundred feet long,'' he said.

The company manufactures plastic bags. Bercaw said he believed chemicals were used in the manufacturing process, but added that he did not know what materials might have been on the premises when the fire broke out.

A cause of the fire has not been determined, police said.

#90120u1959 04/30/1990 ~United Press International

OTTAWA (APRIL 30) UPI - Lithuanian Prime Minister Kazimiera Prunskiene Monday categorically ruled out any possibility the republic would revoke its declaration of independence in order to enter into negotiations with Moscow.

''Suspending of the declaration or revocation is not even the remotest of possibilities,'' she told reporters after meeting in Ottawa with External Affairs Minister Joe Clark.

However, Prunskiene said Lithuania was discussing the possibility of slowing down some of the ''documentary details'' associated with implementing the March 11 declaration of independence. She did not elaborate.

Prunskiene said Lithuania was considering suggestions made by France and West Germany for a compromise proposal that would help launch negotiations. However, she said there were several interpretations of the proposal as to whether it was based on a suspension of the declaration.

Both West Germany and France, Prunskiene said, have affirmed that the declaration is valid and acceptable under the framework of international law. Even if Lithuania were to declare a freeze on the implementation of the independence decree, the declaration itself would still be valid, she added.

At the same time, Prunskiene appeared to link any freeze on independence to the issue of Soviet troops remaining in Lithuania.

A freeze ''very much will depend on how this part of the question is resolved,'' she said, adding there was a ''myriad of possible solutions'' ranging from total demobilization of troops to having some forces remain in Lithuania.

Prunskiene also said Lithuania would require ''international guarantees''

of support from West Germany and France if it accepted their suggestions for a compromise.

''From the moment other nations become involved in solutions they become players,'' she said.

Prunskiene said she had planned last month to visit North America in order to develop contacts with other parts of the world. Specifically, Lithuania wants to improve its forest products technology and begin manufacturing of products like wood briquets, furniture and telecommunications equipment.

But Prunskiene made it clear that even though Lithuania wants to expand trade ties with Europe and North America, it would never sever trade links with the Soviet Union.

''They have always existed and they will continue to exist,'' she said.

Prunskiene, who spoke to officials in Vilnius two hours before meeting with reporters, said there was so far no easing of the economic blockade imposed by Moscow.

Although she did not openly criticize President Bush's decision last week not to impose retaliatory sanctions against Moscow, Prunskiene said Lithuania was seeking ''a stricter kind of reaction'' from Western nations.

Prunskiene will travel to Toronto Tuesday before heading to New York and Washington later this week.

#90120u1967 04/30/1990 ~United Press International

ROCKVILLE, MD (APRIL 30) UPI - Total U.S. machine tool orders rose 7.6 percent in March from February, the American Machine Tool Distributors' Association said Monday.

National orders for machine tools increased in March, achieving a monthly level unsurpassed in the past 12 months, Robert A. Gale, the association's president, said. "Regional sales figures reflect a broadened purchase trend among consuming industries," he added.

The distributors' new order index rose last month to 150.2, on a basis of 100 in 1983-85. The index - based on a sample of orders - measures U.S. machine tool consumption changes in dollar terms, comprising both domestic and foreign sources of tools. The association does not provide sales figures. Metal-cutting tool orders advanced 4.7 percent in March, while metal-forming tools rose 48.7 percent.

However, the association noted that the 12-month moving average dropped by

one percent from March 1989, "indicating the extremely high level of activity that ocurred the same month a year ago."

"Continued economic optimism revolves around the need for capital equipment investment to improve productivity and fuel a drive to increase capacity," Gale said.

He noted that while forecasts had previously predicted slightly lower levels of activity for 1990, "the metalworking environment continues to maintain healthy order levels."

#90120u1968 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - The government, citing new health risk studies showing cancer threats as high as one in 1,000, announced new efforts Monday to cut deadly dioxin residues in fish and food-related paper products such as milk and juice cartons, TV dinners and butter wrappers.

Federal officials said the biggest cancer threat was to frequent consumers of fish caught downstream of paper mills, which discharge dioxin-laced wastewater.

However, they acknowledged there also were small but significant risks to the average American from dioxin residues in bleached paper containers and wrappings in which a wide variety of foods are packaged.

The residues are generated during the pulp bleaching process used in most paper mills to produce whitened paperboard. Though the contamination levels are very low, the residues can leach into food or liquid stored in a paperboard container during shipment to stores.

Officials with the Food and Drug Administration and Environmental Protection Agency said the cumulative cancer risk from average consumption of all food sold in paperboard or paper wrappings was between two in 100,000 to two in a million.

That range exceeds the EPA's health standard for pesticide residues in food crops, which generally prohibits use of any pesticide that results in cancer risks exceeding one in a million.

For people who regularly eat fish caught downstream of paper mills, cancer risks could be much higher, ranging up to one in 1,000 or higher. The non-cancer risks from eating dioxin-tainted fish also are substantial. Officials estimate a person eating one quarter-pound serving of fish could exceed federal health standards for toxicity to the liver.

EPA officials said they did not know yet which paper mills or rivers posed

the biggest dangers for fish-eaters. They said the only study on dioxin-contaminated fish was done for the Columbia River. In general, they said some American Indian groups might be populations at risk because of their high consumption of fish.

For individual food products, the FDA estimated the highest cancer risk was from frozen TV dinners at one in a million. The lowest was for cream in paperboard cartons at three in 100 million.

Other affected products include milk and juice in paperboard cartons, coffee filters, coffee and soup cups, paper plates, microwave popcorn, donuts and sweet rolls sold in boxes, ice cream and other frozen desserts in cartons, tea bags and butter and margarine wrapping.

Officials noted that dioxin residues also were present in a wide range of personal hygiene, cosmetic and medical products, including toilet paper, diapers, bandages, facial tissues and shampoo. Typing paper also has low levels.

In general, government studies showed health risks from such ''body-contact'' products were lower than from food-related products.

EPA officials also expressed concern about the use of waste sludge from paper mills as a fertilizer for forest and farm lands. They said while very little pulp sludge was used as fertilizer, it posed ''appreciable risks'' to wildlife.

The agency said such sludge also posed risks to ''subsistence'' farmers. For example, they said a farmer consuming milk and beef from cattle grazing on land treated with pulp and paper sludge faced cancer risks up to one in 100.

EPA and FDA officials said the health threat from dioxin residues in food and other consumer products was relatively low compared to other contamination risks faced daily by Americans and that there was no need for consumers to avoid food packaged in paperboard.

''The use of these products should not be a cause for alarm and concern,'' said Deputy EPA Administrator Hank Habicht.

''This is not a major health problem,'' said Jim Benson, acting FDA commissioner.

However, both Habicht and Benson acknowledged the risks were high enough to warrant regulatory action by their agencies.

''We are not shrugging our shoulders and saying this isn't a concern, but we are also saying to consumers this is no cause for alarm,'' Habicht said.

Paper industry officials, pledging full cooperation with government regulations, said their mills already had achieved a 50 percent reduction in dioxin formation by changing their bleaching processes.

In response to the dioxin problem, EPA and FDA officials said they would:

-Impose much lower limits on dioxin levels in wastewater discharged from paper mills. It said the tougher limits would be effective by June 1993 at the latest. They said the new regulations would affect at least 58 of the 104 U.S. paper mills producing bleached paper products.

-Regulate and possibly ban the use of pulp sludge as a land fertilizer.

-Work with the paper industry to develop new ''economically achievable'' bleaching processes that will not produce dioxin.

Greenpeace, the international environmental group, criticized the government's response, saying bleaching processes that do not generate dioxin are available now and should be required.

(APRIL 30) UPI - The White House says the Syrian foreign minister told the U-S ambassador in Damascus that a U-S hostage will be freed sometime today. Washington says talk about any release is speculation but that in past dealings, Syria has been an accurate source of information regarding Western hostages in Lebanon. Earlier today, Iran and Syria jointly announced that an American captive would go free today. Yesterday, a shadowy Islamic group said it would release hostage Frank Reed by tomorrow.

President Bush today stood by a decision to pull Japan off the U-S trade hit list. Bush vowed to ''use all the tools'' available, including the possibility of retaliaton, to open Japanese markets to American-made goods. The Bush administration decided last week to NO longer cite Japan for UNfair trading practices. The president said in a speech to the U-S Chamber of Commers that the move ''does NOT mean all of our problems with Japan have disasppeared.''

President Bush today welcomed Panamanian President Endara to the White House. Bush, who has asked Congress to approve a 720-Million-dollar aid package for Panama and Nicaragua, used a photo session with Endara to chide Capitol Hill lawmakers for their inactivity on the aid package. Before Endara's arrival, Bush told the U-S Chamber of Congress he was frustrated with the congressional delay.

Home builders and mortgage bankers tend to blame rising interest rates for a fourth straight monthly decline in single-family home sales. The Commerce Department says home sales dropped five percent during March to an annual rate of 574-thousand from a revised February rate of 604-thousand. Mortgage Bankers Association chief Ronnie Wynn predicts interest rates will remain stable for the next two quarters before the Federal Reserve takes action... likely by tightening credit, which would boost interest rates.

#90120u2019 04/30/1990 ~United Press International

MALDEN, MA (APRIL 30) UPI - ''He's out! He's out!'' the smiling, tearful wife of American hostage Frank Reed shouted Monday as a State Department official told her by telephone her husband had been handed over to Syrian troops after more than three years in captivity.

''He's with the Syrians now,'' Reed's Syrian-born, Moslem wife Fahimeh Dalati said while still on the telephone with a U.S. State Department spokesman. ''He's out! He's out!''

''This is coming from the State Department and I guess it makes it more official now,'' she told a crush of reporters packed into the small apartment of Reed's 91-year old mother, Leota Sprague. ''I guess I'll pack and go.''

Dalati, known as Fifi, first learned her husband would be released within 48 hours Sunday evening as she returned to her mother-in-law's apartment, where she and her nine-year-old son, Tarek, have been living since September.

Since then, she and family members had been holding a vigil by the telephone as dozens of reporters, photographers and cameramen filled the small living room, capturing the family's every move.

After receiving the official call, Dalati said she and her son planned to fly to West Germany on a commercial flight as soon as she was shown a photograph of her husband in freedom.

A Syrian Foreign Ministry official told United Press International that Reed was with Syrian forces in Lebanon, and was traveling to Damascus, where he was to be handed over to the U.S. ambassador at the Syrian foreign ministry building.

''My sister is going to Damascus and I'll be going to Germany,'' Dalati

said.

Sprague, who was 87 years old when her son was first taken hostage in September, 1986, said her pain had finally left her when the family first learned Sunday that Reed's release was imminent.

''I've had an awful hurt since he was taken ... but it isn't going to be there any more. It really left me yesterday. That pain had to go because a positive feeling just came to me yesterday,'' the bespectacled, white-haired Sprague said.

''This is a miracle. There have been so many prayers from little children. This is surely a miracle,'' Sprague said, her eyes filled with tears. ''I had faith, I thought people who had some power would get something done. I thought they might leave the door open.''

When Dalati was asked what she would tell her husband when she saw him, she said, ''I just don't know. I'll probably be saying 100 things that I can't think about right now. I never expected that (his release) to happen.''

Their son, Tarek, said, ''I'll say, 'I missed you,' and I'll hug him.''

Reed's brother, Edward, also in the apartment as the news came, said ''Last night I thought it might happen, but also I thought they might hold off.''

''He had tried to escape and had been recaptured and tortured for it. I'm very happy and excited. We hadn't heard much in the last three years. Fifi has a lot of contacts over there, but they had kept even her from getting information,'' Reed said.

LONDON (APRIL 30) UPI - Prime Minister Margaret Thatcher is considering amendments to her controversial poll tax, possibly by switching the flat-rate poll tax to one linked to an ability to pay, a government spokesman said Monday.

The scramble to alter the controversial tax took place in advance of Thursday's local council elections, which the ruling Conservative Party is expected to lose heavily because of anger over the measure.

Aiming at even bigger electoral gains, opposition Labor Party leader Neil Kinnock said the flat-rate community charge cannot be fixed piecemeal and should be abolished.

Environment Secretary Chris Patten objected to Kinnock's criticism. The tax may need modifications, he said, but it should not be thrown out.

''The real cynicism and the real deviousness comes from the Labor Party, which tells us that they're against rates, that they are against the community charge but doesn't tell us what they are in favor of,'' Patten said.

Kinnock countered by asking the government whether an ongoing review of the tax would produce emergency legislation to amend the program.

Among the options under consideration by Thatcher and her Cabinet are providing more tax relief, stripping local authorities of powers to set the poll tax and tying the tax to ability to pay, a government spokesman said.

Local Government Minister David Hunt said among the ideas were linking taxes to income or removing the cost of education from local councils.

But he said there would be no return to rates, or property taxes, which the poll tax replaced.

''There is no majority in favor of any system,'' Hunt said. ''We are the first government to have had the guts to abolish that unjust system. ''We are prepared to consider any constructive suggestions to improve the community charge.''

#90120u2022 04/30/1990 ~United Press International

(APRIL 30) UPI - British Foreign Secretary Douglas Hurd met with Polish officials in Warsaw for talks expected to center on improving bilateral relations. Hurd arrived in Warsaw yesterday for a three-day visit that will also include talks on European stability in terms of German unification. Also today, Poland's Defense Minister said in a published interview that the Soviet Union has agreed to further reductions in the 55-thousand Soviet forces in Poland.

The head of the American Academy of Pediatric says the United States must change its priorities and provide U-S children with effective health care. In comments before the national organization's spring meeting in Seattle, Dr. Birt Harvey says European nations outperform America when it comes to protecting youths. West Virginia Democrat Jay Rockefeller supported Harvey's assessment and says more money is needed for children's health programming.

Atlanta police are awaiting the descent of two demonstrators who scaled to the 15th floor of the Georgia-Pacific Building today to unfurl a giant

banner reading ''Take the poison out of the pulp.'' The pair is affiliated with the environmental group Greenpeace and is protesting the use of chemicals by the paper industry. The demonstrators say they will come down from their perch this afternoon.

#90120u2023 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - Yields for 13-week and 26-week T-bills increased Monday at the government's weekly auction.

The Treasury Department auctioned $8.4 billion of 13-week bills at an average discount of 7.91 percent, up from 7.78 percent at last week's auction and the highest since March 19, when the auction yielded 7.97 percent.

The government also sold $8.4 billion of 26-week bills at an average discount of 8.05 percent, up from 7.91 percent last week and the lowest rate since June 19, when the rate stood at 8.08 percent. The discount rate understates the actual yield to investors.

The investment, or coupon-equivalent, rate was 8.18 percent on the 13-week bills at an average price of $9,800.10 per $10,000 face value. The investment rate on the 26-week bill was 8.49 percent at an average of $9,594.00 per $10,000.

#90120u2025 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - The B-2 ''stealth'' bomber resumed flight testing after a five-month layup for modifications to its nose wheel steering, pilot displays and environmental control system, the Pentagon announced Monday.

The bomber, the world's most expensive warplane at about $815 million each including research and development costs, resumed flight testing last Friday in a six-hour, five-minute flight from Edwards Air Force Base, Calif.

''I'm very pleased with the flight test results,'' Air Force Maj. Gen. Dick Scofield, director of the B-2 program, said. ''A flight of this duration is an especially remarkable achievement when you consider it's the first flight after a five-month layup.''

During this flight, the aircraft reached an airspeed of 325 knots (.76 mach) and an altitude of 35,000 feet. It was refueled four times by a KC-10 tanker.

This first B-2 is to make five to seven more flights before going into a planned layup to undergo final preparations for ''low-observables testing'' this fall of its radar-evading stealth capability.

A second B-2 is scheduled to make its first flight later this year.

Defense Secretary Dick Cheney, under mounting congressional pressure to reduce the military budget, announced last Thursday that he plans to cut the B-2 bomber program from 132 to 75 planes.

Cutting the number of planes, however, drives up the per-unit costs by slowing production and spreading research and development costs among fewer aircraft. The B-2, for example, would have cost $580 million each for 132 planes, but will cost about $815 million apiece for 75 bombers.

The planes are designed, in case of nuclear war, to penetrate Soviet airspace by slipping through enemy radar defenses and to seek out and destroy mobile missile sites and military command centers.

#90120u2027 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - A special national commission should be established independent of NASA to select the best way to explore the moon and Mars, a report concluded Monday.

The George C. Marshall Institute, a non-profit think tank specializing in science issues, made the recommendation in a 29-page report titled ''New Directions in Space.''

In addition to proposals from the National Aeronautics and Space Administration to explore the moon and Mars, the Department of Energy, private industry and other government agencies are devising plans.

''Under the present management structure, control decisions on technical concepts for manned space flight is vested principally in NASA. At the present time, the agency is developing a competing entry, but also will serve as principal judge and competitor in the competition for selection of the best technical plan for the moon-Mars mission,'' a summary of the report states.

''In view of the importance of placing the functions of judge and competitor in separate organizations, the board recommends that authority for deciding on the technical plan for manned exploration of the moon and Mars should be vested in a national commission external to NASA,'' it said.

''Members of the commission will be chosen for outstanding ability in relevant fields of technology and demonstrated competence in the

management of very large technical programs,'' it said.

''The head of the commission will report directly to the president or the chairman of the National Space Council,'' it said.

BOGOTA, COLOMBIA (APRIL 30) UPI - Pablo Escobar, cocaine's most powerful kingpin, wrote an open letter to police Monday trying to defuse charges he ordered the murder of a leftist presidential candidate aboard a commercial airline flight last week.

''I have always been a good friend of almost all of the leaders of the M-19,'' Escobar said in a letter addressed to police Col. Oscar Pelaez and sent to the Colombian news media.

Carlos Pizarro, the former leader of the M-19 guerrilla group who abandoned guerrilla warfare and became a presidential candidate, was shot 13 times aboard an Avianca flight at 16,000 feet Thursday by a lone gunman.

Escobar, a leader of the feared Medellin cartel, the world's largest and most violent cocaine trafficking organization, has been dubbed ''Public Enemy No. 1'' by the Colombian government.

Pelaez, head of the judicial police, had said evidence pointed to Escobar's involvement in the murder of Pizarro, the third presidential candidate assassinated in less than a year.

Escobar, a reputed billionaire who is accused of numerous murders, also said the police were incapable of protecting leftist leaders.

''The government entrusted you people with the security and life of Carlos Pizarro. His numerous bodyguards nearly impeded his walking,'' Escobar said in the letter.

''As long as you are at the head of state organisms, only this proposal can save the life of leftist leaders: that the government provides them safe conduct (the right to carry a gun) and they choose their own bodyguards.''

The M-19 laid down its arms earlier this year and became a political party

with Pizarro as its candidate. But there are still at least five other guerrilla groups operating in Colombia.

Venezuelan President Carlos Andres Perez said Monday he had accepted the role of mediator between the government of President Virgilio Barco and communist guerrilla groups operating in Colombia.

Perez also said the Revolutionary Armed Forces of Colombia had asked him through an intermediary to seek the intervention of former U.S. President Jimmy Carter in the peace process.

Barco has tried to arrive at an agreement with the guerrillas but the peace process suffered a setback with Pizarro's murder.

ATLANTA (APRIL 30) UPI - Two Greenpeace demonstrators scaled the side of the Georgia-Pacific Building in downtown Atlanta early Monday to hang a banner protesting the industry's use of chlorine in manufacturing paper.

Clinging to cracks and ledges on the skyscraper, the pair unfurled a huge black and green banner across the 15th floor of the building. The banner read, ''Take the Poison out of Pulp,'' and had a giant green and yellow skull and crossbones and the word Greenpeace.

Atlanta police and fire rescue units monitored the situation, manipulating morning rush-hour traffic around the crowd of about 200 people on the ground and waiting on the pair of climbers to come down from the 16th floor of the 51-story building.

The protesters, Laurel Greenberg, 31, of Boston, and D.J. LaChapelle, 24, of Washington, told fellow Greenpeace members they would remain on the building's side, 150 feet from the ground, until sometime Monday afternoon.

Greenpeace spokesman Brian Hunt said the climbers measured the building ahead of time and had a custom-made ascender built for them to aide their ascent. The device fits into narrow vertical slits that run to the top of the building to help window washers scale the building.

While the pair do not normally climb rocks or mountains, they trained specifically for the stunt on a mock building side, Hunt said.

The pair began their climb shortly before 7 a.m. and unfurled the banner at 8:25 a.m. while about 20 Greenpeace activists on the street cheered and waved a poster that said, ''Chlorine Free in 93.''

Police already have informed the climbers they will be arrested as soon as they return to the ground on misdemeanor charges of criminal trespass, reckless conduct and criminal damage to the property.

The reckless conduct could be upgraded to a felony, officers said.

#90120u2080 04/30/1990 ~United Press International

KUWAIT (APRIL 30) UPI - Iran's deputy foreign minister Monday virtually ruled out any resumption of hostilities with Iraq, with whom Tehran fought an eight-year war.

''The possibility of a renewal of hostilities is almost zero,'' Ali Mohammed Besharati told reporters in Abu Dhabi before flying to the Omani capital of Muscat.

U.N. officials based in the Persian Gulf said there have been no serious violations of the cease-fire since it went into force under United Nations brokerage in August 1988.

But the officials said both sides still maintained thousands of troops along the 750-mile joint border and had reported hundreds of minor skirmishes.

Neither side has agreed to a comprehensive peace settlement, with Iraq calling for the immediate release of some 100,000 prisoners of war and

Iran calling on Iraq to recognize what it claims is its joint sovereignty over the Shatt al Arab waterway in the northern Persian Gulf.

The Iranian official said both countries had shown a desire to avoid hostilities during the no-war, no-peace situation currently prevailing.

''Iranian and Iraqi (policy) trends since their acceptance of the U.N. Security Council Resolution 598 emphasize the drive toward peace by both countries,'' Besharati said.

He also reiterated his country's readiness to enter into direct negotiations with Iraq under the supervision of the U.N. secretary-general provided the subjects of discussion were determined in advance.

Besharati also conveyed a message to United Arab Emirates President Sheikh Zaied bin Sultan Al Nahyaan from Iranian President Ali Akbar Hashemi Rafsanjani. Its contents were not disclosed.

The Iranian official is touring Arab states in the Persian Gulf carrying messages to their leaders from Rafsanjani on ''matters of mutual concern.''

#90120u2081 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - A National Institutes of Health AIDS scientist engaged in ''gross conflict of interest'' by steering contracts to a biomedical company he and his wife partially owned but failed to disclose, a House panel was told Monday.

The case of Syed Zaki Salahuddin, who was suspended by NIH without pay Monday, and his wife, Firoza, and their involvement with Pan-Data Systems of Rockville, Md., is being considered by a Baltimore grand jury.

''Today's hearing will focus on a sorry tale of gross conflict of interest on the part of a prominent AIDS researcher at NIH,'' said Rep. John Dingell, D-Mich., chairman of the House Energy and Commerce Committee.

''This scientist created the firm, used his NIH connections to enrich the firm, did not disclose his interest as required and repeatedly lied about his role in the firm. At the same time, the firm reciprocated by painting his house and making his mortgage payments, as well as other hidden payments and gratutities,'' Dingell said.

Salahuddin's attorney, Seymour Glanzer, said, ''This is preposterous. Have you read Kafka? This is Kafkaesque. It's people saying things that are meaningless.''

Pan-Data's attorney, Julian Greenspan, said some of the allegations were

''news to me. ... I will concede some things were poorly handled, but I have seen no defrauding of NIH in any capacity.''

The General Accounting Office and the inspector general of the Department of Health and Human Services have turned their files over to the U.S. attorney in Baltimore, who is now undertaking a criminal investigation.

Clark Hall of the GAO told Dingell's investigations subcommittee that Pan-Data opened as a small, start-up company run out of a condominium in 1984. By 1988, its sales grew to $3 million.

''This growth has been accompanied by a large number of NIH purchases of supplies and services from Pan-Data Systems, the vast percentage of which came from the laboratory of Dr. Robert Gallo, where Salahuddin worked,'' Hall said, referring to the preeminent AIDS researcher credited with co-discovery of the AIDS virus.

''The facts ... clearly document that Zaki Salahuddin and his wife both had extensive involvement with the management, ownership and direction of Pan-Data Systems,'' Hall said.

However, Salahuddin's annual financial disclosure forms failed to note ownership or other propriety interest in Pan-Data Systems, Hall said.

As one example, Hall described Pan-Data's quest for an Army AIDS subcontract in late 1985. Pan-Data listed Zaki and Firoza Salahuddin as ''corporate management personnel,'' Hall said, noting Salahuddin simultaneously was not disclosing this relationship to NIH.

Also, Hall said Pan-Data submitted a lease agreement for office space for the subcontract that allegedly inflated the available square footage and the monthly rent.

''This may have been a Pan-Data Systems attempt to defraud the government by claiming a monthly rental $2,500 greater than the actual cost. The Army fortunately, evaluated this proposal and declined the offer in August of 1986,'' Hall said.

Dingell said that when Gallo learned of serious conflict of interest allegations in 1986, he mistakenly accepted Salahuddin's oral assurances that the problem had been resolved.

Dingell criticized NIH officials at the hearing, including NIH acting director Willam Raub, for Gallo's failure to report the allegations to higher officials and for lax security.

Raub said NIH is implementing two new actions to prevent future conflicts of interest.

''NIH takes the matter seriously ... and will raise the issue with higher levels of the Department (of Health and Human Services),'' Raub said.

#90120u2097 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - The farm price index rose slightly during April, with higher prices for corn, cattle and oranges outweighing the third straight month of steep price declines for milk, the government said Monday.

The Agriculture Department said the index, which measures the prices paid to farmers for livestock and produce, was up 0.7 percent to stand at 151. The index was two percent higher than in April 1989.

Milk prices reached record-high levels at the end of last year, reflecting an unexpected slump in milk production and unabated demand for dry milk and cheese.

Since January, the "all milk" price has fallen sharply, dropping 80 cents in February and 60 cents in March. All milk sold to plants and dealers averaged $13.10 per hundredweight in April, but this was 70 cents higher than the price registered in April 1989,the agency said.

Meanwhile, beef cattle prices surged 80 cents during April to average $75 per 100 pounds. Calf prices were up $2.90 for an average of $102 per 100 pounds. Market hog prices averaged $53.20, up $1.50 per 100 pounds since March. Eggs prices were down 8.9 cents to average 64.2 cents a dozen. Broilers sold for an average of 33.2 cents a pound, down 3.2 cents.

Corn, at $2.52 per bushel, was up 15 cents from March, while sorghum increased by 22 cents to $3.92, the department said.

The all-fruit index was up 11 percent since March, led by higher prices for oranges and grapefruit. Oranges averaged $6.60 per box, up $1.27 from the preceding month. Grapefruit sold for an average of $8.19 a box, an increase of $1.96 since March. The April index reading of 151 compared to 150 in March and 152 in February.

NEW YORK (APRIL 30) UPI - The dollar finished mixed Monday in New York trading that was thinned out by the first of three holidays this week in Japan and by someparticipants in the European markets playing hooky on the eve of May Day labor observances.

U.S. economic news - personal income and savings rose but housing starts were off five percent in March - gave little impetus to buying or selling the dollar. The unit slipped on a Chicago purchasing managers report showing a manufacturing slowdown but later retraced its loss, traders said.

"There's been some activity on the dollar downside," said Lilliana Nealon, a foreign exchange vice president for the Union Bank of Switzerland.

Players said trading was very quiet and choppy. Japanese exchanges shut down for Greenery Day, the first of three business closings during Golden Week, and Europe geared down for the May 1 workers' holiday.

In late New York trading, the dollar was quoted at 1.6790 West German marks, up slightly from 1.6775 Friday. Against Japan's currency, the dollar was changing hands at 158.95 yen, down from 159.20.

Currency manager Albert Soria of the Kansallis Osake Pankki merchant bank said the dollar was trending downwards but stood to rally as Federal Reserve officials hinted they leaned toward tighter credit policy.

Soria said Swiss interest rates probably peaked last week, while doubts still plague the deutsche mark ahead of German monetary union, so an uptick in U.S. interest rates could enhance investor interest in the dollar.

Other dollar rates: 1.4525 Swiss francs, off from 1.4540; 5.6325 French

francs, up from 5.63; and 1,230.25 Italian lire, up from 1,230. The British pound moved up to $1.6410 from $1.6315. In Europe, the dollar closed lower in quiet trading.

"There's absolutely nothing going on," said foreign exchange manager Rolf Sexauer of Deutsche Bank in Frankfurt. "The market is uncertain and standing on the sidelines and waiting for new ideas."

In Frankfurt, the dollar closed at 1.6775 deutsche marks, compared with 1.6815 Friday, and fell in Zurich to 1.4525 Swiss francs from 1.4605.

In London, the pound rose slightly to $1.6375 against $1.6365 after Barclays Bank raised its mortgage rates to prevailing bank levels. But dealers said the unit was vulnerable ahead of local elections this week.

The dollar moved down in Paris, Milan and Brussels to 5.6385 French francs against 5.6515, 1,231.45 Italian lire compared with 1,234.50 and 34.68 Belgian francs against 34.7250.

Japanese financial markets closed Monday for the first of three holidays in a festive spring period called Golden Week. Business will also halt Thursday and Friday.

Republic National Bank in New York closed cash gold at $369 an ounce, down from $371.50 Friday. The New York Commodity Exchange settled spot gold at $368.40 an ounce, off from $371.10. In Zurich, gold fell to $367 an ounce from $371 Friday. London gold slid to $367.25 an ounce from $370.50.

Republic closed cash silver at $4.955 an ounce, up from $4.935. Comex spot silver closed at $4.932 an ounce, up from $4.917. Silver held steady in Zurich at $4.95 an ounce. London silver eased to $4.92 an ounce from $4.95.

#90120u2151 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - Vice President Dan Quayle warned Monday of the danger of Middle Eastern nations possessing their own ballistic missiles.

Speaking to the Washington Institute for Near East Policy, Quayle said by the year 2000 it is estimated that 15 developing countries will be producing ballistic missiles.

Quayle said he feared the Middle East ''could well become a much more danger- ous place over the next few years.''

In the past, he said that the Arab-Israeli conflict took place ''within a bipolar strategic context - a context in which the Soviet Union provided

the Arab states with many of the weapons with which they attacked Israel, while the United States provided Israel with most of the advanced weapons it needed to defend itself.''

He pledged that he and the president ''will do all in our power to help allies like Israel develop the capability to defend themselves against non-conven- tional as well as conventional weapons.''

Quayle also said the United States must continue ''to pursue the Arab-Israeli peace process. ... In our view, these negotia- tions must involve territory for peace, security and recognition for Israel and all states of the region and Palestinian political rights.''

#90120u2157 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - Women worldwide are having an average of 3.5 babies, researchers reported Monday, and the global birth rate is continuing a slow but steady trek downward.

The fertility rate for 1988 represents a slight decline from the 1987 rate 3.6 children per woman, and adds some hope that world population might be held below 10 billion in the coming century, researchers for the non-profit Population Reference Bureau said.

''That's the big question,'' said demographer Carl Haub, referring to the benchmark figure some environmentalists cite as the point beyond which the world ecology cannot survive.

''All projections assume that all countries are going to see their fertility levels decrease,'' Haub said. ''The question is when.''

If the world reaches a ''replacement-level'' fertility rate of 2.0 children per woman by 2000 - considered a wildly optimistic goal - total world population would level off at just below 9 billion by 2025, the annual report said.

But if the 2.0 fertility level is not reached until 2080, world population would surpass 14 billion by the end of the 21st century, it said.

''Most environmentalists we talk to say that if the population stabilizes much beyond 9 billion or 10 billion, the planet is not going to survive,'' said Kathleen Mazzocco of the Population Crisis Committee. ''The sooner we can stop it from growing, the better for everybdy on the planet.''

The Population Crisis Committee, in a report earlier this year, said governments worldwide need to spent $10.5 billion annually on birth control by the turn of the century to keep below the population below the

10 billion mark.

Mazzocco said her organization agrees with the fertility rates in the Population Reference Bureau report.

Most developed countries already are at or near the 2.0 replacement level, while many developing countries have rates of 6 or 7, Haub said.

The eastern African nation of Rwanda was found to have the highest, 8.3 children per woman, while Italy was found with the lowest, 1.3.

One of the sharpest declines has occurred in Bangladesh, which had a fertility rate of 6.3 in the mid-1970s but is now down to 4.9, the report said.

The motivation in Bangladesh, however, has been bitter medicine: ''There's really no more land left'' in the country, where interviews show women now want an average of only 2.6 children apiece, a Haub said.

Neighboring India has a rate of 4.2, a figure Haub said is considered disappointing because its decline from around 6 appears to have stopped. India - the world's second most populace nation after China with 850 million people - appears stalled by cultural factors and fears caused by an emphasis on sterilization in family planning programs, he said.

Haub said two of the most important indicators of future population growth will occur within the coming year when censuses are taken in both India and China.

The count will be particularly crucial for China, since it will be only its second modern census and give demographers a firm basis for checking growth rates, Haub said.

China's fertility rate is reported as 2.3, although there are widespread suspicions families have been hiding births from the authorities, he said.

#90120u2188 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - Vice President and Mrs. Dan Quayle will visit Italy, Great Britain and France May 6-9 to mark the Eisenhower Centennial in Europe.

In addition to leading the U.S. delegation to the ceremonies in honor of the 100th birthday of the late President Dwight D. Eisenhower, who was commander of Allied forces in Europe in World War II.

Quayle also will meet with British Prime Minister Margaret Thatcher,

French President Francois Mitterrand and Italian leaders.

During his stay in Europe, the vice president will visit the USS Eisenhower and address a ''Salute to Eisenhower'' event at the Italian Parliament.

Quayle also will visit the European Space Agency headquarters in Paris.

#90120u2198 04/30/1990 ~United Press International
(APRIL 30) UPI - Frank Herbert Reed went to Lebanon to help children. He met his wife there and adopted her Moslem faith. But his love affair with Lebanon ended in 3 1/2 years of captivity.

''He was in the wrong place at the wrong time,'' his mother, 91-year-old Leota Sprague, said as she waited for news of her son's release.

''He felt he could really help the kids in Beirut,'' Reed's nephew, Christopher, said after the educator was kidnapped by gunmen on Sept. 9, 1986, as he drove a van in West Beirut.

Reed and his two brothers grew up in Malden, Mass., a suburb north of

Boston, where their father, Frank Herbert Reed Sr., was an alderman during the 1930s.

''He is a rather happy-go-lucky kind of man,'' his brother Edward said of Reed following the kidnapping. ''He's the type of fellow who liked to take some chances.''

Reed attended Malden schools and moved to neighboring Medford in 1949. He earned degrees from the University of Maine at Orono and Boston College.

He worked as a teacher in Massachusetts, Maine and New Hampshire, and later served as principal of at the C.D. McIntyre School in Whitefield, N.H.

''Frank was just the type of person was who so extremely personable,'' said Maryellen Cavan, who worked with Reed as a guidance councilor at the school.

Reed moved to Lebanon in 1977. He worked at the University of Beirut before founding the Lebanese International School.

Cavan said Reed wrote to her off the dangers of Lebanon, yet seemed to think he could remain apart from the turmoil.

''Frank felt it was a fact of life - but he thought the college was a neutral zone,'' Cavan said in 1986.

The divored father of two daughers, Reed met Fahimeh Dalati, a Syrian, at a teachers' training course. Dalati's parents at first objected to their relationship, but Reed converted from Methodism to Islam to marry ''Fifi.''

The couple had a son, Tarek, now 9. Dalati said the couple was talking about having a second child when Reed was kidnapped.

A long waiting game began then. Dalati moved to the United States, where she has been living with her mother-in-law in Malden since September.

Asked what she would tell her husband when she saw him, Dalati said, ''I just don't know. I'll probably be saying 100 things that I can't think about right now. I never expected that (his release) to happen.''

NEW YORK (APRIL 30) UPI - The Association for Computing Machinery said Monday it was lifting a 13-year-old boycott of computer technology exchanges with the Soviet Union because glasnost has helped restore some scientific freedom and respect for human rights in the communist country.

Bryan Kocher, president of the independent scientific society which represents more than 80,000 computer experts worldwide, informed the Soviets about ACM's decision in a letter to Evgely Vehilor, head of the

Computer Science Department at the Academy of Sciences in Moscow.

"It is my pleasure to inform you that ACM's Council has rescinded its prohibition on cooperation with the Soviet Union, which was enacted in 1977," Kocher said in his letter to Vehilor.

"ACM's recognition of the return of the Soviet computer scientists to the full fellowship of the international scientific community is a direct result of re-establishment of acceptable levels of scientific freedom for Soviet computer scientists, improvement in Soviet respect for the human rights of its citizens and the citizens of other countries, and reductions of world tension, which will help computer scientists concentrate on their peaceful pursuits," the letter said.

ACM's members voted in favor of boycotting all computer meetings in the Soviet Union as well as scientific exchanges with the Communist country in 1977, following a merciless crackdown on Soviet scientists who had dared voice opposition to the Kremlin's suppression of basic freedoms. During the 1970s, many Soviet scientists regarded as dissidents were sent to labor camps or confined to psychiatric asylums.

Among them was Anatoly Shcharansky who was deported to a concentration camp but was later allowed to emigrate to Israel after the Kremlin came under intense international pressure in the case. The scientist later changed his name to Natan Sharansky.

"The council of the ACM voted unanimously to rescind the boycott which had been imposed in 1977 as a response to the persecution of Anatoly Shcharansky and other Soviet dissident scientists," a spokesman for the association said.

At the time ACM issued its boycott, Nobel Prize winner Andrei Sakharov praised the association's move and predicted it would be an effective way to pressure the Soviet Union into giving up its repressive policy because the Soviets lagged behind the U.S. in the computer field and needed foreign technology exchanges.

"At the time Sakharov said 'there is nothing to induce them (the Soviets) so factually and effectively as a refusal to maintain this cooperation,"' the ACM spokesman added.

Under the economic reforms introduced by leader Mikhail Gorbachev, the Soviet Union drew in late 1988 a new joint-venture legislation aimed at attracting foreign investment in the high-technology sector. The legislation aims not only at attracting foreign capital but also at ensuring the transfer of Western technology to the Soviet Union.

(APRIL 30) UPI - A Syrian official says Moslem kidnappers in Lebanon today turned American hostage Frank Reed over to Syrian troops. The official told U-P-I the soldiers are taking Reed in a convoy to Damascus. There he is to be handed over to the U-S ambassador at the Syrian foreign ministry building. The White House could NOT immediately confirm the report. The Islamic Dawn Organization yesterday said it would free Reed with a message for President Bush.

The Latvian Popular Front says its poor showing in runoff elections is based on fear over what's happening to neighboring Lithuania. The party had sought enough parliamentary seats to ensure passage of a declaration of independence. Popular Front officials say they can still pass a declaration despite yesterday's vote.

Former Philippine first lady Imelda Marcos returned to court in New York City today wearing heart and blood pressure monitors. Mrs. Marcos became upset and left the courtroom last week as a U-S customs agent testified in her racketeering and fraud trial. Marcos said she was ''trying to hide'' the monitoring equipment she's wearing.

Anti-abortion activists are trying to convince U-S Park Police that their weekend rally in Washington, D-C, drew far more than the 250-thousand people which police estimate. Organizers claim there was twice that number... and are flooding police with complaints. The event was to demonstrate the movement's popularity.

NASA workers have finally unglued a sticky antenna on the Hubble Space Telescope that had delayed its mission. A top official at the Goddard Space Flight Center in Greenbelt, Maryland, says people from many organizations pulled together to solve the problem. Engineers are now activating the telescope's delicate instruments.

#90120u2277 04/30/1990 ~United Press International
NEW YORK (APRIL 30) UPI - Stock prices closed mixed Monday in the fifth-lightest trading day of the year after a late burst of buying in the blue chips sent the Dow industrials into positive territory.

The Dow Jones industrial average, which lost 31.53 Friday, rose 11.71 to 2656.76.

Among broader market gauges, the New York Stock Exchange composite index rose 0.75 to 181.49 and Standard & Poor's 500-stock index rose 1.69 to 330.80. The price of an average share rose 14 cents.

Declines nosed out advances 736-734 among the 1,964 issues crossing the NYSE tape. Big Board volume was 122,750,000 shares, compared with 130,630,000 shares traded Friday.

While the broad market was unable to completely recover from the early decline, late buying sent the key blue-chip indicator into the plus column sparked by some good news from market leader International Business Machines Corp. and by a slight drop in long-term interest rates.

IBM, holding its annual meeting in Phoenix, Ariz., said "significantly improved financial performance" is expected this year, spurring buying of Big Blue shares.

Yields on Treasury bonds fell below nine percent in afternoon trading, which investors greeted with a sigh of relief. Despite the slight decline in rates, Jeff Kaminsky, head of institutional sales trading at Mabon, Nugent & Co., said this Wednesday's announcement of the size of the Treasury's quarterly refunding was "hanging heavy on everybody's mind.

"If the government has to try and raise $30 billion (to finance the federal budget deficit), rates will have to go higher to attract investors. That doesn't bode well for equities," he said.

Kaminsky said he expected the market to remain quiet this week because of the pending announcement and because of holidays in Europe and Japan. The Tokyo market, closed Monday for a national holiday, was to reopen Tuesday but close again later in the week. In observance of May Day, Tuesday will also be a holiday in several European countries, but not Great Britain.

On the trading floor, Chase Manhattan was the most active issue, up 1/8 to 25 3/8. Ames Department Stores followed, up 1/4 to two after naming Stephen L. Pistner chairman and chief executive officer - entrusting the debt-ridden company's survival to a veteran executive who has participated in other retailing turnarounds. IBM was third, up 1 5/8 to 109.

Among other blue chips, AT&T rose 1/8 to 40 1/8, General Motors fell 5/8 to 44 3/8 after the Supreme Court let stand a ruling that a group of former GM employees may sue the auto giant in federal court on charges they were misled when they accepted a severance plan. American Express rose 7/8 to 27 1/4, Eastman Kodak advanced 5/8 to 36 7/8, and Coca-Cola gained one to 76 1/4.

Elsewhere, Baltimore Bancorp surged 3 1/4 to 15 after receiving a $17-a-share takeover bid from First Maryland Bancorp, a unit of Allied Irish Banks.

Union Texas Petroleum soared 2 5/8 to 20 1/2. The company's board has authorized an executive committee to explore a sale of the company.

But American Stores tumbled 1 3/4 to 63 3/4. The Supreme Court ruled Monday that a federal judge had the power to order American and Lucky Stores, which merged in 1988, to operate separately until an antitrust case against their merger was settled. The court's action was a victory for California officials, who argued the merger would cost consumers hundreds of millions of dollars a year.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 148,202,550 shares, compared with 144,554,840 shares traded in the previous session.

Prices closed mixed in light trading on the American Stock Exchange. The Amex Market Value index rose 0.40 to close at 343.10. Declines led advances 287-222 among the 775 issues traded. The price of an average share rose two cents. Composite volume totaled 10,815,300 shares, compared with 12,500,985 shares traded Friday. Telesphere International led the Amex issues, up 3/8 to 4 7/8.

The National Association of Securities Dealers composite index rose 2.09 to 420.07.

#90120u2295 04/30/1990 ~United Press International

(APRIL 30) UPI - Oil prices were mixed Monday with heating oil gaining nearly 3 cents a gallon as traders squared their accounts with the expiration of the May delivery futures contract. Crude prices barely moved.

''The products expired. Whatever attention there was in the market was focused on that,'' said David Blumenthal, a trader with the Phibro division of Salomon Brothers in Greenwich, Conn.

He said the crude market would at best be uneventful until Wednesday's meeting in Geneva of the 13-nation Organization of Petroleum Exporting Countries that will try to cut back overproduction.

But Blumenthal said there's ''a speculative play on both sides of the crude market.''

On the New York Mercantile Exchange, heating oil soared 2.79 cents to finish the day at 56.53 cents a gallon.

''It seems people were squaring their accounts,'' Blumenthal said, with Monday being the final day of trading the May delivery contract.

The June delivery contract, which becomes the Merc's spot-month contract Tuesday, gained 0.70 cent to 51.45 cents a gallon.

Prompt delivery heating oil on the New York Harbor cash market jumped 2.55 cents to 59.30 cents a gallon.

April has been colder than anticipated and ''there were some unexpected burns'' of heating oil, Blumenthal said.

Unleaded gasoline for May delivery fell 0.95 cent to 60 cents a gallon, bringing the total loss in the final four days of Merc trading of the contract to 4.4 cents.

The June contract lost 0.33 cent Monday to 59.84 cents a gallon.

On the New York Harbor spot market, prompt delivery gasoline fell 0.90 cent to 59.80 cents a gallon.

On the Merc, the benchmark West Texas Intermediate crude for June delivery remained unchanged at $18.54 a barrel.

Trading volume was a light 60,985 estimated contracts.

On the U.S. Gulf Coast spot market, where crude is bought and sold for cash, WTI was unchanged at $18.50 a barrel.

On the European spot market, Britain's widely traded North Sea Brent lost 7 cents to $16.45 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - climbed 30 cents to $14.80 a barrel.

#90120u2302 04/30/1990 ~United Press International

VIRGINIA BEACH, VA (APRIL 30) UPI - Mail bombs sent to the Christian Broadcasting Network last week and a Texas church in January are similar and suggest a link between the two incidents, a federal official said Monday.

Jack Killorin, a spokesman for the Bureau of Alcohol, Tobacco and Firearms in Washington, said Monday the two bombs share technological similarities but declined to give details. Killorin cautioned that more tests are needed to determine if the bombs were from the same source.

''There are up-front initial similarities that suggest that there's a link '' Killorin said. He said he could not be more definitive at this time.

U.S. Postal Inspection Service and ATF investigators said over the weekend the two bombs were mailed from Bladen County, N.C., with Fayetteville

return addresses.

A package addressed to CBN founder and 1988 presidential candidate Pat Robertson arrived in Virginia Beach on Friday. A security guard who opened the package, Scott Scheepers, sustained a leg injury from flying shrapnel.

James Small, director of security at CBN, said the 6-inch-long package included some type of pipe that flung pieces of metal. Contents of the package, apparently sent from the Bladenboro Post Office in North Carolina are being tested at a lab in Washington.

A package sent from a nearby North Carolina post office to the Rev. John Osteen at the Lakewood Church in Houston also contained a pipe bomb, Killorin said. That bomb injured Osteen's daughter, who opened the package Jan. 30.

Robertson on Friday suggested the bombing may be part of a pattern of attacks against evangelical Christians. CBN on Monday reopened the mail room where the explosion occurred.

''This particular spate of mail bombings to known televangelists appears to us to be something brand new,'' Killorin said.

The U.S. Postal Inspection Service, which had previously offered a $50,000 reward for information in connection with the Houston bombing, is now offering a similar reward for information leading to an arrest in the Virginia Beach bombing.

#90120u2354 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - The State Department's annual report on global terrorism, issued Monday, listed Iran and Syria among those countries that supported international terrorism.

The report was made public Monday at about the same time President Bush and Secretary of State James Baker both publicly thanked the governments of Syria and Iran for their help in facilitating the release of hostage Frank Reed, held by an Islamic group in Lebanon for 3 1/2 years.

In addition to Syria and Iran, the State Department listed Cuba, Libya, North Korea and South Yemen for their continuing support of international terrorism. The State Department announced that the United States and South Yemen are resuming diplomatic relations Monday after a lapse of 20 years.

The report to Congress listed 528 international terroist attacks around the world in 1989, a decrease of 38 percent from the previous year when there were 856 terrorist incidents.

The Middle East remained the hotbed of terrorism, recording about 190 of the terrorist attacks. But the State Department said the government of Afghanistan stopped its terrorist attacks in Pakistan after the withdrawal of Soviet troops.

The report noted that the Palestine Liberation Organiation sharply reduced its terrorist attacks after PLO chairman Yasser Arafat renounced terrorism in 1988.

The State Department said that Syria and Libya, although they remained on the list of countries accused of supporting terrorism, reduced their support, apparently because they were wary of getting caught.

The State Department report noted that Iranian-sponsored terrorist incidents decreased slightly, from 32 in 1988 to 28 in 1989.

But the report also noted that the Iranian regime continues to call for the death of author Salman Rushdie, and assassinated at least five Iranian dissidents outside the borders of Iran.

The Iranian government also continued to ''involve itself, if not organizing, Hezbollah,'' the radical organization accused of holding most of the American hostages in Lebanon.

On Syria, the State Department report said, ''There is no evidence that Syrian officials were involved in planning or executing terrorist attacks outside Lebanon since 1987, although they continue to provide support and safe haven to a number of groups that engaged in international terrorism.''

The report said that Syria continues to support subversion against some of its neighbors, including Turkey, and that Syria allows Iran to send arms via the Damascus airport to terrorist groups in Lebaon, including Hezbollah.

The State Department said that Syria ''indicated its willingness to work closely with Western governments to facilitate the release of the remaining hostages in Lebanon.''

The list of American hostages in the State Department report says that Reed had been held by ''Baath Cells Organization and Arab Revolutionary Cells.'' Baath is the name of an Arab socialist ''brotherhood'' that has ruled in Iraq and Syria.

The group that released Reed identified itself as the ''Islamic Dawn,'' a name which had not been previously known. The State Department said, through a spokeswoman, that it believed the group is part of the the ''Islamic Jihad,'' sometimes called Hezbollah in Lebanon.

The report said that terrorism, within nations, has become a larger problem than international terrorism. It showed a photograph that underlined that point: an Indian soldier was shown with a poised rifle on a bicycle escorting a newspaper vendor against Sikh terrorists who have killed dozens of randomly selected Indian civilians.

#90120u2361 04/30/1990 ~United Press International

BARCELONA, SPAIN (APRIL 30) UPI - Maverick Moscow Communist Boris Yeltsin complained of severe back pains Monday and was rushed to a hospital, where he underwent emergency surgery for what doctors called a herniated disc.

One surgeon described the 59-year-old Soviet politician as ''quite cheerful and animated'' upon being informed the emergency operation would be necessary.

Yeltsin was moments away from appearing on a Barcelona television news panel to discuss the future of Soviet President Mikhail Gorbachev's perestroika reforms when he complained of stabbing back pains, the official Soviet news agency Tass said in a dispatch from Madrid.

Doctors at the television station examined Yeltsin and ordered his immediate hospitalization, Tass said.

Yeltsin was admitted to the emergency ward of a Barcelona hospital and was examined further by trauma specialists and a neurosurgeon, who determined he should undergo surgery for what they called a herniated disc in his back.

The outspoken and controversial Soviet opposition leader had traveled to Spain Saturday to attend an international conference called ''The New Humanism'' in Cordoba.

He also had planned visits in Madrid later this week with Spanish President Felipe Gonzalez and with local Barcelona officials. He was forced by his sudden illness to cancel his appointments.

Yeltsin, the most popular Soviet political figure after Gorbachev, is scheduled to be a candidate for president of the Russian Federation when its Parliament meets in mid-May.

Election to that post would give him a powerful base for an eventual challenge to Gorbachev because the Russian Federation is the largest of the 15 Soviet republics.

Yeltsin became the people's favorite when he was fired as Moscow's Communist Party boss in November 1987 for criticizing Gorbachev and saying that perestroika had given the people very little in material goods.

He later was ousted from the ruling Politburo, but in a remarkable political comeback won overwhelming election to the new Soviet Parliament, garnering more votes than any other candidate.

In the elections to the new Russian Parliament he again was the top vote getter, running as a candidate from the city of Sverdlovsk.

#90120u2415 04/30/1990 ~United Press International

NORFOLK, VA (APRIL 30) UPI - The USS Coral Sea, the ''Ageless Warrior'' which provided air support during the war in Vietnam and two decades later off the shores of Libya, was retired by the Navy Monday after more than 42 years of service.

The aircraft carrier's decommissioning took place two years earlier than originally scheduled, due to Pentagon defense cutbacks. The 978-foot flattop was retired in a ceremony at Norfolk Naval Station that included a 19-gun salute and jets flying overhead spelling out ''Farewell Ageless Warrier.''

During the ceremony Adm. Carlisle A.H. Trost, chief of naval operations, said the fading of the Cold War should not lull U.S. leaders into thinking the modern Navy can continue to decrease its forces. The retirement of the Coral Sea leaves the United States with 14 carrier groups.

''Some say that threats to the United States have crumbled with the Berlin Wall,'' Trost told a crowd of about 5,000. ''Many ... say we can get by with 12, 10 or even six carrier battle groups. Such opinions clearly go beyond the bounds of prudence, and discount the lessons of history.''

Trost noted the Coral Sea was being taken out of service not because it is no longer militarily capable, but because of defense budget cuts.

''Time and time again, in periods of crisis and international tension, our nation's leaders ask, 'Where are the carriers?''' Trost said.

As an example, Trost pointed to last summer, when the Coral Sea was called in to conduct contingency exercises off the coast of Lebanon. At the time, terrorists were threatening to kill Lt. Col. William Higgins, a member of

a United Nations peacekeeping force.

Terrorists announced on July 31 that they had carried out their plans and that Higgins was dead. In August, an air team from the Coral Sea helped evacuate the U.S. Embassy in Beirut, as tensions rose in the region.

That was the Coral Sea's last major mission in a career that included more than two dozen deployments and covered more than 2 million nautical miles.

In 1965, the Coral Sea took part in the first air strikes against North Vietnam. Eight years later, the Coral Sea was the first aircraft carrier to deploy from the United States, after the signing of a U.S.-North Vietnam peace agreement. In 1975, the carrier aided in the evacuation of South Vietnam.

In April 1986, aircraft from the Coral Sea took part in a bombing raid on Libya, in retaliation for Libya's support of terrorist activities.

The Coral Sea was commissioned Oct. 1, 1947, named in commemoration of a World War II sea battle with the Japanese. It was based in San Francisco from 1967 to 1983, and dozens of people from California attended Monday's event.

The final fate of the Coral Sea is still to be determined. The carrier may be stripped down for scrap, mothballed or placed in some type of memorial.

#90120u2431 04/30/1990 ~United Press International

NEW YORK (MAY 1) UPI - Consumer confidence subsided in April, reflecting increased concern over job prospects, after posting a gain in March, according to data released Monday by a business research group.

Respondents to the monthly survey measuring consumers' confidence in the state of the U.S. economy voiced concern over prevailing economic conditions as well as the availability of jobs in the next six months, the Conference Board's report said.

''The loss in consumer confidence in April can be attributed almost entirely to growing uneasiness about jobs - present and future,'' said Fabian Linden, executive director of the Conference Board's Consumer Research Center.

''Although the nation's unemployment rate has remained unchanged for some months - at slightly more than 5 percent - the number of new jobs in March dropped abruptly and sharply.

''The decline in job prospects has probably contributed to much of the

uneasiness picked up in the April confidence survey,'' Linden said.

Also, fewer people expected general business conditions to improve, the survey showed.

According to the board's index, in which a score of 100 equals consumer confidence in 1985, consumer confidence dropped 4.5 points to settle at 106 in April. The index had risen 3.9 points to 110.6 in March.

The monthly survey of 5,000 households nationwide is conducted for the Conference Board by National Family Opinion Inc. of Toledo, Ohio.

#90120u2476 04/30/1990 ~United Press International

ANCHORAGE, AK (APRIL 30) UPI - The Exxon oil spill cleanup entered a new phase as local state-sponsored cleanup crews returned home Monday and Exxon prepared to launch its scaled-down cleanup fleet Tuesday with workers expected to hit the beaches later this week.

''We'll do whatever it takes to make things as clean as we practically can '' Coast Guard Rear Adm. David Ciancaglini, the federal on-scene coordinator, said at a news briefing that informally launched the next stage of work.

But Ciancaglini's open attempt to get the new cleanup season off to a good start, one marked by optimism and a new cooperation between the state and Exxon, was tainted by the simultaneous report by Gov. Steve Cowper that oil had been discovered in the organs of pollock, a bottom-dwelling fish that is one of the mainstays of the Alaska fishing industry.

''I'm pretty upset about it,'' Cowper said in a statewide radio broadcast Monday. ''I think we ought to be alarmed about it.''

''I am surprised to find exposure to hydrocarbons in such deep fish and offshore,'' said Usha Varanasi, a federal chemist and toxicologist who directs the environmental division of the National Marine Fisheries Service in Seattle, which made the discovery in pollock livers and gall bladders.

However, the edible flesh remained free of hydrocarbons, Varanasi said, because the gall bladder collects and stores such toxins, thus serving to protect the flesh from contamination. She predicted no immediate impact on fishing.

She cautioned that the test results, based on 200 samples taken from recent commercial catches, were preliminary and that her lab had another 500 samples to analyze. She said scientists were concerned that oil might harm pollock reproduction or have some as-yet-unknown effect on the

species.

Cowper speculated that pollock fed on small organisms tainted by oil. Varanasi said that may be accurate.

Exxon spokesman Fred Davis said it was impossible to know whether the source of hydrocarbons in pollock was Exxon Valdez oil, and he suggested it might be from other sources in the environment.

The pollock were caught in Prince William Sound, Shelikof Strait and near Kodiak Island, America's chief fishing port, all places hit by oil from the Exxon Valdez, which ran aground March 24, 1989, and spilled 11 million gallons.

Fishing was ruined throughout the oil spill zone last year, and small crab and shrimp fisheries were canceled this year, but the major fishing seasons were expected to be normal this year.

Dozens of workers from a state-sponsored grass roots community cleanup effort completed their $6 million job of collecting oily debris from shores near their towns and left the still-oily beaches to Exxon crews.

''This cleanup is a testament to what can be accomplished on a local level '' Cowper said. ''More than 150 Alaskans have been scouring beaches, pulling oily (containment booms) stuck from underneath logs, removing boom material from last summer's cleanup effort and stuffing thousands of tras bags with oily filth. This form of cleanup may not be high-tech, but it is effective.''

The local cleanup by a dozen communities, launched before Exxon was willing to resume work in May, collected 128,000 pounds of oily debris and trash during April, working on shores they selected as important, said Leslie Pearson, a state Department of Environmental Conservation field officer.

''Communities took this very seriously,'' said Dennis Kelso, the state commissioner of environment. ''In fact, some of them wanted to continue working. But we don't want the community effort to impede in any way what Exxon is responsible for doing.''

Exxon opposed the community cleanups and Kelso noted that Exxon has refused to reimburse Alaska for their cost.

Exxon launched its second season of cleanup Tuesday, deploying vessels with workers and equipment, but actual cleanup was not expected to begin until this weekend, Davis said. The cleanup was to employ up to 1,100 people, about one-tenth of last year's force, with 300 to 350 actually on beaches.

Initial work was to include manually picking up tar, asphalt and oily debris based on consensus of what needed to be done and a new spirit of cooperatiion between the state and Exxon, Ciancaglini said.

#90120u2483 04/30/1990 ~United Press International

WASHINGTON (APRIL 30) UPI - President Bush, meeting a former hostage as a second American gained freedom in the Middle East, thanked Iran and Syria and said he hopes to continue ''the process'' to win the release of six remaining captive Americans.

In a ceremony at the White House, Bush welcomed Robert Polhill - set free last week - as word reached Washington that Frank Reed had been released by his captors in Lebanon and had arrived in Syria.

The public event, marked by high-level dignitaries and a question-and-answer session, was a contrast to Bush's usual reticence on the hostages. The president's remarks, nonetheless, were careful.

Although both Syria and Iran were listed by the State Department Monday as nations supporting international terrorism, Bush thanked both Damascus and Tehran for their help in securing the release of both men.

Bush said he was unaware of any deals for the release of the two American hostages - who had been held by pro-Iranian groups in Syria-controlled areas of Lebanon - and said he could not explain what prompted their kidnappers to act.

He said, however, ''I hope there is a realization that holding people against their will is not the way to effect political change. I can't explain the rationale, but I can express a certain gratitude that things seem to be moving.''

Polhill, 55, visted the White House with his wife on a brief furlough from Walter Reed Army Medical Center, where a growth in his throat is being studied. He was released April 22.

A frail and hoarse Polhill said, ''I am at this moment truly as happy for Frank and Fifi Reed as I was eight days ago for Farial and myself and both families. I sincerely hope that Frank is step two in what will be a continuing release of hostages.''

In Syria, Foreign Minister Farouk al Sharaa had expressed hope that the release of the two Americans would lead to a reciprocal gesture on the part of the United States.

But Bush indicated that a ''thank you'' was all Syria and Iran could expect as long as other hostages are held.

''When a step is taken that goes toward that day when all hostages are released, I should say thank you,'' the president said. ''But beyond that, I can't say that I can be happy. I try to put myself in the place of the other families.''

He added, ''We can't, in terms of overall relationships between countries, expect normalcy or expect vast improvement until all Americans are free.

''We're not in a piecemeal basis, bidding for one human life, holding out hopes only to have them dashed.''

While offering Tehran at least a minor overture in the form of public gratitude, Bush said, ''I can't say that that's an overwhelming expression of goodwill because I have in mind those other six Americans that are held.''

''But look, if it's beginning to work and if indeed there's a process, I expect I speak for all Americans in saying I rejoice in that.''

Syria has been campaigning to shed its status as a pariah state and is seeking better relations for both reasons of prestige and economic benefit.

Iran, after its brutal war with Iraq, is in dire need of economic assistance and trade that have been slow in coming because of its militant status.

In an earlier written statement, Bush has called on ''all parties who either hold hostages or have any influence over the hostage-takers to work for the expeditious and unconditional release of the remaining hostages.''

Noting that the six Americans still held in Lebanon are not alone, Bush said he hopes the release of Polhill and Reed ''is the forerunner to the release of the other American hostages and the others from other countries held against their will. Things seem to be moving on this.''

The kidnappers in Lebanon have stated as their goals the release of a Moslem fundamentalist leader kidnapped by Israeli commandos, some 400 other Arabs held by Israel and 16 Shiite Moslems convicted of terrorist bombings in Kuwait.

When asked whether Israel should free the prisoners it holds, Bush said ''that is a matter for others to determine. I've stated that holding people against their will is not a way to facilitate political change or any other kind of change.''

As for his own feelings, the president said: ''All I can say is Amen - thank you.''

Before being escorted inside the White House by Bush, Polhill was asked how the United States should respond to Syria and Iran and confessed, ''I don't think I can offer a lot of help to anyone.''

''The only thing I can suggest,'' he said, ''is that the American people continue to show, as hostages are released on a regular basis, how much we are wanted back.''

But Polhill also showed that he could sidestep a question as well as Bush. When asked whether he was carrying a message from the hostage takers, he replied, ''They said I was.''

#90120u2488 04/30/1990 ~United Press International

NEW YORK (MAY 1) UPI - Construction contracting is expected to decline slightly in 1990 due to a continuing slide in commercial construction projects, according to a forecast released Monday.

A partial recovery expectd in homebuilding will not offset the decline in commercial construction, according to Dodge/Sweet's Construction Outlook, the Construction Information Group of McGraw-Hill Inc.

Construction activity in 1990 will be valued at $263 billion, down 1 percent from 1989, the forecast said.

Gains in housing starts will be seen in the central and western regions of the country, but a further decline in multifamily construction, principally in the Northeast, will keep total housing starts to about a 2 percent gain, the forecast said.

Contracting value for nonresidential building will drop another 7 percent in 1990, continuing a slide that began in 1986, the forecast said.

''Fourth-quarter 1989 weakness in nonresidential building was evident in several regions and coincided with a rash of gloomy economic news at year-end,'' said George A. Christie, the group's vice president and chief economist. ''First quarter 1990 brought no improvement.

''Although a temporary rebound is possible as the national economy improves, the overriding weakness of commercial construction will again become dominant before year-end,'' he said.

Regionally, 1990 construction contracting value will be down in the Northeast, steady in the Southeast and in the south central region and up

in the north central region and the West, the study said.

Public works construction will remain at a level consistent with the spending plateau reached in 1987, the forecast said.

About half of last year's decline in housing starts was concentrated in the Northeast, Christie said.

#90120u2536 04/30/1990 ~United Press International

(APRIL 30) UPI - Hostage Frank Reed released to Syrian troops... Supreme Court upholds federal random drug testing plan... NASA gets the Hubble Space Telescope working and the latest on the racketeering trial of Imelda Marcos. U-P-I has it all, next:

A Syrian government official says American hostage Frank Reed is being delivered to freedom after three and a-half years in captivity.

The Syrian foreign ministry told U-P-I that Moslem captors turned Reed over to Syrian soldiers in Lebanon today and he was driven in a convoy to Damascus. The troops are to hand Reed over to the U-S ambassador at the Syrian foreign ministry building.

President Bush praised the development as a ''joyous day'' for all Americans. But Bush again called for the UNconditional release of all hostages.

Syrian and Iranian officials had predicted Reed would be released today. The reports come one week after pro-Iranian Moslem extremists released American hostage Robert Polhill, who will visit the White House this afternoon.

A previously unknown group called the Islamic Dawn Organization yesterday issued a photograph of Reed and said it would free him with a message for Bush.

It was the first look at Reed that his family has had since he was kidnapped by gunmen while driving a van in West Beirut September 9th, 1986.

Reed is an educator who moved to Lebanon in 1977 and converted to Islam to marry his Syrian wife. She literally jumped for joy last night on hearing reports of his impending release.

A State Department spokesman says a hostage reception team left Washington for Wiesbaden, West Germany, this morning, and a department working group was activated.

White House spokesman Marlin Fitzwater says there are indications Iran cooperated in Reed's release. Iran and its allies in Lebanon are trying to trade the remaining Western hostages for the release of jailed Moslems in Israel and Kuwait.

Reed's 91-year-old mother in Malden, Massachusetts, said if news of the release is true the family will ''rejoice.''

Reed is from the Boston suburb of Medford, Massachusetts. He was an educational adviser to the Lebanese International School in the Moslem sector of Beirut when he was kidnapped.

(MAY 1) UPI - DIGEST:

Baseball

Dan Quisenberry, fifth on baseball's all-time list for career saves, said arm troubles forced him to retire after less than a month with the San Francisco Giants. He finished with 244 saves and a record of 56-46 with a 2.76 ERA.

Golf

Noboru Sugai, winner of Sunday's $645,000 Chunichi Crowns open in Tokyo, replaced Australian Brian Jones as the top earner on the latest Japan PGA money list while Aiko Takasu retained her lead on the LPGA rankings.

Horse Racing

The 1990 Triple Crown Poll conducted by Thoroughbred Racing Communications has ranked Summer Squall, Mister Frisky and Thirty Six Red as the top three horses in performances through April 22.

Skiing

Downhill racer Leonard Stock, who captured the gold medal at the 1980 Winter Olympics at Lake Placid, has been dropped from Austria's top team, the country's Ski Federation confirmed in Salzburg. Other skiers taken off the team include Gerhard Pfaffenbichler, Stefan Niederseer and Mathias Berthold.

Soccer

Azeglio Vicini, coach of Italy's national soccer team, announced his squad of 22 players for the World Cup finals to be held June 8 through July 8 in

Italy. Goalkeeper Walter Zenga, defender Franco Baresi, midfielder Carlo Ancelotti and forward Roberto Baggio were among the players named. ... Argentinian superstar Diego Maradona was offered $20,000 by Puma Austria in Vienna to play in Thursday's soccer international against Austria. ... Manchester United has included Australian-born goalkeeper Mark Bosnich for an English first division soccer match against Wimbledon. Bosnich, 18, replaces United's regular keeper, Scottish international Jim Leighton, who is sidelined with a thigh strain.

#90120u2631 04/30/1990 ~United Press International

HARTFORD, Conn. (MAY 1) UPI - The Travelers Corp. said Monday first-quarter earnings were $92 million, or 87 cents a share, down from $98 million, or 96 cents a share, in the first quarter of 1989.

Revenue for the period was $3.2 billion, the same as for the quarter one year ago.

The drop in the first quarter was due to continuing ''soft market conditions in the property-casualty businesses,'' said Travelers Chairman and Chief Executive Officer Edward H. Budd.

However, net income for managed care and employee benefits operations almost doubled in comparison with that of the first quarter of 1989, said Budd.

The chairman said the long-term outlook for property-casualty commercial lines ''is excellent,'' but as to property-casualty personal lines, Budd said, ''we are concentrating on fewer markets where satisfactory returns are attainable.''

Travelers is one of the world's largest multi-line insurance, financial services, managed health care and investment corporations.

#90120u2655 04/30/1990 ~United Press International

(APRIL 30) UPI - President Bush says it's ''embarrassing'' that Congress has NOT yet approved a 720-Million-dollar emergency aid package to Nicaragua and Panama.

Bush made the admission today while hosting Panamanian President Guillermo Endara at the White House. This is Endara's first visit to the states since taking office following the December 20th U-S invasion of Panama... and Bush is using his presence to push Congress to approve the aid.

The House and Senate have saddled the measure with hundreds of Millions of

dollars in proposed domestic spending... including an amendment allowing the District of Columbia to use tax dollars for abortions.

As much as he wants the aid money, Bush has promised to veto the whole package if that happens.

British Foreign Secretary Douglas Hurd opened three days of meetings with Polish officials in Warsaw today.

Hurd says his visit is aimed at improving bilateral relations and discussing European stability in the context of Germany unification.

Britain supported Poland in its campaign for a place in the so-called two-plus-four conference on German unification. The upcoming talks will include officials from the two Germanys, and the United States, Great Britain, France and the Soviet Union.

Hurd's visit comes as Poland is pushing for more economic exchanges with Britain... and amid confirmation that the Soviet Union has agreed to further withdrawals in the 55-thousand troops it has stationed in Poland.

#90120u2675 04/30/1990 ~United Press International

(APRIL 30) UPI - Imelda Marcos returned to court in New York City today wearing heart and blood pressure monitors and holding a rosary.

The 60-year-old former first lady of the Philippines left the courtroom sobbing last Friday following testimony by a U-S customs agent who said she gave her husband a suitcase containing 50 gold bars.

Her illness was diagnosed as high-blood pressure, and U-S District Judge John Kennan recessed the trial.

Today, Mrs. Marcos wore a black suit with a jacket and scarf, and said she was trying to hide the blood pressure cuff on her upper right arm.

Marcos is charged with racketeering, conspiracy, fraud and obstruction of justice for allegedly plotting with her husband to divert more than 200 Million dollars from the Philippines treasury for personal use.

Organizers behind a plan to broadcast pro-democracy messages to mainland China from a ship say they're NOT breaking any international laws.

Project head Christophe Nick says the floating pirate radio station will proceed exactly as planned, despite the Chinese government's claim that the broadcasts are illegal.

China's state-run news agency has blasted Taiwan's and Singapore's willingness to assist the vessel and its crew. Those on board include some students who fled China following their government's violent crackdown on pro-democracy demostrators last June.

The ship, dubbed the Goddess of Democracy after the statue erected in Tiananmen Square last Spring, is due to start transmissions to mainland China next month.

The Chinese Foreign Minister says Beijing has not ruled out the use of force to stop the broadcasts.

#90120u2699 04/30/1990 ~United Press International

SEATTLE (MAY 1) UPI - A former Nordstrom Inc. employee filed suit against the upscale retain chain Monday, charging he was unlawfully dismissed after informing management that he had tested positive for the AIDS virus.

In his suit filed in King County Superior Court, Sean Mulholland accused Nordstrom of violating a Washington anti-discrimination statute. His suit seeks unspecified damages for emotional distress and lost compensation.

Mulholland, who once won company awards as a top sales employee in the Alderwood, Wash., store, claims that in June 1988 he contracted a lung infection and had to stay home for several days.

Upon his return to work Mulholland said management demanded to know the reason for his illness. He told them he had an upper respiratory infection

but after continued pressure from his supervisors he said he broke down and told them he had the AIDS virus.

Mulholland said he was sent home, and when he tried to return was told his job had been filled and that there were no openings.

''We call on Nordstrom to put Mr. Mulholland back to work and pay him for all the damages it has caused him and see that others like him are not victimized by such cruel behanvior,'' said Christine Mrak, an attorney for Mulholland.

Nordstrom officials were not immediately available for comment. However, in a February Wall Street Journal article in which Mulholland's story came to light, Nordstrom spokeswoman Kellie Tormey said Mulholland ''asked to leave. It was entirely his choice.''

Tormey said Nordstrom made ''numerous attempts to find something else for him, but he never once followed up on these opportunities.''

Mulholland disputed Tormey's statements, saying he saved letters from 16 different attempts at applying for jobs at four Puget Sound area Nordstrom stores.

Mulholland's lawsuit is the latest in a series of allegations and legal actions taken against Nordstrom.

The United Food and Commercial Workers union, which has been waging a negative publicity campaign against Nordstrom since last summer, has filed a class-action lawsuit against the company on behalf of more than 50,000 current and former employees. The suit seeks back pay and penalties against Nordstrom for time worked off the clock by the employees.

The union's actions led Nordstrom to establish a $15 million reserve for back-pay claims, an amount the union considers inadequate.

Nordstrom also has been charged by the Washington Department of Labor and Industries with a number of wage and labor law violations, including the ''off-the-clock'' issue.

In addition, the company is the target of a shareholders' lawsuit charging that Nordstrom management knew its pay practices could erupt into legal action.

#90120u2845 04/30/1990 ~United Press International

(APRIL 30) UPI - A Syrian official says his government is about to deliver American hostage Frank Reed to freedom. Moslem kidnappers turned

Reed over to Syrian troops in Lebanon today, and he's to be brought to the U-S ambassador in Damascus.

President Bush reacted to the news by declaring this a ''joyous day'' for all Americans, especially Reed and his family and friends. But Bush said Americans canNOT rest until all remaining hostages in Lebanon are liberated.

A former top Cabinet aide during the Reagan administration told Congress today that former HUD Secretary Samuel Pierce used political favoritism as a means of distributing agency funds. But DuBois Gilliam says he doesn't believe Pierce ever took any bribes or kickbacks from anyone while at HUD.

Officials on the big island of Hawaii say lava which has chased people from their homes is now threatening their emergency shelter. Authorities have asked the Red Cross to be ready to move the shelter out of the path of lava from the erupting Kilauea Volcano.

Lawyers for former Panamanian dictator Manuel Noriega today asked a judge in Miami to release them from the case because Noriega has NO money to pay them. The U-S and Panamanian governments have seized Noriega's assets, claiming they are profits from drug dealing.

The Supreme Court today O-K'd a lower court decision allowing former employees of General Motors to sue the auto giant on grounds they were misled when they accepted a severance plan. G-M allegedly lied when it told laid-off workers they'd be rehired if new jobs were created.

A defense witness in New York City's racial killing trial testified that her black friends had targeted murder suspect Keith Mondello. Mondello, who is white, faces second-degree murder charges in last year's fatal shooting of a black teen-ager in Bensonhurst.

The World Health Organization wants to see any peace dividend put into play. A WHO report says by swinging some military spending to health care many of the 40-Million people who die from disease each year could be saved.

-30- 2251

#90120u3119 04/30/1990 ~United Press International

(APRIL 30) UPI - Freed American hostage Frank Reed was turned over to the U-S ambassador in Damascus today. A tired-looking Reed wore a dark suit and said his three-and-one-half years in captivity were lonely and boring. He said he ''was very happy'' to be free. Reed added that NO one ever said why he was taken hostage. He said the ''bottom line'' reason was probably that he was American.

Reed's wife exclaimed ''He's out!'' today upon hearing news that the American educator had been turned over to Syrian officials. Reed's wife... Fahimeh Dalati... is a Moslem who was born in Syria. She heard of her husband's release in a State Department phone call to Malden, Massachusetts. Dalati and her son plan to fly to West Germany tonight.

New Jersey officials say they have brought under control a five-alarm blaze that sent 11 firefighters to the hospital today. The fire was unusually hard to contain because it was in a plastic bag factory and was fed by flammable materials.

The United States is blasting Israeli Prime Minister Shamir for rejecting its Middle East peace plan. Shamir opposes Secretary of State Baker's formula, which calls for talks in Cairo. The State Department today warned that Shamir's stance means- ''losing an important opportunity for peace.''

New research suggests that while people often watch television to relax, it may end up leaving them more tense. Professors from Rutgers University and the University of Chicago spent 13 years studying 12-hundred subjects in their own homes. They found many people felt less relaxed as soon as they turned off the set. The study found people reported that t-v viewing made them ''feel more passive, less alert'' and they could NOT concentrate.

-30- 1896

#90120u3441 04/30/1990 ~United Press International

(APRIL 30) UPI - American hostage Frank Reed is now a free man. A Syrian Foreign Ministry official says Reed has been handed over to U-S ambassador in Damascus. Reed said in a Syrian television interview he is ''very happy to be free.'' He contrasted that with his UNhappiness during three and a-half years of captivity by a Moslem extremist group in Lebanon. Reed follows Robert Polhill to become the second American hostage freed in eight days.

As the White House thanked Syria and Iran for helping free another hostage the State Department criticized both countries in its annual report on terrorism. It said Iran is involved with the Hezbollah group suspected of holding most American hostages in Lebanon, and that Tehran assassinated at least five dissidents outside its borders. The report accused Syria of providing support and a safe haven to a number of terrorist groups.

Lithuania's prime minister says suspending her republic's independence declaration is ''NOT even the remotest of possibilities.'' Prime Minister Kazimiera Prunskiene ruled out such a move after meeting in Ottawa with Canada's external affairs minister. But Prunskiene said Lithuania is discussing slowing down what she called the ''documentary details'' of independence.

A former top aide at the Department of Housing and Urban Development testified today that former HUD Secretary Samuel Pierce used political favoritism as a means of distributing agency funds. But Dubois Gilliam added that he does NOT believe Pierce ever took a bribe while at HUD. Gilliam is serving a prison term for his part in the scandal. Lawyers for Pierce attacked his testimony, calling it a ''sordid tale from an admitted felon.''

-30- 1870

#90120u3695 04/30/1990 ~United Press International

(APRIL 30) UPI - Another American hostage in Lebanon won his freedom today. Frank Reed was turned over to Syrian troops by his Moslem extremist captors. The Syrian foreign ministry then handed Reed over to the U-S ambassador in Damascus. Reed later told a news conference he was NEVER told why he was taken captive in Beirut more than three years ago... but said he assumes it was because he's an American. Reed's wife and son plan to fly to West Germany to meet him.

President Bush today thanked Iran and Syria for their roles in helping win Reed's release. Bush says he expects to talk to Reed by phone within hours and expressed hope that Reed's good fortune is a forerunner to the release of all other hostages in Lebanon. The president made the comments at the White House while greeting Robert Polhill, who was freed by his Moslem captors last week. Bush says he knows of NO deals made for the release of Reed and Polhill.

Despite White House credit to Iran and Syria for helping free an American hostage today, the State Department released a report labeling both countries as supporters of terrorism. The report says there is NO evidence Syria has been directly involved in terrorist attacks outside Lebanon since 1987... but that it continues to support terrorist groups.

The Citizens' Congress of Latvia convened today to form a shadow government it says will take control when the republic regains its freedom from the Soviet Union. One delegate told the Congress the final result of 70 years of Soviet socialism is ''total poverty.'' Latvian Popular Front leaders blame fear over the Lithuanian crisis for voters' failure to elect some supporters of an independence proclamation during yesterday's runoff elections for parliament.

-30- 1918

#90120u3726 04/30/1990 ~United Press International

(APRIL 30) UPI - Lawyers for Manuel Noriega are asking a federal judge in Miami for permission to withdraw from the deposed Panamanian dictator's drug-trafficking case. Lead attorney Frank Rubino says his team hasN'T been paid and accuses the U-S government of withholding money needed for

the defense. The U-S and Panamanian governments have seized Noriega's assets, claiming they are profits from his drug-running days.

In New York City, the judge in the Bensonhurst racial slaying case says he may drop one of two murder charges against defendant Keith Mondello. Mondello allegedly headed a bat-wielding mob that killed a black teen-ager last August in the Brooklyn neighborhood. Defense lawyers say one of the murder charges should be dismissed because prosecutors NEVER proved Mondello acted in concert with the youth accused of shooting 16-year-old Yusuf Hawkins.

Lava from Hawaii's Kilauea Volcano has destroyed yet another house in Kalapana Gardens and is inching toward a Red Cross emergency shelter. Officials have warned the Red Cross to prepare to move the shelter, which houses about 90 people who have already lost homes to Kilauea. Lava from the volcano has gobbled up 118 structures since eruptions began in 1983.

The president of California Polytechnic State University has canceled the university's annual Poly Royal Festival. Today's move follows three nights of rioting by hundreds of rampaging students who threw rocks and bottles at police and burned cars and trash cans. The president says he may resurrect the 58-year tradition next year, but he'll emphasize academics over partying.

-30- 1786

#90120u3880 04/30/1990 ~United Press International

(APRIL 30) UPI - President Bush praises release of second American hostage in Lebanon... Reportaccuses Syria and Iran of supporting terrorism... HUD scandal figure charges former Housing Secretary with political favoritism... and a 50-year study says marriage is good for you. U-P-I has it all, next:

Syria today delivered American hostage Frank Reed into the hands of the United States ambassador in Damascus, but hopes for more than a simple thank-you in return.

Reed's Moslem captors turned him over to Syrian troops in Beiruty. And they drove him to Syria's capital, where the foreign ministry handed him to the U-S ambassador.

The 57-year-old educator said of his three-and-a-half years of captivity- ''It was lonely, it was boring.'' Reed looked tired but told a Syrian t-v interviewer he is ''very happy to be free,'' and feels in generally good health.

His release came eight days after Moslem extremists in Lebanon freed another kidnapped American, Robert Polhill.

Syria's foreign minister said now is time for the United States to return the ''gesture of good will'' as part of the hostage release process.

In Washington, President Bush thanked Syria and Iran for their help in freeing both hostages and said he is optimistic other Middle East hostages would be released.

But Bush said he was UNaware of any deals for releasing hostages, and said there woN'T be normalcy or vast improvement in relations with Syria and Iran until all Americans are free.

Bush spoke while welcoming Polhill for a visit to the White House.

Six Americans and 10 other Westerners remain hostage in Lebanon.

Reed is to be flown to Wiesbaden, West Germany, for medical checks and an initial debriefing.

A group calling itself the Islamic Dawn organization yesterday said Reed would be released within 48 hours ''carrying a message to the U-S administration.'' The White House says it does NOT know anything about such a message.

Iran and hostage holders in Lebanon are trying to trade the remaining Western hostages for the release of jailed Arabs.

Syria and Iran are getting credit for today's hostage release, but the State Department says they continue to support terrorism.

In its annual report on terrorism, the government said Iran continues to involve itself with Hezbollah, the fundamentalist group accused of holding most of the American hostages in Lebanon.

The report said Iran assassinated at least five dissidents outside its borders last year, and continues to call for the death of Salman Rushdie, author of ''The Satanic Verses.''

The report said there is NO evidence Syria has planned or executed terrorist attacks outside Lebanon since 1987... but it continues to support terrorist groups.

The State Department also listed Cuba, Libya, North Korea and South Yemen for their support of terrorism.

The report to Congress listed 38 percent fewer terrorist attacks around the world in 1989 than in the previous year. It also noted that the Palestine Liberation Organiation sharply reduced its terrorist attacks

after P-L-O chairman Yasser Arafat renounced terrorism in 1988.

-30- 3339
#90120u3917 04/30/1990 ~United Press International
(APRIL 30) UPI - A former top federal housing aide testified today the Department of Housing and Urban Development was the best ''political machine'' he has ever seen for getting money to supporters.

One-time HUD aide DuBois Gilliam fingered former HUD Secretary Samuel Pierce as the man who made that political cash station run. Gilliam testified in Washington that Pierce distributed agency funds on the basis of political favoritism.

A special prosecutor is investigating just such charges.

Gilliam testified under immunity from prosecution before a subcommittee of the House Government Operations Committee.

Gilliam admitted to taking some 100-thousand dollars in bribes and kick-backs at HUD. He is serving a prison term for convictions arising from the scandal.

But Gilliam added that he doesN'T believe Pierce ever took any illegal money at HUD.

Lawyers for Pierce attacked Gilliam's credibility, calling his story a ''sordid tale from an admitted felon.''

Lithuanian Prime Minister Kazimiera Prunskiene today categorically ruled out any possibility the republic would revoke its declaration of independence. But she's leaving the door open for compromise.

She says she's still considering a French-German proposal to slow downimplementing the March 11th declaration.

She made the comments today to reporters in Ottawa, Canada, where she's working to cement Canadian support before leaving for New York and Washington later this week.

In Lithuania's neighbor, Latvia, the Citizens Congress has formed a shadow government it says will take over when and if the Baltic state regains its freedom from the Soviet Union.

Delegates of the Congress blamed a local whiplash of fear over Lithuania for the nationalist group's poor showing in yesterday's key run-off elections for parliament.

(APRIL 30) UPI - Maverick Moscow Communist leader Boris Yeltsin is in a Barcelona hospital today, recovering from an emergency operation for an apparent herniated disc.

Yeltsin arrived in Spain Saturday to attend an international conference later this week. He was only moments away from a T-V appearance when he started complaining of stabbing back pains.

He was rushed to a hospital emergency ward where a trauma team prepped him for surgery for what they called a herniated disc in his back.

Yeltsin, the most popular Soviet political figure after Mikhail Gorbachev, is slated to be a candidate for president of the Russian Federation when its parliament meets in mid-May.

The government says it will launch new efforts to cut deadly dioxin residues in fish and food-related paper products.

The move follows a new study which cites dioxin as a major cancer-causing agent... threatening as many as one person out of one-thousand.

The study says the biggest cancer threat is to frequent consumers of fish caught downstream of paper mills, which discharge dioxin-laced wastewater.

But it says there are also significant risks to the average American from dioxin residues in bleached paper containers and wrappings used in food products, such as milk cartons.

Although the Food and Drug Administration acknowledges dioxin's risk is high enough to warrant regulatory action, it says the danger is relatively low compared to other contamination risks faced daily by Americans.

(APRIL 30) UPI - Married people live longer than those who are single, widowed or divorced.

That's what a 50-year, cross-cultural study conducted by Princeton University concludes. Researchers analyzed death rates of people in 16 developed countries to determine the findings.

They say the average mortality rate for unmarried men is twice as high as that for married men. And for unmarried women it is one and one-half-times higher.

The study also found that divorced persons, especially divorced men, generally had the highest death rates among all the UNmarried groups.

Researchers say figures for Japan stood out overall.

Its mortality rates for single men and women are three and one-half-times higher than its married population, much higher than any other country.

#90120u4020 04/30/1990 ~United Press International

(APRIL 30) UPI - President Bush spoke by telephone today to newly freed American hostage Frank Reed. Moslem extremists in Lebanon turned the 57-year-old educator over to Syrian authorities who in turn handed him over to U-S officials in Damascus.

Bush also welcomed former hostage Robert Polhill to the White House. Polhill... who was released just eight days ago... delivered a ''private message'' from his captors to the president. Spokesman Marlin Fitzwater says Bush promised Polhill NOT to discuss the message publicly.

The State Department says the Middle East remains a hotbed of terrorism, with Syria and Iran among those countries supporting international terrorism. In its annual report on terrorism, the State Department says terrorist attacks worldwide in 1989 decreased 38 percent from the previous year.

President Bush and Panamanian President Endara discussed proposed U-S aid and U-S-Panamanian relations during a White House meeting today. Bush used Endara's visit to again urge Congress to approve a 720-Million-dollar aid package for Panama and Nicaragua.

A task force of House Democrats say Salvadoran investigators have done little to find out whether top military officials ordered the slayings of six Jesuit priests and two others last November in El Salvador.

The report was released amid calls in Congress for slashing assistance to El Salvador or linking aid to human rights issues. In El Salvador, a military spokesman says- ''The armed forces will NOT have any reaction to the report.''

#90120u4176 04/30/1990 ~United Press International

(APRIL 30) UPI - American hostage Frank Reed says he is happy and healthy after being freed today by Moslem extremists in Lebanon. Reed says his captivity was three and a-half years of loneliness and boredom. Syrian

troops and officials delivered Reed to the U-S ambassador in Damascus. Syria's foreign minister called on the United States to reciprocate with a gesture of good will ''in the process of releasing the hostages.''

In Washington, D-C, former hostage Robert Polhill today delivered a private message from his captors to President Bush. The White House would NOT reveal the message. The meeting came just hours after Reed was released in Lebanon. Bush telephoned Reed in Damascus to offer him best wishes from the American people. The White House says Bush put Polhill on the line and the two former hostages exchanged warm greetings.

Nicaraguan President Chamorro is defending her decision to retain Sandinista military chief Humberto Ortega . Chamorro says she needs Ortega to stabilize and unify the country, as well as to oversee a military reduction. Her decision, announced last week at her inauguration, drew a storm of protest from the Contra rebels.

Senior diplomats were in East Berlin today, paving the way for ministerial-level negotiations on German unity. The foreign ministers of both Germanys and the four major World War Two allies- Britain, France, the Soviet Union and the United States- are to meet Saturday in Bonn. Observers say the question of a unified Germany's military alliance remains a stumbling block.

#90120u4213 04/30/1990 ~United Press International

(APRIL 30) UPI - Exxon is ready to launch a scaled-down cleanup of the Valdez oil spill in Alaska tomorrow. But Governor Steve Cowper says oil has been discovered in pollock, a bottom-dwelling fish that is a mainstay of the Alaska fishing industry. Cowper says the finding is cause for alarm. But a federal chemist and toxicologist says the oil is in pollock livers and gall bladders, and NOT in the flesh. She predicts NO immediate impact on fishing.

Federal officials believe there's a connection between last week's mail bombing of the Christian Broadcasting Network complex in Virginia Beach, Virginia, and a January bombing of a Houston church. A spokesman for the Bureau of Alcohol, Tobacco and Firearms says the two bombs share technological similarities, but declined to give details. The U-S Post Office is offering a 50-thousand-dollar reward for information leading to an arrest in the C-B-N bombing.

A baby girl who received the heart of her brain-dead twin brother two weeks ago was removed from intensive care today. A spokeswoman at Riley Hospital in Indianapolis says three-week-old Paige Whisman is in satisfactory condition and ''doing well,'' despite being born four weeks premature and undergoing a heart transplant four days after birth. Paige

was involved in what's believed to be the first-ever heart transplant between infant twins.

CINCINNATI (MAY 1) BUSINESS WIRE - Great American Broadcasting Co. has completed its acquisition of KBPI-FM, Denver from Sandusky Radio it was announced Tuesday by Carl Wagner, president, Great American Broadcasting Group. The purchase price was not disclosed.

"We are pleased to acquire this outstanding album oriented rock (AOR) station with its established rock heritage, and look forward to entering the Denver radio market," said Wagner. "The addition of KBPI-FM fills our complement of FM stations and emphasizes our belief that radio is a sound business for the future."

The company also named Clint Sly as vice president and general manager of KBPI-FM. Sly moves to Denver from Great American's station KEX-AM in Portland, Ore., where he has been vice president and general manager since April, 1988.

Sly previously was general sales manager at KEX-AM and also had sales experience at AOR station WYNF-FM, Tampa. "The energy and commitment exhibited by Clint will permit us to build this station into an exceptional performer," said Wagner of the move.

It was also announced that Dave Milner will return to Portland as vice president and general manager of KEX-AM. Milner has been with Great American (formerly Taft Broadcasting Co.) for over 15 years, and has previously managed WYNF-FM, KEX-AM and WKRC-AM before recently serving in Cincinnati at the corporate offices.

Great American Broadcasting Co. is a wholly-owned subsidiary of Great American Communications Co. Great American Broadcasting owns 12 FM and six AM radio stations and five network affiliated television stations in the top 50 markets.

Its additional interests in animated film and video production and distribution include ownership of Hanna-Barbera Productions Inc. Great American Communications Co. trades on the NASDAQ under the symbol GACC.

PALO ALTO, CA (MAY 1) BUSINESS WIRE - ALZA Corp. announced Tuesday that Adrian M. Gerber, 51, has joined the company as executive vice president, with primary responsibilty for business development, licensing and strategic planning.

Gerber was previously executive director, coporate licensing at Merck & Co. Inc., where he had responsibility for Merck's worldwide licensing acitivities. Prior to that, Gerber was executive director, marketing planning for Merck Sharp & Dohme International.

Before relocating to the United States with Merck, Gerber held various executive sales and marketing positions with Boehringer Ingelheim and Merck in South Africa. Maritn S. Gerstel, ALZA's chief executive officer, said, '' As ALZA continues to grow and expand into new areas, we are extremely pleased to have Adrian Gerber join our senior management team and obtain the benefit of his broad experience and expertise in the pharmaceutical industry.''

A native of South Africa, Gerber received his degree in pharmacy at the Natal School in Durban, South Africa.

ALZA Corp. is a leading drug delivery systems company focusing on the development, manufacturing and marketing of a broad range of pharmaceutical products based on ALZA's proprietary technologies.

ALZA's therapeutic systems provide for rate-controlled, programmed administration of medication for both human and veterinary applications.

TEMPE, AZ (MAY 1) BUSINESS WIRE - UDC-Universal Development L.P. (NYSE:UDC) Tuesday reported record first quarter revenues of $72.6 million vs. 1989's first quarter revenues of $63.3 million.

Net income for the quarter ended Mar. 31 was $7 million, compared with $7.2 million last year.

First quarter net income per common share was 45 cents, compared with 60 cents the prior year, impacted by the partial recapitalization of UDC completed last year.

Closings were a first quarter record of $67.3 million for 400 units, compared with $60.3 million for 385 units in the corresponding 1989 quarter.

Net orders during the first quarter were $106.6 million for 677 units, compared with $125.8 million for 769 units a year ago.

UDC's backlog of homes ordered but not yet closed was $164 million for 1,062 units, compared with $171.5 million for 1,068 units a year ago.

UDC builds quality upscale family and adult residential communities in the Sun Belt, with operations in Arizona, California, Florida, Georgia, North Carolina and South Carolina. Its common and preferred shares are traded on the New York Stock Exchange.

SAN MATEO, CA (MAY 1) BUSINESS WIRE - At a hearing Monday in U.S. District Court, Judge Thelton Henderson granted a motion by Bay Meadows Operating Co. (BMOC) and California Jockey Club (CJC) (ASE: CJ) permitting them to take depositions and obtain documents from defendant Bay Meadows Stockholders Committee in support of BMOC/CJC's complaint that the stockholders' committee has violated the federal securities laws in connection with their attempt to gain seats on the plaintiff's board of directors.

The defendants opposed the motion.

On May 11, 1990, the court will set a date to hear BMOC/CJC's motion to enjoin defendants' proxy solicitation.

California Jockey is one of the nation's three publicly traded real estate investment trusts whose primary asset is a racetrack. Its shares are traded on a paired basis with Bay Meadows Operating Co., which operates Bay Meadows Racetrack, on the American Stock Exchange under the symbol CJ.

FORT WAYNE, IN (MAY 1) BUSINESS WIRE - Lincoln National Corp. today reported first quarter net income of $26.2 million, or $.54 per share.

Net income included net realized investment losses of $25.5 million, or $.61 per share. Excluding the realized investment losses for the first quarters of 1990 and 1989, the corporation earned $51.7 million in this year's quarter compared with $56.3 million for the same period a year ago, a decrease of 8 percent. Net income for the first quarter of 1989 was $51.0 million, or $1.13 per share, after realized investment losses of $5.3 million.

Highlights of the first quarter were:

o Employee life-health earnings of $4.9 million, versus a loss of $7.5 million in the first quarter of 1989;

o Life-health reinsurance earnings of $12.8 million, up from $9.6 million.

o Property-casualty earnings of $30.7 million, down from $48.7 million, mostly from weather losses.

o Investment products earnings of $14.1 million, up from $10.2 million.

Consolidated earnings in property-casualty insurance for the quarter decreased to $30.7 million from $48.7 million reported in 1989. ''This business was heavily impacted by greater than anticipated weather losses in the quarter which accounted for approximately $10 million in increased after-tax losses,'' said Ian M. Rolland, president and chief executive officer. ''The remainder of the decrease was caused by the deterioration in the property-casualty business cycle.''

Earnings from agency companies, principally American States Insurance Companies, were $22.6 million, versus $37.0 million last year. Property-casualty reinsurance companies -- National Reinsurance Corp. and American Union Reinsurance Co. -- reported income of $8.7 million, compared with earnings of $12.1 million for the same period last year.

Lincoln National Corp. (NYSE:LNC) is the nation's seventh largest public multiline insurance holding company. With headquarters in Fort Wayne, Lincoln National provides property-casualty insurance, employee life-health benefits, individual life, life-health reinsurance and investment products through its companies. Its assets exceed $25 billion, with annual revenues of more than $8 billion.

ST. LOUIS, MO (MAY 1) BUSINESS WIRE - Sales, net earnings and earnings per share of Emerson Electric Co. for the second quarter and first six months of fiscal 1990 were the highest for any second quarter and first six-month period in the company's history, it was announced Tuesday by Charles F. Knight, chairman and chief executive officer.

The company's net sales for the three months ended March 31, 1990 were $1,906,177,000, an increase of 5.6 percent over net sales of $1,805,308,000 for the second quarter a year ago.

The company's earnings per common share for the three months ended March 31, 1990 were 70 cents, an increase of 6.1 percent over earnings per common share of 66 cents for the same period a year ago.

Net earnings were $156,174,000 for the second quarter of fiscal 1990, an increase of 5.6 percent over net earnings of $147,846,000 for the second quarter of fiscal 1989.

Emerson's net sales for the six months ended March 31, 1990 were $3,552,267,000, an increase of 0.8 percent over net sales of $3,525,096,000 for the same period a year ago.

Emerson's earnings per common share for the first six months of fiscal 1990 were $1.34, an increase of 5.5 percent over earnings per common share of $1.27 for the same period a year ago. Net earnings for the first half of fiscal 1990 were $298,064,000, an increase of 4.7 percent over net earnings of $284,602,000 for the first half of fiscal 1989.

In making the announcement, Knight said, ''We are pleased with these record results achieved in a tough economic environment.

NEW YORK (MAY 1) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by David H. Williams, chairman, Alliance Capital Management.

Alliance Capital Management L.P., the leading international investment advisor announced increased first quarter earnings during a luncheon presentation to the New York Society of Security Analysts Tuesday. The current distribution of 40 cents per unit was 5 cents higher than the 1989 first quarter distribution of 35 cents.

During the luncheon presentation, Chairman Dave H. Williams gave an overview of the firm's investment management expertise, placing particular emphasis on its global capabilities and expanding international business development. With a total of $44 billion in assets under management for institutional and individual investors, Williams credited the firms success and consistent above average performance to the experience, stabilitiy and dedication of Alliance Capital's professional staff.

John D. Carifa, executive vice president, chief financial officer and chief administrative officer, presented highlights of Alliance Capital's Individual Investor Services Division, including Cash Management Services and Mutual Funds, and the earnings and distribution history of the firm since its initial public offering on April 21, 1988.

Listed on the New York Stock Exchange (AC), Alliance Capital offers investors high yield, growth and diversification through investment businesses which include institutions, mutual funds, and equities and fixed income investments both within the United States and internationally.

Alliance Captial Management is a leading international investment advisor, providing investment management services to institutions, primarily pension funds and endowments, and to individual investors thorugh a broad line of mutual funds and cash managements products. Annual reports are available upon request.

LOS ANGELES (MAY 1) BUSINESS WIRE - MagneTek Inc. (NYSE:MAG), a leading electrical equipment manufacturer, Tuesday announced that it has entered into a joint venture agreement with the Hungarian firm Egesult Villemosgepgyar (EVIG), Budapest, for the manufacture and sale of electric motors.

The announcement was made by MagneTek President Frank Perna Jr., following a Budapest signing ceremony on April 30.

The 50-50 joint venture, a limited liability corporation which will be known as MagneTek EVIG Kft., will manufacture integral horsepower motors ranging from 1 to 50 horsepower in Hungary. Such motors are used primarily in commercial and industrial applications, including high-volume air moving, production processes and pumping systems.

EVIG is a highly automated, state-of-the-art motor manufacturer, with primary markets in Hungary and other Eastern European countries. The joint venture should significantly increase sales outside these traditional geographical markets, Perna said. Sales of EVIG integral horsepower motors currently amount to $12 million a year.

Revenues of the new joint venture are expected to approximate $16 million in the first year. ''We also intend to import and export components and materials to and from MagneTek EVIG in Hungary, lowering our overall cost

of manufacturing on both continents,'' Perna noted.

''This agreement gives MagneTek an integral horsepower motor manufacturing capability on the European continent, complementing our existing fractional horsepower motor manufacturing operations in the United Kingdom and our power systems operation in West Germany,'' Perna said. ''We are making good progress in our strategy of increasing MagneTek's international business.''

Founded in 1984, MagneTek manufactures lighting ballasts, transformers, motors, generators, drives and controls, and provides electrical equipment repair and rebuilding services to utilities and industrial customers. The company operates 50 manufacturing and service facilities throughout North America and overseas, and employs some 14,000 associates.

MagneTek recorded sales of $962 million for its fiscal year ended June 30, 1989.

SEATTLE (MAY 1) BUSINESS WIRE - Plum Creek Timber Company, L.P. (NYSE: PCL) today announced net earnings for the first quarter ending March 31, 1990, were $13.0 million, or $0.81 per unit (fully diluted) on revenues of $95.6 million.

Quarterly earnings for the same period in 1989 are not comparable due to the restructuring of the company related to its spin-off as a separate, publicly-traded company in June 1989. However, revenues for the current quarter were up 23 percent from the year earlier period primarily because of higher export and domestic log prices, which were up 33 percent and 28 percent, respectively.

The company also announced that it will distribute $0.70 per depositary unit, 17 percent over the intended minimum distribution of $0.60 per quarter. The distribution, which represents cash generated from operations for the first quarter of 1990, will be paid on May 30, 1990, to unitholders of record on May 15, 1990. Depositary units represent limited partner interests in Plum Creek. As of March 31, 1990, there were 14,352,500 depositary units outstanding.

Commenting on the company's earnings, David D. Leland, President and Chief Executive Officer of Plum Creek, said, "The reduced supply of federal timber in the Northwest has dramatically increased prices for logs in both the export and domestic markets and has also kept prices for lumber and

plywood high. These same market forces that pushed up Plum Creek's profits in the first quarter should also position the company favorably in the coming quarters.

"Also, we continue to see strong demand worldwide for forest products, particularly in Japan which has a big appetite for both raw logs and high quality finished lumber. Domestically, demand for wood products remains very high as well. That demand is fueled by a strong repair and remodel market which is bouncing back after a slow 1989."

Plum Creek is the second largest private timberland owner in the Pacific Northwest and one of the largest in the nation. The company was formed in June 1989 to acquire, own and operate substantially all of the timber business and wood products manufacturing operations formerly owned by Burlington Resources Inc.

FEDERAL WAY, WA (MAY 1) BUSINESS WIRE - Pacific Nuclear Systems Inc. has been awarded contracts to provide services for the U.S. government and Niagara Mohawk Power Corp.'s Nine Mile Point Nuclear Station and has announced several key management promotions within the corporation.

Under the contracts, the company will provide low-level waste processing and transportation services during 1990. The estimated value of the contracts is approximately $1 million.

David Jones, chairman of the board and chief executive officer, has resumed the added responsibilities of president and chief operating officer, positions he had held from the company's inception in 1983 through 1989. He resumed these added duties following the recent resignation of Arthur Marquardt, chief operating officer.

Roger L. Shingleton, senior vice president/marketing and corporate development, has assumed responsibility for the corporation's Products Group, encompassing Nuclear Packaging, Spent Fuel Services and the recently formed Pacific Nuclear Fuel Services Group.

Donald Cook, senior vice president and chief financial officer, now will oversee all corporate administration activities, as well.

Thomas Vogel, with more than 20 years of experience in the engineering field, has assumed management responsibilities for Pacific Nuclear's Nutech Engineers Group.

Jones, Cook and Shingleton are part of the core management team which founded Pacific Nuclear Systems in 1983, while Vogel has been with the Nutech Group since 1975.

Pacific Nuclear Systems Inc. and its subsidiary companies Nutech Inc., NuPac Services Inc., Nuclear Packaging Inc., PN Services Inc., and Alaron Corp., provide a wide range of services to the nuclear industry. The company, founded in 1983 and headquartered in Federal Way, is traded in the NASDAQ National Market System under the symbol PACN.

OAKLAND, CA (MAY 1) BUSINESS WIRE - American President Companies (APC) announced the appointment of Timothy J. Rhein as president and chief executive officer of American President Domestic (APD), APC's domestic transportation subsidiary; and J. (George) Hayashi as president and chief executive officer of APC's Pacific Basin container shipping subsidiary, American President Lines (APL).

Both will report to APC Chairman Bruce Seaton.

Rhein, formerly president and chief operating officer of APL, succeeds Donald C. Orris as head of the domestic transportation unit. Orris' resignation as APD's president and chief operating officer was announced Monday. Hayashi, formerly APC vice chairman, succeeds Rhein as head of the shipping unit.

In related moves, APC named Michael Diaz to the newly created position of executive vice president and chief operating officer of APD and John G. Burgess to the newly created position of executive vice president and chief operating officer of APL.

Diaz, who will report to Rhein, was formerly president of American President Intermodal, the APD subsidiary that operates the company's double-stack container train system in North America. Burgess, who will report to Hayashi, was formerly senior vice president -- North America for APL.

Seaton said the company has dedicated itself to achieving an increasingly

high level of customer satisfaction and improving internal productivity and efficiency. He expressed confidence in the ability of these executives to move the company and its two principal operating subsidiaries toward achieving these goals.

APC provides container distribution and transportation services within and between Asia and North America through an intermodal system combining ocean, rail and truck transportation.

#90121b0180 05/01/1990 ~Business Wire

LOS ANGELES (MAY 1) BUSINESS WIRE - Nantucket Corp. Tuesday announced the shipment schedule for Clipper 5.0, its application development system for the PC.

The product will be distributed first to qualified attendees of Nantucket's third annual West Coast Developer Conference, to be held June 11-13 in Palm Springs, Calif. For those not attending the conference, the company will begin fulfilling upgrade orders by June 30; distributors and resellers are expected to have product by the end of July.

''Delivering a sound and reliable product was our first priority,'' said Larry Heimendinger, Nantucket president and chief operating officer. ''We've made functional improvements in Clipper's architecture to expand the capabilities of the system and lay the foundation for future releases.

''These changes required exhaustive testing and quality assurance, but we feel the wait will be worth it for our customers.''

Nantucket continues to offer free upgrades to buyers of its Clipper Summer '87 version. According to Heimendinger, ''Buying the current version is still the fastest way to obtain Clipper 5.0. Shipments to distributors and resellers will begin as soon as the initial upgrade orders have been filled.''

Upgrade order forms will be sent to registered Clipper users during the second week in May.

Nantucket is committed to shipping clipper 5.0 no later than June 30, with initial shipments reserved for upgrade orders. Registered users who purchased Clipper before June 1, 1989, will pay $195 plus shipping charges for the new release. Developer Conference attendees who order their upgrades by May 31 will receive Clipper 5.0 software and documentation at the Palm Springs event.

The product will carry a suggested retail price of $795 and will be available through Nantucket's authorized resellers.

Clipper 5.0 is an open-architecture application development system that includes user-extensible command and function sets, a compiler with preprocessor, linker and a full set of development utilities. Improved memory management allows developers to build and run applications larger than available memory.

Also included are user-defined commands, multidimensional arrays and new on-line documentation. Clipper 5.0's database driver is replaceable, permitting concurrent use of multiple database formats from within the same application.

Founded in 1984, with headquarters in Los Angeles, Nantucket Corp. is the leading developer of application development systems for microcomputers. Nantucket products are distributed internationally through an office in the Soviet Union, subsidiaries in the United Kingdom, West Germany and Japan, and a network of full-service distributors throughout the world.

#90121b0195 05/01/1990 ~Business Wire

LOS ANGELES (MAY 1) BUSINESS WIRE - Ducommun Inc. (ASE:DCO) announced net income from operations of $276,000, or 8 cents per share, on sales of $18,193,000 for the quarter ended March 31, 1990, compared with net income of $360,000, or 11 cents per share, on sales of $16,491,000 for the first quarter of 1989.

The company recorded an extraordinary tax credit of $125,000, or 4 cents per share, in the first quarter of 1990, for utilization of net operating loss carryforwards substantially offsetting the provision for taxes. Approximately $59 million of federal net operating loss carryforwards remain un-utilized.

Norman A. Barkeley, chairman, president and chief executive officer, said, ''While costs involved in the company's efforts to enhance productivity and profitability reduced first-quarter profits, these excess costs are now behind us.

''The successes of these efforts resulted in March being the company's best months since the initiation of the 1988 turnaround. We expect sales and net income for the second quarter and full year to exceed 1989 results.

''Cost-reduction measures, productivity-improvement programs and lower interest costs will contribute to the company's profits in 1990. Debt was reduced by $850,000 during the first quarter as a result of strong cash flow. We anticipate further reductions in debt, and lower interest expense during the balance of 1990.

''We also expect to benefit from the continuing shift in our product mix from military projects to commercial air-transport programs, which are generally more profitable.''

Ducommun Inc. manufactures components and assemblies for the aerospace industry. The company's product mix during 1990 is expected to be 60 percent commercial, 30 percent military and 10 percent space oriented.

#90121b0199 05/01/1990 ~Business Wire

IRVINE, CA (MAY 1) BUSINESS WIRE - American Savings Bank Tuesday introduced a new mortgage incentive program, providing the new homebuyer with extra cash so necessary when purchasing a home.

The new campaign, entitled ''Take a Break from Your Mortgage Plan!'' gives customers the option to defer up to two loan payments. The program is for applications received from May 1 to July 31, 1990.

''The new campaign gives homebuyers what they need most -- a break,'' said Frank Bonetto, executive vice president and chief lending officer. ''The program frees up cash by deferring two payments to help with move-in expenses including landscaping, painting and furnishings.

It particularly helps the first-time homebuyer who has numerous immediate needs for cash related to the new home.'' Additional cash flow also can help defray closing costs, he added.

Customers may choose to defer the first, second or any two mortgage payments during 1990. The deferred payments are added to the outstanding principal balance and amortized over the remaining term of the loan.

On an average loan of $200,000, the program gives the customer approximately $2,800 in cash based on a two-month deferral. For a loan funded in May, the customer's first scheduled payment would normally be due in July. However, with a two-month deferral, the first payment would be due in September.

The offer applies to all three- and six-month option adjustable rate mortgages on single family residences and duplexes for purchase and refinance transactions.

''Based on our research, we found we can best help the homeowner by offering a way to free up cash, because extra cash is a top priority to today's homebuyers,'' said Bonetto. ''This gives people a break that can be converted into whatever they need most for their new home.''

The new campaign will be supported over the eight-week period by newspaper and radio advertising targeted to five major metropolitan areas throughout California. Direct mail to customers and realtors and promotional support in all branches and loan centers also is scheduled.

American Savings, headquartered in Stockton, has 177 offices and 25 residential loan centers throughout California.

KANSAS CITY, MO (MAY 1) BUSINESS WIRE - Kansas City Southern Industries Inc. annual meeting of stockholders was held Tuesday at the Allis Plaza Hotel in Kansas City.

With more than 90 percent of the company's outstanding common and preferred stock represented in person or by proxy at the annual meeting, the stockholders re-elected James E. Barnes, Thomas S. Carter, William N. Deramus IV, John Hawkinson and R. Crosby Kemper as directors to serve until the annual meeting of stockholders in 1993.

The stockholders also approved the selection of Price Waterhouse as auditors of the company for the year ending Dec. 31, 1990.

The board of directors, at its regular meeting on April 30, 1990, declared a 27 cent quarterly dividend on the company's outstanding common stock, payable on June 19, 1990, to stockholders of record at the close of business on May 30, 1990. The regular preferred stock quarterly dividend of 25 cents per share was also declared and will be payable on July 3, 1990, to preferred stockholders of record at the close of business on June 15, 1990.

In other action, the board of directors elected A.H. (Bob) Nance vice president, personnel. Nance succeeds John L. Deveney, who was elected vice president, human resources. Nance was formerly director of line operations, American President Intermodal, headquartered in the San Francisco area.

LOS ANGELES (MAY 1) BUSINESS WIRE - Mark S. Grody, chief executive officer of The Rowland Co. in Los Angeles and San Francisco, has resigned from the firm to return to private consulting.

He has headed The Rowland Co. and a predecessor agency in Los Angeles since the mid-1970s and he will continue as a consultant to the firm.

Steve Smith, president and chief operating officer, will assume full leadership of The Rowland Co.'s west coast operations. Last year, Smith's firm, Smith Marketing Communications, was acquired by Rowland Worldwide, one of the world's five largest public relations firms and an autonomous subsidiary of Saatchi & Saatchi Holdings PLC in London.

A 30-year career public relations professional, Grody founded Mark Grody Associates in 1975, which, though a merger five years later, became Grody/Tellem Communications Inc. In 1987 the firm was sold to Saatchi & Saatchi PLC to form the Los Angeles office of Rowland Worldwide.

This office was merged with Smith Marketing in 1989 to become The Rowland Co. in Los Angeles and San Francisco.

Grody formerly was on the public relations staff of General Motors Corp. for nearly 14 years. He served in a number of managerial positions, including southern regional manager, based in Atlanta, and assistant

western regional manager, based in Los Angeles.

During his last 15 months with General Motors, Grody was ''on loan'' to the U.S. Department of Labor to serve as vice president of public relations and advertising for the then-called National Alliance of Businessmen in Washington. He resigned from GM in 1974 to return to California and open his own agency.

A native of Milwaukee and a journalism/public relations graduate of the University of Wisconsin, Grody is a member of the Public Relations Society of America and the National Investor Relations Institute.

DALLAS/FORT WORTH AIRPORT (MAY 1) BUSINESS WIRE - American Airlines launches hourly nonstop service Tuesday between Los Angeles and San Francisco, backed by a double-mileage bonus for frequent fliers and programs to speed travelers through both airports.

The airline will increase its Los Angeles-San Francisco nonstop operations from 12 flights every business day to 16. Weekday flights will operate every hour in both directions, from 7 a.m. through 10 p.m.

According to Department of Transportation figures, American has the best

on-time arrival record at Los Angeles, San Francisco and San Jose airports.

The airline will add to its California service on May 3, when it begins daily flights between Long Beach and its Chicago hub. It will begin daily transcontinental service from San Jose to New York Kennedy International Airport on June 15 and add a second daily flight on July 1. Also on June 15 American will begin daily service between Fresno and Dallas/Fort Worth.

HOUSTON (MAY 1) BUSINESS WIRE - Smith International Inc. (NYSE/PSE:SII) Tuesday reported results for the first quarter ended Mar. 31, 1990.

For the first quarter ended Mar. 31, 1990, the company reported a profit of $27,000 on revenues of $78.8 million. This compares with a net loss of $1.1 million in the first quarter 1989 on revenues of $71.8 million.

On a per-share basis, after considering the impact of preferred stock dividends, the company had a loss of 1 cent per share in the first quarter of 1990 as compared with a loss of 5 cents per share for the comparable period in 1989. On a pre-tax basis, profits improved $2 million between quarters.

Revenues and profits improved primarily as a result of an increase in our performance drilling group although revenues from all product groups increased between quarters.

Smith International is a worldwide supplier of products and services to the oil and gas drilling industries.

MILPITAS, CA (MAY 1) BUSINESS WIRE - Diasonics Inc. is pleased to announce the appointment of Syed Omar Ishrak, Ph.D., as the engineering director of new product development for the Ultrasound Division.

Ishrak will be directing his engineering development team on evolving new technological enhancements for Diasonics' multicomputer whole body SPECTRA Ultrasound System and for the new intravascular/endoluminal IVUS interventional Ultrasound System (which was recently cleared by the FDA for diagnosing disease within coronary arteries.)

Ishrak brings to Diasonics over 13 years of experience in acoustical research and ultrasound product development, with his most recent position as manager of Ultrasound Product Development Engineering for Philips Medical Systems.

He holds a Ph.D. in electrical engineering from the University of London King's College, where he completed his research thesis on ''Optically-scanned Piezoelectric/Semiconductor Transducers for Acoustic Imaging.'' Ishrak was awarded the King's College Tutorial Studentship for engineering. He has published several research papers and is currently awaiting final approval on two U.S. patents.

As stated by Stewart Carrell, Diasonics chairman and chief executive officer, ''We are committed to providing cost-effective solutions for the diagnosis and treatment of disease to help the medical community provide the highest quality of patient care. Experienced engineering management, such as Omar Ishrak, along with innovative products like SPECTRA and IVUS are making these very productive times for Diasonics.''

Diasonics Inc. is a leader in the development and manufacture of computer-based medical instrumentation. Diasonics corporate headquarters are located at 1565 Barber Lane, Milpitas, Calif., 95035; telephone 408/432-9000.

#90121b0620 05/01/1990 ~Business Wire

SAN FRANCISCO (MAY 1) BUSINESS WIRE - California Energy Company Inc. (AMEX/PSE:CE), Tuesday disclosed its financial results for the quarter ended March 31.

Electricity sales were a record $15,353,000, or 364.9 million kilowatt hours, vs. $6,403,000, or 166.5 million kilowatt hours in the comparable period of 1989. Total revenues in the period rose to $16,661,000 from $7,625,000 in the like period a year ago.

Net income for the quarter was $1,702,000, or 6 cents per share (26,595,000 shares) compared to $1,679,000, or 7 cents per share (25,552,000 shares) in the comparable period.

During the first quarter the company completed the scheduled overhaul of the last of the three Navy I turbines, performed mandatory warranty inspection and maintenance of the two BLM East units and modified two of the Navy II units.

Sales and earnings as expected were impacted by the time and cost associated with these activities, all of which are a part of the winter program of preparation and readiness to operate at maximum efficiency during the upcoming peak season which commences June 4.

''While a lower capacity factor at the BLM power plant had an effect on earnings in the quarter, our people have engineered and begun installing a process which when implemented in late May will achieve targeted capacity factors as impressive as those attained by the Navy I and Navy II plants '' said Charles T. Condy, chairman and chief executive officer.

The awards program backed by 23 of America's foremost national environmental advocacy groups, was created to identify projects across the country that are successfully countering environmental threats.

California Energy Company Inc. is the leading independent developer of geothermal resources in the United States. As operator and an owner of the 240 megawatt Coso Geothermal Project, the company is also a major wholesaler of electricity in Southern California.

In addition, California Energy controls more than 470,000 acres of geothermal prospect lands in Northern California, Oregon and Washington.

#90121b0629 05/01/1990 ~Business Wire

TORRANCE, CA (MAY 1) BUSINESS WIRE - Epson America Inc. is extending its line of high-performance, affordable products for advanced business, technical and networking applications with the introduction Tuesday of its new Equity 386/25 desktop personal computer.

The Equity 386/25 provides end-users with the best combination of speed, performance and value currently available in an 80386 Industry Standard Architecture (ISA)-based model.

Key features include an 80386 microprocessor running at 25 MHz, 2 MB of random access memory (expandable to 16 MB), 32 KB RAM cache memory for faster data processing, Shadow RAM for increased system performance, Intel 80387 and Weitek 3167 math coprocessor support and 16-bit VGA graphics support.

Corbett said that the Equity 386/25 is designed for use either as a stand-alone unit or as a file server in a local area network. It can easily be utilized for such applications as CAD/CAM/CAE, desktop publishing, database management and business and financial analysis.

To optimize the true 32-bit capabilities of its 80386 microprocessor, the Equity 386/25 includes 32KB of high-speed memory cache and 2 MB of 80 nanosecond RAM to support memory-intensive and 386-specific applications. It is also equipped with a dedicated memory card that accommodates snap-in Single In-Line Memory Modules (SIMs) for easy memory upgrade allowing it to support a total of 16 MB of RAM without using an expansion slot.

Other standard features found on the Equity 386/25 include zero wait-state processing; Lotus-Intel-Microsoft (LIM) 4.0 driver which allows the use of memory above the 640 KB limit that MS-DOS imposes; 16-bit Video Graphics Array (VGA) adapter for high-resolution output of up to 800 by 600 pixels; selectable 8 or 25 MHz clock speed; seven full-size expansion slots; a built-in embedded hard disk controller interface; built-in parallel, serial and IBM PS/2-compatible mouse ports; password security and key

lock; MS-DOS 4.01 software; and Epson's one-year limited warranty.

There are three configurations of the Equity 386/25: the 5.25-inch, 1.2 MB floppy disk drive model has a manufacturer's suggested retail price of $4,199; the 5.25 inch, 1.2 MB floppy disk drive/40MB hard disk drive unit is $5,199; and the 5.25 inch, 1.2 MB floppy disk drive/100 MB hard disk drive is $6,199.

The Equity 386/25 is now available through Epson Authorized Resellers, Value-Added Resellers and Federal Government Systems Integrators.

In addition, Epson has ensured that the Equity 386/25 is compatible with a wide range of popular network operating systems such as IBM Local Area PC Network, Novell Netware 386 and 3COM 3 Plus using Token-Ring and Ethernet network adapters.

Epson America is a leading manufacturer and marketer of computer printers and personal computers serving the overall North American marketplace.

#90121b0634 05/01/1990 ~Business Wire

TORRANCE, CA (MAY 1) BUSINESS WIRE - Epson America Inc. entered the 386-based laptop computer market Tuesday with its announcement of the Equity LT-386SX, a full-featured model that satisfies the growing need for high-performance and versatility on portable systems.

Equipped with the Intel 80386SX microprocessor, the Equity LT-386SX features Epson's unique modular laptop design, which allows for the easy removal of the 20 or 40 MB hard disk drive, as well as the ability to install a variety of industry standard add-on boards to satisfy specific application needs.

Corbett added that, since the Equity LT-386SX and Equity LT-286e which was introduced last September share the same modular design, many optional accessories can be used on either machine.

With the announcement of the Equity LT-386SX, Epson provides end-users with a choice of portable laptop models to satisfy every need and pocketbook. The new Equity LT-386SX will be available in June at Epson Authorized Resellers nationwide.

Targeted at end-users in all business environments, the Equity LT-386SX is ideal for traveling professionals and executives who are looking for portable alternatives to their desktop PC models. It can also serve as a

networked workstation or custom-designed vertical-market system.

The Equity LT-386SX was designed to satisfy calculation-intensive business applications. Its 80386SX microprocessor has switchable clock speeds of 8 or 16 MHz. The new portable comes standard with 2 MB of RAM, and it is fully compatible with Industry Standard Architecture. An 80387SX math coprocessor can be added to further enhance performance.

The Equity LT-386SX's modular design provides a ''3-Way Expansion System'' that includes two internal, dedicated expansion slots; one to accommodate a 2400 bits-per-second modem and another for a 2 MB RAM expansion card. A two-thirds size, 16-bit, AT-compatible slot is also available for additional expansion capabilities. It is equipped with an NTN paper white liquid crystal display screen that has 640 by 480 pixel resolution and full Video Graphics Array (VGA) compatibility.

The Equity LT-386SX's ''DataSafe'' hard disk drive system allows end-users to easily remove the standard 20 MB and optional 40 MB hard disk drives for added system security, or for easy upgrade. With the addition of a third party adapter, the ''DataSafe'' hard disk drive can be connected to most desktop PCs.

The Equity LT-386SX can be powered by either an AC adapter or by a removable nickel cadmium battery pack which provides up to three hours of operation on a full, 12-hour charge. Additional battery packs to extend portable operations will be available from Epson Authorized Resellers.

Epson America is a leading manufacturer and marketer of microcomputer printers and personal computers serving the overall North American marketplace.

NEW YORK (MAY 1) BUSINESS WIRE - Melinda M. Sweet has been appointed to the newly created post of director of environmental affairs at Lever Brothers Co., the household products company headquartered in New York City.

Sweet will coordinate all Lever's environmental activities, as well as direct Lever's Environmental Affairs Committee.

Since 1986, Sweet has served as assistant general counsel for Lever, responsible for the company's environmental compliance activities.

In announcing Sweet's appointment, David F. Webb, Lever Brothers' president and chief executive officer, said, ''Lever places a high priority on the protection of the environment. We are proud of the record of the detergent industry, and of the part Lever products have played in raising standards of hygiene.

''We are committed to a pro-active role in helping to solve the larger problems our society faces on such issues as packaging and solid waste,'' he said.

Webb said the appointment of Sweet is part of a company-wide effort to ensure that all environmental efforts are coordinated effectively.

''One of the key features of this job will be to communicate Lever's excellent environmental record, as well as new developments in packaging and product formulation that are environmentally responsible. At Lever, we have a strong commitment to create real solutions to environmental concerns. We plan to do so with thorough research, straight talk and responsible actions,'' Sweet said.

Under the direction of Sweet, Lever's Environmental Affairs Committee will oversee progress in meeting environmental goals, and communicating Lever's environmental strategy to internal and external constituencies.

A native of Ohio, Sweet is a graduate of Sarah Lawrence College and Hofstra University School of Law.

LOS ANGELES (MAY 1) BUSINESS WIRE - Ian Lewis has been appointed managing director and chief executive officer of Technicolor Ltd., the London-based film processing subsidiary of Technicolor Inc., effective June 18, 1990.

Lewis succeeds Raymond A. Dutfield, who had been chairman, chief executive officer and managing director of Technicolor Ltd. since January of 1979.

Lewis has extensive experience in the international film industry and most recently served as managing director of Universal Pictures Ltd. Lewis serves as chairman of the executive council of the new Producers Association and is at present president of The Guild of Film Production Executives.

Dutfield will continue to serve Technicolor Ltd. during his retirement as a consultant and as chairman of the company.

Arthur N. Ryan, chairman and chief executive officer and Raymond A. Gaul, president of Technicolor Inc. jointly stated: ''We are delighted that Ian Lewis has agreed to join Technicolor in this key management position. His stature and experience in the international film industry will be vital to Technicolor's continuing growth in the United Kingdom and Europe.''

They further noted: ''We thank Ray Dutfield for his many contributions to Technicolor during the past 11 years and wish him well in his retirement. We are pleased that Mr. Dutfield will continue his relationship with the company in a consulting capacity.''

Lewis commented: ''This is a very exciting opportunity. I welcome the chance to lead Technicolor Ltd. through the challenges to be posed in the 90s. Ray Dutfield has built a fine organization, and I look forward to working with Simon Baxter, Ashley Hopkins and Ian Mackay to continue our growth in the European film market.

''We intend to retain Technicolor's position as the premier film processing laboratory in Great Britain.''

SAN DIEGO (MAY 1) BUSINESS WIRE - Software Products International, a leading developer and publisher of PC-based multifunction business software for the international market, Tuesday announced the availability of Access SQL.

According to Kathleen Garvey, SPI product manager, Access SQL has been shipping since the end of March and is designed specifically for users in corporate and government agency environments, who need to access information quickly and easily from multiple databases. Access SQL is the first fully featured graphical front end to the SQL database servers.

Access SQL is designed to bring the power of SQL client-server databases to the desktop. Use of the Windows Graphical User Interface (GUI) enables Access SQL to provide database solutions to less sophisticated users who would be intimidated by more traditional PC-based databases or by SQL, said Garvey. Pricing

Access SQL for one to four users has a suggested retail price of $1,595. Single-user versions are available for $695. The Access SQL server or the single-user version can operate on any IBM PC or compatible with a minimum configuration of 2.0 Mbytes of RAM. Network stations need 640K minimum. A four-station add-on pack is priced at $995.

For users who already have SQLBase from Gupta Tachnologies, network access for four users is priced at $995. Distribution

Access SQL is sold internationally through dealers, distributors and directly to major accounts. In the United States, SPI sells its products through a national network of computer resellers and direct.

Currently available is the English version of Access SQL from SPI with shipments of German, French, Spanish and Scandinavian versions available this summer. Special Promotion

From now until June 30, customers who purchase Access SQL from SPI will receive a coupon that can be redeemed for a free Microsoft Mouse.

Software Products International, with headquarters in San Diego, was founded in 1979 to develop, publish and market business software for personal computers. The company's flagship product, Open Access, is the leading multifunction PC software package in Europe. The company is privately held, with product revenues for fiscal year 1989 of more than $18 million.

The company maintains subsidiaries or master distributors in West Germany,

Spain, the United Kingdom, France, Sweden, Brazil, Italy, Argentina, Benelux and Australia.

NEW ORLEANS (MAY 1) BUSINESS WIRE - Freeport-McMoRan Resource Partners, Limited Partnership (NYSE:FRP), an affiliate of Freeport-McMoRan Inc. (NYSE:FTX), announced Tuesday that FRP has agreed to acquire from Chevron U.S.A. Inc. oil and gas reserves currently estimated to range between 35 million and 50 million barrels of oil as well as 8.0 billion cubic feet of natural gas associated with FRP's Main Pass Block 299 sulphur discovery for $137,000,000 cash plus certain costs already incurred by Chevron associated with development of the oil and gas reserve which to date totals approximately $13,000,000.

The reserves that are being acquired are contained in the same caprock reservoir on Main Pass Block 299 as are FRP's sulphur reserves and were discovered by FRP during the drilling of sulphur exploration wells.

Main Pass Block 299 is located offshore Louisiana in the Gulf of Mexico approximately 90 miles southeast of New Orleans. FRP estimates expenditures of approximately $100,000,000 for the development of this oil reserve.

Chevron has also retained the right, under certain circumstances, to participate in the proceeds of future production should the price or volumes realized exceed certain established levels.

Rene' L. Latiolais, president and chief executive officer of FRP, said: ''This acquisition of proved oil and gas reserves is an excellent investment which will provide FRP with an important cash flow stream when production begins in late 1991. Furthermore, the synergies to be realized by FRP through codevelopment and optimization of recoveries of both the sulphur and oil reserves will benefit our cost structure and therefore the cash flows generated from these excellent reserves.''

FRP intends to offer the opportunity to participate in this acquisition to its Main Pass Block 299 sulphur joint venturers. The Main Pass Block 299 sulphur joint venture is owned 58.3 percent by FRP; 25 percent by IMC Fertilizer, Inc., a wholly owned subsidiary of IMC Fertilizer Group Inc.; and 16.7 percent by Felmont Oil Corp., a wholly owned subsidiary of

Homestake Mining Co.

FRP is the largest and one of the lowest-cost integrated U.S. phosphate fertilizer producers. In addition, FRP is currently the second largest domestic Frasch sulphur producer and will become the largest when the Main Pass Block 299 sulphur deposit reaches full production in 1993. FRP is also the largest U.S. transporter of sulphur produced by others.

PHOENIX (MAY 1) BUSINESS WIRE - Homeplex Mortgage Investments Corp. (NYSE:HPX) (formerly Emerald Mortgage Investments Corp.) Tuesday announced that it had net earnings of $2,290,000, or 24 cents per share, for the quarter ended March 31, 1990 based on 9,675,100 shares outstanding as compared to net earnings of $2,105,000, or 24 cents per share, for the comparable quarter in 1989 based on 8,750,100 shares outstanding.

This also compares to net earnings of $1,661,000, or 19 cents per share, for the previous quarter. Alan D. Hamberlin, president of the company, attributed the increase in earnings to lower short-term interest rates during the first quarter of 1990 as compared to the comparable quarter in 1989, despite the effect of the issuance of 925,000 shares of additional stock in December 1989.

Hamberlin added that based upon current market conditions (including most importantly current short-term interest rates and mortgage prepayment rates), which may change, the company believes that it will have taxable income of approximately $9.7 million or $1 per share for all of 1990. This includes the effects of the amortization of lower hedging costs, the absence of amortization of the cost of warrants after May 1990 and the savings anticipated from the termination of the Management Agreement as of May 1, 1990. As a real estate investment trust the company must distribute annually at least 95 percent of its taxable income to its stockholders. The company cannot estimate, at this time, its financial reporting income for the year due to the effects which may result from possible changes in industry-wide accounting principles.

Hamberlin also announced that the company had reached an agreement with its banks which extends the maturity of its term loan agreement from May 1 1990 to Feb. 1, 1991, on substantially the same terms and conditions. The agreement requires the principal balance of the term loan to be reduced by $10 million by October 1990. Such principal reduction may be accomplished by use of the company's monthly cash flow from operations,

sales of assets or refinancing part or all of the loan. Hamberlin added that the company's top priority is to seek alternative financing to replace its existing financing agreements and to reinstitute the payment of quarterly dividends.

LOS ANGELES (MAY 1) BUSINESS WIRE - Johnson Fain and Pereira Associates, a Los Angeles-based architecture, design and planning firm, has been selected by the U.S. Department of Energy to assist in programming of all above-grade facilities for its $8 billion superconducting super collider (SSC) laboratory in Waxahachie, Texas, the firm announced Tuesday.

Once built, the SSC will be the world's most sophisticated high-energy physics machine designed to explore the outer frontier in scientific knowledge of the origin of matter. This will be achieved through the acceleration and collision of sub-atomic particles in a 54-mile underground tunnel surrounding Waxahachie.

The programming assignment includes space standards for over 1.5 million square feet of laboratories, offices, a computer center, shops and conference facilities, as well as cyrogenic and acceleration facilities. The concept will include a campus-like environment, which will provide permanent residences for a population of 3,000 scientists and staff, in addition to housing 500 visiting physicists, graduate students and research teams from throughout the world, the firm said.

Founded in 1931, the 80-member Johnson Fain and Pereira firm has acquired an international reputation for its planning and architectural services. Among the firm's projects are Donald Trump's planned mixed-use project that will include the world's tallest building, Los Angeles; Miyama Hills, a $1 billion destination resort community on Guam; Opus One Winery, Napa Valley; Rincon Center, San Francisco; the Carnation Co. headquarters, Glendale, Calif., Otis Art Institute of Parsons School of Design addition, Los Angeles; and Fox Plaza, Century City, Calif.

CANTON, MA (MAY 1) BUSINESS WIRE - Instron Corp. announced Tuesday that it has finalized the acquisition of Laboratory MicroSystems Inc., (LMS) of

Troy, N.Y.

Instron and LMS have worked closely for the past four years in a number of joint software developments.

Harold Hindman, chairman of Instron, said that the worldwide distribution of LMS' laboratory information management systems (LIMS) product would have a more significant impact being a wholly-owned subsidiary of Instron. Hindman added that the LIMS product has been recently introduced in Europe and expects that the two key market areas to be concentrated on initially will be in the U.S. and Europe.

Mark Chudzicki, president of LMS remains in the same capacity reporting into Instron's marketing division. Chudzicki said that the software capabilities of LMS coupled with Instron's global presence will complement the strategies of both organizations.

Instron Corp., listed on the American Stock Exchange (ISN), is a leading producer of instruments and systems for advanced materials testing.

PALO ALTO, CA (MAY 1) BUSINESS WIRE - Actel Corp. and Hewlett-Packard Co. Tuesday announced that they will cooperate in developing, licensing, and manufacturing an advanced family of field- programmable gate arrays (FPGAs).

Under terms of the 5-year agreement, HP has immediate access to Actel's FPGA design software and will make a 5 percent equity investment in Actel, a leading supplier of FPGAs. Actel is located in Sunnyvale, Calif.

FPGAs are a type of application-specific integrated circuit (ASIC), a chip produced for specific customer needs. They are becoming increasingly popular as the basic building blocks for products such as computers, instruments and peripherals.

In a matter of hours and at a very low cost, these integrated circuits can be programmed at a designer's desk with information (logic functions) to operate electronic products. Traditional techniques require several weeks to program these logic functions.

Actel and HP will work together to incorporate Actel's technology into HP's advanced integrated-circuit processes as well as Actel's FPGA programming software into HP's ASIC design system. Actel and HP will

design a new, more powerful family of FPGAs that HP will manufacture and Actel will sell on the open market.

In addition, the two companies will develop a method to transfer design information from HP's design systems either to Actel FPGAs or HP ASICs.

Under terms of the agreement, Frederic N. Schwettmann, HP vice president and general manager of HP's circuit technology group, will join Actel's board of directors.

In December 1989, HP announced a major advance in submicron CMOS (complementary metal-oxide semiconductor) technology that allows HP to design extremely dense chips that greatly increase processor performance. (Submicron means less than one micron, and a human hair is about 50 microns wide.)

Hewlett-Packard is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 94,000 employees and had revenue of $11.9 billion in its 1989 fiscal year.

SAN ANTONIO, TX (MAY 1) BUSINESS WIRE - Diamond Shamrock Inc.'s (NYSE:DRM) board of directors Tuesday approved the company's regular dividend of 12 cents per common share for the first quarter, payable June 7 to shareholders of record of May 18.

This is the 13th consecutive quarterly dividend of the corporation.

The board also declared a dividend of 50 cents per share on each of the $2 convertible exchangeable preferred stock, payable on June 15 to stockholders of record on May 18.

Diamond Shamrock Inc. is a regional refiner and marketer of petroleum products with annual sales of approximately $2.1 billion. The San

Antonio-based corporation has two Texas refineries, markets gasoline and diesel through approximately 2,000 Diamond Shamrock branded outlets, processes natural gas, and stores and markets natural gas liquids.

#90121b0707 05/01/1990 ~Business Wire

GREENWICH, CT (MAY 1) BUSINESS WIRE - The Fund American Companies Inc. (NYSE:FFC) reported consolidated net income of $35 million, or 65 cents per share, for the three months ended March 31, 1990, compared to $36 million, or 66 cents per share, for the same period in 1989, a decline in net income of four percent.

Consolidated revenues were $904 million for the three months ended March 31, 1990, an increase of nine percent compared to $831 million for the same period in 1989. The 1990 revenues include $30 million of realized investment gains, versus $5 million of realized losses in the first quarter of 1989.

Book value per common share as of March 31, 1990, was $35.04, an increase of three percent from $34.16 as of March 31, 1989, and a three percent decrease from $36.21 as of Dec. 31, 1989. The decrease in book value from year-end 1989 is mainly attributable to a decline in unrealized appreciation on the company's investments in equity securities.

Insurance operations -- principally from the Fireman's Fund Insurance Co. subsidiary -- reported an underwriting ratio of 119.0 percent for the first quarter of 1990, versus a ratio of 113.6 percent for the comparable 1989 period. This deterioration in underwriting results continues to reflect inadequate commercial and specialty insurance prices, which are lagging behind the growth in claims costs.

Reserves for prior years claims showed no development during the first quarter of 1990. The full year 1989 underwriting ratio had been 122.3 percent, which included an estimated 5.8 points of reserve strengthening for prior years claims.

Net written premiums for the first three months of 1990 were $732 million, up nine percent compared to $674 million for the same period of 1989. After adjusting for a seven percent whole book quota share agreement which ended Aug. 31, 1989, net written premiums increased one percent over those written in the first quarter of 1989.

Net investment income for the three months ended March 31, 1990, totaled $152 million, an increase of eight percent from $141 million reported for

the same period in 1989. Pretax unrealized appreciation in the Company's portfolio of equity securities declined $93 million during the 1990 period and the excess of market value over book value of the Company's portfolio of fixed maturity investments declined $68 million during the quarter to $13 million as of March 31, 1990.

PURCHASE, NY (MAY 1) BUSINESS WIRE - JWP Inc. (NYSE:JWP), a worldwide technical services company specializing in facility and information systems, announced Tuesday that net income for the first quarter of 1990 increased by 41 percent to $11 million compared to $7.8 million in the first quarter of 1989.

Revenues for the quarter increased by 49 percent to $513 million from the $345 million recorded in 1989's first quarter. On a per share basis, earnings for the first quarter increased to 50 cents from 41 cents in the prior year.

As previously announced, on March 7, JWP agreed to acquire NEECO Inc., a leading company specializing in the sale and service of desktop computer systems to corporations.

The acquisition is subject, among other things, to approval by NEECO shareholders at a special meeting to be held May 22. The acquisition of NEECO, when combined with JWP's existing information systems business, will create a major national enterprise providing computers, local and wide area networks and associated value-added services to corporations, institutions and government.

With respect to the court proceeding by the City of New York to acquire the company's water supply properties located in Queens County, a trial began on April 17, before the Supreme Court of the State of New York.

The company's position was presented in direct testimony before the court and certain of its witnesses were cross-examined by the city's counsel.

The trial is scheduled to resume on June 27th and to be completed early in the third quarter of 1990.

JWP is the premier technical services company in the world specializing in facility and information systems. The company is also emerging as a leader in the environmental systems industry, including ownership of the largest-owned water utility in New York State.

CHICAGO (MAY 1) BUSINESS WIRE - Aon Corporation and Blue Cross & Blue Shield United of Wisconsin have formed a new joint venture -- United Heartland, Inc. -- aimed at combating the rising costs of workers' compensation, the two companies announced Tuesday.

United Heartland, Inc. will market a variety of workers' compensation products to employers groups.

The economics of workers' compensation nationally have changed dramatically over the last decade largely due to skyrocketing health care costs. United Heartland, Inc. will provide clients with a new approach to effectively contain costs associated with their workers' compensation programs.

Aon Corporation is experienced in administering workers' compensation benefits and will assist in structuring workers' compensation products for United Heartland. Aon, through a subsidiary, presently offers workers' compensation products, claims management, and safety and loss control systems. Along with this expertise, Aon brings sophisticated computer systems to the Untied Heartland venture.

Wage compensation for disabled workers had until the mid-1980s been the most expensive part of workers' compensation. However, as health care insurance costs have risen, medical care has eaten up a greater portion of the workers' compensation dollar. For example, in Wisconsin in 1980 health care costs were 28 percent of workers' compensation expenses and disability payments were 72 percent. In 1988, health care costs were 52 percent of total workers' compensation costs and disability was 48 percent.

United Heartland will offer workers' compensation products which provide a variety of preferred provider and managed care options. Coordinated case management, preferred clinic network and status reporting will be key elements in controlling health care costs.

Aon Corporation is a diversified insurance and financial services company with assets in excess of $9.1 billion. Blue Cross & Blue Shield United, Wisconsin's leading health insurer, is headquartered in Milwaukee.

#90121b0724 05/01/1990 ~Business Wire
CHELSEA, MA (MAY 1) BUSINESS WIRE - Town & Country Corp. (AMEX:TNC) announced Tuesday that its consolidated net sales for the fiscal year ended Feb. 28, 1990 will be approximately $424 million, up from $240 million a year ago.

The increase is due primarily to the inclusion of full-year results from the L.G. Balfour Co. and Feature Enterprises, acquired in the fourth quarter last year. Net income is expected to be $6.6 million, about even with income of $6.7 million in fiscal 1989. Earnings per share are estimated to be 55 cents compared with 65 cents reported last year. The per share comparisons reflect an increase of 1.8 million Class A common shares outstanding as a result of a second public offering in December 1988.

Fourth quarter revenues of $93 million were flat compared with year-ago results, whereas net income improved from $43 thousand to about $2.8 million. The company reported that the estimated earnings improvement is due to better results in its manufacturing segment. On a per share basis earnings are expected to be 23 cents compared with zero a year ago.

Carey stated that Town & Country's core jewelry manufacturing division reported strong second-half sales in spite of soft economic conditions and a very conservative approach to purchasing on the part of jewelry retailers across the country. The company's Caribbean retail division, on the other hand, continues to experience a substantial decrease in sales due to a fall-off in tourism after the mid-September hurricane.

Town & Country Corp. is an international manufacturer of fine jewelry with facilities in Massachusetts, New York, Texas, Hong Kong, and Bangkok, Thailand. The company's Little Switzerland luxury-products retailing group sells up-scale jewelry, watches, crystal, china and fragrances in duty-free ports of the Caribbean.

DALLAS (MAY 1) BUSINESS WIRE - Texas Instruments (NYSE:TXN) was honored Thursday, April 26, by a major substance abuse prevention organization for its drug-free workplace policies.

PRIDE, the largest organization in the United States devoted to drug abuse prevention through education, presented TI with its corporate award during

the PRIDE World Drug Conference in Orlando, Fla. TI was the first recipient of this national service award.

TI was recognized for its drug-free policy, which is among the most comprehensive in the nation, and for its smoke-free policy. TI U.S. Personnel Director Chuck Nielson accepted the award for the company.

President Virgilio Barco Vargas of Colombia was recognized with the Spirit of Freedom Award, which is given to the individual who has done the most in the last year to fight the illegal use of drugs. PRIDE presented the award to him April 20 in Bogota.

The conference, held April 23-28, is the world's largest gathering of educators, government officials, parents and youth to focus on drug abuse strategies. More than 6,000 people from 60 countries attended the conference, which is in its 13th year.

Keynote speakers include U.S. drug czar William Bennett, U.S. Information Agency Director Bruce Gelb, and Health and Human Services Secretary Louis Sullivan. President George Bush delivered a videotaped address Thursday night.

Texas Instruments Inc., headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials and consumer electronics products.

FRAMINGHAM, MA (MAY 1) BUSINESS WIRE - The board of directors of Dennison Manufacturing Co. announced the promotion of Jacquie D. Arthur, Anthony F. Bova, Gerald P. Hendrick, and John C. McCurrach to senior vice president.

''By this action, we have positioned these four outstanding individuals, with Daniel J. Sullivan, our senior vice president and chief financial officer, as the management team that will begin to lead Dennison into the 1990's and beyond,'' said Nelson S. Gifford, chairman and chief executive officer.

Ms. Arthur, vice president of strategic planning, joined the company as treasurer in 1986, and was elected vice president in 1987. She had previously served as vice president, finance, at British Petroleum North

America.

Mr. Bova, group vice president, systems and packaging, joined the company in 1988 as group vice president, packaging, and in December, 1989 assumed responsibility for the systems segment as well. Before joining Dennison, he was associated with International Paper for 20 years.

Mr. Hendrick, vice president, general counsel and assistant secretary, joined the company in 1986 as vice president, general counsel. Prior to that, he was associated with H. P. Hood Inc. where he served as senior vice president - administration, general counsel and secretary.

McCurrach joined the company in 1989 as group vice president, stationery products, Dennison's largest operating segment. Before joining Dennison, he was with the Mead Corp. for 12 years, most recently as president of its School and Office Products Division.

Dennison is a diversified ''Fortune 500'' manufacturer serving worldwide markets for stationery and office supplies for use in business, school and home; printing systems and fastener products for identification and control; and package decoration systems and materials.

CONCORD, MA (MAY 1) BUSINESS WIRE - For the first quarter ended March 31, 1990, GenRad Inc. reported a net loss of $3,495,000, or 20 cents per share on sales and service revenues of $43,145,000.

That compares with the first quarter ended April 1, 1989 when the company reported income of $961,000, or 6 cents per share on revenues of $49,337,000.

''The quarter was characterized by continued softness in the U.S. market for printed circuit board test systems while exports remained strong, at 56 percent of total sales,'' said Robert E. Anderson, president and chief executive officer of GenRad Inc.

''Sales of low-end systems were slow while we achieved excellent market acceptance of our high-end in-circuit (GR 2286) and performance (GR 2750) board test systems.'' ''We also experienced a significant pickup in orders in the Design Automation Products group which booked its highest orders in the past two years for System HILO 2.0 Logic Simulation Toolkit.'' Orders totaled approximately $48 million, slightly lower than last quarter.

''We slowed shipments to build backlog during the quarter and, as a result recorded our first positive book-to-bill ratio in nine quarters,'' noted Anderson.

As a cost reduction measure during the first quarter, GenRad employees in the U.S. took three days unpaid leave, the equivalent of a 5 percent salary reduction. Asset management in the areas of cash, inventories and receivables remain strong. In addition, recently the company subleased 46,000 sq. ft. of excess facilities in Phoenix, Arizona which will positively impact cash flow next year.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment, to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

NEW YORK (MAY 1) BUSINESS WIRE - Tuesday at PolyGram's first annual general meeting as a public company, shareholders approved the appointments of Jerry Moss, Chris Blackwell and Alain Levy to the board of management of PolyGram NV.

Jerry Moss is chairman of A&M Records, a company acquired by PolyGram at the beginning of this year. He founded A&M in 1962 in Los Angeles with Herb Alpert and has since built the label into a multi-million dollar operation attracting world class stars as Sting, Chris de Burgh, Janet Jackson, Bryan Adams and Suzanne Vega.

Chris Blackwell is chief executive officer of Island Records which was acquired by PolyGram last year. He established Island in 1962 and has built his label into a major concern with an enviable artist roster which includes the best sellling group U2, The Christians and a unique back catalogue that includes the late Bob Marley.

Alain Levy is an executive vice president of Polygram with overall responsibility for popular music and for music publishing as well as direct management responsibility for operations in France and in the United States.

Since his appointment to this position in December 1988 he has played a considerable role in reshaping PolyGram's popular music business. Most

recently he has been acting as chief executive officer of PolyGram's American operations. All three apppointments are effective from May 1st.

CHATTANOOGA, TN (MAY 1) BUSINESS WIRE - Construction of Saturn's new dealer facility in Chattanooga, began Tuesday as Nelson Bowers and company officials broke ground here for the future home of ''Saturn of Chattanooga.''

Joining Bowers in turning the first spade of ground were John T. Michaud, financial secretary of UAW Local 1853 and advisor to Saturn's Sales, Service and Marketing Team, and Philip C. Bradshaw, Saturn field executive for the southern area of the United States.

The ceremony in Chattanooga is the first of two ground breakings to be held by Bowers today. This afternoon, Bowers will begin construction on a Saturn dealership in Nashville, Tenn.

The stand-alone, uniform Saturn dealer facilities will feature new concepts in merchandising and servicing cars including side- by-side sales and service entrances to enhance customer convenience and satisfaction.

Saturn currently has signed franchise agreements with 93 dealers for 102 marketing areas across the United States. These dealers plan to build 121 facilities. The automaker will introduce its cars first on the West Coast Tennessee and the Southeast this fall, followed by a rollout across the rest of the United States.

Paying tribute to the environment and Saturn's Spring Hill, Tenn., home, an area at the site was designated for a Tulip Poplar tree to be planted at the dealership following construction.

While construction of Saturn's dealer facilities is under way in several states, equipment installation and validation of the automaker's new

manufacturing and assembly complex is nearing completion in Spring Hill.

Saturn Corp., an independent subsidiary of General Motors, is based in Spring Hill, and Troy, Mich. The company's mission is to develop, manufacture and market a family of high-quality, affordable cars to compete in the subcompact and compact segments of the market.

Saturn products will be built at a four-million-square-foot manufacturing and assembly complex in Spring Hill. The first cars, two-door and four-door models, will be introduced this fall.

TAMPA, FL (MAY 1) BUSINESS WIRE - Tampa and St. Petersburg, Fla., area consumers who visit their local supermarket or convenience store today will find an innovative addition to their dairy cases when Nescafe Mocha Cooler becomes available.

A refreshingly cold combination of rich chocolate, fresh coffee and 2 percent low fat milk, Nescafe Mocha Cooler is a ready-to-drink beverage that will be available in Tampa on a pilot market basis for the next twelve months. The Tampa Bay area is one of five pilot markets in the United States.

''Tampa area residents are well known for their good taste, and ability to recognize and support unique new products and trends,'' said Angelo Iantosca, vice president of marketing for Nestle Foods Corp.'s coffee/tea division. ''We're confident they'll find that Nescafe Mocha Cooler can be enjoyed anytime, anywhere and any way.''

''With today's stressful lifestyles, every once in a while it's nice to sit back and relax. We believe consumers will find that Nescafe Mocha Cooler helps them take a break, while making their relaxing moments even more enjoyable.''

The introduction of Nescafe Mocha Cooler creates a new segment within the steadily growing ready-to-drink cold beverage category. ''Reflecting America's changing tastes and desire for more unique beverages, sales of cold beverages, low fat milk and chilled juices are at all-time highs. That and the popularity of similar products in Europe and Asia bode well for Nescafe Mocha Cooler's future,'' said Iantosca.

Research conducted by Nestle Foods found that the majority of all consumers who tried the product said they would buy it.

A fully integrated marketing program unique to the dairy industry will support Nescafe Mocha Cooler's introduction. In addition to radio and outdoor advertising, a customized mobile truck will travel to area supermarkets and convenience stores to give out free samples of the product. A variety of special events and promotions are planned utilizing the sampling truck. McCann-Erickson Advertising of New York is the advertising agency for Nescafe Mocha Cooler.

The product's packaging is just as innovative. Palm fronds, island mountains and a blue-green sea will bring eye appeal and added consumer attention to the normally generic looking dairy case. The product will be available in 12-ounce and 32-ounce pure-pack dairy cartons.

Using an advanced processing technology known as ultrapasteurization, Nescafe Mocha Cooler will have a 45-day shelf life.

An 8-ounce serving of Nescafe Mocha Cooler contains, by average analysis, approximately 150 calories, 23 grams of carbohydrates, 7 grams of protein, 245 milligrams of calcium, 100 milligrams of sodium and 390 milligrams of potassium.

Nestle Foods Corp., and the other companies within the Nestle Enterprises Inc. umbrella, have a long history of anticipating and fulfilling consumer desires.

From the introduction of soluble coffee in l938 to recent new product successes such as Nestle Crunch ice cream and Stouffer's Right Choice low calorie and low sodium microwaveable frozen entrees, primary emphasis has always been on providing value-added products linked to real consumer needs.

In addition to Tampa/St. Petersburg, other Nescafe Mocha Cooler pilot markets include Orlando, Fla.; Jacksonville, Fla.; Boston; and Providence, R.I.

CHATTANOOGA, TN (MAY 1) BUSINESS WIRE - Signal Apparel Co. Inc. (NYSE:SIA) Tuesday announced that Walsh, Greenwood & Co. has purchased a substantial equity interest in Signal from two trusts for the benefit of George B. Clairmont and has an option to purchase the remaining interest of the trusts.

The trusts' shares represent approximately 51 percent of the company's total voting power.

The board has been expanded to eight members, three of which are the following: Robert B. Colbert Jr. (formerly Signal's president and chief executive officer), George B. Clairmont and Arnold S. Jacobs.

The other five directors are Roger Holland, (former president and chief executive officer of Champion Products Inc.) who has become president and chief executive officer of the company and Guido Goldman, Paul Greenwood, B. Lance Sauerteig and Stephen Walsh, designated by Walsh Greenwood.

While the Class B option remains in effect, Walsh Greenwood will vote for designees of the Clairmont trusts to three of the board seats and the trusts will vote for the board of directors' nominees for the remaining positions.

Walsh Greenwood paid $4.50 per share for the Class A Shares, $18 per share for the preferred shares and, if the option is exercised, will pay $6.00 per share for the Class B Shares.

Signal Apparel Co. Inc. is engaged in the manufacture and marketing of apparel, including knit sportswear, knit underwear for men and boys, sweaters and knit shirts for men and boys, and women's apparel. The company's common stock is traded on the New York Stock Exchange under the symbol SIA.

NEW YORK (MAY 1) BUSINESS WIRE - The following is a summary of a presentation Tuesday at the New York Society of Security Analysts by David H. Williams, chairman, Alliance Capital Management.

Alliance Capital Management L.P., the leading international investment advisor announced increased first quarter earnings during a luncheon presentation to the New York Society of Security Analysts Tuesday. The current distribution of 40 cents per unit was 5 cents higher than the 1989 first quarter distribution of 35 cents.

During the luncheon presentation, Chairman Dave H. Williams gave an overview of the firm's investment management expertise, placing particular emphasis on its global capabilities and expanding international business development. With a total of $44 billion in assets under management for institutional and individual investors, Williams credited the firms success and consistent above average performance to the experience, stabilitiy and dedication of Alliance Capital's professional staff.

John D. Carifa, executive vice president, chief financial officer and chief administrative officer, presented highlights of Alliance Capital's Individual Investor Services Division, including Cash Management Services and Mutual Funds, and the earnings and distribution history of the firm since its initial public offering on April 21, 1988.

Listed on the New York Stock Exchange (AC), Alliance Capital offers investors high yield, growth and diversification through investment businesses which include institutions, mutual funds, and equities and

fixed income investments both within the United States and internationally.

Alliance Captial Management is a leading international investment advisor, providing investment management services to institutions, primarily pension funds and endowments, and to individual investors thorugh a broad line of mutual funds and cash managements products. Annual reports are available upon request.

SAN ANTONIO, TX (MAY 1) BUSINESS WIRE - Tuesday at Diamond Shamrock Inc.'s Annual Meeting in San Antonio, Chairman and Chief Executive Officer Roger R. Hemminghaus re-emphasized the corporation's commitment to increasing shareholder value while maintaining the highest business ethics.

After discussing highlights of 1989, Hemminghaus told shareholders that several major projects initiated last year were nearing completion and soon would be coming on-line to add strength to the company and increase shareholder value.

He also explained that Diamond Shamrock's commitment to its shareholders, customers, and employees includes operating as a responsible corporate citizen in all respects, including concern for the environment.

Hemminghaus pointed out some of the corporation's existing policies to protect the environment, and emphasized the corporation's commitment to the environment, and concerns about pending Clean Air legislation.

He explained that although estimates vary, the bill will be very expensive costing billions of dollars per year.

Hemminghaus predicted that even though proposed environmental legislation may change the way the industry does business, gasoline in some formulation will continue to fuel society well into the twenty-first century.

Hemminghaus concluded, ''We're optimistic about the future of Diamond Shamrock. The momentum of this company is exciting, and Diamond Shamrock's strong operations and dedicated, innovative employees will continue to strive to provide an outstanding return for our shareholders.''

During the business meeting, Diamond Shamrock's shareholders re-elected Hemminghaus and B. Charles Ames to serve three-year terms on the Board of Directors, ratified the appointment of Price Waterhouse as independent

accountants, and approved the Diamond Shamrock Inc. Long-Term Incentive Plan.

Diamond Shamrock Inc. (NYSE:DRM) is a San Antonio-based regional refiner and marketer of petroleum products with annual sales of approximately $2.1 billion.

RENO, NE (MAY 1) BUSINESS WIRE - NCR Corp. has announced the System 10000 Model 85, which extends the company's System 10000 family of multi-user products at the high end.

The Model 85 was introduced at the annual convention of the Federation of NCR Users (NUCON) held in Reno.

''The Model 85 provides higher availability, expanded connectivity, and improved price/performance,'' said Gilbert P. Williamson, NCR president. Williamson said that it nearly doubles the power of a System 10000 Model 75, which was the previous high end of the System 10000 line.

The new model is comprised of multiple dyadic processors connected via the

NCR-developed SCSI Inter-Processor Bus. Standard features such as sharable communications modules and switchable SCSI peripherals provide high availability.

Systems resources for the Model 85 are controlled by an operator with an ITX Windows PC Console, which provides single-point operation of the multiple processor system.

Model 75 users can upgrade directly to the Model 85.

To facilitate interoperability of the System 10000's ITX operating system within NCR's Open, Cooperative Computing Environment, the company also released several communications products at NUCON. ITX customers will now have the option of using Token Ring and Ethernet TCP/IP, which will allow their systems to work together with NCR Towers, personal computers, NCR 9800 systems and non-NCR products in an enterprise-wide network. Such a network was demonstrated at NUCON.

While both Token Ring and TCP/IP provide connectivity to ITX systems from a personal computer, the functionality of the new connection is different.

With Token Ring, the PC can connect to the ITX system using ITX Windows and perform all the functions of a TTY-connected terminal.

With a TCP/IP TELNET-connected PC, the user can connect to an ITX system as well as to other NCR and non-NCR systems while appearing as a locally attached terminal. The user can also transfer files between those systems thus providing a bridge between the ''islands of automation'' that exist within many enterprises.

Open, Cooperative Computing is NCR's comprehensive product and marketing strategy for helping customers manage change in the nineties.

The Model 85 ranges in price from $485,000 to $600,000.

NCR develops, manufactures, markets and supports business information processing systems for worldwide markets.

HOUSTON (MAY 1) BUSINESS WIRE - Howell Corp. announced Tuesday that its exploration and production unit, Howell Petroleum Corp. (HPC), and HPC's working interest partners have received formal approval from the Minerals Management Service for the unitization of portions of Block 64 and 65,

Main Pass Area, Offshore Louisiana.

HPC is the operator and largest working interest holder of both blocks. The unitization was necessary to facilitate a waterflood of the currently producing 7300' oil sand. Development of the waterflood will commence shortly, with capital expenditures of $6.1 million planned during 1990.

Prior to three acquisitions of additional working interest in both blocks during 1989 and 1990, HPC was the operator of Block 64, in which it owned a 62.5 percent working interest. HPC owned no interest in Block 65. The acquisitions have resulted in HPC owning about an 80 percent working interest in both Blocks 64 and 65, and in the newly approved waterflood unit.

The two acquisitions which were closed during 1990 added about 1.3 million net equivalent barrels of oil (NEB) to the company's reserve base at a total combined purchase price of $4.55 million ($3.50 per NEB).

Howell Corp. (NYSE: HWL) is an energy industry holding company. Through wholly-owned operating units, it is engaged in oil and gas exploration and production, crude oil marketing, technical fuels refining and marketing, custom chemical processing, product terminalling and common carrier bulk liquids transportation of hydrocarbons and chemicals.

PHOENIX (MAY 1) BUSINESS WIRE - The IBM board of directors has elected Stephen B. Schwartz an IBM senior vice president.

Schwartz, who joined IBM in 1957, held a variety of sales, staff, development and management positions before being named vice president of the Display Products Business unit, one of IBM's first business units, in 1978.

He was named vice president, Communications Systems, and General Manager of IBM Kingston in 1980. Schwartz was appointed vice president, Asia Staff Operations, for the IBM World Trade Americas/Far East Corp. in 1981, and was elected an IBM vice president in 1982.

He was named president and chief executive officer of Satellite Business Systems in 1984 and later that year became assistant group executive, telecommunication products.

Named president of IBM's System Products Division in 1985, Schwartz was responsible for IBM's mid-range computer business. In 1988, he was named IBM vice president and general manager, IBM Application Business Systems and a member of the Corporate Management Board. Most recently, he was named IBM vice president, market-driven quality.

In that position, he is responsible for the company's worldwide strategy to achieve total customer satisfaction and zero defects in everything IBM does.

BALTIMORE (MAY 1) BUSINESS WIRE - Along with other underwriters, Howard,

Weil, Labouisse, Freidrichs Inc. has been named a defendant in two class actions alleging misstatements and omissions in the offering documents for taxable municipal bond offerings completed in 1986.

Howard Weil Financial Corporation, the parent of Howard, Weil, Labouisse, Freidrichs, became a subsidiary of Legg Mason, Inc. (NYSE: LM) when it was acquired by Legg Mason in 1987.

The class actions relate to a $200 million offering by the Nebraska Investment Finance Authority, for which Drexel Burnham Lambert Incorporated, Morgan Stanley & Co. Incorporated and Howard, Weil, Labouisse, Freidrichs served as co-senior managing underwriters, and to a $400 million offering by the Memphis Health, Educational and Housing Facility Board for which Drexel Burnham Lambert, Howard, Weil, Labouisse, Freidrichs and Morgan Keegan & Company, Inc. served as co-senior managing underwriters.

Proceeds of the offerings were invested in guaranteed investment contracts issued by Executive Life Insurance Company. Market prices of the bonds have declined substantially following downgradings in ratings of Executive Life's claims paying ability by rating agencies. Howard, Weil, Labouisse, Freidrich's management believes that the class actions are without merit and, along with the other underwriters, plans to defend them vigorously. Similar 1986 bond offerings in which Howard, Weil, Labouisse, Freidrichs participated also have experienced price declines and could result in additional litigation.

Legg Mason, Inc., headquartered in Baltimore, is a holding company which provides securities brokerage, investment advisory and other financial services through its wholly owned subsidiaries.

WASHINGTON (MAY 1) COMTEX - Banking officials said today they have not been able to take advantage of recently expanded securities powers due to excessive regulation, while others caution such restrictions are needed to protect the integrity of the U.S. banking system and federal deposit insurance fund.

At issue is the Federal Reserve Board's ruling on Section 20 of the Glass-Steagall Act and whether this should be viewed as the first step regarding financial services industry restructuring.

The Glass-Steagall Act generally bars banks from securities activities. Under Section 20 of the Act, securities subsidiaries of bank holding companies may engage in a variety of securities activities, so long as the activities do not exceed 10 percent of the affiliate's gross revenues.

In general, bank holding company officials view revenue limitations on the activities of these so-called Section 20 subsidiaries as well as many other restrictions known as "firewalls" place unnecessary constraints on their competitiveness in the market. Conversely, securities industry officials believe firewalls are needed to assure fair competition and to prevent Section 20 firms from benefitting from federally insured deposits maintained by their affiliated banks.

The General Accounting Office, the congressional watchdog agency, stated it is too early to "draw conclusions about Section 20 firms, their benefits, profitability, riskiness and impact on the market, or about the long-term effectiveness of the regulatory system in which the firms operate."

"Firewalls intended to protect the banking system and depositors are inhibiting banks' competitiveness and increasing operating and regulatory costs," A. Rodney Boren, Jr., representing the American Bankers Association, told a House Banking subcommittee. "The Federal Reserve Board's current firewall provisions amount to regulatory overkill."

Richard S. Simmons, testifying on behalf of the Association of Bank Holding Companies, agreed. "The approximately 28 firewalls imposed by the Federal Reserve Board are costly and place unnecessary constraints on the banking industry's competitiveness," he said. "In short, we believe that the firewalls threaten to diminish substantially or eradicate many of the potential benefits of bank holding company securities underwriting."

However, the Independent Bankers Association of America, a trade association representing the interests of community banks, believes the Fed's approach to Section 20 firms is pro-competitive.

"In addition to our safety and soundness concerns we are opposed to proposals like the repeal of the Glass-Steagall Act because it would permit existing banks and non-bank firms to affiliate," said Philip J. Vandingham, president of the IBAA.

Vandingham added such deregulation would lead to the creation of a small number of "universal banks" which would serve large institutions at the expense of small businesses.

The Securities Industry Association says a new structure providing greater protection for the federal deposit insurance system should be a prerequisite to allowing banking organizations to engage in equity underwriting activities.

"As long as banking organizations cloak themselves in the mantle of a federal safety net, taxpayers shouldn't underwrite additional risk by the expansion into underwriting and dealing in securities by those organizations," said Marc E. Lackritz, SIA's executive vice president.

The ABA's Boren, citing the fact that many U.S. banks have extensive securities operations overseas, that many state-chartered banks are exercising insurance powers and the present activities of Section 20 firms, said allowing banks to offer a wider variety of financial services will not create more risk for the federal deposit insurance fund.

"There is no evidence that any of these activities is inherently riskier than traditional banking activities," Boren said.

Boren argues the riskiest of all policies is to do nothing on financial restructuring. "If Congress does not allow banks to compete in the broader market for financial services, banks will continue to lose business to their non-bank competitors as well as to foreign banks," he said. "The inevitable result will be a weaker, less diversified banking system."

JAKARTA (MAY 1) - The Capital Market Executive Authority (Bappepam) has ruled that trading of small share lots on the Jakarta Stock Exchange (JSE) be made through appointed odd lot dealers at prices pegged to those of the market.

The Bappepam ruling, which takes effect Wednesday, also restricted odd lot transactions - those involving fewer than 500 shares - to JSE trading hours, press reports quoted Bappepam chairman Marzuki Usman as saying.

Observers said the regulation was apparently intended to prevent small amount share buyers, often erratic traders, from influencing share prices.

The ruling will limit each odd lot dealer to handle transactions on three particular listed issues, with each issue to be traded by at least two odd lot dealers, press reports said.

The JSE currently trades in 74 listed shares.

Under the ruling, the odd lot prices should be priced at no more than two per cent above or below market prices.

It also frees block sales - trading of 10,000 shares or more - to be conducted at the non-regular exchange with a price margin of five percent above or below market prices.

#90121d5320 05/01/1990 ~French/German News Agency

KARACHI (MAY 1) - As donkey and camel carts give way to the motor car in Pakistan, Japanese automobile firms seem to have the growing market to themselves, with Toyota, Mazda, Suzuki and Isuzu fighting for their share.

For the former U.S. president Lyndon Baines Johnson the camel carts of Karachi were an exciting experience during his visit here some 25 years ago.

LBJ was so fascinated that he invited camel cart driver Bashir Ahmed, who waved at him, to Washington, where he was given a Ford truck.

But Fords are no longer the favourite make in Pakistan now, and Japanese Prime Minister Toshiki Kaifu, due to visit the country Wednesday, can draw satisfaction from the fact that Japanese cars fill the streets of Karachi, Lahore, Peshawar and Islamabad.

The Suzuki van has replaced the horse-drawn "tonga" for short distances between cities and outlying villages, as well as being the cheapest form of transport for inter-city runs.

As local demand for economy cars escalates by 20 percent yearly, Toyota, Mazda and Isuzu have jumped in to set up assembly and manufacturing plants.

Pakistan last year imported 60,246 automobiles, mostly from Japan, as against 49,596 vehicles arriving in 1988, representing a 21 percent increase in imports of all sorts of vehicles, business sources said.

Suzuki vehicles, partly assembled here, are the most popular, followed by Toyota, Mazda, Honda, Mitsubishi and Hino.

In 1989, Pakistan imported 42,788 Suzukis in knocked down condition for assembly, followed by 7,715 Toyotas.

Prime Minister Benazir Bhutto laid the foundation stone of an integrated 50,000-unit manufacturing plant of Suzuki vehicles here late last year, underlining her policy of " self-reliance" and industrialization.

#90121d5440 05/01/1990 ~French/German News Agency

TAIPEI (MAY 1) - Eva Airways Corp., Taiwan's only private international airline, is to establish offices in Hanoi and Ho Chi Minh City to pave way

for opening air routes between the island and Vietnam, Eva's General Manager Hsu Jui-yuan said Tuesday.

Eva, a wholly owned subsidiary of the Taipei-based Evergreen Group which runs the world largest container shipping fleet, signed an aviation agreement with Vietnamese authorities in late 1989 to secure landing rights, Mr. Hsu said.

The planned offices in Vietnam's capital and Ho Chi Minh City, formerly Saigon, would be set up this year, said Mr. Hsu, who returned last week from a business trip there.

Eva, formed in April last year, is planning to inaugurate a weekly Taipei-Ho Chi Minh City flight early next year after formal go-ahead from Taiwan's Communications Ministry, he said.

The Taipei government last year allowed direct trade, transportation and telecommunications links with communist-ruled Vietnam after a 15 year ban.

The airline has ordered 26 passenger jets worth 3.6 billion U.S. dollars for delivery from 1992.

In addition to Vietnam, Eva has acquired landing rights in Thailand, Austria and Malaysia and was expecting government approval to open services to those countries, Mr. Hsu.

The Evergreen Group was planning trips to China to inspect the shipping and air transportation market on the mainland in June now that the Taipei government has eased a four-decade ban on business visits there.

The authorities in Taipei, who were ejected from the mainland by the communists in 1949, still claim sovereignty over the whole of China.

#90121d5950 05/01/1990 ~French/German News Agency

TOKYO (MAY 1) - The Bank of Japan (BOJ) will implement the biggest internal reforms in its 109-year history to reflect changes in the domestic and international financial markets, bank officials said Tuesday.

"This change is intended to strengthen our function as a central bank amid dramatic changes in the financial and economic environment at home and abroad," a BOJ statement said.

The BOJ, one of the main central banks among major industrialized nations - along with the U.S. Federal Reserve and the West German Bundesbank - said the changes, which mainly involving reorganising bank departments and cutting their number from 18 to 16, will take effect May 28.

The principal features of the reorganization include a merger of overseas research functions into a newly created international department to survey global economic developments.

The BOJ also plans to set up a representative office in Washington, supplementing those in New York, Frankfurt, London, Paris and Hong Kong.

An office in Hong Kong will be upgraded to a chief representative office status to follow economic developments in Asia and Oceania.

The London chief representative office follows Europe, Africa and the Middle East, while New York monitors North and South America.

In the new credit and market management department, the bank relations division and the capital markets division will oversee the activities of financial institutions both at home and abroad.

A financial and payment system department will be established to maintain "a safe and sound financial system" in the face of increasing deregulation, globalization and computerization, the bank said.

Other changes include the establishment of an operations department to oversee all settlements of funds and securities transfers, and upgrading the information services to the general public and the media.

CAIRO (MAY 1) - Fourteen Islamic fundamentalists were killed and four wounded during clashes with police, the press reported Tuesday.

The violence erupted on Monday after police tried to arrest three brothers - members of the fundamentalist Takfir wal Higra movement - who killed their father for urging them to change their ways and surrender to the authorities.

The attempted arrest sparked clashes in which the three brothers and 11 other people died and four were wounded. The incident was in the village of Kahk near Fayyoum about 100 kilometers (60 miles) from here.

Last April, two fundamentalists were killed during a similar incident in the same region. One was suspected of setting fire to a church in the nearby village of Sanhour and causing the death of a policeman.

Another village near Fayyoum, Senoures, was the scene last month of attacks against the Christian Coptic community.

The Takfir wal Higra group, which was active in the 1970s and seemed to decline in recent years could be making a comeback, analysts said.

It was implicated in the 1979 murder of Mohammad al-Dahabi, Egypt's minister for religious affairs.

SINGAPORE (MAY 1) - Singapore's trade deficit narrowed to 100 million dollars (53.5 million U.S.) in March from a 1.3 billion dollar deficit (0.7 billion U.S.) in February, official figures released Tuesday showed.

The Trade Development Board (TDB) said that compared to March a year ago, imports rose 11.1 percent to 9.6 billion dollars (5.1 billion U.S.) while exports climbed 18.3 percent to 9.5 billion dollars (5.0 billion U.S.).

Singapore's total trade grew 14.6 percent from the same month a year ago to 19.1 billion dollars (10.2 billion U.S.).

The United States, European Community, Malaysia and Japan continued to be the republic's major markets, the TDB said.

TOKYO (MAY 1) - Sales of new motor vehicles in Japan rose 5.4 percent from a year earlier to 465,400 in April for the first single-digit gain in 13 months, the Japan Automobile Dealers Association said Tuesday.

The slowdown was due to unseasonably brisk sales in April last year when high commodity taxes on motor vehicles and other luxuries were replaced by an across-the-board three-percent consumption tax, the association said.

It added, however, the total was the highest for any month of April.

Sales of passenger cars totaled 335,000 in April, up 0.1 percent, and those of trucks 127,800, up 22.1 percent. Sales of buses rose 29.1 percent to 2,500.

BANGKOK (MAY 1) - The Cambodian Government has devalued its currency 65 percent from 218 to 360 riels for one U.S. dollar, the official Phnom Penh news agency SPK said Tuesday.

SPK, monitored here and citing a recent National Bank announcement, said

the official exchange rate was now 590 riels to the British pound, 210.53 to the Deutsche mark and 2.31 to the Japanese yen.

The Phnom Penh government was installed by Vietnam after it invaded Cambodia 11 years ago to oust a Khmer Rouge government.

It has since been fighting a resistance coalition that joins the Marxist Khmer Rouge with two non-communist factions loyal to Prince Norodom Sihanouk and former prime minister Son Sann.

SYDNEY (MAY 1) - Australia's largest bank, Westpac Banking Corporation, said Tuesday it would form a joint venture in Indonesia with P.T. Pan Indonesia Bank Ltd.

Stuart Fowler, Westpac's managing director, said in a statement the two institutions had signed a memorandum of understanding and hoped to open the banking venture by October 1.

Westpac, which has had a representative office in Jakarta since 1972, will hold 85 percent of the equity in the new bank, he said.

Pan Indonesia has 61 offices in Indonesia, making it among the top privately-held foreign exchange banks there.

SEOUL (MAY 1) - South Korea suffered a trade deficit for the fourth consecutive month in April, but sluggish exports showed signs of a slight recovery, the Trade and Industry Ministry reported Tuesday.

Commodity exports rose by 3.8 percent last month to 4.966 billion dollars, bringing the aggregate total for January-April to 18.869 billion dollars, a 0.1 percent rise from the same period last year.

Imports increased 11.5 percent to 5.356 billion dollars in April, totalling 21.201 billion dollars since the beginning of the year.

The ministry report said the trade deficit amounted to 2.332 billion dollars during the four-month period, already surpassing the government's yearly trade deficit calculation of two billion dollars.

It added that exports of such items as footwear, iron-steel products, ships, machinery were picking up, while sales of textile products and automobiles continued to be sluggish.

#90121d6890 05/01/1990 ~French/German News Agency
SEOUL (MAY 1) - More than 100,000 workers downed tools as thousands of radical students fought hand-to-hand battles with riot police in South Korea on Tuesday, May Day, to protest a government clampdown on labor unions.

Several thousand radical students threw Molotov cocktails at tear-gas firing riot police in a downtown area in Seoul in the early evening.

Police meanwhile continued to occupy the Seoul headquarters of the Korean Broadcasting Service (KBS), which was raided overnight as police launched a floor-by-floor search for union leaders, workers there said.

"Everyone here is scared. Things are getting very serious and they don't want to get on a black list," said a KBS journalist on the telephone from the occupied building.

More than 2,000 riot police late Monday raided KBS and broke up a 19-day strike, rounding up 330 striking employees. Sources said however that authorities had only arrested two of the five major KBS union leaders.

In the southeastern industrial city of Ulsan, tens of thousands of workers rallied peacefully while around 2,000 workers in other parts of the city fought running battles with riot police.

Violent clashes have taken place countrywide since dawn Saturday, when riot police raided the country's largest shipyard in Ulsan to break up a three-day occupation by workers.

The government accuses the KBS union, which is demanding that a new network chairman appointed in April by President Roh Tae-Woo step down, of inciting the shipyard workers to strike.

Eight Hyundai subsidiaries, including 20,000 workers at the South Korea's largest automaker, Hyundai Motors, went on strike Tuesday to protest Saturday's raid at the Hyundai Heavy Industries shipyard.

An estimated 20,000 Hyundai autoworkers defied a police ban and gathered to chant slogans and to demand that the some 12,000 police be withdrawn and that 18 arrested shipyard workers be released.

"Hyundai colleagues unite, drive out the police forces," they chanted.
About 120 hard-core holdouts entered into their fourth day of occupation of an 82-meter (270 foot) high crane in the middle of the Hyundai Heavy Industries shipyard.

Students backing the workers took to the streets in almost every major city.

In Seoul, thousands of students pelted police with Molotov cocktails at Yonsei and Sogang universities, while at Eiwha Women's College an estimated 800 female students also fought the police.

Police fired volleys of teargas into the colleges to contain the demonstrators, at times fighting hand-to-hand, but did not enter the campuses.

Hundreds of riot police fought pitched battles with an estimated 3,000 students in the Shinchon district. Other squads patrolled strategic points of the city in preparation for sudden demonstrations expected after nightfall.

Tens of thousands of students in the major provincial cities of Chonan, Chonju, Taejon and Taegu also fought running battles with the police, attacking local police substations and Hyundai offices with rocks or firebombs, the national Yonhap news agency said.

Even in the southern island province of Cheju, a holiday retreat called the Hawaii of Korea, some 500 students also clashed with police, Yonhap said.

The Labor Ministry said it had sent officials to factories and plants across the country to threaten union leaders with criminal prosecution if they struck on May Day.

Information Minister and government spokesman Choi Byung-Yul issued a terse statement saying "the legal order of the nation must be upheld by all means."

ISTANBUL (MAY 1) - More than 380 people were arrested here Tuesday and 14 people injured in a violent May day clash between demonstrators and security forces, the Anatoly news agency said.

Fourteen people were injured in the fighting, including two demonstrators with gunshot wounds, and seven policemen, the agency said.

A young woman student from Ankara was said to be in serious condition in hospital after being shot twice in the back.

Demonstrators defied an offical ban and continued their rally in early afternoon.

TEHERAN (MAY 1) - Iran threatened Tuesday to halt any further efforts aimed at freeing Western hostages in Lebanon unless the United States responds with a reciprocal gesture toward Teheran.

The warning came a day after the release in west Beirut of Frank Reed, a 57-year-old American school director kidnapped there September 9, 1986.

Mr. Reed, handed over to U.S. authorities in Damascus, arrived earlier Tuesday at the U.S. Rhein Main military base in West Germany, where he was to undergo de-briefing and medical checks.

Iran maintained that his release was the fruit of extensive negotiations between Teheran and his kidnappers, a previously unknown group calling itself the Islamic Dawn Organization.

Mr. Reed was set free eight days after the release of another U.S. hostage, Robert Polhill, also held by a pro-Iranian Lebanese faction. Immediately after Mr. Polhill's liberation Iran appealed to kidnappers to free a second American to test the good intentions of the United States.

"The Islamic Republic used its maximum power and credibility for the release of the hostages," said an editorial Tuesday in the Teheran Times newspaper,
considered a mouthpiece for President Ali Akbar Hashemi Rafsanjani.

"Naturally, without an appropriate response from the West, there is no chance for the continuation of Iranian mediation and requests," wrote the English-language daily.

But initial reactions from Washington to Mr. Reed's release appear unlikely to satisfy Iranian leaders and do not reflect any softening in the U.S. position, according to analysts here.

The test of wills between Teheran and Washington could therefore impose a freeze on further hostage releases, for which the Iranian media have already held the United States and its Western allies responsible.

As they did following the release of Mr. Polhill, U.S. officials on Monday were much warmer in their expressions of thanks toward Syria than Iran, reiterating that six other Americans held in Lebanon must also be set free.

U.S. President George Bush, asked Monday if he were now prepared to make a goodwill gesture toward Iran, asserted there could be no return to normal relations, nor any "vast improvement ... until all Americans are free."

But for the Teheran Times, the latest releases "showed that Lebanese Moslem groups are fully prepared for the resolution of the hostage crisis in the shortest time possible.

"From the viewpoint of the Islamic Republic of Iran, which put in months of hard effort, something miraculous has happened."

Iran, as the Teheran Times recalled, wants the United States to use its influence to secure the release of Lebanese detained by Israel, notably Sheikh Abdel Karim Obeid, a Shiite dignitary kidnapped by Israeli troops in southern Lebanon last July.

Teheran also wants the release of four Iranians kidnapped in Beirut in 1982,
but whose fate remains uncertain.

Committed to an ambitious economic recovery program, Mr. Rafsanjani is in addition hoping that Iranian initiatives on the hostage question will lead to the recovery of some 11 billion dollars in Iranian assets frozen in the United States since 1979.

Recovering the money could serve to silence his hardline critics, who reject any overtures to the West.

The government's displeasure therefore with Washington's response to Iranian efforts on behalf of the hostages reflects a conviction that the Bush administration is not making the task of an embattled moderate such as Mr. Rafsanjani any easier.

LONDON, ENGLAND (MAY 1) - The Co-operative Bank, one of Britain's smaller deposit-taking banks, has said it is raising its base rate one percent to 16 percent with effect from Tuesday.

The bank's decision was unexpected, as Britain's banks generally follow the lead of the Bank of England's intervention rate, which has stood at 15 percent since October 5.

A Co-op spokesman said that the bank had raised its base rate as it was expecting a further rise in interest rates.

Analysts said the decision also reflected the specific situation of the Co-op bank, which offers high interest rates on clients' deposits.

The Manchester-based bank's loan portfolio totals some 1.9 billion pounds

(3.1 billion dolars).

The three-month interbank rate on the British money market Tuesday morning stood at 15.375 percent, up from 15.3125 at Monday's close.

NEW DELHI (MAY 1) - Separatists and tribal militants have shot dead seven people in the Indian state of Assam, whose home minister left for New Delhi on Tuesday to discuss the breakdown of law and order in Assam.

Gunmen from the United Liberation Front of Assam (ULFA) shot dead an engineer, Ganesh Dubey, and his 18-year-old son, at their home in the heart of Guhawati city overnight Monday, the Press Trust of India (PTI) reported.

The ULFA is a self-styled left-wing group fighting to set up a "sovereign, socialist" Assam, an oil-rich state situated in India's northeast on the border with Bangladesh and Bhutan.

PTI said that tribal activists from the All Bodo Students Union (ABSU) also shot dead five rivals and injured nine in two separate attacks in Assam late Monday.

The ABSU, which is not aligned with the ULFA, is fighting for the division of Assam and the creation of a separate homeland for Bodo tribals, alleging discrimination by the state government.

Assam's Home Minister Bhirgu Kumar Phukan Tuesday left for New Delhi to discuss the increasing lawlessness across the state with federal Home Minister Mufti Mohammed Sayeed, PTI said.

MUNICH, WEST GERMANY (MAY 1) - The West German airline German Wings, established just over a year ago, has ceased operations and filed for bankruptcy, the company announced Tuesday.

The management issued a statement saying that negotiations with a ''major European airline'' about buying a share in German Wings had failed. The identity of the potential partner was not revealed.

German Wings flew six Md83 jets between Munich, Cologne, Hamburg, Frankfurt and Paris. It offered passengers more comfort and better service than the national carrier, Lufthansa, while charging the same fares.

But too many seats remained empty because German Wings could not compete with the schedules of established carriers. Attractive takeoff and landing ''slots'' are all assigned to Lufthansa and other major airlines.

According to unconfirmed figures, the airline, which began operating April 1, 1989, lost nearly 60 million marks (35.3 million dollars) by year's end.

It had been speculated last month that British Airways could buy a 70 million mark (41.2 million dollars) share in German Wings by raising its current capital of 42.5 million marks.

Some 45 percent of the capital is held by the publishers Franz and Frieder Burda, 40 by airline managers Christian and Peter Kimmel, and 15 percent by Bavarian Investment Co. (Bub) of Munich.

SINGAPORE (MAY 1) - The labor movement Tuesday reaffirmed its relationship with government and employers so that Singapore will continue to be politically stable and do business, according to a May Day resolution.

The resolution, adopted by union leaders and more than 10,000 workers representing the island nation's 260,000-strong unionised work force, also pledged to improve the economic status of Singaporeans.

Among other things, the resolution called on managements to invest more in automation and training, attract more women into the work force and extend the retirement age to 60 and beyond.

The resolution was adopted at a special May Day rally led by the National Trades Union Congress secretary-general Ong Teng Cheong, who is also second deputy prime Minister.

#90121d7380 05/01/1990 ~French/German News Agency

LONDON (MAY 1) - For the managers and patrons of Britain's 21,500 public drinking houses owned by the country's five largest brewers, May Day could be remembered as the start of the beer-lover's revolution.

Under new government regulations which went into effect throughout the country on Tuesday, Britain's brewing giants must now allow their pub managers a free hand in choosing a new "guest" beer to complement the line of brews already on offer from the owners.

The new order, aimed at boosting competition in the brewing industry and

resulting from a recent inquiry by the Monopolies and Mergers Commission, has many of Britain's jaded pub managers flush with the prospect of free choice.

"Everybody wins," said Harvey Knight, manager of the Hoop and Grapes pub which is part of the Courage brewery chain.

"The customer wins because he has a wider choice of beers, and maybe just the one he's looking for. We win because hopefully the better choice we can offer will bring more customers in," he said.

The effects of the new regulation, to be monitored by the government's Office of Fair Trading, are expected to be felt most by Britain's small independent brewers which now have new outlets for their products.

A number of those brewers, whose self-proclaimed virtue lies in the quality of their product rather than in the quantity, cropped up in recent years as a result of the Campaign for Real Ale in Britain. Some are now finding it difficult to remain solvent and hope the new measures will give them a boost.

For their part, the Campaign for Real Ale welcomed the introduction of the new regulations as a "real opportunity" for the country's independent brewers and has called on pub managers to take full advantage of their new right.

Britain's powerful breweries are, predictably, less enthusiastic about the new rules.

"We accept it, what else can we do?" said Barry Clark, spokesman for Whitbread brewers which owns 4,200 public houses around the country.

#90121d7420 05/01/1990 ~French/German News Agency

CAIRO (MAY 1) - President Hosni Mubarak begins an official visit to Syria on Wednesday that is expected to consolidate renewed ties between the Arab world's leading moderate and one of its most committed hardliners.

It will be the first visit by an Egyptian head of state to Syria in nearly 13 years, a period during which Damascus routinely denounced Egypt's peace overtures to Israel.

The two states on December 27 renewed diplomatic ties, severed in 1977 following former Egyptian President Anwar Sadat's controversial trip to Jerusalem in November of that year.

Syria has recently begun to soften its stand on eventual Arab-Israeli peace

negotiations after realizing it cannot attain military parity with Israel, according to analysts here.

The adjustment reflects changes in Syrian ties with the Soviet Union, which for years has been Syria's main arms supplier but is now cutting back on sales to former key clients.

Mr. Mubarak is expected to try to reconcile Syrian leader Hafez al-Assad with his Iraqi counterpart Saddam Hussein after years of friction, exacerbated by Syria's support for Iran in its eight-year war against Iraq.

Arab diplomats here said Damascus had agreed to a meeting between the Syrian and Iraqi leaders on condition that Mr. Assad would not be asked to apologize for his ties to Iran.

The Egyptian president will also try to heal a rift between Mr. Assad and Palestine Liberation Organization Chairman Yasser Arafat, who fell out in 1983 over approaches to settling the Middle East conflict.

#90121d7460 05/01/1990 ~French/German News Agency

GEISA, East Germany (MAY 1) - East and West Germany's fast-fading border is soon to gain a new memorial in the form of a modernistic steel-and-glass rainbow planned by a 41-year-old West German artist.

Josef Knecht, who has also become the first person to rent one of the ugly watchtowers which formerly staked out the border, describes his plan as "a symbol of freedom and hope."

The 50-metre- (165-foot) long strip of steel and reflective glass will arch 20 metres (66 feet) across part of the border near the watchtower, which Mr. Knecht plans to turn into a museum.

The arch, which has been authorized by the East German government and is being paid for by sponsors and the Western state of Hesse, will be floodlit at night to bring out its rainbow colours, Mr. Knecht says.

The artist, a veteran of "happenings" and other works of "performance art," briefly made headlines in September 1987 when he asked the then East German leader Erich Honecker to donate one square metre (10 square feet) of his country's land to art. Unsurprisingly, the request was turned down.

Mr. Knecht, who lives near the town of Werdha in Hesse, has chosen to build his arch at what was previously the most heavily-militarized point along the former "Iron Curtain" between East and West.

The Wiesenfeld region in Thuringia province is opposite the West German

town of Fulda and marks the most westerly location at which Warsaw Pact forces are deployed.

Many of the sinister watchtowers and barriers are being demolished, but Mr. Knecht plans to keep his for posterity -- and his museum.

From the end of this month the 12-metre- (40-foot) high structure will house an exhibition of works by "East and West German artists who have a feeling for the border, or who have made it a theme," he says.

Mr. Knecht says the rainbow structure is a tribute to the mediaeval German scholar and agitator Thomas Munzer, who preached an early form of religious communism.

The arch, which is to cost some 300,000 Deutsche marks (175,000 dollars), is expected to be completed in three months.

Meanwhile all around, the slow job of demolishing the former barriers and watchtowers goes on under the benevolent gaze of the once-feared Grenztruppen,
 or East German border police.

The force, which used to shoot dead people who tried to escape across the barbed wire to the West, now directs people to the many crossing points, and is controlled by the interior ministry rather than by the army.

"We help the traffic in the interests of the people," said Grenztruppen Lieutenant-Colonel Hartmut Kueken.

However he sternly added that the companies busy tearing down the Iron Curtain did not get the materials for free, as they belonged to the state.

This view got short shrift from a young man and his grandfather, who were busily loading chunks of concrete onto a trailer near the site of Mr. Knecht's rainbow arch.

"Pay for this?" they said incredulously. "No way. They've given us enough trouble for the past 40 years."

#90121d7480 05/01/1990 ~French/German News Agency

THE HAGUE (MAY 1) - The Netherlands reduced its trade surplus to zero in February, with exports and imports balancing out at an identical 18.4 billion guilder (9.5 billion dollars), the economy ministry said Tuesday.

Imports were up eight percent over February last year, while exports grew only three percent.

The February figures took the Dutch trade surplus for the first two months of the year to 500 million guilder (277 million dollars), less than a third the 1.7 billion guilder (944 million dollars) level in the same period last year.

The Netherlands' trade surplus totalled 7.6 billion guilder (4.2 billion dollars) last year.

#90121d7540 05/01/1990 ~French/German News Agency

NEW DELHI (MAY 1) - Finance ministers and representatives from the Asian Development Bank's (ADB) richest member countries met here Tuesday for preliminary discussions on a replenishment of the bank's soft lending arm.

However, delegates in the closed-door meeting said there were few results and no timeframe was agreed at the initial session.

A bank working report circulated to delegates indicated that some 10.4 billion dollars could be needed to meet developing members' concessionary loan needs in the four years from 1992.

However, donors were sharply divided on this figure, with most Western delegates saying that it was far too high while Japan argued that a steep increase was needed to meet growing regional needs.

The current Asian Development Fund (ADF) has raised 3.6 billion dollars from donor countries since 1987, although about one billion dollars remains unspent,
 bank officials say.

The fund is expected to be depleted by the middle of next year and officials from the bank's treasury department want to start potentially controversial talks on refinancing it well in advance.

India is pushing for a share of this fund's surplus and a larger share of the next fund. The bank's Board of Directors has agreed in principle to the demand, according to India's ADB director D. Bandyopadhyay.

China is also expected to apply for funds from the next replenishment.

If either or both of these two Asian giants are given access to the funds, they could seriously deplete the money available for smaller borrowers.

Bank officials say this is the main reason for the working paper's sharply inflated estimate of funding required for the next replenishment.

Japan's ADB director Shoji Mori said after Tuesday's meeting that no concrete agreements had been reached but there had been "some progress" on a timeframe for talks.

However, U.S. director Victor Frank -- visibly annoyed by the discussions -- repeated his country's position that the talks were not yet necessary as the fund would last well beyond the end of this year.

#90121d7550 05/01/1990 ~French/German News Agency

GENEVA (MAY 1) - Swiss group Societe Generale de Surveillance (SGS), the world's leader in product inspection and checking, decided Tuesday to reform its statutes to adapt to the internationalisation of world markets.

The board will ask shareholders at the annual general meeting in June to approve the abolition of all current restrictions in company statutes on transfer of registered shares.

This would mean that the shares would be freely saleable and could be bought without a ceiling on the percentage stake acquired and without any conditions, particularly nationality requirements, SGS said in a statement.

The June annual meeting will also vote on a capital increase through the issue of 15,000 new registered shares, which will be mainly reserved for the board, SGS said.

SGS, which employs some 22,000 people worldwide, had a net profit last year of 155.3 million Swiss francs (97 million dollars), up 24.6 percent on the 1988 level.

#90121d7660 05/01/1990 ~French/German News Agency

SIBASA, SOUTH AFRICA (MAY 1) - More than 150 prisoners in South Africa's Venda tribal homeland forced warders temporarily to free them Tuesday and marched to military headquarters to present a list of grievances, the South African Press Association reported.

The prisoners had forced warders at Matatshe Central Prison near here to open "well-guarded gates," officials told SAPA, and had then marched five kilometres (three miles) to see the leader of military-ruled Venda, Colonel Gabriel Ramushwana.

Col. Ramushwana heard the group demand a commuting of their sentences and also complaints about warders' heavy-handed treatment, according to SAPA.

He had told them the issues would be addressed Wednesday.

The prisoners, at their request, had been transported back to the prison after the meeting.

A spokesman for Venda's Department of Justice said in a statement the grievances had been brought to officials' attention last Friday, but had been "unfortunately ignored" as "one of those things."

Venda, which fell to a coup on April 5, has for months been torn by industrial action and general defiance of authority in the face of official intolerance of unionism or public dissent.

#90121d7670 05/01/1990 ~French/German News Agency

LAGOS (MAY 1) - Nigerian workers were Tuesday forced to observe May day without the usual pomp and peagentary, following the banning of the annual rally by the government.

The ban was a result of the jolt that followed the recent coup attempt in the most populous African nation.

Fourteen military officers and 200 other ranks have already been arrested in connection with the abortive putsch.

A number of civilians have also been arrested, following government's

announcement last week that the plot was sponsored and financed by ''some very rich and powerful people outside the military''.

Also in detention are 14 journalists, including two editors, while a leading private newspaper, The Punch, has been sealed up for the third day running following what security agents considered unfavourable reporting over the abortive coup.

The banning of the May day rally and the clamp down on the press have drawn serious criticisms from the Nigerian labour congress and the Nigeria Union of Journalists, who say the government's action is ''repressive and a curb on press freedom''.

#90121d7700 05/01/1990 ~French/German News Agency

LONDON (MAY 1) - British industry is likely to axe thousands of jobs in a bid to remain competitive in world markets, after years of a steady fall in unemployment, the national businessmen's organisation warned here Tuesday.

"Many thousands of jobs will be lost as companies seek to reduce their unit costs to remain competitive in world markets," said David Wigglesworth, chairman of the Confederation of British Industry's (CBI) economic situation committee in a study on the manufacturing industry.

CBI economist Andrew Sentance said that some 54,000 jobs were about to be lost in industry.

Only 11 percent of the firms consulted by the CBI said they were expecting to take on workers in the next four months, against 34 percent who were planning to cut jobs.

Some 38 percent said they had already cut back their workforce in the past four months, and 48 percent said they were working at below full capacity.

Unemployment has been falling steadily in Britain for the past 44 months, and is down to 5.6 percent or 1.6 million people of the available workforce.

#90121d7770 05/01/1990 ~French/German News Agency

WASHINGTON (MAY 1) - The United States suspects South Africa of sponsoring bombing attacks against black nationalist leaders in neighboring countries in 1989, the State Department said.

In its annual report on terrorism, released Monday, the department also noted that South African police had been linked publicly to "death squad"

killings of two prominent opponents of the white-minority Pretoria regime.

Those two anti-apartheid leaders are David Webster, killed May 1 in Johannesburg, and Anton Lubowski, a white official of the South West Africa People's Organization assassinated September 10 in Namibia.

The report, entitled "Patterns of Global Terrorism," said South African agents were also alleged to be responsible for the murder of three members of the African National Congress (ANC) in Swaziland in February 1989.

The report added, however, that "the cycle of violent repression by the South African Government and violent resistance by the black opposition abated" during 1989.

It said "the political climate improved after newly installed President (Frederik) de Klerk began allowing peaceful political protest and initiated feelers to the ANC that may lead to formal negotiations."

But efforts to reach political accommodation "do not completely eliminate the possibility of further violence by ANC militants, South African right-wing extremists or vigilante groups," the report said.

SANAA (MAY 1) - The South Yemeni authorities Monday agreed to send 10,000 troops into North Yemen to help quell tribal disturbances that erupted near the border with Saudi Arabia, reliable sources said here and in Aden.

The sources said North Yemeni President Ali Abdallah Saleh made a lightning visit to Aden early Tuesday to request military assistance from South Yemen to stop the troubles in the northwestern region of Saa'da.

North Yemeni troops were Tuesday trying to assume control in Saa'da, the sources said. They said the troubles began recently but gave no details.

There have been frequest clashes in the past between rebellious tribes and North Yemeni government forces along the border with Saudi Arabia.

Tribal unrest has been persistent in the northeastern Maareb region, where a truck convoy was recently attacked and destroyed, diplomats here said.

The troubles and appeal for aid came as the two Yemens prepared to announce a unified state by the end of the year.

#90121d7830 05/01/1990 ~French/German News Agency

DHAKA (MAY 1) - Japanese Prime Minister Toshiki Kaifu said here Tuesday that his country sought special ties with south Asian nations.

A senior Japanese official quoting Kaifu, told a news conference that Japan wanted to deepen relations with south Asia and was ready to extend assistance to the South Asian Association for Regional Cooperation formed by Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan and Sri Lanka four years ago.

Shigeo Takenaka, spokesman for the Japanese prime minister, said economic relations with south Asian nations were growing and had reached a new peak in recent years.

Takenaka quoted Kaifu as saying that Japan wanted to develop special ties with south Asia.

Kaifu, who arrived in Dhaka Tuesday from New Delhi on the second leg of his Asian tour, pledged 31.2 billion yen (210 million dollars) in concessionary loans to Bangladesh for 1990 during formal talks with President Hussain Muhammad Ershad.

The Japanese leader is expected to fly to Islamabad on Wednesday and from there to Sri Lanka and Indonesia before returning home.

#90121d7850 05/01/1990 ~French/German News Agency

JAKARTA (MAY 1) - Japan said Tuesday that a rescheduling of Indonesia's foreign debt, placed at some 50 billion dollars, would have an automatic affect on the level of Japanese investment here.

"We haven't received any request from the Indonesian government for rescheduling, and that's good," Michihiko Kunihiro, Japan's ambassador to Indonesia, told reporters.

Japan is the largest foreign investor in Indonesia.

"If the private sector comes to know that the government is not paying (its debt) ... they will not come to Jakarta," he said.

The idea of rescheduling the debt, 40 percent of which is denominated in yen, was floated two weeks ago by Hamzah Haz, vice president of the National Assembly's budget commission.

The proposal was rejected by Finance Minister Johannes Sumarlin, who said Indonesia should maintain its image as a "good payer."

A Western economist here said the current monetary situation is "on the

whole, favorable to Indonesia," which demands payment for exports in U.S. dollars while repaying Japan in yen.

He said the yen's weakening against the greenback was in fact giving "a breath of fresh air" to the local economy.

"You can't see why the government would all of a sudden decide to reschedule its debt," he said.

Mr. Kunihiro, who was speaking at a news conference devoted to the visit here by Japan's Prime Minister Toshiki Kaifu on Friday, also said that aid to be given by Tokyo to East European countries was "not to affect aid here ... Indonesia has its own importance."

Mr. Kaifu was to meet Saturday with Indonesia's President Suharto to discuss aid, trade and investments, as well as to exchange views on international and regional issues, particularly Cambodia, Mr. Kunihiro said.

Japan is Indonesia's top trading partner. Exports to Japan of products such as petroleum, gas and wood climbed to 11 billion dollars in 1989, representing 43 percent of the annual total.

Jakarta imported 3.3 billion dollars worth of Japanese products, such as metals and chemicals last year.

KABUL (MAY 1) - Elections could be held before the end of the year in Afghanistan if Washington would drop objections to President Najibullah's candidacy, a senior member of the ruling party said Tuesday.

A shift in U.S. policy is essential to end the 11-year-long war in which more than a million people have died, said Najmuddin Kawyani, 42, a politburo member of the Moscow-backed People's Democratic Party of Afghanistan (PDPA).

Mr. Kawyani called Washington's continued support to the Afghan resistance after the Soviet troop withdrawal from the country "a serious mistake" and likened it to Moscow's Afghan policy 12 years ago.

"The Americans are unnecessarily getting involved in Afghanistan. They are now making the same mistake that (late Soviet president Leonid) Brezhnev made," Mr. Kawyani said, referring to the dispatch of Soviet soldiers into Afghanistan in December 1979.

"Depending on the United States' policy, it is possible for us to hold

elections in Afghanistan by the end of the year," he told a group of foreign journalists at the PDPA's top-security headquarters here.

However diplomats here said that organizing an election in the fragmented nation would be "a formidable task to say the least," and one commented that at least a year would be needed to prepare for nationwide polls.

Mr. Kawyani said Washington, which supports the Pakistan-based mujahedeen position that President Najibullah should be barred from standing for office, should put pressure on the resistance groups to agree to a peace dialogue without preconditions to end the dragging conflict.

The mujahedeen consider Mr. Najibullah, who came to power in 1986 before the Soviet troop withdrawal, as a Soviet puppet.

"There should be the participation of all forces sympathetic to peace," Mr. Kawyani said. "There shouldn't be any preconditions. It is our recommendation that there should be a direct dialogue with all parties to the conflict. This includes the present regime."

Mr. Kawyani, who is also a member of the country's supreme defence council and the politburo member in charge of international affairs, rejected the U.S. position that Mr. Najibullah should step down after launching a peace dialogue.

#90121d8000 05/01/1990 ~French/German News Agency

SINGAPORE (MAY 1) - First Deputy Prime Minister Goh Chok Tong said Tuesday that Singapore can sustain an average growth rate of four to six per- cent over the next 10 years because the international economic scene was peaceful.

Goh, however, warned that a labor shortage was the only serious factor that could restrain the island-nation from forging ahead.

''Prospects for good economic growth for Singapore and other Southeast Asian nations are bright as there are some favourable factors as well,'' he said.

''These include a more peaceful international scene and the move to transform planned economies into market economies which means expanded opportunities for investment and trade,'' he said.

Speaking at a special May Day function, Goh said the United States remained committed to the Western Pacific ''which means the region will remain stable.''

''With a stable U.S. economy and Singapore's good relations with Malaysia and Indonesia, the future is bright for all of us in this region,'' Goh added.

MOSCOW (MAY 1) - A man who tried to bomb Lenin's Tomb in Red Square on Saturday was born in the Lithuanian republic, the Soviet trade union newspaper Trud said Tuesday.

It identified him as Kasimir Almazov, born in 1941, but did not specify if he was living in Lithuania, currently subject to an economic blockade by Moscow over its declaration of independence in March.

The government daily Izvestia, which first reported the incident Monday, said the man refused to give his name and had no identifying papers on him when he was arrested after hurling two home-made bombs at the monument.

His only comment was: "What I did says everything".

The devices started a fire, but authorities quickly put it out.

Troud said psychiatrists had examined Mr. Almazov and found him normal.

Lenin's mausoleum, located outside the Kremlin, contains the embalmed remains of the founder of the Soviet Union. Millions of Soviet citizens file past the closely guarded site each year.

#90121d8040 05/01/1990 ~French/German News Agency

LONDON (MAY 1) - British conglomerate BAT Industries said Tuesday it had bought up 4.2 percent of its capital since announcing a restructuring plan to fight off a 13 billion pound (21 billion dollars) hostile takeover bid in September.

BAT said in its annual report that it had acquired 63.75 million shares at a cost of 690 million pounds (1.12 billion dollars), out of a total 153 million it had been authorised to acquire by shareholders.

The restructuring was announced to fight off the hostile bid by the Hoylake consortium led by Sir James Goldsmith.

The bid expired before the U.S. authorities had ruled on the sale of BAT's U.S. insurance interests, and Hoylake has said recently that it will not renew it.

DAMASCUS (MAY 1) - Syria Tuesday denounced the United States for branding certain Arab countries as sponsors of terrorism while ignoring the excesses of Israel in the occupied territories.

"Washington moves promptly when the Arabs are concerned, making arbitrary and unjustified accusations of terrorism, but remains blind before the acts of terrorism carried by Israel in the occupied territories," Damascus Radio said.

"Since the creation of Israel, the United States has never adopted a single equitable position on the Arab-Israeli conflict," the official radio added.

It also underlined the "unlimited danger" posed by the "closing of U.S. borders to Soviet Jewish emigres" now flooding into Israel.

Syria was among six countries listed in an annual U.S. State Department report Monday for allegedly sponsoring terrorism.

The report said that while there was no evidence of Damascus involvement in terrorist attacks outside Lebanon since 1987, "both Syria and Syrian-occupied areas of Lebanon... remain sanctuaries for a wide variety of international groups that have engaged in terrorism."

The list also included Libya and South Yemen among Arab countries, as well as Iran, North Korea and Cuba.

It was announced shortly after President George Bush publicly thanked Damascus and Teheran for helping gain the release of U.S. hostage Frank Reed,
who had been held in Lebanon since September 1986.

#90121d8190 05/01/1990 ~French/German News Agency
LONDON (MAY 1) - British defence electronics group Ferranti International victim of an alleged false contracts fraud, warned Tuesday that it would be forced to write off substantial assets this year.

Chairman Eugene Anderson told the annual general meeting that "write-offs of assets of a trading and extraordinary type will be very substantial."

Mr. Anderson, who took over at the head of Ferranti at the beginning of this year, would not give further details, but the announcement sent Ferranti shares down 2.5 pence to 41.5 pence in London, after firming up in recent days on hopes that the worst was over for the group.

The new chairman said that a recovery plan had been drawn up and that he would be holding talks with banks.

Ferranti uncovered an alleged false contracts scandal last year involving its U.S. subsidiary International Signal and Control and totalling some 215 million pounds (360 million dollars).

It has begun legal action against some former ISC figures in the hope of recovering at least part of the money, but has also sold off a significant part of its assets to rebuild capital and reserves badly hit by the fraud.

Analysts have estimated Ferranti's losses in the year to the end of March at around 50 million pounds (83 million dollars).

HO CHI MINH CITY (MAY 1) - More than 2,000 Amerasian children left Vietnam last month for the United States, 15 years after the end of the Vietnam War, a U.N. official said here Tuesday.

The United Nations High Commissioner for Refugees official said 5,850 people, including 2,004 Amerasians, left Vietnam in April as part of a program for legal departures, called the Orderly Departure Program.

Most of the offspring of Vietnamese mothers and American fathers have had trouble being accepted by Vietnamese society, especially in southern cities.

"It is necessary to add to that group a little less than a thousand former civil servants or officers of the southern regime who left in April under an agreement between the United States and Vietnam, signed in Hanoi last August," the official said.

The figures are the largest since the end of the war, said the official who forecast that some 65,000 people would leave the country in 1990, an increase of about 40 per cent over the previous year.

The U.N. official said Vietnamese authorities had "considerably" softened their attitude toward such departures "which are not running into any more major obstacles."

"The official hazings have practically disappeared except for the top executives who ask to leave and automatically lose their jobs," he said.

"As for the Amerasians, no one including the Vietnamese and the Americans know their exact numbers," he said. "New ones are discovered every day in

the provinces."

The young from the provinces are placed in a U.S.-built center in Ho Chi Minh City, formerly Saigon, for the duration of interviews conducted by U.S. immigration teams from Bangkok.

As soon as they leave Vietnam, the Amerasians, their mothers and immediate family are directed to the Bataan center in the Philippines where they spend six months, primarily to learn English before going to the United States.

While Amerasians are often rejected by Vietnamese society, the U.N. official said some in the countryside are "well integrated and have no plans to leave."

#90121d8290 05/01/1990 ~French/German News Agency

EINDHOVEN, Netherlands (MAY 1) - Dutch utility vehicle maker DAF said Tuesday it was expecting to make of loss of 20 to 30 million guilder (10 to 15 million dollars) in the first half of this year, down from a profit of 74.5 million in the same period last year.

DAF had said when it published its 1989 annual results in March that it was expecting a lower profit in the first half of this year than for first half 1989.

The firm's downward revision of its prospects led to the shares being suspended from trading on the Amsterdam stock market Tuesday afternoon.

But DAF said in a statement that it expected to show a profit for the year as a whole.

DAF made a net profit of 171.7 million guilder (85 million dollars) last year on turnover of 5.3 billion (2.7 billion dollars).

The company attributed its current poor performance to uncertainties over the pound, high British interest rates and falling demand for vehicles in Britain and to a lesser extent in France.

HARARE (MAY 1) - Students and trades unionists seized advantage of May Day celebrations here Tuesday to demonstrate against President Robert Mugabe's scheme to introduce a one-party state.

The Zimbabwe Confederation of Trade Unions boycotted the festivities

entirely in protest against the plan.

Scores of students entered Rufaro stadium, where ceremonies were held, and unfurled banners reading "Workers Say No to One-Party Dictatorship" and similar slogans.

Youth brigades from the ruling ZANU party dispersed them peacefully.

The union confederation earlier advised its members not to exhibit their wares on stands set up around the stadium, as they usually do, in protest against the single-party scheme.

Confederation General Secretary Morgan Tsvangirai, addressing reporters, alleged authorities interfered in his organization's preparations for the holiday by forcing it to leave out a banner saying: "No One-Party State in Zimbabwe".

Mr. Mugabe meanwhile defended his project in a speech, saying: "My philospohy is, let us differ in one house, one family".

Many countries, including African states, which had abandoned the single-party system had done so only because of pressure from aid donors, he said. There had been "a financial threat and not a fundamental change of heart".

Mr. Mugabe has wanted to abolish party pluralism for years. He called ZANU's victory in last month's elections a popular vote of support for his plan.

In the May Day speech, Mr. Mugabe also renewed criticism of strikes by health workers, which, he said, the government opposed and were illegal.

"Strikes for higher wages or other forms of improvement in conditions of service, without any apparent consideration of the adverse consequences of such actions on other people or the nation as a whole, should surely be put to an end."

#90121d8320 05/01/1990 ~French/German News Agency

JERUSALEM (MAY 1) - The leader of a Jewish extremist group was Tuesday jailed for five months for killing a Palestinian and seriously wounding a second on the West Bank.

The Jerusalem district court handed down the verdict, including a seven-month suspended sentence, after convicting Rabbi Moshe Levinger, head of Gush Emunim (Bloc of the Faithful), of "homicide through criminal negligence."

Rabbi Levinger was accused of shooting dead a Palestinian, Kaid Salah, and seriously wounding a second, Ibrahim Bahli, with a revolver in the centre of the West Bank town of Hebron on September 30, 1988.

He was also charged with insults and looting Palestinian traders' stalls.

His conviction on the homicide through negligence charge was the result of plea bargaining, judicial sources said.

Rabbi Levinger, whose group demands the annexation of the West Bank and backs efforts to establish Jewish settlements there, starts his term in two weeks.

#90121d8380 05/01/1990 ~French/German News Agency

LONDON (MAY 1) - Several people were arrested Tuesday in connection with investigations into efforts to ship to Iraq steel tubes which British officials say are part of a huge gun, customs officials said.

"A number of people are being interviewed, some of whom have been arrested today," a customs spokesman said.

But he would neither confirm nor deny that officials of Sheffield Forgemasters, the British company which manufactured the eight steel tubes seized by customs last month, were among those arrested.

A spokesman for Sheffield Forgemasters confirmed that customs agents had "visited" the company earlier in the day and said "six executives of group companies have been asked to make statements at local police stations."

Customs agents last week arrested Christopher Cowley, a British scientist said to have close links with the Brussels-based Space Research Corporation

suspected of playing a key role in having the tubes shipped to Iraq.

Mr. Cowley was remanded in custody after appearing before a Sheffield magistrate last week.

WASHINGTON (MAY 1) - The United States has suspended its Peace Corps program in Liberia due to escalating fighting between the government and rebels who are closing in on the capital, U.S. officials said Tuesday.

A State Department official said 79 of the 135 Peace Corps volunteers assigned to Liberia had left the country as of late Monday and the remainder were scheduled to quit the country Wednesday.

Two Peace Corps staffers will remain in Liberia to monitor the agency's program, which involved education, rural development and health projects, a Peace Corps official said.

The State Department official also confirmed that about 280 of the 500 U.S. diplomats and dependents stationed in Liberia left the country over the weekend and more were due to return home this week.

The State Department last week authorized non-essential diplomatic personnel and their families to leave Liberia as fighting intensified between government forces and an estimated 3,000 rebels who launched a bid to topple President Samuel Doe December 24.

But the official Tuesday stressed that "there are no immediate plans to order an evacuation" of remaining U.S. personnel. She could not say how many essential embassy staff would remain in the country following this week's voluntary departures.

Monday, U.S. officials in Monrovia said that more than half of the 5,000 U.S. citizens living in Liberia had left the country amid reports that the rebels had pushed to within 100 kilometers (60 miles) of the capital and were poised for an assault on the city.

But the State Department official denied reports that the government had arranged special charter flights for the fleeing Americans and said U.S. nationals, like other foreigners, had been leaving on commercial airliners.

#90121d8540 05/01/1990 ~French/German News Agency

CARTAGENA, COLOMBIA (MAY 1) - The navy seized 600 kilos (1,350 pounds) of pure cocaine stashed aboard a double-bottom Colombian fishing vessel bound

for the United States, naval authorities said Tuesday.

Three Colombians were arrested aboard the "Sandra," which was boarded by navy personnel Sunday in Caribbean waters near the Rosario islands, where the presidential weekend retreat is located, an official statement said.

The cocaine was wrapped in plastic bags and hidden under a double bottom under the deck, the statement added.

There was no word on who was responsible for the drug shipment. But officials did not rule out the powerful Medellin drug cartel, which is currently waging a bloody war against the government.

#90121d8580 05/01/1990 ~French/German News Agency

WASHINGTON (MAY 1) - China has sent a large shipment of weapons to Khmer Rouge guerrillas fighting the Cambodian government, despite U.S. entreaties not to do so, the New York Times said Tuesday.

The Times quoted administration officials as saying the Chinese government had sent mortars, rifles, machine guns, rocket launchers, howitzers, field guns and other heavy artillery.

In a series of trips to Beijing earlier this year, senior U.S. officials asked the Chinese government not to aid the Khmer Rouge because of their past abuses.

More than one million people died in a Khmer Rouge genocide during its rule in Cambodia between 1975 to 1978.

Deputy Secretary of State Lawrence Eagleburger said the United States had asked China ''on a number of different occasions'' to end arms shipments to the Khmer Rouge, although it has praised China for aiding non-communist factions led by Norodom Sihanouk and Son Sann.

The permanent members of the U.N. Security Council have held three rounds of talks on a cease-fire and political settlement in Cambodia, but the talks have failed.

#90121d8760 05/01/1990 ~French/German News Agency

PORT OF SPAIN (MAY 1) - Two of four Americans arrested here Friday aboard a yacht have pleaded guilty to weapons charges, officials in the capital of Trinidad said Tuesday.

The other two Americans pleaded innocent.

All four were denied bail and remanded in custody when they appeared Monday before Chief Magistrate Melville Baird in the Port of Spain District Court.

The yacht's captain, Lewis Norris of New York, and his female companion, Benedict Dunleavy, pleaded guilty to charges of failing to declare firearms they were carrying on the vessel - an AK-47 assault rifle and a 12-gauge Winchester shotgun - as well as hundreds of rounds of ammunition.

The two who pleaded innocent were identified as Kevin Rudd and Jeanne Marie Gibbins.

According to police reports, their 18-meter (60-foot) yacht "The Tempest" left Miami in February on a Caribbean cruise, stopping off at the U.S. Virgin Islands, Antigua and Grenada before arriving in Trinidad April 11.

#90121d8830 05/01/1990 ~French/German News Agency

WASHINGTON (MAY 1) - Bank of Credit and Commerce International, the Luxembourg-based bank whose takeover by the Abu Dhabi government was announced Tuesday, was exposed as a key money-laundering operator in a two-year probe by police and monetary authorities in Britain, France and the United States.

That probe, dubbed Currency Chase, culminated in an October 1988 indictment in which BCCI was charged with having used its U.S. subsidiaries to launder Colombian drug barons' money.

Nine officials of the bank, as well as 76 other individuals, were also charged in the affair in which BCCI was accused with having laundered some 32 million dollars' worth of drug money on behalf of the Medellin Cartel.

Among the bank officials wanted by the United States is the former head of the BCCI's Panama operations, Amjad Awan, accused of being the personal banker of ousted Panamanian strongman Manuel Antonion Noriega. Mr. Noriega is currently being held in Florida awaiting trial on drug-related charges, including money laundering.

For its part, BCCI pleaded guilty in January, in a Tampa, Florida court, to money-laundering and was placed on probation for five years and ordered to forfeit 14 million dollars.

The sentence was part of a plea bargain reached between the bank and prosecutors just before the trial was due to begin.

BCCI also agreed to cooperate with investigators in their ongoing probe.

The indictment against CCI was a turning point in the U.S. battle against drug-trafficking, officials here said.

The bank was the largest financial institution, worth more than 20 billion dollars with operations in 72 countries, to have been accused of laundering drug money, they noted.

It was also the first time that cooperation between U.S. and European Customs authorities had revealed such a large-scale money-laundering operation involving a global network.

Investigators said the bank's global network was key to the operation.

They said the scheme involved the depositing of money in the United States by traffickers based in New York, Chicago and Los Angeles. The funds were then transferred to such places as France, Britain and the Bahamas and converted into certificates of deposit.

Other BCCI branches then provided loans to Latin American traffickers and those loans were then repaid with the certificates of deposit.

U.S. undercover customs agents posing as criminals seeking a means to launder their own narcotics revenues were able to penetrate the powerful Colombian drug rings. In 1987, they got in touch with BCCI representatives and opened accounts with different BCCI branches.

#90121d8850 05/01/1990 ~French/German News Agency

Kuwait (MAY 1) - Candidates continued Tuesday to register for the June 10 election of the Kuwait National Assembly, bringing their number to 83 in two days.

The Kuwait News Agency quoted an interior ministry official as saying the 83 candidates registered in 23 of the 25 constituencies to fill 50 seats of the assembly which was dissolved in 1986.

The registration, started Monday and running to May 9, continued despite a boycott by the opposition led by former assembly speaker Ahmed al-Sadoun, who termed the elections as unconstitutional.

Kuwait ruler Sheikh Jaber al-Ahmed al-Sabah, who dissolved the assembly citing threats against the country's unity, announced April 22 the revival of the parliament through electing a transmitional four-year National Assembly.

The new assembly will have 75 members, 25 of whom will be government appointted while the rest will be elected.

#90121d8870 05/01/1990 ~French/German News Agency

MOSCOW (MAY 1) - Some 260 delegates founded a parallel parliament in the Latvian capital Riga Tuesday to try to restore constitutional bodies set up during Latvia's brief independence, nationalist sources said.

The republic was an independent nation from 1922 until 1940 when Stalin annexed it.

A resolution adopted by the fledgling Congress of Latvian Citizens said the organization was ready to participate in "international negotiations on the withdrawal of Soviet armed forces from Latvia".

Extracts of the text, received in Moscow, also called for "the election of a legal parliament for the republic".

The resolution was passed late Monday, the first day of the two-day meeting.

According to the official Soviet news agency Tass, delegates to the Congress of Latvian Citizens were chosen in elections open only to residents of the republic who had Latvian nationality before Stalin annexed Latvia in 1940.

It said they represented "less than a quarter of the republic's population".

However nationalist sources said the delegates represented the Latvian population.

A similar congress was formed recently in neighbouring Estonia, which was also annexed in 1940. Its goal is to take over gradually from the local Soviet Supreme, or parliament, considered by nationalists to be an illegal institution.

Tass said many ethnic Russians living in Latvia telephoned the local television station and expressed concern over the emerging nationalist congress. They also asked "How do we leave Latvia?", Tass said.

Unlike Lithuania, the third Baltic republic, where native Lithuanians form 80 percent of the population, Latvia's population is only 54 percent indigenous.

Russian-speakers -- including ethnic Russians, Byelorussians and Ukrainians -- form 41 percent, and ethnic Poles three percent.

Lithuania's official parliament declared independence on March 11, leading Moscow to impose an economic blockade.

#90121d8890 05/01/1990 ~French/German News Agency
BAGHDAD (MAY 1) - Iraq is ready to host an emergency Arab summit to discuss security threats facing the Arab world, Foreign Minister Tareq Aziz said Tuesday.

In a message to Arab League secretary general Chedli Klibi, he said Baghdad was "in favour of an emergency Arab summit to examine and resolve the threats facing the (Arab) nation's security."

Mr. Aziz, whose message was carried by the official Iraqi News Agency, invited Mr. Klibi to visit Baghdad to prepare the summit.

Palestine Liberation Organisation chairman Yasser Arafat has lodged a formal request with the Arab League for an emergency summit to discuss "the dangers of Jewish immigration in the occupied territories and threats made against Iraq."

Iraq has come under fire from the West for allegedly trying to procure devices for nuclear weapons and other powerful arms. Baghdad has denied the charges saying they were aimed at justifying an attack by Israel on Iraq.

Ten countries in addition to the PLO, out of 22 Arab League members, have officially approved the proposal for a summit, which Mr. Arafat has said should be held in Baghdad.

Though a quorum for the meeting has been reached, several key Arab League members, including Egypt and Syria, have not yet endorsed the gathering.

Iraq and Syria, ruled by opposing wings of the Baath Party and long-standing rivals in the Arab world, have had no relations since October 1980 after Damascus made clear its support for Iran in the Gulf war.

The Qatar-based newspaper Al Arab, citing a Palestinian diplomatic source,

reported Monday that the summit would take place May 15 in Baghdad, and that diplomatic efforts were under way to convince Mr. Assad to attend.

BELGRADE (MAY 1) - Albania remains committed to the socialist path, the country's hardline leader Ramiz Alia said in a May Day speech reported by

the official news agency ATA.

For Tirana, "the struggle along the socialist path is the only alternative and the only guarantee of its freedom and its independence," he said at Korce, in south-eastern Albania.

Albania "is looking for a solution totally different to that of the countries of the East (bloc)," he said in the speech monitored here.

LOS ANGELES (MAY 1) - A mathematician with a brain tumor said Tuesday he was prepared to let his body die but has filed a lawsuit to have his head quick-frozen to be thawed when a cure for the tumor is found.

Thomas Donaldson, 46, said he wanted his head quick-frozen while he was still alive, using a process known as cryonic suspension. He hopes once a cure is found his head will be attached to a healthy body.

"I am dying and want to be cryonically suspended so that I might later be revived and continue to live," said Mr. Donaldson, of Sunnyvale, California. He is a member of the Alcor Life Extension Foundation.

He filed suit Monday seeking to bar state and local officials from preventing his cryonic suspension before he is declared legally dead.

Advocates of cryonics say waiting for legal brain death hurts patients' chances of successful reawakening. But so far, the procedure has been performed only after a patient has died of natural causes.

Alcor grabbed headlines in 1987 when the head of an elderly woman was frozen after she died at the lab. Authorities questioned whether her head was removed before she died.

Mr. Donaldson makes no bones about it. He is aiming for immortality and thinks his chances aren't too bad.

"We think that everyone should be immortal. The purpose of medicine should be to bring about that immortality," he said.

The procedure would involve being anesthetized while his body temperature is reduced. Alcor surgeons then would replace his blood with glycol and other chemicals to minimize tissue damage caused by freezing.

The head would be surgically removed and then sealed in a container and maintained at minus 160 Centigrade (minus 320 degress Fahrenheit.)

The operation for the head costs 35,000 dollars while a full body suspension goes for 100,000 dollars.

Mr. Donaldson pursued the cryonic solution after radiation treatment for his tumor, discovered in 1988, failed to have any effect on it. Although the tumor is stable, court paper said, he has only a for 40 per cent chance of living to August 1993.

TOKYO (May 1) - The number of Japanese factories in Europe increased 28.7 percent last year, reaching 529 in January compared with 411 a year earlier, a study by the Japan External Trade Organization (JETRO) said Tuesday.

Britain came out on top of the places chosen by Japanese firms, with 132 businesses choosing to manufacture there, followed by France with 95, West Germany with 89, Spain with 55, the Netherlands with 34 and Italy with 28, according to the recent JETRO report.

Electronics and electronic equipment was the most chosen sector of Japanese manufacturing, with 139 such firms setting up shop in Europe compared to 83 chemical product plants. In mechanics, 66 new factories opened up and there were 38 new spare parts factories for the transportation sector.

The study, the sixth of its kind, was made with the 18 member countries of the European Economic Community (EEC) and the European Association for Free Trade.

The survey "revealed that a large number of Japanese makers are pursuing globalization strategies by establishing themselves in Europe, where they foresee expanded opportunities for business when the EEC is integrated in 1992," JETRO said.

JETRO said European countries "generally take a positive stance regarding the presence of Japanese makers," but demands for increased local contents were being strengthened.

The institute also said 77 Japanese factories make electronic components and parts for the transportation industry.

The local content in Japanese production of spare parts and materials in Europe will rise from an average 51.2 percent at the end of 1989 to 67.2 per cent, the study said.

Some 73 Japanese research and development offices have also opened in Europe.

In Europe, the average Japanese factory has 11.1 million U.S. dollars in capital, employs 346 people, including six expatriate Japanese, and does 61.8 million dollars in business annually, the study said.

SAN FRANCISCO (MAY 1) - Former Argentine general Carlos Suarez Mason has been ordered to pay 89 million dollars in damages to torture victims and relatives of people killed by forces under his command from 1976 to 1979.

Mr. Suarez Mason, however, is in jail and awaiting trial in Argentina where he was extradited to in 1988 after his arrest, the year before, in the United States.

He fled to the United States before the military junta in Argentina (1976-1983) was replaced by a democratically elected government. Several top military leaders were later tried and jailed for the thousands of killings and kidnappings which took place under their rule.

U.S. District Judge Lowell Jensen Monday ordered Mr. Suarez Mason to pay eight million dollars in damages to two former Argentinians now living in Alexandria, Virginia, whose relatives were tortured and killed when he was in command of the First Army Corps.

In earlier rulings, the judge had ordered Mr. Suarez Mason to pay 21 million dollars to a lawyer who had been tortured repeatedly during four years of illegal imprisonment, and another 60 million dollars to relatives of three murder victims.

The plaintiffs sued for damages under laws allowing legal action against a any foreigner who is accused of human rights abuses and comes at any point under U.S. jurisdiction.

Mr. Suarez Mason is believed to possess hidden wealth, but lawyers for the plaintiffs have been unable to locate it.

JERUSALEM (MAY 1) - Israeli police fired tear gas to break up a May Day march in Arab east Jerusalem Tuesday, arresting 40 Palestinian trade unionists, Palestinian sources said.

The police moved in to disperse the 100 demonstrators after coming under attack by stone-throwers, the sources said.

The sources said 35 of those arrested were released later with a warning, including Shaher Sahed, the secretary general of the Palestinian trade union federation in the occupied West Bank and Gaza Strip.

Only a few thousand people throughout Israel and the occupied territories celebrated May day, mostly supporters of left-wing opposition groups.

Three thousand people marched in the West Bank town of Nazareth and two thousand in Tel Aviv in response to a call by the communist Hadash party.

In a separate development, Israeli troops shot and wounded six Palestinians in clashes in the Gaza Strip where a two-day curfew was lifted in all areas expect the Jabaliya refugee camp, reports from the region said.

WARSAW (MAY 1) - Poland wants a bigger voice at the forthcoming "Two Plus Four" talks on German reunification, British Foreign Secretary Douglas Hurd said here Tuesday.

The four Allied Powers -- the United States, Soviet Union, Britain and France -- and two Germanies have agreed that Poland can take part in the talks when the issue of Germany's eastern border comes up.

But in addition to the border question, "there are other areas of concern to Poland," Mr. Hurd told a news conference.

He cited the "link", according to Warsaw, between the Soviet troop presence in East Germany and in Poland.

He promised to pass on the Polish message to his counterparts when the meeting begins at foreign minister level in Bonn Saturday, saying a way must be found for Poland's interests to be represented.

The ministerial talks are to touch on how Poland can participate at the negotiations on "external aspects" of German unity, scheduled to run for the rest of the year.

#90121d9430 05/01/1990 ~French/German News Agency

BUCHAREST (MAY 1) - Romania's interim government Tuesday dismissed a threat by the opposition to withdraw from upcoming elections, but offered to discuss organizational problems to do with the electoral campaign.

The main opposition parties complained of "systematic and organized" harassment of their campaigns a day earlier. They said their rallies had

been attacked and their candidates beaten and in some cases murdered.

They also called on the government to delay the elections, Romania's first free vote in more than four decades, scheduled for May 20.

They accused the ruling National Salvation Front of monopolizing unlimited resources left over from the Ceausescu regime, citing funds, technical equipment, and an unchanged administration, "including the machinery of repression".

In a communique, the government replied: "the electoral law does not empower the government to organize talks to resolve political disputes".

However "any suggestions and flaws in the (campaign) organization reported by the legal representatives of parties and political formations can be discussed with representatives of the government".

Separately, Interior Minister Mihai Chitac said his department was impartial and its staff "dedicated defenders of law and order".

He made the statement in a communique carried by the official Rompress news agency.

General Chitac said his ministry was committed to maintaining "a climate of public order and peace necessary for the process of democratization to proceed normally" in Romania.

WEST BERLIN (MAY 1) - Police used water cannon and teargas to disperse masked demonstrators who attacked them with stones and damaged property and buildings in West Berlin's Kreuzberg district late Tuesday at the end of a street party.

Police, who have long been girding for such a confrontation in an area which has seen many such clashes in the past, said no permission had been given for the party.

They had kept it under helicopter observation during the afternoon and early evening, and moved in when the young masked demonstrators began causing trouble.

Police later said 50 people had been arrested - mainly young foreigners. Several people had climbed onto roofs in order to throw rocks at police.

Crowbars had also been distributed among demonstrators to lever out cobble stones to throw at police.

#90121d9560 05/01/1990 ~French/German News Agency
NICOSIA (MAY 1) - Libya Tuesday accused Washington of double standards on the hostage issue, expressing surprise that U.S. President George Bush thanked Syria and Iran after the release of American Frank Reed.

The official JANA news agency, monitored here, said the United States was "distributing thanks to some and accusations to others."

It noted that Washington had criticised Paris for praising Libyan leader Moamer Kadhafi after his call led Palestinian extremists to free French hostage Jacqueline Valente, her Belgian companion and their daughter on April 10.

The agency also expressed surprise that Mr. Bush had thanked Syria and Iran for Mr. Reed's release Monday while the same day the two countries along with Libya were listed by the U.S. State Department as sponsors of terrorism.

JANA said it wondered "whether Mr. Bush ignores the reports of his administration," adding that Washington "has no right to exert its authoritarianism according to the mood of its Zionist-linked politicians."

Mr. Reed was released in Beirut by his pro-Iranian Lebanese kidnappers after three-and-a-half years in captivity.

Mr. Bush thanked Syria and Iran for helping to secure the release but said the United States would not rest until the remaining six Americans held in Lebanon were freed.

#90121d9830 05/01/1990 ~French/German News Agency
WASHINGTON (MAY 1) - The United States Tuesday said it would grant political asylum to as many as 700 Vietnamese children and youths now in refugee camps in Southeast Asia.

Commissioner Gene McNary of the Immigration and Naturalization Service (INS) said the INS would begin interviewing applicants this month.

The young people, unaccompanied by parents or adult relatives, were under the age of 18 when they reached the refugee camps, although some are today in their early 20s, according to the INS.

The first of those granted asylum are expected to arrive in the United States in July, with the balance here by year's end, the INS says.

"Their lives are in suspension and it seemed like an appropriate time to go back and re-interview those people in the most generous manner," said Ralph Thomas, deputy assistant INS commissioner for refugee asylum and parole.

"We anticipate that the large bulk of them will be admitted as refugees," he added.

Some of the 700 have relatives living in this country. Many others have families still living in Vietnam, including fathers who fought in the South Vietnamese army during the Vietnam War that ended 15 years ago.

Since the war ended, more than one million Vietnamese refugees have been admitted to the United States.

Most of the children and youths to be interviewed are living in refugee camps in Thailand, the Philippines, Indonesia and Hong Kong.

Mr. McNary said he hoped the initiative would encourage other nations to implement the Comprehensive Plan of Action, an international agreement for resettling Indochinese refugees.

PARIS (MAY 1) - New fighting between government forces and Libyan-led troops on Chad's eastern border with Sudan has left some 70 enemy troops dead, according to a provisional toll issued Tuesday by the Chadian embassy here.

The embassy statement, which did not make it clear whether the fighting took place inside Chad or in Sudan's Darfur province, also said a Libyan "refuge" had been destroyed in the clashes on Monday.

It added that some 45 prisoners had been taken.

Chad has in recent weeks accused Libya of sending its Islamic Legion -- a unit made up of non-Libyan recruits -- into eastern Chad via Darfur Province.

#90121e0002 05/01/1990 ~Latin America New Agency

LIMA (MAY 1) EFE - A severe drought expected to last for another four months has left millions of Peruvian homes and factories without water or electricity for most of the day and has brought industry in some areas to a standstill, officials said.

In the capital, a number of neighborhoods are without water supplies for up to 18 hours a day, while electricity, supplied mainly by the country's hydroelectric plants, is being cut for up to 12 hours a day.

Those worst hit in Lima by the drought have been the inhabitants of the numerous shanty towns which surround the capital, where some 60 per cent of the city's 7.5 million population live.

Municipal authorities have been working with state water company and civil defense officials to install temporary water deposits in these areas, where the majority of homes lack water or sewage installations.

Civil Defense chief Gen. Jorge Ferreyros said Monday that he had asked 12 international organizations to send urgent aid to help Peru deal with the consequences of the drought, which according to metereological reports could last until September.

Some 1 million peasant farmers across Peru are reportedly also going hungry after loosing crops through the drought.

National Industrial Society official, Francisco Martinotti, said Monday that electricity rationing is affecting some 40,000 businesses and that in the south of the country industry has been brought to a standstill.

Hydroelectric plants supply Peru with some 80 per cent of its electricity.

The emergency situation has also been exacerbated by Peru's Maoist "Shining Path" guerrilla group which regularly attacks power installations as part of its decade-old insurgency.

According to the state water company SEDAPAL, around 43 per cent of Lima's water is lost due to the deteriorating condition of supply pipes and poor installations in homes.

Both presidential hopefuls, Mario Vargas Llosa and Alberto Fujimori, who are due to face each other in a June 3 run-off for the presidency, have made personal pleas to foreign aid organizations asking for help to fight the consequences of the drought.

#90121e0003 05/01/1990 ~Latin America New Agency

LIMA (MAY 1) EFE - Over 145,000 Peruvian workers from the health, mining, fishing and penitentiary sectors are on strike to press for wage rises and better working conditions, according to a spokesman for the Labor Ministry.

More than 80,000 health workers entered their second week on strike Monday in a stoppage which has meant services in state hospitals across the

country have been severely limited.

Some 10,000 state doctors have also threatened to go on indefinite strike as from Wednesday if their wage demands are not met.

In Peru's prisons, 15,000 guards have been on strike for almost ten weeks, leaving police to carry out their tasks. A representative of the strikers warned Monday that they would not be responsible for any violence which occurs in jails in their absence.

Around 5,000 miners from the U.S. Southern Peru Copper Corporation entered their seventh week on strike this week. The stoppage has caused losses of dlrs 1.3 million a day.

Peru's Mine Workers Union, which groups some 80,000 workers, has called a walkout for May 6, 7 and 8 in support of their striking colleagues.

Copper represents some 30 of Peru's foreign exchange earnings.

The strikers' unions, which claim workers' purchasing power dropped by at least 40 per cent in the first three months of the year, are calling for 100 per cent pay rises and monthly readjustments linked to inflation, running at around 30 per cent a month.

On Monday 34,000 workers from the fishing sector walked off the job in a 72-hour strike to push for a rise in the price of fishmeal. The stoppage is expected to cause losses of dlrs 1 million a day.

The government of center-left President Alan Garcia, due to leave office in July, has claimed that it does not have the sufficient funds to meet the strikers' demands.

Peru is crippled under a dlrs 20 billion foreign debt and the costs of fighting a decade-old war against the Maoist " Shining Path" rebel group.

-30- 2158

#90121e0004 05/01/1990 ~Latin America New Agency

WASHINGTON (MAY 1) EFE - Panamanian President Guillermo Endara has denied that accords he is to sign with the U.S. government threaten his country's sovereignty and said U.S. troops would be gone from the Panama Canal zone by the year 2,000, as agreed.

Endara told EFE the accords, two of which allow U.S. guards to patrol Panamanian waters and board Panamanian-flagged ships in international waters, were "in defense of our democracy" and aimed at "combatting narcotics trafficking and money laundering."

"When we are fighting drugs we are defending our democracy and liberty and those who speak of sovereignty (being threatened) are patronising drug trafficking and money laundering," said Endara.

"It was shown during the dictatorship of (Manuel Antonio) Noriega that when drug trafficking and money laundering are allowed in Panama, democracy has not got a chance because drugs carry the seeds of corruption and dictatorship," he added.

The Panamanian president was speaking during a two-day visit to Washington where he met Monday with his U.S. counterpart, George Bush, Vice President Dan Quayle and top-ranking government officials.

The visit is Endara's first to the United States since being sworn-in as president during the U.S. invasion last December to oust and capture former military strongman Noriega.

Endara was widely recognized as having won elections last May which were annulled by the pro-Noriega government.

Referring to the accords, to be signed Tuesday, Endara said the battle against drugs was not just "to favor the United States but every brother nation."

Two other agreements will allow for increased control in the production and sale of chemicals used in the processing of drugs and the establishment of a U.S. voluntary peace force to aid Panama's post-invasion development.

Endara dismissed speculation that during his visit he would discuss changes in the bilateral 1977 Canal Treaty under which the estimated 13,500 U.S. Armed Forces personnel are to leave the Canal zone and complete jursidiction over the canal is to be handed over to Panama.

"The United States leaves in 2,000, that is what President Bush has said and now President Endara is saying it," said Endara, adding that this is "what was agreed and because both the United States and Panama want it that way."

"The best defense of the canal is its neutrality and the only thing Panama needs is a professional police force which will provide security," added Endara, rejecting suggestions that Panama's plans to do away with its Army would undermine the zone's security.

On the second day of the Washington visit, Endara was to meet with members of the U.S. Senate Foreign Affairs Committee and officials from the Organization of American States.

During talks Monday, the president sought to pressure the speedy release of some dlrs 420 million promised in U.S. aid.

Sympathizing with him, Bush blasted Congress for delaying the aid, saying the lawmakers' slowness was embarrassing.

Panama's economy was brought to its knees because of U.S. economic sanctions imposed in 1988 as part of the campaign to oust Noriega.

Delays in servicing debts to the International Monetary Fund and the World Bank have also affected negotiations for new loans.

On leaving Washington, Endara is to travel to New York where he is scheduled to hold talks with United Nations and banking officials.

#90121e0005 05/01/1990 ~Latin America New Agency

BOGOTA (MAY 1) EFE - The Colombian government has rejected a proposal by one of the country's five remaining rebel groups that an international team of negotiators mediate in peace talks aimed at ending their insurgencies.

"If there's a spirit of patriotism, a real interest to join political and democratic activity, and, given the fact a government peace proposal exists, there's no need for international mediation," Interior Minister Horacio Serpa Uribe said Monday.

Serpa Uribe's comments followed an annoucement by the Colombian Revolutionary Armed Forces (FARC) rebel group that a team headed by Venezuelan President Carlos Andres Perez, former U.S. President Jimmy Carter and the Vatican's envoy to Bogota was prepared to mediate in possible peace talks.

The interior minister said that it was among the plans of the present administration of Liberal President Virgilio Barco to find a solution to end the rebel insurgencies.

A spokesman for the Simon Bolivar National Guerrilla Coordinator (CNGSB), which groups Colombia's five rebel groups, said Monday that Perez had said he was willing to sponsor an international peace initiative.

The CNGSB, created in 1987, includes the communist FARC, the Maoist +People's Liberation Army+ (EPL), the pro-Indian "Quintin Lame," the Trotskyist "Revolutionary Workers Party" and the pro-Castro "National Liberation Army" (ELN), a group which has up to now rejected peace talks.

Both Liberal party presidential candidate in May's elections Cesar Gaviria

Trujillo and the aspirant of the opposition Social Conservative party, Rodrigo Lloreda Caicedo, Monday said they also opposed international mediation in possible rebel peace talks.

The peace initiative comes days after the leader of the M-19 rebel group, which laid down arms six weeks ago, was shot dead during a flight to the northern city of Barranquilla by a gunman allegedly on the payroll of right-wing extremists .

M-19 agreed to end its insurgency and turn into a political party in an agreement signed with Barco's government in March.

The remaining rebel groups have called for a new constitution which would allow them to end their insurgencies, arguing peace would require "dynamic conditions, such as a bilateral cease-fire, a dialogue open to the public and an international presence."

But government peace adviser Rafael Pardo Rueda Monday said the guerrillas had been "two faced" and that "while they have talked about peace, they have continued their violent attacks."

He called on all rebels who wish to discuss peace to gather at a neutral location, similar to the method used under a peace agreement with the M-19 rebel group.

#90121e0008 05/01/1990 ~Latin America New Agency

MADRID (MAY 1) EFE - Spanish motorists queued to fill up their tanks Tuesday, hours before petrol station employees across the country were to walk off the job for nine days to press for pay hikes and better working conditions.

The strike, which was to start at 10 p.m. (2000 GMT), was expected to close some 85 per cent of filling stations.

The remaining stations were either unaffected by the strike or were to stay open as a result of government-ordered minimum services.

Unions representing the station workers are calling for a 9 percent pay rise, to be increased if 1990 inflation goes above 5 percent, and a reduction of their working week.

Petrol station companies have offered a six percent rise.

#90121e0009 05/01/1990 ~Latin America New Agency

MADRID (MAY 1) EFE - Spain's two main unions Tuesday called on the Socialist government to make full employment its priority, during a May Day rally in Madrid which attracted tens of thousands of people.

Making the call, Workers Commissions (C.O.) leader Antonio Gutierrez said unemployment was "the main imbalance to combat, not the trade deficit or price controls, as the business sector wants."

Spain's unemployment rate, at just over 16 per cent, is one of the highest in Europe.

The Socialist government of Prime Minister Felipe Gonzalez has come under increasing fire over the past two years from the unions, who claim it has deserted its socialist principles to satisfy business leaders.

A second round of union-government talks is to be held this month during which labor leaders are expected to press for the fulfilment of accords reached in January allowing for increased pensions.

Also on the agenda will likely be a wage pact the government hopes will keep pay down.

The Madrid May Day march, organised by the C.O. and the General Workers Union (UGT), was attended by some 300,000 people, according to union officials. Some independent observers estimated that only a tenth of that figure took part.

The socialist UGT and the communist-led C.O. are Spain's largest and second-largest unions respectively.

Some 10,000 also took part in a joint C.O.-UGT march in the northeastern city of Barcelona while thousands took part in similar rallies in cities throughout the country.

In Madrid, the two unions also announced their support for the wage demands of petrol station workers who were due to strike later Tuesday and bank staff who have called a three-day strike to begin May 10.

During his speech, Gutierrez also called for the demilitarization of Spain's Civil Guard police and urged that the force be allowed union representation, which it is currrently denied.

Among those leading the march was Carmen Romero, whose husband, a Civil Guard who supports the call for a trade union in the corps, was recently arrested on charges of disobedience.

Formed in 1844, the 70,000-member paramilitary Civil Guard is one of Spain's three national security corps and is primarily employed to police

rural areas and guard official buildings.

#90121e0011 05/01/1990 ~Latin America New Agency

BUENOS AIRES (MAY 1) EFE - Argentine President Carlos Menem, stepping up a verbal offensive around the disputed Falkland Islands, told Congress Tuesday that the sovereignty of the British-owned archipelago was a major priority of his government.

"It is the priority area of our foreign policy," Menem told deputies, referring to his aim of regaining sovereignty of the Falklands and neighboring British-owned islands.

Menem's statement came the day after he said the Falklands dispute with Britain, which led to war in 1982, would continue until Argentina recovered sovereignty, while last week Congress included the islands in an Argentine province.

In a speech to deputies at a new session of parliament, which was broadcast nationwide, Menem Tuesday defended the decision to renew diplomatic relations with Britain without first solving the sovereignty issue.

"We feel that re-estabilishing friendly links and cooperation with Britain will allow us to discuss the future sovereignty of the islands under terms of peace," he said.

He also ruled out further use of force to press Argentina's 157-year-old claim to the islands.

In February, Britain and Argentina renewed diplomatic relations broken off after a 10-week war in which British forces expelled invading Argentine troops at a cost of some 1,000 servicemen from both sides.

Menem agreed to put the sovereignty question on hold during negotiations that led to the renewal of relations.

Congress last Thursday included the Falklands and two other South Atlantic island groups, South Sandwich and South Georgia, also British-owned, in the Argentine province of Tierra del Fuego.

In London, a British Foreign Office spokesman Tuesday played down the move arguing that the inclusion of the disputed islands within an Argentine province was an internal matter that did not affect international diplomacy.

-30- 2102
#90121e0012 05/01/1990 ~Latin America New Agency
HAVANA (MAY 1) EFE - Some 3.5 million Cubans, nearly a third of the island's population, took to the streets Tuesday in a spectacular Labor Day celebration heralded as massive show of support for the communist policies of President Fidel Castro.

In Havana's Revolution Square half a million workers, some hustled up at the crack of dawn by union activists, gathered to join Castro at a May Day speech by Cuban Workers' Union Secretary General Pedro Ross. Some 3 million workers turned out for similar rallies were throughout the country, organizers said.

With Cuba facing increasing political and economic isolation as its traditional socialist allies in Eastern Europe undertake western-style liberal reforms, Ross called for support of the Cuban Communist Party and Castro, who has stood firm on the Caribbean island's socialist system.

Ross told the crowd that the Labor Day meeting had been called, "in support of the revolution, the party and Fidel," and called for "unity in the face of encroaching imperialism" in reference to U.S. military maneuvers being conducted off the coast

Referring to the international crisis in the socialist camp, the Cuban labor chief argued that Cuba was more important than ever as a bastion of support for the rights of workers worldwide.

#90121e0013 05/01/1990 ~Latin America New Agency
BOGOTA (MAY 1) EFE - Leftist Colombian rebels Tuesday released four journalists held hostage four days and announced a unilateral cease-fire during upcoming presidential elections, press reported Tuesday.

The pro-Cuban National Liberation Front (ELN) freed the four hostages with a statement that said, "there will be no attacks or guerrilla action" during the presidential elections slated for May 27.

One of the freed journalists is employed by the Colombian radio network Caracol, which reported that the ELN had denied any involvement in the murder last Thursday of presidential candidate and former M-19 rebel chief Carlos Pizarro.

The leftist rebels also announced their intention to step up activities in the coffee-growing central departments of Caldas, Quindio and Risaralda.

The ELN, which has until recently rejected peace overtures from the government of President Virgilio Barco, is considered the most violent of

Colombia's five leftist guerrilla groups.

But a spokesman for an organization that represents the five rebel groups Sunday announced moves towards peace talks with the government of President Virgilio Barco.

#90121e0021 05/01/1990 ~Latin America New Agency

MEXICO CITY (MAY 2) EFE - Seven people were injured in clashes Tuesday between rival trade unions and riot police as more than 2 million people marched through the Mexican capital to celebrate May Day.

The violence broke out when police at an entrance to the central Plaza de la Constitution tried to prevent independent trade unionists from joining 1,600 official union members already in the square to hear a speech by President Carlos Salinas de Gortari.

Police drove the independent unionists back with blows and as they retreated a group of workers, apparently official union members, attacked them.

Two riot police officers, a journalist, three photographers and a demonstrator were injured, according to the Red Cross.

Police estimated 15,000 people joined in the seven marches organized by the independent trade unions throughout the capital.

About 30,000 police were on duty to "avoid possible clashes between government-affiliated union members and independent unionists," a police official said.

Fidel Velazquez, head of the biggest official union, the Mexican Workers' Central, was prevented by a severe pain in his legs from joining Salinas

in his address to the crowd.

Velazquez, 90, later accompanied the president to watch the official procession after he was attended by doctors.

#90121h0019 05/01/1990 ~Chinese News Agency

BANGKOK (MAY 1) XINHUA - THAILAND AND TURKEY HAVE SIGNED AN AGREEMENT TO PROMOTE BILATERAL TRADE TIES.

THE AGREEMENT WAS SIGNED BY THE BOARD OF TRADE (BOT) OF THAILAND AND THE UNION OF CHAMBERS OF COMMERCE, INDUSTRY, MARITIME COMMERCE AND COMMODITY EXCHANGE OF TURKEY (UCCET) HERE MONDAY.

ACCORDING TO A LOCAL PRESS REPORT TODAY, UNDER THE AGREEMENT, BOT AND UCCET WILL REGULARLY EXCHANGE MARKET INFORMATION, AND ARRANGE JOINT MEETINGS AND VISITS BY TRADE MISSIONS OF THE TWO COUNTRIES.

BOTH PARTIES ALSO AGREED TO ASSIST ENTERPRISES IN THE TWO COUNTRIES TO TAKE PART IN JOINT VENTURES IN THIRD COUNTRIES, RENDER ASSISTANCE IN THE SETTLEMENT OF TRADE DISPUTES AND ESTABLISH TRADE AND ECONOMIC COOPERATION COMMITTEE BETWEEN TURKEY AND THAILAND.

THE REPORT NOTED THAT THE AGREEMENT IS INTENDED TO ACCELERATE THAI-TURKISH TRADE TIES WHICH HAVE BEEN LIMITED BECAUSE BOTH COUNTRIES PRODUCE AND EXPORT SIMILAR LINES OF PRODUCTS.

INCONVENIENT TRANSPORTATION AND LACK OF TRADE AND MARKET INFORMATION ARE ALSO FACTORS MAKING TWO-WAY TRADE SMALL, IT ADDED.

THAILAND EXPORTED 204.2 MILLION BAHT (8.168 MILLION U.S. DOLLARS) WORTH OF GOODS TO TURKEY LAST YEAR AGAINST IMPORTS OF 236.1 MILLION BAHT (9.444 MILLION U.S. DOLLARS) FROM THAT COUNTRY.

LONDON (MAY 1) XINHUA - IRELAND TODAY INTRODUCED NEW TOUGH ANTI-SMOKING LAWS WHICH MAKE OFFENDERS FACE FINES OF UP TO 100 IRISH POUNDS (ABOUT 150 U.S. DOLLARS), ACCORDING TO REPORTS FROM THE IRISH CAPITAL OF DUBLIN.

DESCRIBED AS THE "FINAL PIECE IN THE JIGSAW OF THE GOVERNMENT'S ANTI-SMOKING POLICY", THE EXTENDED SMOKING BAN APPLIES IN PUBLIC OFFICES, SCHOOLS, COLLEGES, FOOD PREPARATION UNITS IN SUPERMARKETS AND STORES, CINEMAS AND THEATRES, TRAINS, BUSES, AIRPORTS, FERRY-PORTS, HEALTH PREMISES, LIBRARIES, ART GALLERIES AND BUS AND RAILWAY STATIONS.

RESTAURANTS HAVE BEEN ORDERED TO SET UP NO-SMOKING AREAS AND MANAGERS WHO FAIL TO COMPLY WILL FACE FINES OF UP TO 500 IRISH POUNDS (ABOUT 750 DOLLARS).

HEALTH MINISTER DR. RORY O'HANLON SAID: "WE ARE ANXIOUS THAT THESE RULES SHOULD BE IMPLEMENTED -- AND WHATEVER IS NECESSARY TO ENSURE THAT HAPPENS WILL BE DONE."

TOKYO (MAY 1) XINHUA - PURCHASES OF GOLD PRODUCTS BY JAPANESE HIT A RECORD HIGH OF 465.5 TONS IN 1989, AN INCREASE OF NEARLY 30 TONS FROM

1988'S 436.8 TONS, THE JAPAN GOLD METAL ASSOCIATION SIAD TODAY.

THE ASSOCIATION SAID PURCHASES OF PERSONAL ORNAMENTS MADE OF GOLD SURGED TO 109.3 TONS, TOPPING THE 100 TON-LEVEL FOR THE FIRST TIME.

INDUSTRY OFFICIALS ATTIBUTED THE INCREASE DEMAND TO THE HIGHER VALUE OF THE YEN AND THE ABORLITION OF TAXES ON LUXURY GOODS IN APRIL 1989.

THEY SAID THE SURPUS OF MONEY AND THE INCREASING POPULARITY OF GOLD PRODUCTS AMONG THE COUNTRY'S YOUNG PEOPLE WERE ANOTHER FACTOR FOR THE HIGHER DEMAND.

HAVANA (MAY 1) XINHUA - THE ARRIVAL OF TWO MORE U.S. WARSHIPS AT THE GUANTANAMO NAVAL BASE THE UNITED STATES MAINTAINS AT THE EASTERN MOST TIP OF CUBA BRINGS THE NUMBER OF WARSHIPS DOCKED HERE TO 12, OFFICIAL SOURCES HERE SAID MONDAY.

ACCORDING TO REPORTS FROM THE CUBAN MILITARY BRIGADE STATIONED AT THE EDGE OF THE BASE, THE "W.S. SIMS" FF-1059 FRIGATE AND THE NITRO AE-23 AMMUNITION SUPPLY SHIP ARE THE LATEST WARSHIPS TO DROP ANCHOR AT THE BASE.

THE MINISTRY OF CUBA'S REVOLUTIONARY ARMED FORCES SUNDAY WARNED OF A POSSIBLE SURPRISE ATTACK BY U.S. TROOPS, CITING THE GROWING NUMBER OF U.S WARSHIPS AT THE BASE. IN ADDITION TO STEADILY BOOSTING ITS MILITARY PRESENCE AT THE BASE, THE UNITED STATES IS ABOUT TO BEGIN THREE MILITARY MANEUVERS IN NEARBY WATERS--THE "OCEAN VENTURE," THE "DEFEX" AND THE STRATEGIC "GLOBAL SHIELD."

THE MANEUVERS, WHICH BEGIN TODAY AND LAST UNTIL MAY 5, WILL MOBILIZE NUMEROUS U.S. ARMY UNITS, INCLUDING THE 82 AIRBORNE DIVISION, THE 101 AERIAL ASSAULT DIVISION AND THE 24 MECHANIZED INFANTRY DIVISION, AS WELL AS HUNDREDS OF AIRPLANES, SUCH AS B-52 AND BIB STRATEGIC BOMBERS AND TACTIC FIGHTERS.

THE NAVAL BASE, LOCATED IN GUANTANAMO BAY, WAS INVADED BY THE U.S. MILITARY IN 1898. SINCE 1903, THE BASE HAS BEEN OCCUPIED BY THE UNITED STATES THROUGH AN ACCORD THAT WAS THEN IMPOSED ON CUBAN AUTHORITIES.

#90121k0093 05/01/1990 ~Japanese News Agency
TOKYO (MAY 1) KYODO - MAJOR U.S. CONSTRUCTION FIRMS HAVE NOT SHOWN THEMSELVES EAGER TO WIN CONTRACTS IN JAPAN DESPITE A BILATERAL AGREEMENT IN 1988 OPENING THE MARKET TO THEM, ACCORDING TO A SURVEY BY A TOKYO-BASED CONSULTING COMPANY.

THE SURVEY ALSO SHOWED THAT U.S. FIRMS HAVE FOUND THERE ARE FEW REAL BARRIERS TO THEIR ENTERING THE JAPANESE MARKET, ACCORDING TO THE CONSULTING FIRM, INDUSTRY FOCAST INC.

IN THE 1988 ACCORD, JAPAN PROMISED TO DESIGNATE 17 PUBLIC WORKS PROJECTS AS SPECIAL CASES FOR PROVIDING OPPORTUNITIES FOR U.S. COMPANIES TO ENTER THE ALLEGEDLY CLOSED JAPANESE MARKET.

BUT THE SURVEY, IN WHICH INDUSTRY FOCAST POLLED THE CHIEF EXECUTIVES OF THE TOP 50 U.S. CONTRACTORS, OBTAINING ANSWERS FROM 47, FOUND VERY FEW U.S. COMPANIES HAVE ACTUALLY MADE APPLICATIONS TO GET CONTRACTS FOR THESE

PROJECTS, ALTHOUGH 12 AMERICAN CONTRACTORS HAVE RECEIVED JAPANESE CONSTRUCTION CONTRACTOR'S LICENSES SINCE THE AGREEMENT.

THE NUMBER OF U.S. COMPANIES THAT HAVE APPLIED TO TAKE PART IN BIDDING FOR EACH OF THESE PROJECTS AVERAGES LESS THAN ONE, ACCORDING TO THE POLL.

SEVENTEEN COMPANIES OUT OF THE 47 THAT RESPONDED SAID THEY HAVE ALREADY ESTABLISHED FOOTHOLDS IN THE JAPANESE MARKET, BUT FEW OF THEM HAVE A LOCAL STAFF OF MORE THAN FIVE.

THEY ARE ALSO DOING LITTLE IN THE WAY OF PUBLIC RELATIONS ACTIVITIES IN JAPAN, THE SURVEY SHOWED.

ONLY TWO COMPANIES SAID THEY ARE PLANNING TO ADVANCE INTO THE JAPANESE MARKET IN THE FUTURE.

AMONG THE 17 U.S. CONTRACTORS THAT ARE ALREADY DOING BUSINESS IN JAPAN, SIX SAID THEY FEEL SOME FORMS OF TRADE BARRIERS EXIST IN THE MARKET.

BUT MORE THAN HALF OF THEM CITED SUCH UNINTENTIONAL DIFFERENCES IN CULTURE OR LANGUAGE AS BARRIERS, AND ONLY ONE COMPANY DEPICTED THE MARKET AS BEING CLOSED TO FOREIGNERS.

MOREOVER, ONLY ONE FIRM POINTED TO BID-RIGGING, WHICH WAS THE MAIN COMPLAINT BY THE U.S. GOVERNMENT IN THE BILATERAL CONSTRUCTION TALKS, AS A BARRIER TO THE MARKET.

THE SURVEY ALSO INDICATED THAT A MAJORITY OF U.S. CONSTRUCTION FIRMS APPARENTLY PLACE MORE EMPHASIS ON THE DOMESTIC U.S. MARKET THAN ON OVERSEAS MARKETS IN THEIR BUSINESS STRATEGY.

ABOUT 85 PERCENT OF THE RESPONDENTS SAID THEY PUT PRIORITY ON THE U.S. MARKET IN THEIR MARKETING ACTIVITIES.

MOST OF THE COMPANIES THAT ARE ACTIVE IN JAPAN REGARD JOINT VENTURES WITH JAPANESE FIRMS AS ESSENTIAL, ACCORDING TO THE SURVEY.

ABOUT 85 PERCENT OF SUCH FIRMS SAID THEY ARE CONSIDERING SOME FORM OF JOINT VENTURE WITH JAPANESE FIRMS, IT SAID.

THE REMAINING 15 PERCENT HAVE NO PLANS TO TAKE PART IN ACTUAL CONSTRUCTION WORK IN JAPAN.

JAPAN AND THE U.S. ARE EXPECTED TO REVIEW THE RESULTS OF THE 1988 ACCORD SHORTLY.

JAPAN'S CONSTRUCTION MINISTRY IS CONFIDENT THAT THE AGREEMENT HAS WORKED QUITE WELL SO FAR, BASED ON ITS OWN RECENT RESEARCH.

A MINISTRY OFFICIAL SAID, ''THE SPIRIT OF THE PACT IS BEING FAITHFULLY FOLLOWED.''

NEW DELHI (MAY 1) KYODO - WORLD BANK OFFICIALS WILL PRESENT TO THE BANK BOARD A NEW PROPOSAL TO RESUME NORMAL LENDING TO CHINA LATE THIS MONTH, INTERNATIONAL BANKING SOURCES ATTENDING THE 23RD ANNUAL MEETING OF THE ASIAN DEVELOPMENT BANK (ADB) HERE SAID TUESDAY.

THE SOURCES SAID IF THE WORLD BANK BOARD AGREES TO RESUME NORMAL LENDING TO CHINA, IT MAY PAVE THE WAY FOR THE ADB AND JAPAN TO DISBURSE LOANS TO CHINA STALLED BY THE TIANANMEN INCIDENT LAST JUNE.

THE WORLD BANK IS REPORTED TO BE PREPARING A COUNTRY ECONOMIC MEMORANDUM FOR CIRCULATION AMONG BOARD MEMBERS NEXT WEEK THAT WILL FOCUS ON THE PROGRESS OF CHINESE ECONOMIC REFORMS.

ADB PRESIDENT KIMIMASA TARUMIZU SAID LAST WEEK THE ADB IS WATCHING DEVELOPMENTS IN BEIJING AND MONITORING WORLD REACTION BEFORE NORMALIZING TIES WITH CHINA.

JAPANESE FINANCE MINISTER RYUTARO HASHIMOTO WILL APPEAL TO THE ADB BOARD OF GOVERNORS ON WEDNESDAY TO DISBURSE FUNDS ALREADY COMMITTED TO CHINA.

HASHIMOTO URGED LAST WEEK THAT TOKYO UNFREEZE THE UNTIED PORTIONS OF ITS COMMITTED 810 BILLION YEN THIRD LOAN PACKAGE TO CHINA TO HELP STABILIZE THE LIVES OF THE CHINESE PEOPLE.

RODEO, CA (MAY 1) PR NEWSWIRE - Unocal (NYSE: UCL) announced today that Stephen Plesh has been appointed manager of the company's San Francisco refinery, located in Rodeo. Plesh replaces John R. Dietzman, who has been appointed director of corporate engineering and construction.

Plesh joined Unocal in 1973 as an engineer at the company's Chicago refinery. Over a 10-year period, he held increasingly responsible supervisory positions. In 1983, Plesh was promoted to general superintendent of operations at Unocal's Beaumont, Texas refinery. He was subsequently appointed manager of the Unocal refinery at Santa Maria, Calif. in 1988.

Plesh has a bachelor's degree in mechanical engineering from the University of Illinois. A native of Springfield, Ill. He is married and has one son.

In the community, Plesh has been active with the United Way and recently served on an advisory board at California Polytechnic University, San Luis Obispo.

WHITE PLAINS, NY (MAY 2) PR NEWSWIRE - IBM Corp. (NYSE: IBM) and Valid Logic Systems Incorporated (NASDAQ: VLID) today announced an agreement for IBM to acquire a minority equity interest in Valid, a leading developer of integrated electronic design automation (EDA) software. Valid, based in San Jose, Calif., had worldwide 1989 revenues of $173.9 million. Separately, Valid today also announced its first quarter results.

Under the terms of the agreement, IBM will make an initial $11.2 million investment in Valid in the form of newly issued voting convertible preferred stock. The purchase of the convertible preferred stock will be made at a price per common share equivalent equal to 140 percent of the highest average of the closing prices for a share of Valid common stock on any 10 consecutive trading days from today through May 30. In any event, the purchase price of the convertible preferred stock will not be less than $4.20 per share or greater than $7 per share on a common stock equivalent basis.

The initial investment will represent an interest in Valid of between five percent and 8.3 percent. Additionally, IBM will purchase warrants for approximately $1.2 million to acquire up to 4.75 million shares of common stock at $11 per share.

The agreement also includes provisions for Valid, at its option, to sell additional convertible preferred shares to IBM. A series of four annual capital calls, to begin in 1991, has been set up to enable Valid to secure additional investment capital. The amount and price of each capital call will depend on Valid's performance in marketing its EDA applications on IBM workstations. While the terms of the calls allow for up to $90 million in additional capital, they will not require IBM to acquire an equity interest in Valid greater than 49.99 percent.

Valid currently offers EDA applications for the IBM Personal System/2(a) and IBM RT(a) system. The firm has announced that its software tools will be available for IBM's new RISC System/6000(a) family of advanced workstations and servers in the second half of 1990. IBM is a major customer of Valid and is using Valid's EDA applications at several of its locations, including Kingston and Yorktown, N.Y., and Manassas, Va.

Valid was formed in 1981 and was one of the founders of the electronic computer-aided engineering industry. The company designs, manufactures, markets and supports electronic design process automation solutions used to develop electronic systems such as integrated circuits, application specific integrated circuits and printed circuit boards.

TULSA, OK (MAY 1) PR NEWSWIRE - Thrifty Rent-A-Car System Inc. Monday awarded its $7 million advertising account to a new alliance of Tulsa-based Ad Inc. and Ciociola & Co., a New York-based ad agency.

Thrifty put the account into review about two months ago after working with Ad Inc as its agency of record for seven years. Ad Inc formed the alliance with Ciociola when the review process started.

Unlike a merger, the joint venture arrangement with Ad Inc and Ciociola leaves account service, marketing and media functions with the Tulsa group while the creative services will be provided primarily by the New York group.

Bob Dimmick, division vice president of Advertising and Promotion, said the new alliance between Ad Inc and Ciociola will be very beneficial to Thrifty. "It leaves in tact an account service team that has had extensive experience in the car rental industry, and with Thrifty, yet allows the infusion of a fresh creative approach from a veteran in the business whose experience includes some of this country's best creative work."

Ciociola, which was formed in 1983, currently bills $32.3 million and serves clients such as San Peligrino Bottled Water, XEROX financial Services and Walt Disney On Ice. Mel Ciociola is a 14-year ad veteran who has worked for agencies such as Young & Rubicam, N.W. Ayer and BBDO. His background includes creative work on clients such as AT&T, Gillette, General Foods, Bristol Myers, Chrysler, Burger King, Pepsico, Quaker, Ralston-Purina, Richardson-Vicks and Wm. Wrigley Jr., Co.

Aside from Ad Inc/Ciociola, Thrifty heard final creative presentations from Austin-based GSD&M and Detroit-based Ross Roy.

Thrifty is the world's largest off-airport car rental company, the fifth largest of all daily car rental companies in North America in rental locations, and the fastest growing car rental company in Europe and Canada. Thrifty has more than 750 locations in 49 states and 30 countries.

MILWAUKEE (MAY 1) PR NEWSWIRE - Say the word "reunion" to anyone and you

know you've hit upon a universal experience. Now reunions are the focus of a new quarterly magazine. Thomas Wolfe thought we couldn't go home again, but as summer nears, people everywhere are planning the seasonal going-home-again to family and school reunions.

Reunions, the magazine, considers every angle of our annual trek to reunite with places and people from our past. Edith Wagner, owner of a Milwaukee, Wis., public relations firm, was inspired with the idea for the magazine from a radio interview remark made by Jean Strauss of Worcester, Mass. Strauss, an adult adoptee, commented that the search for her birthparents would have been much easier if there were a nationally promoted and circulated magazine known for helping conduct searches for reunions.

The concept for the magazine grew to embrace many kinds of reunions -- family, class, military and so on...as well as support and assistance for genealogists. For the reunion organizer, the magazine provides planning tips and suggestions for new and exciting places to hold reunions among other ideas. People searching benefit from other's experience, and classifieds make the search easier. Genealogists will find a sympathetic audience to share their joy of searching and ecstacy of finding.

Content includes feature stories and articles, departments and columns by experts. Classified advertising is a valuable personal searching resource for adult adoptees, birthparents, schoolmates, lost friends and genealogical information. The prepublication issue, now available, includes four full pages of current searchers. It also summarizes unusual reunions to be featured in upcoming issues. An example is the annual reunion of former residents and their descendants in Hanford, Wash., a town "closed" by the U.S. Government in 1943 for a top secret plutonium-producing project destined to end World War II. Readers are encouraged to contribute history, practical advice, humor, ideas, inspiration and stories of exciting reunion adventures.

A 28-page prepublication issue including information about subscriptions, classifieds and writers' guidelines is now available for $2.50. Annual subscriptions for the quarterly are $24.00. Single issues will cost $6.00. Contact Reunions, the magazine, P.O. Box 11727, Milwaukee, Wis., 53211-1727.

CONTACT: Edith Wagner of Reunions, the magazine, 414-263-4567.

#90121p9452 05/01/1990 ~PR Newswire

SAN DIEGO (MAY 1) PR NEWSWIRE - Pyraponic Industries, a local company that recently produced the first multi-blooming tea rose in a Phototron, the company's low-cost indoor horticultural growth chamber, has found a

formula to induce a mutation into a rose that will produce a thornless or prickless rose from a rose plant that originated as a thorned rose. According to Jeffery DeMarco, president and founder of Pyraponic Industries, "The possible benefits and applications that this new development offers are far more encompassing than reducing the number of minor injuries attributable to handling thorned roses."

DeMarco plans on creating the same type of morphological changes in a multitude of other plants. "We want to create mutations that will produce stemless broccoli, eyeless potatoes, and artichokes that are completely edible, for example," explained DeMarco. Using the adage of waste not want not, the company is taking an environmental stance to produce plants that are beneficial to humans, reducing the amount of material that is unused by humans and animals.

Pyraponic Industries also developed a tea rose that will produce multi-blooming flowers from a single stem. Although this has been done randomly by nature, it has never been possible to induce this mutation at will, which is what Pyraponic Industries has accomplished. Using tissue culture, DeMarco also plans on initiating this breakthrough into other plants as well. The objective is to produce multi-fruiting vegetables and fruits. "This methodology will enable my laboratory to produce vegetables with triple the amount of fruit." By utilizing methodologies that will produce multi-blooming plants with minimal waste, the company hopes to actively participate in increasing the amount of edible food that is produced by plants. A spokesperson for the company stated that the probability exists where a balance will be maintained, combatting the amount of plant loss that occurs every year because of drought, global warming, and increased air pollution. "We need to get people involved and get them acquainted with our accomplishments and goals," stated a company spokesperson.

Pyraponic Industries has sold more than 100,000 Phototrons worldwide since 1982, and the company is now moving into a new market, targeting the product towards the environmentally conscious, as the Phototron effectively converts most of the pollutants found in the home to pure oxygen, through natural plant respiration and transpiration. Pyraponic Industries moved to San Diego in November 1988 and has since received the Manufacturer of the Year Award by the San Diego Chamber of Commerce. The company also placed in the 1989 Inc. 500 of America's fastest growing private companies at number 86.

MENLO PARK, CA (MAY 1) PR NEWSWIRE - Robert Half International Inc.

(NYSE: RHI) today reported revenues and earnings for the first quarter ended March 31, 1990.

For the first quarter ended March 31, 1990, net income was $3,439,000, or 30 cents per fully diluted share, on revenues of $66,580,000. Net income for the prior year's first quarter was $3,774,000, or 30 cents per fully diluted share, on revenues of $58,104,000.

Harold M. Messmer Jr., chairman and chief executive officer of the company said: "Operating income increased 5 percent over the same period last year while net income per share in both periods was 30 cents. Operating income was offset by higher interest costs attributable to debt incurred for recent acquisitions and the company's recently completed securities repurchase program. Additionally, prior year results benefited from nonrecurring gains on debenture repurchases of $360,000." He added, "The modest growth in operating income for the first quarter reflects continued sluggish demand and related margin pressures in the Northeastern United States."

Messmer also noted that during the quarter the company acquired two more franchised Robert Half and Accountemps offices located in New Jersey as well as the Florida financial recruiting firm of Wayne S. Mello & Associates with offices in Tampa and Ft. Lauderdale.

Robert Half International is the world's first and largest personnel services firm specializing in the placement of accounting, financial, banking, tax, and information systems personnel. The company places permanent employees through its Robert Half division and temporary employees through its Accountemps division. These services are offered through 160 offices located in the United States, Canada and abroad.

SAN DIEGO (MAY 1) PR NEWSWIRE - The Titan Corp. (NYSE: TTN) announced today that it had signed a letter of intent to acquire M/A-COM Government Systems Inc. (Linkabit) from M/A-COM Inc. (NYSE: MAI). The signing of a final acquisition agreement is subject to various conditions customary to such transactions.

San Diego-based Linkabit, which has annual revenues in excess of $40 million, is a leading supplier of earth-based satellite communications equipment to the U.S. Government.

"We are extremely pleased to have the opportunity to acquire a company

with Linkabit's fine reputation for the outstanding technological skills of its people and the high quality of its products," said Dr. Gene W. Ray, president and chief executive officer of Titan.

Ray further noted, "Satellites are a critical part of this country's long-term strategy for improving and maintaining worldwide communications. Combining Linkabit's recognized strength in Satellite Communications with Titan's existing C3I (Command, Control, Communications and Intelligence) capabilities achieves a level of expertise that is very competitive in the industry."

The acquisition of Linkabit is expected to be a cash transaction, with no shares of Titan stock involved.

The Titan Corp. supplies fully-integrated, high-technology hardware and software systems to federal, state, and local government agencies and to international customers and commercial and industrial clients. In fiscal 1989 (Dec. 31), the company reported net income of $2.3 million on revenues of nearly $100 million.

HOUSTON (MAY 1) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) today reduced the suggested resale price of its notebook- sized COMPAQ LTE/286 product line.

The suggested resale price of the COMPAQ LTE/286 Model 40 has been reduced from $4,999 (U.S.) to $4,799 (U.S.), and the suggested resale price of the COMPAQ LTE/286 Model 20 has been reduced from $4,499 to $3,999.

"The COMPAQ LTE/286, the first notebook-sized computer to offer full PCfunctionality, has experienced enormous success in the marketplace. According to market researcher StoreBoard/Computer Intelligence, Compaq's share of the U.S. market for battery-powered laptops sold through computer dealers stands at 62 percent for the first two months of this year. This represents an increase in market share of 16 percent over the third quarter of 1989, prior to our introduction of the LTE product family," said Michael S. Swavely, president, North America, Compaq Computer Corporation. "Although we have shipped a substantial number in units, we have just begun to meet demand for the product in April. These price reductions, the first since their introduction in October 1989, will make the COMPAQ LTE/286 more accessible to a wider audience of users who require the power of a desktop computer and the convenience of a notebook-sized computer."

"The COMPAQ LTE/286 family quickly captured and has maintained the leadership position in the notebook computer market. Because of its superior features and functionality, the COMPAQ LTE/286 has gained worldwide market acceptance. By improving its competitive position through price reductions, the COMPAQ LTE/286 will continue as the market and technology leader," Swavely added.

Compaq Computer Corporation is the world leader in the manufacture of PC systems and desktop, portable and laptop personal computers.

Founded in February 1982, Compaq is a FORTUNE 200 company with 1989 worldwide sales exceeding $2.9 billion. COMPAQ products are sold in 62 countries through a network of more than 3,000 Authorized COMPAQ Computer dealers.

MIAMI (MAY 1) PR NEWSWIRE - John E. Tostanoski, chairman of the board of Enviropact, Inc. (AMEX: ENV), today announced that the board of directors has elected one of its members, Lawrence O. Turner Jr., to the position of chairman of the executive committee and chief executive officer of the company with primary responsibility for the day-to-day financial and administrative affairs of the company. He said this addition to management does not bring added expense to the company because Turner has acted as a paid consultant to the company since July 1989. He said Turner's joining the company as a full-time officer will enable Edward C. King Jr., president of Enviropact, to devote more time to the current expansion program of the company, which recently opened offices in Texas and South Carolina, and to managing the existing and new operating regions.

Turner is the former chairman of the board of Atico Financial Corporation, a financial institution holding company, and the former vice chairman of Pan American Banks, Inc., a bank holding company; an associate member of the Orange Bowl Committee; a member of the board of governors, and co-chairman of the New World Center Action Committee, of the Greater Miami Chamber of Commerce; chairman of the board of trustees and past president of the Zoological Society of Florida, Inc.; and a director of Backus Turner & Partners, Inc.; the Miami Heart Institute and Light Up Miami, Inc.

Enviropact offers a variety of environmental services, including environmental consulting and audits, groundwater and soil remediation, industrial hygiene, asbestos management, analytical laboratory services,

and hazardous waste analysis, transportation and disposal. The company has offices in Miami, West Palm Beach, Orlando, Tampa Bay and Jacksonville Fla.; Yonkers, N.Y.; Corpus Christi, Texas; and Greenville, S.C.

SEATTLE (MAY 1) PR NEWSWIRE - Ackerley Communications Inc. (AMEX: AK) reported the company's preliminary unaudited results for the first quarter of 1990. Sales for the first quarter ended March 31 were $43.9 million, up 6 percent from $41.6 million a year earlier.

Adjusted operating profit (defined as net revenue less operating expenses plus other income before depreciation, amortization and interest) -- the "cash flow" by which the company measures its performance -- increased 1 percent to $6.6 million from $6.5 million for the previous year.

The company showed a net loss applicable to common shares of $4.5 million, or 29 cents per share for the quarter ended March 31, compared to a loss of $2.9 million, or 19 cents per share, for the comparable quarter last year. Acquisitions have increased the non-cash expenses of depreciation and amortization, as well as interest due to borrowings associated with these same acquisitions, both of which together more than offset the gain in adjusted operating profit.

Ackerley Communications is a national multimedia advertising business, with interests in outdoor and airport advertising, broadcasting and professional sports, notably the Seattle SuperSonics.

Ackerley Communications provides display advertisements in more than 130 airport terminals throughout the United States. The company's outdoor advertising division serves the metropolitan markets of Boston and Worcester, Mass.; Miami, Ft. Lauderdale and West Palm Beach, Fla.; Seattle/Tacoma, Wash.; and Portland, Ore.

Its broadcasting properties include television stations KVOS-TV in Bellingham, Wash.; WIXT-TV in Syracuse, N.Y.; KKTV-TV in Colorado Springs, Colo.; KCBA-TV in Salinas and KGET-TV in Bakersfield, Calif. Ackerley also owns radio stations WBOS-FM in Boston; WAXY-FM in Ft. Lauderdale, Fla.; KJR-AM and KLTX-FM in Seattle; and KGON-FM and KFXX-AM in Portland, Ore.

#90121p9502 05/01/1990 ~PR Newswire

ANNAPOLIS, MD (MAY 1) PR NEWSWIRE - UNC Incorporated (NYSE: UNC) today reported net earnings of $1.2 million for the first quarter of 1990 compared with the fourth quarter of 1989 when the company reported a $5.5 million loss.

Earnings were down 42 percent from those reported in the 1989 first quarter. The company said that results for the quarter were significantly affected by lower volumes of production at its Naval Products Division as it begins to phase out of this business.

Sales for the 1990 first quarter were $118.9 million, 7 percent higher than the $110.8 million in the first quarter of 1989. Operating income rose 10 percent to $6.9 million compared with $6.3 million a year earlier.

Net earnings were $1.2 million, or $.07 per share, down from $2 million, or $.12 per share, in the 1989 first quarter.

The first quarter sales increase of 12 percent in the company's Technology segment was due principally to new aircraft maintenance contracts awarded to UNC Support Services. This increase offset a 25 percent decrease in revenue at the company's Naval Products Division as a result of a lower level of activity. While most of the company's Aerospace/Aviation units had strong revenue growth during the quarter, overall growth in this segment was slowed by a one-week strike at the company's Airwork subsidiary in late January.

Operating income was up due to higher profits in the Aerospace/Aviation segment but these increases were partially offset by lower results in the Technology segment associated with a 35 percent decline in operating income in the submarine components business.

Dan A. Colussy, chairman and chief executive officer, of UNC, said, "Our first quarter earnings reflect the decision to reduce our future defense exposure by consolidating our aerospace businesses to improve efficiency and to phase out from the submarine components business. While we are pleased with the results in our other operating units, our overall earnings were depressed because of impacts from phasing out of the Department of Energy's Naval Reactors Program. This situation is expected to continue to affect our earnings in the second quarter.

UNC Incorporated, listed on the New York Stock Exchange, is engaged in providing high technology products and services in the aerospace/aviation, defense and environmental industries.

CONTACT: David L. Dragics or Robert L. Pevenstein, 301-266-7333, both of UNC.

#90121p9503 05/01/1990 ~PR Newswire

TAYLOR, MI (MAY 1) PR NEWSWIRE - Net sales for Masco Corporation (NYSE: MAS) for the first quarter ended March 31, 1990, increased 3 percent to $810 million, the highest for any quarter in the company's history. Increased sales of both building and home improvement products and home furnishings products contributed to the record sales. The first quarter of 1989 included sales of the recreational accessories and insulation products businesses recently sold to TriMas Corporation; excluding these businesses, the sales in the first quarter of 1990 increased 6 percent.

The company's earnings continue to be adversely affected by costs related to major expansion programs of the last few years, as well as the economic softness in a number of its markets. Net income for the quarter declined

7 percent to $69.8 million from the restated $75.4 million in the comparable 1989 period, and earnings per share declined 6 percent to $.45 from $.48. In the 1990 quarter, earnings were reduced by $.06 per share from lower equity earnings of affiliated companies, which reduction was offset by the gain recorded on the sale of the businesses to TriMas.

The company recently entered into an agreement to acquire KraftMaid Cabinetry, Inc., a leading manufacturer of semi-custom kitchen and bathroom cabinetry. KraftMaid, headquartered near Cleveland, has annual sales of approximately $100 million.

While the company expects that 1990 will be negatively impacted by the continued economic softness in a number of its markets and by costs related to the aforementioned expansion programs, it believes that 1990 will be a year of significant increases in both sales and earnings for the company and that it will enjoy even greater opportunities for growth in the remainder of the decade.

Masco Corporation manufactures building, home improvement and home furnishings products for the home and family.

PASADENA, CA (MAY 1) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC), Pasadena, and Maeda Corp. of Tokyo, today announced the signing of a mutual cooperation agreement to pursue engineering and construction projects in the international marketplace with initial emphasis in the United States.

The agreement was signed by Noel G. Watson, Jacobs president and chief operating officer, Kenji Maeda, president of the Maeda Corp., and Tsutomu Alzawa, director, The Yasuda Trust & Banking Co. Ltd., during a ceremony held in the Jacobs corporate headquarters in Pasadena. The agreement calls for Jacobs and Maeda to "cooperate in the development of mutually beneficial relationships in the international engineering and construction marketplace."

Maeda Corp., one of the largest engineering/construction firms in Japan, is recognized for its capabilities and experience in designing and building civil engineering projects, such as dams and railways, and facility projects such as factories and commercial and municipal buildings.

Jacobs Engineering Group provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and

operations services to government and industry worldwide.

The agreement acknowledges the similarity in expertise between Jacobs and Maeda and calls on each company to coordinate its respective resources "to offer a broader range of services to clients" in the "engineering/construction and building material- related business areas," representatives of the two organizations said.

Also attending the signing ceremony were Dr. Joseph J. Jacobs, chairman and chief executive officer, Jacobs Engineering Group Inc.; Sadaharu Honda president, MKK Technologies, Inc., Maeda's U.S.-based construction subsidiary; and Richard J. Slater, president, Robert E. McKee Inc., Jacobs' facilities construction subsidiary.

SOUTHFIELD, MI (MAY 1) PR NEWSWIRE - Chrysler Financial Corporation today reported 1990 first quarter net earnings of $89 million, surpassing the company's previous all-time record quarter of $86 million set in the fourth quarter of 1989.

John P. Tierney, Chairman of Chrysler Financial, said the company's net earnings were 37 percent higher than the previous first quarter record of $65 million set in both 1988 and 1989.

"CFC's strong net earnings in the quarter resulted primarily from higher interest margins caused by lower borrowing costs," Tierney said. Pre-tax earnings of $135 million established a new all-time record quarter, surpassing the previous high of $133 million set in the fourth quarter of 1989. The previous first quarter record was $102 million also set in 1989.

At the end of the 1990 first quarter, gross receivables serviced were $39.6 billion, compared to $39.8 billion a year ago. Total assets were $27.8 billion at March 31, 1990, compared to $29.7 billion at March 31, 1989.

Chrysler Credit, CFC's automotive finance unit, had $26.2 billion of receivables serviced at the end of the first quarter, compared to $26.8 billion at the end of the 1989 first quarter.

During the quarter, Chrysler Credit financed or leased 118,408 new passenger cars and light duty trucks, representing 26 percent of Chrysler U.S. retail deliveries. This compares with 141,996 units or 29 percent of Chrysler retail deliveries a year ago.

Chrysler Capital, CFC's commercial and industrial leasing and lending unit

had a $7.3 billion portfolio of gross receivables and operating leases at the end of the first quarter, up 18 percent from the first quarter of 1989.

Chrysler First, the CFC unit involved in consumer and inventory financing services, had $6.9 billion of receivables serviced at the end of the quarter, compared to $7.4 billion a year ago.

Chrysler Insurance, which provides property, casualty and inventory insurance to automotive and nonautomotive dealers, had direct insurance premiums written of $50 million during the first quarter, compared to $48 million in the 1989 first quarter.

LOWELL, MA (MAY 1) PR NEWSWIRE - Wang Laboratories Inc. (AMEX: WAN) today announced that its Wang Australia subsidiary has been awarded a contract by the Ford Motor Company Australia Ltd. for Wang VS computer systems and services. The contract is valued at $1.3 million.

This is the second recent significant purchase by an existing VS customer, reflecting a confidence in Wang's VS development strategy. Wang announced in March that the Stop & Shop Company, New England's largest supermarket

chain, had signed a contract for VS computer systems valued at $4.3 million.

The Ford Motor Company of Australia purchase includes three VS mid-range computers that will become part of a sophisticated electronic mail network used to link Ford's Australian operations with the company's offices in Europe, North America, New Zealand and Taiwan. A VS 5000 will be installed in Ford Asia Pacific headquarters, a VS 7010 in the Broadmeadows Assembly Plant, and a VS 7110 in Ford's Product Engineering Operation in Geelong, all in Australia.

Systems users will communicate via Wang OFFICE, an integrated set of office information management and communications applications. Wang OFFICE is an integral part of Ford's worldwide electronic mail network and enables Ford to distribute documents and plans around the company's international network.

For example, Ford used Wang OFFICE to communicate design plans for its Capris sports car to offices located in different time zones. The Capris was designed and built in Australia for the North American market. "The computer systems that control production in Australia had to be integrated with the ordering systems in North America," said Geoff Hare, office automation manager for Ford Austrailia. "Detailed definitions had to be agreed upon and testing had to be monitored between the two countries on a daily basis. The electronic mail facilities of Wang OFFICE made all of this possible."

Wang has been solving Ford's information technology problems since 1981. Wang WP became a standard within Ford Austrailia in 1983 and the company has adopted the Wang PC as its standard throughout Australia. Hare said the company's latest acquisition of Wang VSs was a logical extension to the last major upgrade of Wang equipment in 1986. "Wang office automation was the best then and it hasn't been superceeded," he said.

BOHEMIA, NY (MAY 1) PR NEWSWIRE - Symbol Technologies, Inc. (NYSE: SBL), the leading manufacturer of portable bar code data collection systems, today reported lower sales and earnings for the first quarter of 1990.

For the three months ended March 31, 1990, sales were $51,133,000, compared with $55,547,000 in the corresponding year-earlier period. Net income for the first quarter of 1990 was $266,000 ($.01 per share), compared with $5,424,000 ($.28 per share) for the three months ended March

31, 1989. Weighted average shares outstanding, fully diluted, for the first quarter were 22,457,000 in 1990 and 19,588,000 in 1989.

"Bar code scanner revenue in the first quarter was lower than in the corresponding year-earlier quarter. This was largely due to softness in domestic retailing and increased competition. Also affecting the decline were sharply lower sales to Intermec in anticipation of the agreement between the companies which was announced on April 3. However, that agreement provides Symbol with license royalties and product purchase revenues from Intermec which will contribute significantly to results for the balance of 1990 and beyond," said Dr. Jerome Swartz, chairman and chief executive officer.

"Sales of terminal products were essentially flat in the first quarter of 1990," said Raymond R. Martino, president and chief operating officer. "Lower earnings in the first quarter resulted from lower sales and higher operating expenses. Our increased investments in engineering, product development and in our sales, marketing and sales support functions, are necessary for the long-term growth of the company's revenues and earnings."

Symbol Technologies, Inc. is the world leader in bar code-based data capture systems with over one million scanners and terminals installed. The company designs, manufactures and markets bar code reading equipment, portable data collection systems and radio frequency data communications products which are used as strategic building blocks in data collection systems in retail, military, manufacturing, distribution, health care and many other applications.

#90121p9525 05/01/1990 ~PR Newswire

FORT WORTH, TX (MAY 1) PR NEWSWIRE - Union Pacific Resources Company (UPRC) of Fort Worth announced today 1989 and first quarter 1990 results of its horizontal drilling efforts in the "Austin Chalk" formation -- 16 wells currently producing a (gross) average of 5,900 barrels of oil equivalent per day (BOED). Resources' net working interest is 5,000 (BOED).

The company has a five-rig drilling program in progress, which it expects to expand to 10 rigs by year end. Union Pacific Resources is the oil, gas and minerals subsidiary of Union Pacific Corporation (NYSE: UNP) of Bethlehem, Penn.

All 16 wells are located in the Giddings Field, which covers portions of six counties northwest of Houston. The most productive well was completed in March 1990. In a 24-hour test it produced 1,201 barrels of oil per day and three million cubic feet of gas through a 38.64 choke with a flowing tubing pressure of 850 pounds per square inch.

William L. Adams, chairman and chief executive officer of UPRC, said the company's results and current program makes Resources one of the largest players in the resurgence of the Austin Chalk.

"The vast majority of the 165,000 acres we have leased or under commitment is concentrated inside the Giddings Field limits," Adams emphasized. "We currently plan to drill up to 50 wells this year."

The Austin Chalk, which covers about 10 counties has been drilled since 1933, with its highest activity in the early 1970s and 1980s. It is estimated that more than 6,300 vertical wells have been completed there since 1933 for total production of approximately 475 million barrels of oil equivalent. Since 1979, UPRC has drilled more than 200 successful

vertical wells in the Chalk.

Horizontal drilling techniques have been available for several years but widely embraced only recently. A vertical well is drilled to the chalk and then directed horizontally, penetrating several fractures and producing more oil than a single vertical well in the same formation.

UPRC's horizontal wells have been drilled at vertical depths from 7,200 feet to 9,500 feet. The maximum horizontal displacement has been 3,183 feet, with an average displacement of 2,321 feet. Of the 16 wells, 10 flowed without stimulation or artificial lift. Four of the wells have been stimulated with a water fracture procedure pioneered by Resources in this field for vertical and horizontal wells. All four treatments were successful.

#90121p9535 05/01/1990 ~PR Newswire

CHATSWORTH, CA (MAY 1) PR NEWSWIRE - The Software Toolworks, Inc. (NASDAQ: TWRX), today announced the signing of a series of significant OEM software licensing agreements.

The company has entered into an agreement with Philips N.V. for the licensing of the Software Toolworks' proprietary software operating environment to be bundled with Philips computers worldwide. This operating environment provides the computer user with several innovative features including multi-task switching, automatic background hard drive optimization, and full point-and-shoot menu operation while simplifying normal computer tasks such as launching programs, copying files and making backups. In addition, Philips has purchased additional OEM licenses to the Software Toolworks' published products such as the award-winning Chessmaster, Mavis Beacon Teaches Typing, and Twist & Shout.

The Software Toolworks currently provides the software operating environment, and bundles several of its software programs for the HeadStart series of personal computers, also offered by Philips N.V.

The Software Toolworks has also completed a licensing agreement with the Sun Moon Star PC Division to develop a custom CD ROM software installation program for the Sun Moon Star series of computers. The Sun Moon Star Group is a 45-year-old Taiwanese company with sales in excess of $700 million annually. The Software Toolworks will also license a series of its CD ROM titles for inclusion in the package including the Software Toolworks World Atlas and several other Software Toolworks titles.

Another agreement with Hyosung Computers, a Korean manufacturer of

personal computers, is for software development and licensing for the Hyosung line of computers marketed worldwide under the brand names MAXAR and PULSTAR. This line of powerful yet affordable computers will be marketed in 286, 386-SX and CD ROM configurations.

Lastly, an agreement was signed with CompuAdd to bundle the Toolworks Office Manager and Twist & Shout with certain CompuAdd computers. CompuAdd, the $400 million Austin, Texas-based computer manufacturer, designs, manufactures and markets their line of PCs via mail order and 89 retail stores throughout the world.

Les Crane, chairman and chief executive officer of The Software Toolworks, stated, "These agreements speak to our commitment to expand our OEM division, and to bring our latest CD ROM and operating environment technology to the marketplace." Crane said these licensing agreements will provide immediate contributions to earnings.

The Software Toolworks is a vertically-integrated software publisher, distributor and developer for the Nintendo and personal computer market.

DALLAS (MAY 1) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) today announced that its Dallas-based subsidiary, Grace Drilling Company (GDC), has signed a commercial operating agreement with FlowDril Corporation of Kent, Washington, creating a 50/50 partnership between subsidiaries of GDC and FlowDril to market FlowDril's ultra-high pressure, fluid-jet-assisted drilling system. Field tests of this revolutionary drilling system in East and West Texas have consistently achieved rates of penetration two to three times those of conventional drilling systems in the projected market of medium-to-hard and hard formations.

The FlowDril system is capable of delivering up to a 34,000 pounds-per-square-inch stream of fluid to the formation in front of the drill bit. The fluid stream cuts the rock, thereby enhancing the rate of penetration. The system, based on initial testing, also may offer the ability to drill straighter holes than can be conventionally drilled.

Grace Drilling is the largest onshore drilling contractor in the U.S., with 183 rigs, and is an industry leader in new technological applications. FlowDril is a market leader in ultra-high pressure, fluid-jet-assisted technology.

GDC will supply the partnership with financial support, drilling rigs and equipment, crews and marketing and administrative services. FlowDril will lease its drilling systems to the partnership and provide technical assistance. The partnership will have exclusive use of the FlowDril system in the United States (both onshore and offshore) for 25 years. This exclusivity, along with GDC's long-term commitment to the technology, assures GDC's customers access to this enhanced drilling system. The partnership expects to have three to four commercial drilling systems by year-end 1990.

Grace Energy Corporation, headquartered in Dallas, is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of oil and natural gas; and in coal mining.

#90121p9540 05/01/1990 ~PR Newswire

NEW YORK (MAY 1) PR NEWSWIRE - Marsh & McLennan Group Associates, Inc., leading specialists in the provision of insurance program management services for a broad range of business groups and individuals, has changed its name. Effective today, the Marsh & McLennan Companies subsidiary is Seabury & Smith, Inc.

Frank J. Tasco, chairman of Marsh & McLennan Companies (NYSE: MMC), explained the move: "Marsh & McLennan Group Associates pioneered the business of insurance program management -- including the design, distribution and administration of products and services. This new name helps provide a single, clearly defined identity to distinguish Seabury & Smith's specific role within our overall organization, Marsh & McLennan Companies."

"The name was chosen," according to Bernard F. Rogers, chairman of Seabury & Smith, "to honor Charles Ward Seabury (1876-1966) and Hermon D. Smith (1900-1983), former chief executive officers of the Marsh & McLennan organization. They made invaluable contributions to the substance and values of Marsh & McLennan and our new identity draws from and emphasizes that heritage."

Based on the most recently published rankings of insurance broking companies in the United States, Seabury & Smith, with $149 million in annual gross revenue would by itself rank among the top ten organizations.

Seabury & Smith has 1,500 employees in more than 50 offices in the United States and Canada, as well as an international arm in the United Kingdom. Trained specialists using proprietary technical systems provide service

for nearly three million customers in some 17 million transactions per year.

As a result of the name change, Marsh & McLennan Group Associates units that operated under that name or the following names will now be known as Seabury & Smith: Smith-Sternan Organization, Inc.; Riepe, Buchanan & Piper; Marsh & McLennan Associates; and Marsh & McLennan Group Associates Limited.

The company traces its beginnings back 50 years to the development of firms concentrating on offering insurance program management to individuals and groups. In 1982, Marsh & McLennan Group Associates was formed to unite those specialists within Marsh & McLennan Companies. Strong internal growth and further acquisitions have expanded the firm to approximately three times its original size.

Rogers emphasized that Seabury & Smith continues as a key part of Marsh & McLennan Companies and would so identify itself in advertising and promotion. "We have developed our business," he added, "to the point where we now need to be better recognized as the distinct entity we are. Our new name, Seabury & Smith, represents both a coming of age and a key to our continued growth."

#90121p9543 05/01/1990 ~PR Newswire

NEW YORK (MAY 1) PR NEWSWIRE - Seabury & Smith, Inc., a subsidiary of Marsh & McLennan Companies, today announced a number of executive appointments, following adoption of its new corporate name. The insurance program management firm had until today operated under the name of Marsh & McLennan Group Associates, Inc.

The following corporate appointments were made: Bernard F. Rogers, chairman; Joel Hirsch, president; and Claude Y. Mercier, executive vice president. All three continue as members of the board of directors of the company.

Rogers has served as president of the company since its founding in 1982. Previously, he had been executive vice president of William M. Mercer, Inc., another Marsh & McLennan Companies subsidiary. He is credited with both organizing a program management specialty within Marsh & McLennan Companies and then forming the business units into a company. Under his leadership the business has approximately tripled in size in eight years.

In 1958, Rogers joined William M. Mercer in Chicago in the group and

production departments, after similar experience with Metropolitan Life. He was appointed vice president in 1966 and director and head of the Chicago office in 1975. In 1975, he was appointed director of Mercer's merchandising operations in the New York headquarters.

A graduate of Yale University, Rogers currently serves as a director of Sahara Enterprises, Inc. and has been a trustee of the Architectural League of New York, the Central YWCA College, Hull House Association and the Art Institute of Chicago.

Hirsch previously served as executive vice president of Marsh & McLennan Group Associates, Inc., the predecessor of Seabury & Smith. He began his career with Marsh & McLennan Companies in 1969 when he joined Smith-Sternau Organization, Inc. in Washington. He was named vice president of accident and health operations in 1971, and became corporate vice president in 1973. Hirsch served as senior vice president and executive vice president before being elected president and chief operating officer of Smith-Sternan Organization in 1981.

#90121p9547 05/01/1990 ~PR Newswire

NEW YORK (MAY 1) PR NEWSWIRE - The Prudential Intermediate Income Fund (NYSE: PIF) today issued the following May monthly update:

Distribution Information:

Amount	Payable Date	Record Date	Declaration Date
$0.07	May 25, 1990	May 14, 1990	May 1, 1990

Investment Adviser Commentary:

-- The fund's monthly dividend has been lowered from $.08 to $.07 per share to reflect current conditions in the global markets.

-- A strong U.S. dollar and rising worldwide interest rates have led to a difficult environment for generating gains on currency and security positions thus far in 1990. Furthermore, the fund has reduced option writing activity in 1990 in anticipation of rising U.S. bond prices. The new rate more closely corresponds to the current earnings level of the Fund.

-- Note that the fund's earnings are comprised of interest income on securities and any gains or losses from currency or bond price movements. Therefore, should the fund enjoy substantial currency gains during the year, it will pay out those gains at year end.

-- The adviser remains positive longer term on the foreign and U.S. bond markets. Over the next several months, they expect the U.S. dollar to weaken against most foreign currencies, which should afford the opportunity for the Fund to generate greater currency gains. The adviser further expects interest rates to peak later this year in several European markets. In the U.s., they believe rates of 9 percent represent a good long-term buying opportunity. Such an environment should support appreciation in the fund's net asset value later this year.

The Prudential Intermediate Income Fund, Inc. is an asset allocation fund that invests in different sectors of the world's bond markets, primarily intermediate-term U.S. government and foreign government bonds. The fund's manager is Prudential Mutual Fund Management, Inc. and investment advisory services are provided by the Prudential Investment Corporation.

#90121p9555 05/01/1990 ~PR Newswire

YORK, PA (MAY 1) PR NEWSWIRE - Sonoco Graham Co. announced today that it will begin supplying motor oil bottles made with recycled plastic to the Philadelphia-based Sun Refining and Marketing Co.

Sun will market its Sunoco brand automotive lubricants in bottles which are made with 20 percent recycled plastic. The black one-quart bottles will go into national distribution early next month through specialty retailers and more than 6,400 retail gasoline outlets.

"This is a significant step in Sun's commitment to help protect the environment," said David Rippy, Sun's vice president, Lubes Division.

Other major oil companies being supplied by Sonoco Graham with bottles made with recycled plastic are Texaco, Exxon, Valvoline and Shell.

The Sun bottles will be made with plastic from a full range of colored high density polyethylene (HDPE) bottles collected in community recycling programs, said Phil Yates, senior vice president for Sonoco Graham. Those used bottles will include packages from household, personal care and assorted food products as well as automotive product bottles including Sunoco Ultra brand bottles.

"What's more, that bottles-to-bottles loop can be made again and again," he said.

At first, the Sun bottles will contain 20 percent recycled material, Yates

said, because the demand for recycled plastic is outstripping current supplies. The percentage of recycled plastic will increase as additional supplies become available.

Yates said that his company is doing its best to increase the available supply of recycled material. That's why Sonoco Graham recently announced plans to build a $5 million plastics recycling plant in York.

What's more, Yates said, Sonoco Graham plans to use recycled plastic in nearly every bottle the company makes within three years. A private company based in York, Sonoco Graham is the world's largest manufacturer of HDPE or high density polyethylene bottles and a leader in the use of recycled plastic. Sonoco Graham, which produces more than 2 billion HDPE bottles annually, is 60 percent owned by The Graham Cos., a privately held group, and 40 percent owned by Sonoco Products Co. (NASDAQ: SONO) of Hartsville, S.C. Sun Refining and Marketing Co. is a subsidiary of Sun Co. Inc. (NYSE: SUN) of Radnor, Pa. Sonoco Graham Co. and Sun Co. are not related.

STAMFORD, CT (MAY 1) PR NEWSWIRE - Cognitronics Corporation (AMEX: CGN) today announced net income of $247,000, or 11 cents per share, for the three months ended March 31, 1990, compared to net income of $364,000, or 16 cents per share, for the same period in 1989. Included in net income is an extraordinary credit of $89,000, or 4 cents per share, in 1990 and $110,000, or 5 cents per share, in 1989 attributable to the utilization of operating loss carryforwards. Revenues for the first quarter were $4,373,000 in 1990 and $4,361,000 in 1989.

Matthew J. Flanigan, president of Cognitronics Corporation, stated, "Sales of voice processing products were a record $2.8 million in the first quarter of 1990, up 13 percent from each of the first and last quarters of 1989, which, together with increased sales of machined parts, were offset by lower sales of scanning products.

"The lower operating profit is attributable to higher manufacturing costs in the machined parts segment and the previously-reported increased research and development effort of new voice processing products in 1990, up 35 percent in the current quarter compared to the same quarter in 1989.

"Beginning in 1989, management shifted the major focus of the company's research and development effort to voice processing equipment. With the burgeoning growth of voice processing products throughout the world, management is eager to further exploit the company's high quality,

flexible and versatile McIAS proudct line. A substantial R&D commitment has been made for the development of new and enhanced voice processing products and technology throughout 1990, which during the first quarter of 1990 resulted in a 148 percent increase over the same quarter of 1989. The company's stronger financial position provides the resources to fund the increased R&D and marketing efforts necessary to meet the challenges of the 1990s and benefit operations in the long term."

NORTHBROOK, IL (MAY 1) PR NEWSWIRE - Ronald G. Evens, M.D., director of the Mallinckrodt Institute of Radiology at Washington University's School of Medicine in St. Louis, has been elected to the board of directors of International Minerals & Chemical Corporation (IMC) (NYSE: IGL).

Evens, 50, whose election increases IMC's board size to 12, will serve until the company's annual meeting of shareholders on Oct. 17. He is expected to stand for re-election at that time to a full three-year term.

Evens has been head of the department of radiology at Washington University's School of Medicine, director of the Mallinckrodt Institute of Radiology, and radiologist-in-chief at Barnes and Children's Hospitals in St. Louis since his appointment in 1971 at the age of 31. He was named the first Elizabeth Mallinckrodt professor of radiology in 1972 (the first endowed chair in radiology), and, in 1988, he was appointed to the faculty of the Olin School of Business as professor of medical economics.

Noted for his expertise in a variety of radiologic technologies and business administration issues, Evens was president and chief executive officer of Children's Hospital in St. Louis from 1985-88 and is now the vice chancellor for financial affairs and administration at Washington University, in addition to his responsibilities at the medical school.

Under his direction, the Mallinckrodt Institute of Radiology has undergone a major expansion program and is now responsible for 350,000 radiologic examinations annually and has a staff of 700. It is noted for developments in computed tomography, magnetic resonance imaging, radioisotope detection methods, the development of positron emitting isotopes, cancer biology, hyperthermia, three-dimensional treatment planning in radiation oncology, and the use of computers in medicine.

Evens earned a bachelor's degree in economics from Washington University in 1960 and received his medical degree from the Washington University School of Medicine in 1964.

He has been president or chief executive of numerous health care societies and organizations and serves on the editorial boards of the Journal of the American Medical Association, the Journal of Radiology, and the American Journal of Roentgenology and Investigative Radiology. The author of more than 150 articles for journals and textbooks, Evens has been a consultant to many companies, universities, states and foreign countries.

He is a director of the Boatmen's Bank of St. Louis, the American College of Radiology, the American Roentgen Ray Society, the Association of University Radiologists, and the Washington University Medical Center.

IMC's businesses include Mallinckrodt Medical of St. Louis, a major supplier of products for radiology, cardiology, anesthesiology, nuclear medicine and critical care. Mallinckrodt Medical has been a pioneer in the development of iodinated contrast media for use by radiologists and cardiologists in both diagnostic and interventional X-ray procedures.

IMC's other businesses are Mallinckrodt Specialty Chemicals and Pitman-Moore. The company also owns approximately 38 percent of the common stock of IMC Fertilizer Group, Inc.

IMC recently announced its new name, IMCERA, which will be voted on at a special shareholders' meeting on June 14.

CONTACT: Dave Prichard, 708-205-2270, or investors: Elizabeth Higashi, 708-205-2189, both of IMC

#90121p9561 05/01/1990 ~PR Newswire

ROCKVILLE, MD (MAY 1) PR NEWSWIRE - Contel ASC today announced a major contract with O/E Learning, Inc., a training specialist group located in Troy, Mich., for a national video teleconferencing network.

The network, which will be operational in the second quarter of this year, connects O/E Learning's client headquarters with eight of its regional training centers.

Contel ASC will design and install an interactive video and audio network that incorporates its Channel Management Services. O/E Learning will manage the network and assist its client in developing and transmitting a comprehensive curriculum of personal and professional continuing education courses. The network will also facilitate client business and informational video conferences and meetings.

"Video conferencing delivered over a satellite network provides the flexibility and control we need to fulfill our clients' requirements for a

variety of configurations," said a spokesperson for O/E Learning.

"Contel ASC's NCS 1000 network controller, a feature of its Channel Management Services, allows for centralized management of the network," said Salvatore S. Benti, vice president of marketing and sales for Contel ASC. "An instructor at the hub site can broadcast to all remote locations and view one location. Additionally, a point-to-point conference between two remote locations can be held with both sites video conferencing, and other sites can view either location and participate through the audio bridge."

The 384 kilobits per second network will use Contel ASC's Data Messenger Networks 4000 product line and satellite transmission services. The multidirectional audio bridge is a unique value-added enhancement, never before used in a network this large.

"Contel ASC provides interactive video teleconferencing (VTC) to well over 70 VTC rooms nationally, making Contel ASC the largest provider of private satellite networks used for video conferencing in the United States," said Benti.

Contel ASC, a subsidiary of Contel Corporation (NYSE: CTC) provides data communications networks using satellite-based technology to domestic and international customers. Contel Corporation, a company with $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

DETROIT (MAY 1) PR NEWSWIRE - Approximately 540 General Motors jobs will be added to existing GM facilities in Pontiac, Mich., according to W. Blair Thompson, vice president and group executive in charge of the General Motors Automotive Components Group (ACG) and E. Michael Mutchler, vice president and group executive in charge of the Chevrolet-Pontiac-GM of Canada Group (C-P-C).

Thompson said the ACG group headquarters staff and a consolidated accounting center will move from a leased facility in Troy, Mich., to the Pontiac Division administration building beginning in 1991. When the move is completed, ACG employment in Pontiac will total approximately 300. "This move will help the ACG reduce expenses and at the same time utilize existing available floor space in a GM facility," Thompson said.

Mutchler announced C-P-C is insourcing its trailing-axle business which

will result in adding approximately 120 employees at the Pontiac Manufacturing Operations. "This is the result of the people of Pontiac working together to secure new business," Mutchler said. "It is a strategic decision to more fully utilize GM's available resources in these intensely competitive times." Pontiac will add these trailing axles at the start of 1993 model production.

Mutchler also said that the C-P-C Plant 37 die tryout operations will be transferred from Detroit to the C-P-C Pontiac Manufacturing Operations. The transfer will begin in the fall of 1990 and will be completed by the summer of 1991. Status of the current 133 Plant 37 employees will be governed by the provisions of the GM/UAW National Agreement.

#90121p9566 05/01/1990 ~PR Newswire

GAITHERSBURG, MD (MAY 1) PR NEWSWIRE - Capitol Tune, Inc. (CTI) has acquired area franchise rights for Precision Tune automotive tune-up and engine diagnostic centers in crucial Mid-Atlantic markets -- from New Jersey in the North to Virginia in the South.

The action marks the start of CTI's aggressive expansion campaign which includes the introduction of Precision Tune centers in most of New Jersey, and New York's Staten Island, Pennsylvania, and all of West Virginia, a twofold increase in the number of operating units (from 10 to 20) in Virginia by 1992, and a tripling in CTI's overall operations over the next five years, beyond which a string of additional units will be opened to serve Maryland and Washington, D.C.

According to CTI President Michael Parker, the expanded area franchise includes 19 Precision Tune centers currently in operation, bringing the company's numerical strength to 46 from 27. Capitol Tune, founded in Gaithersburg, Md., only 18 months ago and already one of the most successful subfranchisors in the nationwide Precision Tune system, recently opened offices in Philadelphia and Richmond.

Precision Tune, Inc., Sterling, Va., is America's largest franchiser of automotive tune-up and engine diagnostic centers. More than 530 Precision Tune centers coast to coast provide diagnosis, repair, component replacement, and maintenance of all performance- related systems under the hood. Systemwide revenues totalled approximately $160 million in 1989.

Parker expects "to broaden our base in Philadelphia from three franchised centers currently to as many as 25 in the next three to five years." Major development plans for Pittsburgh -- six Precision Tune centers will

operate under CTI's area franchise -- are being finalized. Meanwhile, the expansion strategy for the remainder of the Keystone State, as well as both New Jersey and West Virginia, must await market analyses. It was disclosed, however, that two units will go into operation in new Jersey by the summer of 1990.

Capitol Tune acquired area franchise rights to all of New Jersey except Camden, Gloucester, and Burlington Counties, and to all of Pennsylvania except for the Greater Harrisburg area.

The Capitol Tune president acknowledges that his company also is considering penetration into other areas, maintaining "an aggressive posture predicated on the extraordinary future we foresee for the auto aftermarket. We have the organizational capability to handle many more units."

Donald E. Ervin, chairman and CEO of Precision Tune, Inc., describes Capitol Tune as "an aggressive, high-quality operation certain to make a dramatic impact on the auto aftermarket in all regions in which it operates."

PALATINE, IL (MAY 1) PR NEWSWIRE - Square D Company (NYSE: SQD) announced that it had concluded the sale of the stock of Yates Industries, Inc., its U.S. copper foil business, to AFEC, Inc., a joint venture company founded by Arbed, S.A. of Luxembourg and The Furukawa Electric Co. Ltd. of Japan.

Square D had sold Yates' European operations and Yates' 50 percent joint venture interest in Furukawa Circuit Foil to Arbed and Furukawa in separate transactions on Jan. 31, 1990. This sale completed Square D's divestiture of the copper foil business.

Square D is a worldwide leader in industrial control and electric distribution products, systems and services, and had 1989 sales from continuing operations of $1.63 billion.

Arbed, a major European steel producer, is part of an international corporate group which had 1988 sales of $5 billion. Furukawa, a leader in electric wire and cable, optical-fiber cable and nonferrous metals, had 1988 sales of about $4 billion.

#90121p9574 05/01/1990 ~PR Newswire
HARTFORD, CT (MAY 1) PR NEWSWIRE - In what may be one of the largest sales of prime downtown real estate in America this year, over two acres of land in downtown Hartford will be sold to the highest bidder at public auction on June 12.

JBS & Associates Inc., national real estate consulting and auction firm, said the strategically located tract, covering 2.08 acres, presently houses the closed Parkview Hilton Hotel, which overlooks the sate capitol building.

Joel D. Zegart, president of JBS & Associates, said the location is so distinctive that the minimum auction bid has been set at $25.5 million.

The 16-story hotel was closed last December and all contents liquidated. The property also includes an adjacent building that houses an operating parking garage with 320 spaces.

Special financing has been arranged that includes a $3 million down payment.

JBS & Associates will conduct the auction in cooperation with Connecticut real estate broker Cavanagh Fritz & Co. at 1 p.m. in the Plaza Ballroom of the Summit Hotel in Hartford on June 12.

The Parkview Hilton site is the most prominent development opportunity in

downtown Hartford, the state capital of Connecticut. Overlooking Bushnell Park and the state capitol building, this prime development site is bounded by Asylum, Ford and Pearl Streets, less than one block to the west of the Hartford Civic Center, the center of Hartford's commercial/state government business district. The location is near many of Hartford's major downtown office buildings including the 38-story City Place, the tallest building between Boston and New York, along Main Street.

Hartford is home to more than 35 insurance companies, earning the title of the "Insurance Capital of the World."

JBS & Associates Inc. auctioned a record $82 million in real property assets in 1989. Among the 1989 sales was one of the largest multifamily housing complexes in the United States, the 1,792-unit Colonial House Apartments in Houston, which sold for $8.9 million. Since the company was founded in 1985, it has auctioned in excess of $150 million in real estate including multifamily housing complexes, condos, villas, townhomes, resort properties, single-family dwellings and commercial properties. Since 1986 JBS & Associates also has auctioned $100 million in notes. The firm recorded residential and commercial auction sales of $42 million in 1988.

TAMPA, FL (MAY 1) PR NEWSWIRE - Link-Miles Simulation Corporation, a wholly owned subsidiary of Bicoastal Corporation, announced the formation of General Energy Technologies, a joint venture company between NPO Energia of the Soviet Union and Link-Miles Simulation Corporation of Columbia, Md. General Energy Technologies will be a Soviet enterprise centered in Moscow and will provide Soviet and Eastern European simulation training, and engineering services in energy related fields including nuclear and fossil fuel power plants, and chemical processing.

Link-Miles Simulation Corporation is the recognized world leader in Nuclear Power Plant Simulation, and NPO Energia is the world's largest Nuclear Steam Supply System vendor. Link-Miles Simulation Corporation is currently under contract to provide multiple full-scope Nuclear Power Plant Simulators to a branch of NPO Energia. General Energy Technologies is an expansion of that relationship combining the simulation engineering and managerial experience of Link-Miles Simulation Corporation with the nuclear engineering, design and plant operational expertise of NPO Energia to meet the simulation and training needs for Soviet designed plants worldwide.

The joint venture agreements were signed in Moscow on April 18, 1990 and

are currently being processed for Ministerial approval. Link-Miles Simulation Corporation will be the majority partner in the venture.

CLEVELAND (MAY 1) PR NEWSWIRE - McDonald & Company Investments, Inc. (NYSE: MDD) today reported results for the fourth quarter and fiscal year ended March 30, 1990.

Revenues for the fiscal year rose $12,030,000, from $63,389,000 a year ago to $75,419,000, an increase of 19 percent. For the fourth quarter, revenues increased 24 percent, from $15,827,000 to $19,599,000.

For the fiscal year ended March 30, 1990 income before extraordinary gain was $2,773,000, or $.48 per share, a decline of 13 percent when compared to the fiscal 1989 income before extraordinary gain of $3,172,000, or $.51 per share. Income before extraordinary gain in the fourth quarter was $427,000, or $.07 per share, compared to $723,000, or $.12 per share, in the fourth quarter of fiscal 1989.

Net income in the fiscal year was $3,321,000, or $.58 per share, compared to $3,172,000, or $.51 per share, in the year-ago period, an increase of five percent in net income and 14 percent in earnings per share. For the fourth quarter, net income was $662,000, a decrease of eight percent from the net income of $723,000 reported in the fourth quarter a year ago. Earnings per share were $.12 in both the fourth quarters of fiscal 1990 and fiscal 1989.

Included in net income in the fiscal year and the fourth quarter was an after tax extraordinary gain, of $548,000 and $235,000, respectively, resulting from the company's purchase and retirement of a total of $3,595,000 of its 8 percent convertible subordinated debentures.

The average number of common shares outstanding during the fiscal year was 5,760,000 compared to 6,224,000 a year ago. In the fourth quarter of fiscal 1990, average common shares outstanding was 5,730,000 compared to 6,038,000 in the fourth quarter of fiscal 1989.

Directors of McDonald & Company Investments, Inc. today declared a regular quarterly dividend of $.05 per share payable May 21, 1990 to shareholders of record May 11, 1990.

McDonald & Company Investments, Inc., through its principal subsidiary, McDonald & Company Securities, Inc., operates a regional investment banking and brokerage business with 22 offices in Ohio, Michigan and

Indiana and 4 offices in Illinois, Massachusetts, New Jersey and Texas.

TUSTIN, CA (MAY 1) PR NEWSWIRE - MAI Basic Four, Inc. (NYSE: MBF), today reported profitable results for its three- and six-month periods ended March 31, 1990, although revenue and net income declined in comparison to the like periods in 1989.

Revenue for the quarter ended March 31, 1990, declined 9.3 percent to $95.0 million from $104.7 million reported for the same quarter last year. Current quarter operating income was $8.4 million as compared to $10.1 million reported for the same period last year. Net income was $2.1 million for the current quarter compared to $2.4 million reported last year.

Revenue for the six months ended March 31, 1990, declined 11.9 percent to $187.1 million from $212.3 million reported a year ago. Operating income was $17.9 million during the first half of the current year as compared to $24.8 million reported last year. Net income declined to $4.6 million from $7.9 million reported during the first six months of last year.

Lower revenues for both the three- and six-month periods ended March 31, 1990, are primarily the result of generally reduced customer demand for mid-range computer systems, especially in the United States, and delayed buying decisions by customers anticipating the company's offering of its new high-end UNIX based computer systems. The company's divestitures of certain foreign operations in 1989 also contributed to lower revenues.

Gross profit margins of 45.3 percent and 46.5 percent during the second quarter and first six months of 1990, respectively, compared favorably with 44.8 percent and 46.1 percent reported during the same periods of last year. These increases resulted primarily from cost savings derived from the restructuring of customer service operations.

MAI Basic Four assembles, markets and services a full line of mid-range business and information processing systems for multi-user applications throughout the world. The company's line of supermicro and superminicomputers and information system products is complemented by both its extensive software development capabilities and its worldwide maintenance organization. MAI Basic Four, with approximately 3,500 employees and a customer base of more than 45,000 shipped systems worldwide, markets its products in 36 countries.

PRINCETON, NJ (MAY 1) PR NEWSWIRE - Fowler Platt Batchelor Investments, a newly formed investment firm, today announced the purchase of Axel Electronics, a major producer of specialized electronic components for defense and aerospace applications.

Axel had been a division of General Signal Corp. since 1967 and has been serving the defense and aerospace markets with key radar components and sub-systems and radio frequency interface suppression products since 1956.

The company's headquarters and principal manufacturing facilities are in Jamaica, N.Y. It also maintains a product development and assembly plant in Simi Valley, Calif.

Fowler Platt Batchelor Investments was formed in March 1990 by retired U.S. Navy Admirals Earl B. Fowler and Stuart F. Platt and Kevin R. Batchelor, a prominent mergers-and-acquisitions consultant specializing in the defense sector.

Axel is the firm's first acquisition, and is typical of the small-to-medium-sized defense contractors on which it will focus exclusively.

In announcing the move, Batchelor said Axel's entire management team will remain in place, and that Fowler will become chairman of the board of directors.

"Axel exemplifies the type of high-quality defense contractor in which our firm seeks investments," he said. "Based on our principals' knowledge of the military and aerospace markets, we believe we add special value to solid companies while also generating excellent returns to institutional investors."

Batchelor noted that Fowler Platt Batchelor is engaged in discussions with a number of large companies seeking to divest small to medium-sized defense operations.

WASHINGTON (MAY 1) PR NEWSWIRE - Changes and advancements in the international automobile industry have prompted the Automobile Importers of America to change its name.

Beginning May 1, 1990, the 25-year-old organization will be known as the Association of International Automobile Manufacturers, according to Chairman Friedrich Hanau.

"The name no longer describes the organization we have become," Hanau said. "The business of manufacturing, design and production has changed significantly since 1965, becoming more international in nature. Manufacturing in the United States as well as new partnership arrangements make it appropriate to broaden the association's services to the members since they are more than just importers."

He said the goals of the association have become more diverse, reflecting the reality of the wider, more complex needs and interests of the members.

"We are interested in maintaining an American market which appreciates the three strengths our members' vehicles represent -- quality, value and choice," he said.

The association has also recently moved its offices to 1001 19th St. North Arlington, Va. 22209.

#90121p9595 05/01/1990 ~PR Newswire

BIRMINGHAM, AL (APRIL 30) PR NEWSWIRE - Torchmark Corporation (NYSE: TMK) reported that a state court in Indiana today enjoined an Indiana Insurance Commission hearing concerning Torchmark's solicitation of proxies for five independent nominees for director at American General Corporation's (NYSE: AGC) annual meeting on May 2, 1990.

The decision came in response to litigation filed today by Torchmark, alleging abuse of discretion and violation of due process by the insurance commissioner. Torchmark sought a temporary restraining order and preliminary injunction, delaying the hearing scheduled by the commissioner for Tuesday, May 1. State Superior Court Judge Richard L. Milan granted a delay until May 7, 1990.

Said a Torchmark representative, "This is another unfortunate move by American General management to prevent its shareholders from having the opportunity to vote on our slate of nominees."

Outlined in the litigation are efforts by another insurance company to force Torchmark's legal counsel to withdraw at the last minute; the refusal by the insurance commissioner to delay the hearings so that new

counsel could become informed; the improper use of "emergency powers," which the judge called "a thinly veiled attempt to satisfy the minimal notice requirement by avoiding it," and other actions designed to impair Torchmark in the hearing.

Torchmark also reported that the acting commissioner of the department of commerce and insurance for the state of Tennessee, Commissioner Joe Huddleston, today ruled that Torchmark's notice of disclaimer of control with regard to its solicitation of proxies for use at the American General annual meeting would be disallowed. The ruling applies to Torchmark's solicitation for the election of five independent nominees to the American General Board and to Torchmark's shareholder resolution concerning the proposed sale or merger of American General.

A spokesman for Torchmark stated that Torchmark strongly disagreed with the acting commissioner's determination and would immediately challenge in court the validity of the ruling.

Formal actions by state regulatory authorities in California, Virginia, Hawaii and Missouri have held Torchmark's solicitation to be in compliance with the applicable laws and regulations in those states. Last week, Torchmark filed a disclaimer of affiliation in Texas, and stated that it believed it has satisfied insurance regulations in that state.

OIL CITY, PA (MAY 1) PR NEWSWIRE - Quaker State Corporation (NYSE: KSF) has completed the sale of the McKean Plant, Farmers Valley, Pa., and the Emlenton, Pa., Wax Plant to Petrowax PA Inc. for $30 million.

Petrowax, a subsidiary of U.S. Petroleum Corp., New York, N.Y., specializes in the manufacture and sale of waxes.

Under terms of the sale, Quaker State received payment of $20 million in cash and a $10 million subordinated note, payable beginning in 1991 with interest over a term of up to 8-1/2 years. A pretax gain of approximately $3.5 million has been recognized on the transaction, and additional gains will be reported as proceeds from the note are collected. In addition, the company also sold Petrowax certain inventories at these locations, priced at current costs, and the effects of LIFO liquidations of these inventories will be determined at a later date.

A total of 258 salaried and hourly workers were employed by Quaker State

at the two plant. There is no contemplated reduction in the labor force at the plants as a result of the sale.

#90121p9598 05/01/1990 ~PR Newswire

LINCOLNSHIRE, IL (MAY 1) PR NEWSWIRE - ARDIS, a partnership of IBM and Motorola, announced today that it has begun full commercial operation of the country's first nationwide radio data information network service.

The availability of such radio data services will create over the next decade a multibillion-dollar market opportunity for new information systems as companies further automate their field sales, distribution and service functions.

The beginning of service follows the completion of required licensing from the FCC and the transfer of assets to ARDIS from International Business Machines Corp. and Motorola Inc.

ARDIS combines IBM's private data radio system and Motorola's shared-use Radio Data Network. Using ARDIS, people, while inside a building or on the street, are now able to communicate with computers virtually anywhere in the United States.

Otis Elevator Co. is an early user of the service. Sears, Roebuck and Co. and New York Life Insurance Co. have announced plans for field trials using ARDIS and a number of other major corporations are in various stages of trial and implementation of applications utilizing the ARDIS service.

ARDIS permits a worker in the field using a personal terminal with a radio modem to transmit information through a radio signal to the nearest of 1,100 radio base stations located across the country. This message is then passed through the ARDIS nationwide network to the designated customer computer, and he receives the information he needs in a matter of seconds.

The service will enable people to communicate with PCs, minicomputers, mainframes and, importantly, other users on the network.

ARDIS is headquartered in Lincolnshire, a suburb of Chicago, with primary network operations centers in Illinois and Kentucky. Other operations facilities are located in New York and Los Angeles.

Financial details for the company were not announced. Customers seeking more information on ARDIS should call 800-622-5328.

CONTACT: Tom Crosby or Jim McClure, 312-280-2182, both of Edelman Public Relations, for ARDIS, or Rob Euler of ARDIS, 708-913-1215.

MINNEAPOLIS (MAY 1) PR NEWSWIRE - Munsingwear, Inc. (NYSE: MUN), announced today that it has received an unsolicited proposal from Irwin L. Jacobs to acquire a controlling interest in the company.

Jacobs' proposal contemplates that subject to normal due diligence, a company to be established would make a significant cash investment in Munsingwear in return for an 80 percent equity ownership. His proposal also would be conditioned upon the ability to redeem Munsingwear's existing $34 million of 8 percent debentures at not more than 25 percent of face value.

The proposal also stated: "Existing shareholders who do not want to continue to participate in the company as reorganized will be given the opportunity to sell their shares to the acquisition entity for $2 per share." That $2 price is a premium of about one-third over the recent market price of the stock.

Lawrence L. Horsch, Munsingwear chairman and chief executive officer, indicated that the proposal will be studied further and considered by the board of directors with the assistance of its advisors in the near future. "In the meantime," he added, "further discussions with Jacobs are expected to be held."

Munsingwear also reported net sales of $29,957,000 for the first quarter ended April 7, 1990, and net income of $657,000 or $.13 per share. Included in these results is net income from discontinued operations of $846,000 or $.17 per share. In the first quarter of last year, the company reported net sales from continuing operations of $32,164,000 and net income of $1,416,000 or $.29 per share, of which $462,000 or $.10 per share was from discontinued operations of $509,000 or $.10 per share was from the recognition of a tax loss carryforward benefit.

Horsch also stated: "Our at once orders for basic goods in Munsingwear Canada and LeRoi Princeton Divisions were slower than expected in the first quarter of this year, causing these divisions to be behind plan in revenues and profits. The men's division experienced a very strong first quarter led by its successful re-entry into the golf apparel area under its Grand Slam label. Their performance was particularly noteworthy since the division had to cope with the operational impact of a plant closing and the relocation of its warehouse during the quarter. The overall underperformance of the company in the first quarter has tightened its liquidity condition."

Munsingwear, Inc., a Minneapolis-based company, designs, manufactures and markets branded sports apparel and furnishings through its men's apparel division, branded junior sportswear for the Canadian market through its Munsingwear Canada (1989) Inc. subsidiary, and the LeRoi brand of infants' and children's apparel through its LeRoi Princeton Division.

#90121p9606 05/01/1990 ~PR Newswire

WARMINSTER, PA (MAY 1) PR NEWSWIRE - Fischer & Porter Co. (AMEX: FP) reported today that sales for the first quarter of 1990 ($48,583,000) were virtually the same as the first quarter of 1989 ($48,541,000).

Sales in the United States declined $4 million while sales by International units increased a like amount. The lower sales in the United States was both in instruments and in systems and was partly due to lower order input as well as the timing of systems' shipments. The absence of a sales increase, despite improved gross profit margins, resulted in a slight loss from operations. Interest expense was $689,000 higher than the prior year which reflected the full impact of the 1989 increase in debt

levels to finance major renovations in Warminster and an increase in inventories due to the order levels in 1989. As a result, there was a pretax loss of $892,000 in 1990 compared to a pretax loss of $346,000 in 1989. The absence of income tax benefits on losses in the United States and at certain subsidiaries resulted in a net loss for the current quarter of $1,994,000 or $.40 per share compared to a net loss of $1,592,000 or $.32 per share in the prior year quarter. Per-share amounts in the prior year have been restated to reflect the 5 percent stock dividend declared in February 1990.

Orders received for the first quarter of 1990 were $62.5 million compared to $59 million during the comparable quarter in 1989 and compared to $56 million in the fourth quarter of 1989. The backlog of unfilled orders was $75.5 million at March 31, 1990, and $61.5 million at Dec. 31, 1989. The order level in the first quarter of 1990 reflects an increase of nearly $13 million in orders in International when compared to the fourth quarter of 1989.

Fischer & Porter Co. is a world leader in measurement and control technologies. The company's products include flowmeters, transmitters, process controllers, microcomputers, distributed control systems, analytical instruments and various types of disinfection equipment. Throughout the world, Fischer & Porter instruments and systems are an integral part of such varied enterprises as chemical plants, pharmaceutical plants, food and beverage processing facilities, pulp and paper mills, mines, metal refineries and municipal and industrial water and wastewater treatment plants.

MIAMI (MAY 1) PR NEWSWIRE - Sterling Motor Cars added a pair of executives with extensive luxury-import experience to head its dealer development and warranty departments.

Robert G. Gillan, 36, headed up Jaguar Cars, Inc., dealer development operation prior to joining Sterling as dealer development manager. Additionally, he spent some 10 years in a variety of senior positions with Jaguar and BMW of North America.

George H. Blinn III, 45, has spent 25 years in the automotive industry, including roles as warranty manager for BMW and manager of service and engineering for Peugeot Motors of America, Inc.

According to Sterling President Graham J. Morris these additions are further commitment of Sterling to the American market.

"We are committed to fielding the best team possible and will look throughout the industry, and the country, to find the right players," he explained.

Both Gillan and Blinn will be moving their families from Hillsdale, N.J., to Miami.

HERZLIA, ISRAEL (MAY 1) PR NEWSWIRE - Scitex Corporation, Ltd. (NASDAQ: SCIXF), the world's leading manufacturer of digital color imaging systems for the printing and publishing industries, today announced it is entering into an agreement with GTE Spacenet Corporation which provides for exclusive marketing rights for GTE Spacenet's Prepress Express service to the U.S. graphic arts community.

The alliance with GTE Spacenet, a world leader in the provision of telecommunications services and systems, and Scitex, with its graphic arts industry marketing expertise, is expected to accelerate the expansion of the use of satellite-based services within the pre-press industry.

Prepress Express is a high-speed satellite communications service allowing printers, publishers and color separators to send image data from one location to another, or between sites in a single organization. Scitex anticipates Prepress Express being utilized by both Scitex and non-Scitex system users, creating a national image transfer and exchange network.

The applications of Prepress Express are varied, especially for users with tight deadlines and multiple operations, including remote proofing, for immediate evaluation of contract-quality color proofs, as well as remote imagesetting, in which page assembly files are transmitted by satellite communications and exposed as color separation films.

Prepress Express consists of a small satellite terminal that interfaces with the customer's pre-press equipment. The terminal employs customized software which allows the customer's site to send and receive network control information form a central network operations center operated by GTE Spacenet. This facility receives requests from the sites for transmission, assigns satellite channel frequencies and modern settings to each site, and receives end-of-transmission notices from the sites so that the satellite channel can be reassigned.

Scitex Corporation, Ltd., designs, develops, manufactures, markets, and

services interactive computer imaging systems used primarily in the printing and publishing industries. Scitex products are also used in the cartographic and textile industries, as well as for certain applications in the printed circuit board manufacturing and seismic exploration industries. Scitex operates marketing, sales and service divisions in North America, Europe and Japan. Scitex systems are sold and serviced in other areas through regional distributors.

CONTACT: Philip Y. Sardoff or Gordon Wolfe of Wolfe Lombard, 212-545-8400 for Scitex.

DALLAS (MAY 1) PR NEWSWIRE - Texas Instruments was honored Thursday, April 26, by a major substance abuse prevention organization for its drug-free workplace policies.

PRIDE, the largest organization in the United States devoted to drug abuse prevention through education, presented TI with its corporate award during the PRIDE World Drug Conference in Orlando, Fla. TI was the first recipient of this national service award.

TI was recognized for its drug-free policy, which is among the most comprehensive in the nation, and for its smoke-free policy. TI U.S. Personnel Director Chuck Nielson accepted the award for the company.

President Virgilio Barco Vargas of Colombia was recognized with the Spirit of Freedom Award, which is given to the individual who has done the most in the last year to fight the illegal use of drugs. PRIDE presented the award to him April 20 in Bogota.

The conference, held April 23-28, is the world's largest gathering of educators, government officials, parents and youth to focus on drug abuse strategies. More than 6,000 people from 60 countries attended the conference, which is in its 13th year. Keynote speakers include U.S. drug czar William Bennett, U.S. Information Agency Director Bruce Gelb, and Health and Human Services Secretary Louis Sullivan. President Bush delivered a videotaped address Thursday night.

Texas Instruments Incorporated, headquartered in Dallas, is a high-technology company with sales and manufacturing operations in more than 30 countries. TI develops, manufactures and markets semiconductors, defense electronics systems, software productivity tools, computer systems, industrial automation and control systems, electrical controls, metallurgical materials, and consumer electronics products.

FINDLAY, OH (MAY 1) PR NEWSWIRE - Strong operations, increasing financial strength and a favorable outlook for the company were reported to stockholders of Cooper Tire & Rubber Company (NYSE: CTB) at their 75th annual meeting.

During 1989, more than 297 million pounds of natural and synthetic rubber were converted by the company into tires, inner tubes and other products designed and engineered to serve motorists and the automotive manufacturing industry. This rate of conversion represented an increase in productivity per employee of 37 percent over the past ten years.

The company announced planned capital investments of over $130 million during 1990 to further improve capabilities to meet the demands of customers. Projects are scheduled at all the company's plants to advance and expand operations, keeping Cooper on the leading edge of technology and efficiency. By the end of 1990, the company will have the combined capability of producing 80,000 tires per day, an increase of 27 percent in capacity over a two year period.

Stockholders were told that sales and earnings increases during the first quarter continued the momentum established in the past. During the same period, stockholders' equity continued to increase, and long-term debt was further reduced to 16.6 percent of capitalization. The strength of the balance sheet favorably positions the company to acquire, as needed, additional long-term debt to assist in financing planned expansions and development of the new Albany, Ga. facility.

At the meeting stockholders re-elected W. Robert Brewer, William T. Fitzgerald, Ronald W. Skeddle and Leon F. Winbigler to the board of directors for terms expiring in 1993. Other directors continuing in office are Edward E. Brewer, Edward Donley, Merle E. Gilliand, Ivan W. Gorr, Allan H. Meltzer, J. Alec Reinhardt and Patrick W. Rooney.

BETHPAGE, NY (MAY 1) PR NEWSWIRE - Grumman Corporation (NYSE: GQ) has been awarded a contract by the Naval Oceanographic and Atmospheric Research Laboratory (NOARL), Stennis Space Center, Mississippi, to provide the Primary Oceanographic Prediction System (POPS).

POPS is a supercomputer-based system that NOARL will use to model the ocean and atmosphere to predict their behavior. The eleven-year contract is valued at $204 million if all options are exercised.

Robert J. Myers, president of Grumman's Data Systems division, said, "The POPS project was a major target for our team in 1990. It shows the investments that we have made in people and technology in supercomputing are paying off for us and our customers. Our team is committed to making the NOARL a satisfied customer."

Grumman Data Systems is teamed with MAR, Inc. of Rockville, Md. Among several subcontractors providing hardware and software are Cray Research, Minneapolis; IBM Corporation, Armonk, N.Y.; and Network Systems Corporation, Minneapolis.

Grumman Data Systems, an operating division of the $3.56 billion Grumman Corporation, provides design, development, integration, installation, maintenance, and support capabilities for large-scale information systems used by the Department of Defense, NASA, other federal and state agencies, and private industry.

ATLANTA (MAY 1) PR NEWSWIRE - Charles D. Graham has been named president of Wilma Southeast.

As president, Graham is in charge of the company's various development and management activities throughout the Southeast.

Graham has replaced M.J. "Skip" Beebe, who has assumed responsibility for Culbro Land Resources Inc. and other Culbro subsidiaries in Hartford, Conn.

According to Graham, he will continue to serve as president of Wilma Inc., the U.S. holding company for Wilma International, one of Europe's largest privately held construction and full-service development organizations.

"I'm delighted to have this opportunity and believe it will be a smooth transition," said Graham. "Wilma Southeast is respected throughout the region and has some exciting projects under way. We are strategically positioned for the future."

In Atlanta, Wilma Southeast's projects include RiverEdge Center, a 100-acre office park adjacent to the Chattahoochee River; Centrum at Glenridge, an eight-story, 175,000-square-foot office building; Cumberland Plaza, planned as two office buildings; and Atlanta Tradeport, a mixed-use domestic and international business complex east of Hartsfield International Airport.

Other developments in the Southeast are Jacksonville International Tradeport, a 615-acre business park in Jacksonville, Fla.; and Bayport Colony, a 2,000-acre residential community with office and retail space in Tampa, Fla.

Graham joined Wilma Inc. in 1983 as executive vice president and chief financial officer. In 1988, he was named president of Wilma Inc.

Prior to joining Wilma Inc., Graham was vice president of finance and chief financial officer of the Sea Pines Co. in Hilton Head, S.C. Previously, he was associated with Cousins Properties and Arthur Andersen & Co.

Graham earned his B.A. in accounting and business and his master's degree in accounting and finance from Florida State University, where he graduated with honors.

Graham is a member of the Urban Land Institute, the National Association of Industrial and Office Parks, the U.S. Chamber of Commerce and the American Institute of Certified Public Accountants.

MIAMI (MAY 1) PR NEWSWIRE - Burger King Corporation announced today that The Coca-Cola Company will become the official soft drink syrup supplier to Burger King (R) restaurants in the U.S.A. Coca-Cola classic, diet Coke, Sprite, Minute Maid, and other Coca-Cola products will become available in Burger King (R) restaurants over the next several months.

"We selected Coca-Cola because of its ability to provide a powerful mix of global brand strength, state-of-the-art technological capabilities and distinctive service," said Barry J. Gibbons, chief executive officer, Burger King Corporation.

Burger King International, which currently serves Coca-Cola products in most of its restaurants, will continue its agreement with The Coca-Cola Company to provide soft drink syrup services to Burger King International.

Burger King Corporation was acquired by Grand Metropolitan in January 1989. One of the United Kingdom's largest international companies, Grand Metropolitan is a world leader in the food, drinks, and retailing businesses.

SKOKIE, IL (MAY 1) PR NEWSWIRE - Brunswick Corp. (NYSE: BC) announced today that a definitive agreement had been signed for the sale of the Energy Conservation Systems (ECS) unit of its Technetics division to a group headed by Jack S. Singleton, a former corporate vice president of Brunswick Corp. and president of its Technetics division. Closing is expected within the next several weeks.

The ECS unit is located in DeLand, Fla., and produces specialty materials for aerospace and industrial applications. Sales and earnings of the ECS unit were not disclosed.

The company had previously announced the intended sale of the ECS unit and other industrial units as part of its continuing strategy to focus on its businesses in the marine, recreation/leisure and defense industries.

Headquartered in Skokie, Brunswick Corp. serves worldwide markets in the marine power, pleasure boating, recreation products, defense/ aerospace and industrial areas. Its stock is traded on the New York, Tokyo, London, Pacific and Midwest Stock Exchanges.

ENCINO, CA (MAY 1) PR NEWSWIRE - Medical Properties Inc. (AMEX: MPP) today reported net income of $435,000 or $.18 per share for the first quarter ended March 31, 1990, as compared to $497,000 or $.21 per share for the same period the previous year. Revenue, principally from rental properties, was $1,334,000 for the first quarter ended March 31, 1990, as compared to $1,391,000 for the same period the previous year. The decrease in net income and revenue is primarily due to lower excess rental income.

Medical Properties is a real estate investment trust engaged in investing in income producing health care related facilities.

AUSTIN, TX (MAY 1) PR NEWSWIRE - Motorola's Microcontroller Division today announced the CDS8/05, the first member of the Jewelbox CDS8 family of low-cost development systems. The CDS8/05 enables hardware and software engineers to develop applications and products for Motorola's popular family of M68HC05 (HC05) CSIC (Customer Specified Integrated Circuit) microcontrollers. The CDS8/05 provides a portable, high performance development environment. It gives designers a single-source solution for all development phases from prototype to market at the low price of $2,950.

"The CDS8/05, together with Motorola's complete line of evaluation products, demonstrates our commitment to providing high performance/low cost development tools to our customers to speed their product development cycle," said R. Gary Daniels, vice president and general manager of Motorola's Microcontroller Division.

The CDS8/05 provides real-time, non-invasive emulation of the microcontroller and includes a window oriented user interface and menu-driven commands to speed programming productivity. Other time-saving features include single-step execution, symbolic debugging, software breakpoints, continuous run mode and memory tapping.

As the first commercial product based on Motorola's 68332 (332), the CDS8/05 takes advantage of the 32-bit microcontroller's advanced

integration by replacing the equivalent of nine peripheral chips. Weighing only two pounds, the CDS8/05 is small enough to fit into a briefcase. The development system measures 12 inches wide, 11 inches deep and 2 inches high.

The CDS8/05 was designed with alternative power sources for portability. Powered either by a universal 85 to 265 volts AC, 50 to 60 Hz power supply or a 9 to 18 volts DC converter, the CDS8/05 can be used in the laboratory or in the field. The CDS8/05 features a bus analyzer that contains an 8K by 80 real time trace buffer. The bus analyzer can connect to on board non-volatile RAM which stores macros loaded in the laboratory for use in the field.

The product includes a software development package that runs on an IBM PC XT, AT or compatible computer, which also serves as the host computer for the CDS8/05.

The CDS8/05 is available now. Jewelbox CDS products for the 68HC11 and 68332 are expected to be announced later this year.

SEATTLE (MAY 1) PR NEWSWIRE - The interim board of directors of Emerald City Bank yesterday announced it will report on the bank's financial condition at a special shareholders' meeting May 21.

The board appointed Clint Randolph chairman of the board, accepted the resignation of Steve Graham from the board, and appointed Jim Gill to the board. Randolph is Boeing's manager for its compliance review program. Gill is the chief financial officer for Stewart Title Co. Graham, of Perkins Coie, was unable to serve due to a potential conflict of interest.

The board also appointed Foster Pepper & Shefelman as general counsel for the bank, replacing the firm of Holland and Scales.

"We are very pleased with the composition of this independent interim board," said Arlender Jones, chief executive officer of Emerald City. "They are thoroughly familiar with the financial services industry, so they can give us professional counsel. That's important with a business like ours."

"The primary duty of the interim board is to make a recommendation to the shareholders about the long-term viability of the bank," said Mary Pugh, board member.

Randolph said the interim board will complete an overall financial assessment of the bank with special analysis of problem assets, contingent claims, operating expenses and margin, and insurance costs.

"If the interim board believes that the bank can be made into an ongoing concern, then it will be our task to recruit a permanent board of well-respected members of the community who have a strong business orientation," Randolph said.

"The permanent board will then be responsible for securing the commitment of the community to the bank and for raising new capital from investors who are committed to a minority-owned bank that serves the diverse interests of the community."

Board members include, in addition to Randolph and Gill, Gary Melonson of Security Pacific, Richard Sproul of Key Bank and Mary Pugh of Washington Mutual.

CLEVELAND (MAY 1) PR NEWSWIRE - National City Bank is the 1990 Season Sponsor of the Cleveland Metroparks Zoo.

"We're proud to be the Zoo's corporate partner this year," stated David Daberko, National City Bank president. "The Zoo's programs and activities

provide a unique contribution to the community and touch the lives of young and old alike."

National City's sponsorship makes possible the airing of radio and television commercials during spring and summer, as well as zoo segments on WEWS Channel 5's "Morning Exchange" and WJW-TV 8's "PM Weekend" programs, to help promote zoo attendance.

"This sponsorship is consistent with the bank's goal of supporting worthwhile organizations that provide significant cultural and social benefits to the community," said Daberko.

National City Bank is the flagship bank of National City Corporation (NYSE: NCC), one of the nation's leading super-regional bank holding companies with assets of $23 billion and more than 420 branch offices in Ohio, Kentucky and southern Indiana.

#90121p9649 05/01/1990 ~PR Newswire

SYRACUSE, NY (MAY 1) PR NEWSWIRE - Niagara Mohawk Power Corp. (NYSE: NMK) has embarked on a series of short-term goals and long-term objectives for increasing the overall value of the company, its shareholders heard today.

William J. Donlon, chairman and chief executive officer, told shareholders at the company's 41st annual meeting that these goals and objectives will guide Niagara Mohawk into the 1990s.

Key to the company's efforts, he said, is the extensive regulatory agreement reached last year with the state's Public Service Commission, Consumer Protection Board, Attorney General and a group of large industrial customers.

The 1989 agreement established a framework for the resolution of several outstanding regulatory matters, including a possible multi-year rate increase that would begin on Jan. 1, 1991.

As part of the agreement, Niagara Mohawk is now conducting an intensive self-assessment of its operations to enhance the company's efficiency and effectiveness.

The chairman said that restart of the Nine Mile Point Unit One nuclear station is scheduled during this calendar quarter, pending approval from the Nuclear Regulatory Commission Region I Admininstrator.

Other priorities for 1990 include the completion of the study being

conducted on the company's natural gas business and the successful completion of negotiations now underway to resolve a multitude of regulatory issues.

Niagara Mohawk is studying its entire gas business as part of the 1989 regulatory agreement, and is to submit a final report to the PSC staff by June 1.

The company is studying various options for its gas operations to gain the most possible value from that asset for the company, its shareholders and customers.

The company is not expected to resume common share dividend payments at least until after Nine Mile One is returned to full operation. At that point, the board also must consider the levels of cash flow, retained earnings and other factors before a dividend can be paid.

#90121p9651 05/01/1990 ~PR Newswire

BOSTON (MAY 1) PR NEWSWIRE - Boston area consumers who visit their local supermarket or convenience store today will find an innovative addition to their dairy cases when Nescafe Mocha Cooler becomes available.

A refreshingly cold combination of rich chocolate, fresh coffee and 2 percent low fat milk, Nescafe Mocha Cooler is a ready-to-drink beverage that will be available in Boston on a pilot market basis for the next 12 months. The Boston area is one of five pilot markets in the United States.

"Boston area residents are well known for their good taste, and ability to recognize and support unique new products and trends," said Angelo Iantosca, vice president of marketing for Nestle Foods Corporation's coffee/tea division. "We're confident they'll find that Nescafe Mocha Cooler can be enjoyed anytime, anywhere and any way."

"With today's stressful lifestyles, every once in a while it's nice to sit back and relax. We believe consumers will find that Nescafe Mocha Cooler helps them take a break, while making their relaxing moments even more enjoyable."

A fully integrated marketing program unique to the dairy industry will support Nescafe Mocha Cooler's introduction. In addition to radio and television advertising, a customized mobile truck will travel to area supermarkets and convenience stores to give out free samples of the

product. A variety of special events and promotions are planned utilizing the sampling truck. McCann-Erickson Advertising of New York is the advertising agency for Nescafe Mocha Cooler.

The product's packaging is just as innovative. Palm fronds, island mountains and a blue-green sea will bring eye appeal and added consumer attention to the normally generic looking dairy case. The product will be available in 12-ounce and 32-ounce pure-pack dairy cartons.

Using an advanced processing technology known as ultrapasteurization, Nescafe Mocha Cooler will have a 45-day shelf life.

An 8-ounce serving of Nescafe Mocha Cooler contains, by average analysis, approximately 150 calories, 23 grams of carbohydrates, 7 grams of protein, 245 milligrams of calcium, 100 milligrams of sodium and 390 milligrams of potassium.

Nestle Foods Corporation, and the other companies within the Nestle Enterprises, Inc. umbrella, have a long history of anticipating and fulfilling consumer desires.

In addition to Boston, other Nescafe Mocha Cooler pilot markets include Tampa/St. Petersburg, Orlando, Jacksonville, Fla.; and Providence, R.I.

PHILADELPHIA (MAY 1) PR NEWSWIRE - Sun Distributors L.P. (NYSE: SDP) has acquired Industrial Air and Hydraulics Inc., a leading Texas distributor of fluid power products, it was announced today by Donald T. Marshall, chief executive officer of the diversified industrial distribution firm based here.

Headquartered in Dallas, Industrial Air and Hydraulics has annual sales of $14 million and operates branch warehouses in Houston, Dallas and New Orleans. The company represents a broad spectrum of major suppliers of hydraulic products along with a significant number of pneumatic product manufacturers. Design, fabrication, and repair of hydraulic systems also are an integral part of the company's operations. Hydraulic power systems are sold to both domestic and international markets through an affiliate, Edwards Engineering Corp.

Industrial Air and Hydraulics was originally founded in 1953 by James Lewis, its current president. The business has been privately owned by various groups of investors since 1960. Lewis will continue as vice

chairman following the acquisition by Sun Distributors.

Marshall said the acquisition of Industrial Air and Hydraulics "continues the planned expansion of our Fluid Power Group and strengthens our position in the important southwest market. It also maintains the momentum in Sun Distributors' ongoing acquisition program and its balance among our four groups."

The addition of Industrial Air and Hydraulics will increase the sales of Sun Distributors' Fluid Power Group to more than $180 million annually. A new acquisition has been added to this group in three of the last four years, mainly in the west and south where Sun Distributors has significantly expanded its presence.

A nationwide industrial distribution firm with annual sales approaching $600 million, Sun Distributors operates through 17 subsidiaries in four major fields: electrical, fluid power, glass, and maintenance products.

#90121p9655 05/01/1990 ~PR Newswire
SYRACUSE, NY (MAY 1) PR NEWSWIRE - Niagara Mohawk Power Corp. (NYSE: NMK) today submitted to the state Public Service Commission staff its mid-course report detailing the progress it has made in its ongoing self-assessment program.

The company began the internal review of its organization last fall in an effort to enhance overall effectiveness and efficiency.

The mid-course report is one of the milestones established under a comprehensive regulatory agreement between Niagara Mohawk, the PSC, the Attorney General's office, the Consumer Protection Board and Multiple Intervenors, a group of NM's largest industrial customers. The company will submit a final report concerning its self-assessment to the PSC this November.

The company has organized the self-assessment in two phases. The first phase -- identifying initiatives -- has been completed. It began with a review of the company's long-term strategies and identification of the skills the company will require in the future. The skills determine areas of organizational design needing to be strengthened through initiatives -- programs that more precisely define required changes and develop plans to implement change.

The first phase analysis resulted in three key conclusions:
-- Cost control offers the company the greatest potential for

retaining and creating value, and therefore represents the greatest threat if expenditure management is inadequate.
-- The company's low rates minimize the risk from competitors, although the threat could grow. Furthermore, the company could create additional value through effective marketing.
-- Environmental legislation and other regulatory or governmental actions have had, and will continue to have, a major impact on value. Therefore, being more proactive in environmental and regulatory arenas is vital to the future success of the company.

#90121p9684 05/01/1990 ~PR Newswire

MONTREAL (MAY 1) PR NEWSWIRE - Domtar Inc. (NYSE: DTC) today reported net earnings for the first quarter of 1990 of $20 million or $0.19 per common share compared to $26 million or $0.26 per common share in the same period of 1989. Earnings from discontinued operations, at $30 million or $0.34 per common share compared to $6 million or $0.07 per common share in the first quarter of 1989, included a net after-tax gain of $23 million which mainly reflected the gain on the sale of the majority of the assets of the salt business on March 30, 1990.

The continuing operations incurred a loss of $10 million or $0.15 per common share compared to earnings of $20 million or $0.19 per common share in the first quarter of 1989 due to more unfavorable market conditions for all business lines and higher interest expense. Sales from continuing operations in the first quarter of 1990 declined to $611 million from $623 million in the corresponding period of 1989 while operating profit was reduced to $10 million from $45 million.

Sales of fine papers in the first quarter of 1990 increased by 13 percent to $216 million as the impact of increased shipments from Windsor more than offset the effect of significantly lower selling prices for commodity grades. Operating profit for fine papers declined to $10 million from $14 million in the first quarter of 1989. The lower selling prices and higher depreciation expense following the start of commercial production of Phase II of the Windsor project were partially offset by the impact of the higher shipments and improved productivity efficiencies at Windsor. Significant operating progress has been achieved at Windsor during the first quarter of 1990.

Sales and market pulp, newsprint and groundwood specialty papers declined by 19 percent to $116 million and operating profit was reduced to $7 million from $21 million due to lower selling prices for newsprint and groundwood specialty papers and reduced shipments of both softwood and hardwood market pulp.

Sales for the packaging business lines for the first quarter of 1990

declined by 9 percent to $117 million while operating profit was reduced to $8 million from $19 million. The reduction in sales and profitability was primarily due to declining selling prices for containerboard in a weaker market.

#90121p9688 05/01/1990 ~PR Newswire

SAN FRANCISCO (MAY 1) PR NEWSWIRE - Chevron Corporation is succeeding in its five-year program to achieve superior stockholder returns, Board Chairman Kenneth T. Derr told the Annual Meeting of Stockholders today.

In a progress report on the company's key strategies for the 1990s, Derr said: ''Over the last 12 months, we have turned these strategies into specific plans, definite actions and improved stockholder value.''

The company's primary goal, Derr said, is to out perform its strongest competitors and to achieve a sustained average annual return to stockholders of 15 percent or more.

Since early 1989, when the company began implementing the five-year plan, Chevron's stock price has increased from about $45 to the $65 range recently.

However, he cautioned that oil and natural gas prices have been volatile in recent weeks. The outlook for the rest of the year will depend on whether reductions in OPEC production lead to more stable oil prices.

With the United States currently importing almost 50 percent of its oil, Derr also urged government to take responsible actions to stimulate greater domestic petroleum development, promote energy conservation and encourage research into potential alternative energy sources.

Derr praised the petroleum industry's efforts to strengthen its ability to protect the environment, including a five-year, $400 million oil spill response program. ''The industry is placing the highest priority on finding better ways of protecting the environment,'' Derr said.

With its 1988 acquisition of Tenneco's Gulf of Mexico assets, Chevron is now the nation's largest natural gas producer. ''We expect growing demand and tightening supplies to raise the price of natural gas in the next decade,'' he added.

In refining and marketing, Sullivan said Chevron is making significant capital investments to upgrade refineries to enhance the yield of high-value products; and is past the midway point of its $1.5 billion program to modernize and increase sales volumes at strategically located Chevron service stations.

Chevron's commitment to environmental protection is one of the company's top priorities, Sullivan said, noting that the company has reduced its hazardous wastes by 60 percent since 1986.

PITTSBURGH (MAY 1) PR NEWSWIRE - Equitable Resources Inc. (NYSE: EQT) reported consolidated net income for the quarter ended March 31, 1990, of $25.5 million, or $1.22 per share, compared with a restated $28.1 million, or $1.35 per share, for the first quarter of 1989.

The 1989 period includes $3.6 million of income from a rate settlement applicable to prior periods which had been reserved. A comparison of operating results excluding this amount shows an increase of about $1.0 million in 1990 which is attributed to higher wellhead prices for company-produced natural gas and oil. This improvement was achieved despite unseasonable weather during the first quarter of 1990, which was 24 percent warmer than normal and 14 percent warmer than the first quarter of 1989.

Net income for the 12 months ended March 31, 1990, was $48.3 million, or $2.30 per share, compared with a restated $48.4 million, or $2.33 per share, for the 12 months ended March 31, 1989. The 1989 period includes $2.0 million from the rate settlement applicable to prior periods. A comparison of operating results excluding this amount shows an increase of about $1.9 million which is attributed to a general increase in retail utility service rates effective January 1989.

EDMONTON, ALBERTA (MAY 1) PR NEWSWIRE - Echo Bay Mines Ltd. (AMEX: ECO) announced today that largely on the basis of its most recent assessment of minable reserve grades and mining costs, it has elected not to proceed with its earlier plan to exchange its shares in the Muscocho group companies for a direct interest in the group's Magino and Magnacon gold mines in Ontario, Canada.

As previously announced, Echo Bay had planned to exchange its approximate one-third ownership of the common shares of Muscocho Explorations Ltd., Flanagan McAdam Resources Inc., and McNellen Resources, Inc., plus Cdn.$10 million in cash and a Cdn.$5 million loan facility (subsequently increased to Cdn.$10 million), for a direct undivided 37.5 percent ownership of the Magnacon gold mine and 50 percent of Magino. The proposed transaction was announced on Dec. 28, 1989 and was scheduled to be completed about April 30, 1990, subject to compliance with the terms of the various agreements.

Commenting on the company's decision, Robert F. Calman, chairman of Echo Bay, said, "Compared with our assessment last November, before we had the latest information, we now estimate that Magnacon's minable ore reserve grade is down 28 percent and underground mining costs per ton are up 16 percent, while at Magino the grade is estimated to be 17 percent lower and mining costs 16 percent higher.

"In November, our estimates of cash production costs were approximately US$350 per ounce for Magino and US$330 per ounce for Magnacon. Today, regrettably, the current and foreseeable cash costs of producing gold, particularly at Magnacon, are significantly higher than the gold price."

John Zigarlick, president of Echo Bay, explained, "Mining methods were changed at both mines in late 1989 as planned, and the new estimates of minable grade and costs are now based on several months of experience with the new methods. Without these changes, mining costs would have been even higher."

Calman added, "Our agreement was subject to Echo Bay being satisfied that no circumstances exist prior to concluding the proposed transaction which, in our sole judgment and absolute discretion, materially and negatively affect the business, affairs, operations or condition of the Muscocho group companies or their properties. During the four months since that agreement, material negative changes have become apparent, particularly in cash cost estimates at both Magnacon and Magino, and we see no prudent course of action on behalf of our shareholders other than a decision not to proceed."

Echo Bay purchased its original interest in the Muscocho companies in April 1988, with Magino in the startup phase and Magnacon still in the

exploration stage.

Echo Bay is one of the largest gold producers in North America.

MINNEAPOLIS (MAY 1) PR NEWSWIRE - Fingerhut Companies Inc. (NYSE: FHT) announced first quarter 1990 net earnings of $7.5 million, a 79-percent increase over first quarter 1989 earnings of $4.2 million. Net revenues for first quarter 1990 were $221.4 million, compared to $220.4 million for the same period in 1989. Fingerhut, which began trading on the New York Stock Exchange on April 25 under the symbol FHT, is the fourth largest direct mail marketer of consumer products in the United States.

Ted Deikel, Fingerhut's chairman and chief executive officer, stated, "Our first-quarter results reflect positive customer response to our mailings and are consistent with our strategy for 1990 to increase the bottom line earnings through improved customer service, enhanced systems, and operating efficiencies, while holding revenues to approximately $1 billion. We have made significant changes in operations -- streamlining order handling and fulfillment and reducing other operating expenses."

Deikel went on to state that "New merchandising and marketing strategies executed in the third and fourth quarters of 1990 will position us to enhance profitability and further strengthen the company's market share."

Fingerhut Companies Inc. markets general merchandise through catalogs and direct mail to its list of approximately 9 million active customers. The company employs approximately 6,000 people in seven locations in Minnesota and Wisconsin.

RESEARCH TRIANGLE PARK, NC (MAY 1) PR NEWSWIRE - GESCAN International today announced the latest in its line of products for real-time newswire searching and automated distribution of news articles to users based on individual interest profiles. The new GESCAN product will connect customers' computer systems to the DowVision real-time information service recently announced by Dow Jones & Company, Inc. DowVision delivers up-to-the-second business, financial and competitive news across a dedicated, high speed network. The GESCAN real-time news product allows

users to search through incoming news and be instantly notified when articles of interest are received. Important news articles are electronically routed to executives and professionals throughout the firm within seconds of being received from Dow Jones via the DowVision network.

"The combination of GESCAN and DowVision will greatly improve the way corporations gather and analyze news and competitive information that impacts their business," said Dale W. Rowe, GESCAN president and chief executive officer.

Along with the new product announcement, GESCAN announced a strategic alliance with Dow Jones to jointly supply real-time news services.

GESCAN, a long-time supplier of real-time news and message handling systems to federal government agencies, has expanded its product line and marketing efforts to address the rapidly growing demand for real-time news and competitive intelligence systems in the corporate marketplace. GESCAN's real-time products have passed the stringent certification requirements of both the Defense Intelligence Agency and the Defense Communications Agency. GESCAN's products are widely used on Department of Defense communications networks.

Dow Jones chose GESCAN as a DowVision Alliance Developer based on GESCAN's proven track record in real-time news applications. "GESCAN's experience in real-time DEC VAX and Macintosh-to-VAX applications made them a natural fit for our DowVision strategy," said Charles Brady, Jr., executive director of advanced systems for Dow Jones Information Services. "GESCAN's previous development in real-time news systems allowed them to quickly integrate with the new DowVision technology and deliver the first DowVision beta-test system to a strategic client."

GESCAN International, Inc. was formed in 1988 through a management buyout of the former General Electric GESCAN Products Department. The company's focus is on real-time news and message handling systems and specialized text retrieval systems for highly dynamic business environments.

#90121p9704 05/01/1990 ~PR Newswire

ROSEMEAD, CA (MAY 1) PR NEWSWIRE - Southern California Edison is predicting reduced hydroelectric power generation again this year because a fourth consecutive dry year has kept reservoir water levels in the southern Sierra Nevadas well below normal.

However, Edison foresees no problems in meeting customer demand for electricity during the coming months, an Edison spokesperson said.

Precipitation for the water year beginning Oct. 1, 1989 is at 62 percent of normal in Edison's Big Creek system, and Edison's latest surveys indicate that southern Sierras reservoirs are only 25 percent full. "That's a decrease from last year when reservoirs were 30 percent full at this time," the spokesperson said.

Because of continuing dry conditions in the southern Sierras, Edison's forecast for water runoff for the full water year (October 1989 to September 1990) is 39 percent of normal. "Assuming normal conditions, the current water year will end up as the seventh driest year in recorded history (since 1873).

"Although hydroelectric generation is being impacted by the ongoing drought," the spokesperson said, "Edison's great diversity of resources helps to mitigate its impact on energy available to serve customers' needs."

Edison generates or purchases power from nine different energy resources, more than any other utility. Hydroelectric power will account for four percent of Edison's generation resources this year.

DETROIT (MAY 1) PR NEWSWIRE - Ford Motor Company (NYSE: F) today announced a new buyer-incentive program with cash allowances or low-rate financing on several 1990 cars and trucks.

Ford's most recent buyer-incentive program took effect March 29 and expired April 30. The new program takes effect today and expires May 31.

"The start of the spring selling season and the introduction of four all-new 1991 models (between March and July) will give our dealers new sales momentum, which we feel will result in the sales turnaround forecast for mid-1990," said Robert L. Rewey, vice president - Ford North American Sales Operations.

The all-new 1991 Ford Escort went on sale at Ford dealerships April 26, with nearly 70,000 orders by April 30.

The new Ford Explorer sport utility vehicle got off to a fast sales start in March, with an excellent reception by customers -- resulting in more than 67,000 orders by the end of April. The new Mercury Tracer will be introduced June 14, and the new Mercury Capri convertible is scheduled for a mid-summer introduction.

NEWPORT BEACH, CA (MAY 1) PR NEWSWIRE - Spring Mountain Group, a financial services company primarily serving real estate needs, has formed a new subsidiary, Spring Mountain Insurance Services Inc.

Linda Brown, who has more than 20 years of insurance background, has been named its first manager.

Initially, the new independent insurance agency will place residential homeowners' and hazard insurance coverages. Later this year, Brown plans to begin offering commercial coverages. The agency will work through all 42 offices of Spring Mountain Escrow Corp., a sister subsidiary of Spring Mountain Group.

Prior to joining the Spring Mountain Group last summer, Brown spent 12 years at Visalia in the San Joaquin Valley, managing an office that primarily served contractor and builder businesses. Earlier in her career, she worked 8 years at the Los Angeles Regional Office of Farmers Insurance Group, serving in nearly every capacity in that regional office.

BURBANK, CA (MAY 1) PR NEWSWIRE - Warner Bros. has reached an agreement with Andrew Lloyd Webber to produce the film of his unprecedented theatrical hit "The Phantom of the Opera," it was announced today by Mark Canton, executive vice president of Warner Bros. Inc., Worldwide Motion Picture Production, and by Bruce Berman, president of Theatrical Production.

Lloyd Webber will produce the film, which will star Michael Crawford and Sarah Brightman, re-creating their original stage successes as the Phantom and Christine. The director will be Joel Schumacher, who has emerged as one of today's most stylish filmmakers, with such hits to his credit as "St. Elmo's Fire," Warner Bros.' "The Lost Boys," "Cousins" and the upcoming "Flatliners."

The choreographer for "The Phantom of the Opera" will be Great Britain's distinguished Sir Kenneth MacMillan, with designs by Eugenio Zanetti. James Acheson, who received Academy Awards for "Dangerous Liaisons" and for Bernardo Bertolucci's "The Last Emperor," will be the costume designer. The cinematographer will be Jan De Bont, whose film credits include "The Hunt for Red October," "Black Rain," "Die Hard," "The Jewel of the Nile" and "Flatliners." Principal photography is anticipated to begin in late 1990 with a release date scheduled for Thanksgiving 1991.

Stated Lloyd Webber: "I am particularly glad 'The Phantom' should be made with Warner Bros., whose creative and marketing teams I hold in the highest regard."

Stated Canton: "All of us at Warner Bros. are thrilled that we are the studio which will bring 'The Phantom,' an international stage phenomenon, to the screen. We are also delighted that by working with Andrew Lloyd Webber, Michael Crawford and Sarah Brightman the integrity of the original will be carefully maintained, while the directorial talents of Joel Schumacher will help make 'The Phantom of the Opera' a motion picture event."

Stated Berman: "We all worked very hard to bring 'The Phantom' to Warner Bros., and are excited about the opportunities to turn a great theatrical production into an equally memorable motion picture. We look forward to our association with all involved."

LOWELL, MA (MAY 1) PR NEWSWIRE - Richard W. Miller, chairman and chief executive officer of Wang Laboratories, Inc. (AMEX: WAN) today announced that the board of directors of Wang unanimously elected Courtney S. Wang a director of the company. Wang's election fills the vacancy created by the death of Dr. An Wang.

Miller said, "We are pleased to welcome Courtney as a director of the company. The board believes that Courtney's commitment to the company's future will enable him to make a valuable contribution as a director."

In accepting his election, Wang said, "Wang Laboratories is the company that my father founded and to which my family remains committed. I am honored to serve as a director and am enthusiastic about working with the other board members."

Wang, 33, joined Wang in 1978 and is currently a vice president and area sales director. He began his career as a marketing representative, and in July 1980, Wang was promoted to general manager of Wang Computer Private, Ltd. Singapore where he remained until August 1982 when he founded and became general manager of Wang Communications, Inc., a wholly owned subsidiary of Wang Laboratories, Inc. Wang was elected a vice president of Wang Laboratories, Inc. in May, 1985. In July, 1987, Wang was named an area sales director in Dallas, Texas.

#90121p9792 05/01/1990 ~PR Newswire

STAMFORD, CT (MAY 1) PR NEWSWIRE - General Signal Corporation (NYSE: GSX) has announced the creation of a new optical lithography systems unit within its Semiconductor Equipment Group.

The new unit, to be called GCA/Ultratech, combines General Signal's GCA and Ultratech Stepper organizations. President of the new unit, which will be headquartered in Andover, Mass., is Peter J. Simone, who was president of GCA.

Edmund M. Carpenter, General Signal's chairman and chief executive officer said, "The creation of this new General Signal optical lithography unit blends America's two strongest stepper suppliers into one focused, leading-edge source for the world semiconductor manufacturing industry. It will significantly strengthen General Signal's ability to provide semiconductor manufacturers with superior photolithography technology."

Plans call for most Ultratech Stepper operations, based in Santa Clara, Calif., to be transferred to the 350,000-square-foot GCA facility in Andover, Mass. The separate domestic sales and service functions will be integrated into the new business unit and will no longer operate as General Signal Lithography Sales and Service.

In his new role, Simone will report to Peter A. Laing, General Signal's senior vice president - operations, who is responsible for the lithography segment of the Semiconductor Equipment Group, as well as General Signal's Electrical Controls and Transportation Controls sectors. Pending finalization of the new lithography unit's structure, no other management or organizational details are being released. However, significant transfer of Ultratech personnel, at all levels, from California to Massachusetts is anticipated.

Simone stated, "This new organization marks the formation of a world-class company bringing together the technologies of both 1X photolithography -- which Ultratech developed and pioneered -- and reduction lithography, where GCA has been a leader for over 30 years. The combined strengths of both companies will better serve the worldwide semiconductor marketplace and ensure American leadership in photolithography."

General Signal Corporation, with 1989 sales of $1.92 billion, is a leading manufacturer of equipment and systems for the process control, electrical, semiconductor, and transportation industries.

ANTIOCH, TN (MAY 1) PR NEWSWIRE - Growth Development Corp. (NASDAQ: GDCX) announced the completion of its acquisition of Port Armor, a 2,250-acre resort development on Lake Oconee, 65 miles east of Atlanta.

The transaction was completed for $25 million and comprises properties owned by both Southern Guarantee Investment Co. and Georgia-Pacific (NYSE: GP). The Sumitomo Trust & Banking Co. provided $17 million in acquisition and development financing to Growth Development. Warringtons plc, a London stock exchange property company and majority shareholder in Growth, arranged financing and will participate in the continued development of Port Armor with a 25 percent interest.

Port Armor is the home of the world famous Robert Cupp golf course which bears the same Port Armor name and is ranked by many as the second-best golfing facility in Georgia after Augusta National.

Growth Development plans the further construction of two additional

championship golf courses together with greatly expanded tennis facilities on this waterfront property which will eventually contain 2,400 residential lots. The company projects $123 million in retail lot sales over an estimated 10-year absorption period which will appeal to a high-end market seeking second home resort and pre-retirement real estate.

CHICAGO (MAY 1) PR NEWSWIRE - Midway Airlines today began service from Chicago's Midway Airport hub to Savannah International Airport, providing the only round-trip, non-stop flights between those two cities.

Midway offers two daily round-trips between the two destinations. Travelers bound from Savannah to the Midwest can conveniently connect in Chicago with Midway flights to several business centers.

The schedule is:

Chicago to Savannah			Savannah to Chicago		
	Leave	Arrive		Leave	Arrive
No. 272	9:15 a.m.	12:20 p.m.	No. 271	11:45 a.m.	1:00 p.m.
276	2:35 p.m.	5:40 p.m.	277	5:05 p.m.	6:20 p.m.

Introductory one-way fares between Chicago and Savannah available through May 31 are: $99 non-refundable coach, $149 unrestricted coach and $169 unrestricted first class.

"Midway has had a long-standing interest in serving the city of Savannah," said John P. Tague, vice president of marketing and planning. "Savannah is a very popular leisure and group-travel destination and the airline gateway to the prestigious Hilton Head Island resort area. Tourism is a fast-growing industry in this hospitable and historic city, and Midway Airlines is committed to enhancing tourism here by providing high-quality, personalized airline service."

Midway on March 15 inaugurated non-stop service to Savannah with three daily round-trips between the airline's Philadelphia International Airport hub and Savannah International.

Other cities Midway serves from Philadelphia are Albany, Boston, Buffalo, Chicago, Columbus (May 1), Ft. Lauderdale, Ft. Myers, Hartford/Springfield Jacksonville, Miami, Montreal, Orlando, Providence, Rochester, Sarasota, Tampa, Toronto and West Palm Beach.

Midway Airlines offers coast-to-coast service from its hubs at Midway Airport and Philadelphia International Airport. Midway Airlines and its wholly owned subsidiary, the Midway Commuter, serve 59 destinations in the United States, U.S. Virgin Islands and the Bahamas.

SYOSSET, NY (MAY 1) PR NEWSWIRE - Viatech, Inc. (AMEX: VTK) Chairman and Chief Executive Officer Donald J. Bainton today announced the results for the three months ended March 31, 1990.

Revenues for the three months ended March 31, 1990, increased 141 percent to $56,120,000 primarily as a result of the recent acquisition of Ferembal the second largest food can manufacturer in France and the fifth largest in Europe. For the same period, the company reported net income of $458,000 as compared to net income of $251,000 in the first quarter of 1989, an increase of 82 percent. Earnings per share increased 40 percent to $.28 despite the dilution resulting from the sale of 460,000 shares of common stock in January 1990. The increases in net income and earnings per share in 1990 reflect the earnings of Ferembal, lower corporate expenses and increased interest income in the United States.

Bainton commented, "We are very pleased with the company's overall performance and the operating results of our subsidiaries. The acquisition of Ferembal has expanded not only our range of packaging materials, but our customer base as well, enabling us to provide a full complement of services in the packaging segment."

Looking at the remainder of 1990 and beyond, Bainton stated, "We expect our 1990 financial performance to be significantly ahead of last year, with revenues in excess of $250,000,000, well positioning us to achieve our goal of becoming a $1.5 billion company within five years."

Viatech, Inc., through its subsidiaries, manufactures cans, film and equipment for the packaging industry, and prints and laminates packaging for the food and snack food industries. The company's subsidiary, Lockwood, Kessler & Bartlett, Inc., provides engineering services principally in the fields of mapping and survey, transportation,

structures, site and landscape development, recreation and environmental studies, and mechanical and electrical engineering.

CONTACT: Donald Bainton, chairman and CEO of Viatech, 516-822-4940.

LAWRENCEVILLE, NJ (MAY 1) PR NEWSWIRE - First Fidelity Bancorporation (NYSE: FFB) announced today that it has named James L. Mitchell general counsel.

He has been serving as deputy general counsel of Citibank. "We are pleased that Jim Mitchell has agreed to join us in this important and sensitive post," said Tony Terracciano, chairman, president and chief executive officer. "His experience and perspective will serve First Fidelity well as we move forward."

Mitchell succeeds Harold E. Mortimer, who has been named special assistant to the chairman.

"All of us at First Fidelity owe Harold a deep debt of gratitude," said Terracciano. "He has served as general counsel of First Fidelity for the past 20 years, a period of enormous expansion. I am delighted that he has agreed to delay his personal plans to help me directly with special corporate projects."

Mitchell has been deputy general counsel of Citibank since 1984. From 1977 to 1984, Mitchell was managing partner of the Washington office of the law firm, Mayer, Brown & Platt, and a member of the firm's management committee.

Previously, from 1972 to 1977, he served in a variety of capacities in the administrations of Presidents Nixon and Ford. He was an associate director of the Office of Management and the Budget, an Under Secretary of the Department of Housing and Urban Development and a special assistant for policy development to the Secretary of Commerce.

From 1966 to 1972, he served in the Chicago and Washington offices of Mayer, Brown & Platt and from 1962 to 1966, he was a Lieutenant in the Judge Advocate General's office of the U.S. Navy.

Mitchell served as co-counsel to the Committee on Contests of the Republican National Committee and to the Credentials Committee of the Republican National Conventions of 1980, 1984 and 1988. He also served on President Reagan's transition team at the Department of Energy from November 1980 to January 1981.

He has a bachelor's degree in economics from Cornell University and is a graduate of the Yale University Law School. Mitchell is 52, married and the father of five.

First Fidelity operates through some 500 offices in New Jersey and eastern Pennsylvania and, with $30.2 billion in assets, is among the nation's 25 largest banking organizations.

#90121p9818 05/01/1990 ~PR Newswire

CHATTANOOGA, TN (MAY 1) PR NEWSWIRE - Roger Holland, former chief executive officer of Champion Products Inc., has been named the new president and chief executive officer of Signal Apparel Company (NYSE: SIA) according to a statement released today.

"My goal is to infuse Signal with a new spirit that will provide the impetus to make Signal a leading manufacturer of active wear and athletic apparel," said Holland. "I firmly believe we have all the elements in terms of plant facilities, a quality labor force, and financial backing to make Signal a major force in this industry."

While at Champion, Holland is credited with engineering that firm's return as a premier manufacturer of athletic apparel, and in the process, achieving record sales and profits for the company. Crucial to Holland's success at Champion was his innovative strategy to reinvigorate the company's image through the use of the company's brand name and logo for promotional efforts. Champion is a leading supplier of athletic uniforms for high schools and colleges throughout the country.

Holland's appointment coincides with the purchase of control of Signal Apparel by Walsh, Greenwood & Co., and a partnership representing certain Minda Bronfman de Gunzburg family trusts. The investor group, in pursuing its long-term strategic acquisition strategy, is providing access to significant financial backing designed to support Signal's turnaround efforts.

Connecticut-based Walsh, Greenwood purchased its interest in Signal from the George B. Clairmont Trust.

Walsh, Greenwood & Co., founded in 1979, is headquartered in Greenwich, Conn. It is a member of the New York Stock Exchange and other principal exchanges in the United States.

Signal Apparel, a manufacturer of high-quality women's sportswear and knit goods, was established in 1891. The company currently employs 1,800

people at locations in Chattanooga and Knoxville, Tenn.; Marion, S.C., as well as facilities in La Grange and Griffin, Ga.

#90121p9835 05/01/1990 ~PR Newswire

JACKSON, MI (MAY 1) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today reported increased net earnings and strong operating gains for its first quarter ended Mar. 31, 1990.

Company President U.E. (Pat) Patrick reported net earnings for the period of $194,616, or 2 cents per share on approximately 12.7 million weighted average shares outstanding. Year-ago first-quarter net earnings were $172,807, or 2 cents a share on 8.4 million shares.

Total revenues for the quarter increased 21 percent to $3,906,718 from $3,219,939 a year ago. Oil and gas sales were up 51 percent to $3,723,268 or about 95 percent of total revenues. The increase primarily was due to sharply higher oil and gas prices and higher production levels. Total expenses, up 22 percent to $3,712,102, also reflected higher levels of operations.

The company also reported that its stockholders approved the re-election of directors James R. Jenkins, Frank L. Bryant and James M. Snodgrass, as well as the appointment of Deloitte & Touche as the company's independent auditors for the fiscal year ending Dec. 31, 1990. Stockholders also approved an amendment to the company's Certificate of Incorporation to reduce the par value of the preferred stock (unissued) from $10 per share to $1 per share.

Patrick Petroleum Company is an independent exploration and production company listed on the New York Stock Exchange since 1976 (symbol - PPC). The company has interests in producing properties and undeveloped acreage in 13 states, including various interests in approximately 549 oil and gas wells located primarily in Michigan, North Dakota, Texas, Oklahoma and Louisiana.

JACKSON, MI (MAY 1) PR NEWSWIRE - Patrick Petroleum Company (NYSE: PPC) today reported increased net earnings and strong operating gains for its first quarter ended March 31, 1990.

Company President U.E. (Pat) Patrick reported net earnings for the period of $194,616, or 2 cents per share on approximately 12.7 million weighted average shares outstanding. Year-ago first-quarter net earnings were $172,807, or 2 cents a share on 8.4 million shares.

Total revenues for the quarter increased 21 percent to $3,906,718 from $3,219,939 a year ago. Oil and gas sales were up 51 percent to $3,723,268, or about 95 percent of total revenues. The increase primarily was due to sharply higher oil and gas prices and higher production levels. Total expenses, up 22 percent to $3,712,102, also reflected higher levels of operations.

Mr. Patrick stated, "At March 31, 1990, the company had $11.3 million in cash and short-term and long-term marketable securities. Working capital was $3,604,387, our current ratio was 1.3 to 1.0 and stockholders' equity was $55.2 million or $4.52 per outstanding share. Cash flow from operations was up sharply to $1,927,000 from $1,361,000," said Mr. Patrick.

"The company currently has interests in some 216 gas wells and 333 oil wells in 13 states. First-quarter production sold from these wells, net to the company, was 936,437 Mcf, up 34 percent and 83,608 barrels of oil, up 84 percent from year-ago production levels. Our average wellhead prices were also up sharply for the quarter. We received $20.22 per

barrel (vs. $17.28) and $2.09 per Mcf for our natural gas (vs. $1.77)," Mr. Patrick stated.

The company also reported that its stockholders approved the re-election of directors James R. Jenkins, Frank L. Bryant and James M. Snodgrass, as well as the appointment of Deloitte & Touche as the company's independent auditors for the fiscal year ending Dec. 31, 1990. Stockholders also approved an amendment to the company's Certificate of Incorporation to reduce the par value of the preferred stock (unissued) from $10 per share to $1 per share.

Patrick Petroleum Company is an independent exploration and production company listed on the New York Stock Exchange since 1976 (symbol - PPC). The company has interests in producing properties and undeveloped acreage in 13 states, including various interests in approximately 549 oil and gas wells located primarily in Michigan, North Dakota, Texas, Oklahoma and Louisiana.

DALLAS (MAY 1) PR NEWSWIRE - Robert P. Hauptfuhrer, chairman and chief executive officer of Oryx Energy Co. (NYSE: ORX), today called for a sensible federal energy policy that provides exploration/production tax credits and opens more federal waters to oil and gas activity.

Tax credits for exploration and for development expenditures would provide a strong incentive to increase domestic reserves and help reduce America's increasing reliance on imported oil, Hauptfuhrer told shareholders at the Dallas-based independent's annual meeting at the Ramada Renaissance Hotel in suburban Richardson, Texas.

Hauptfuhrer urged shareholders to contact congressional representatives to support the tax incentives proposed by Congressmen Bill Archer and Mike Andrews and Senator David Boren. "These incentives would help provide an operating climate in which the private sector can put capital at risk in the pursuit of national objectives and priorities. The interests of our country are best served if the oil industry operates within a stable public policy framework," said Hauptfuhrer.

Citing the Outer Continental Shelf (OCS) as an area where a more stable policy is needed, Hauptfuhrer said the more than 450 permit requirements at the Point Arguello Project in California is an example of how the federal OCS program is at an impasse.

Hauptfuhrer said: "...an industry investment of over $2 billion is being held hostage in the California offshore. The platforms and facilities have been ready to come on stream since December 1987, but we have been stymied by an endless series of procedural delays, permit decision reversals and new, ever-changing requirements by state and local authorities."

Emphasizing the theme of growth through excellence, Hauptfuhrer also cited highlights of Oryx Energy's first full year as an independent company.

Shareholders reelected McCormick, John C. Kenefick and Albert E. Piscopo to the board of directors for three-year terms. Kenefick is a retired vice chairman of Union Pacific Corp. and had been the chairman and chief executive officer of the Union Pacific Railroad. Piscopo is senior vice president and chief financial officer of The Glenmede Trust Co., Oryx Energy's largest shareholder.

Shareholders also approved the firm of Coopers & Lybrand as independent certified public accountants.

Oryx Energy is the largest independent oil and gas company in the world, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels.

NEW YORK (MAY 1) PR NEWSWIRE - Michael Golden, previously general manager of Child magazine, today was named publisher of McCall's magazine. The announcement was made by William T. Kerr, president of The New York Times Company Magazine Group, which owns both magazines.

John Beni, who was publisher of McCall's since 1988, resigned to join Cahners Publishing Company.

Kerr said, "Since the Times Company acquired McCall's in July 1989, Mr. Beni has helped us strengthen the magazine for the 1990's. A new management team has been put in place and our new editor-in-chief Anne Mollegen Smith's new design and editorial approach has been well received by readers and advertisers.

"We are delighted to have Michael Golden assume this important assignment " said Kerr. "He played a key role in the phenomenal growth and success of Child magazine. And under his leadership, I am confident McCall's will

continue its momentum of attracting more readers and advertisers."

Golden, 40, served as general manager of Child from January 1988 until April 1990. During that period, Child increased its rate base from 200,000 to 450,000 copies and increased its advertising pages from 235 to 522 pages when much of the magazine industry experienced a decline. In August the rate base will increase to 500,000 copies.

Prior to heading Child, Golden was senior vice president of the Retail Magazine Marketing Company where he played a significant role in the development and implementation of the Times Company magazine distribution joint venture with Time-Warner. Earlier he was associate production manager of Family Circle. Before joining the Times Company, Golden worked for eight years in a series of editorial and management posts at The Chattanooga (Tenn.) Times.

Golden has an M.B.A. from Emory University, an M.A. in journalism from the University of Missouri, and a M.Ed. and B.A. from Lehigh University.

Beni, 57, was publisher, president and chief operating officer of the Working Woman/McCall's Group, from which the Times Company acquired McCall's. He was president and CEO of Gruner + Jahr USA Publishing from 1978 to 1988.

In addition to McCall's and Child, the Times Company publishes 15 other magazines: Family Circle, Family Circle Great Ideas/NOW Series, Decorating Remodeling, Golf Digest, Golf Shop Operations, Golf World, Golf World (U.K.), Golf Digest Sverige (Sweden), Golf Illustrated Weekly (U.K.) Golf World Industry News (U.K.), Tennis, Tennis Buyer's Guide, Snow Country, Sailing World and Cruising World.

CARROLLTON, TX (MAY 1) PR NEWSWIRE - AMBIT Systems announced today that it has acquired the rights to Data General's (NYSE: DGN) Genioss Integrated Office Controller (IOC) product line and technology.

The IOC combines computer, communications and office automation technologies to provide a powerful information network that integrates advanced voice/data messaging capabilities.

According to AMBIT President Robert Pedersen, "The IOC provides the benefits of computer and telephony integration by allowing applications executing on Data General's proprietary MV computer systems and MS-DOS PCs

to communicate with and exercise control over the switching system."

Pederson said that AMBIT will introduce a new family of products, called TeleServers(tm) in 1991, that extend the IOC capability to other non-proprietary industry standard platforms, beginning with UNIX.

Pederson stated that the AMBIT TeleServers will allow the development of applications that will address the rapidly expanding market for integrated computer and communications systems.

The AMBIT TeleServers will provide integrated voice/text/facsimile messaging and will allow applications to access advanced network services such as ISDN, calling number identification, and multi-media transmission facilities.

Pedersen also reported that his company has signed an agreement to work with Data General as a value-added reseller (VAR), marketing TeleServers in conjunction with Data General's computers.

Pedersen added that AMBIT, which was formed in March 1990, is seeking joint development opportunities with value-added resellers, independent software vendors, and other organizations with interest in these fields. AMBIT is also actively seeking business partners for this endeavor.

Principals in the new firm, besides Pedersen, are Richard Christensen, vice president, business development, and John Bellamy, vice president, engineering.

AMBIT Systems, Inc. is located at 3410 Midcourt Rd., Suite 115, Carrollton Texas 75006.

PHILADELPHIA (MAY 1) PR NEWSWIRE - Lorina L. Marshall, vice president of government and community relations for Philadelphia Gas Works (PGW), has been named to the board of directors of Independence Blue Cross, a Philadelphia-based provider of hospital-related insurance services with more than 2 million subscribers in the five-county region.

At PGW, Marshall, 39, is responsible for monitoring and introducing legislation affecting the utility, as well as overseeing community and governmental relations programs for PGW, the nation's largest municipally owned natural gas utility. As a director on the 36-member board of Independence Blue Cross, she will help oversee operations and management of the non-profit hospital-related insurance services company, founded in 1938.

Marshall was selected from a field of 35 candidates for one of 11 open three-year seats on the board. Her election by a committee comprised of board representatives, managers, consumer advisory panelists and general subscribers was announced at the board of directors' annual organization meeting in March.

Her appointment to the board of Blue Cross is the latest in a long line of such appointments for Marshall, who has won numerous awards for her tireless community service. A gregarious, high-spirited woman with a disarming smile, and a zest for accomplishing goals, she serves on boards and committees of more than two dozen service organizations, including the Boy Scouts of America, which bestowed her with the Silver Beaver Award -- the highest honor that can be given to a volunteer -- in April.

In addition to her position as an activities chairperson for the Boy Scouts, Marshall also serves on the boards of directors of the Big Sisters of America, the Urban League of Philadelphia and the Freedom Theatre, as well as on the board of trustees of the United Way of Southeastern Pennsylvania. She has also been actively involved in such diverse service organizations as the United Negro College Fund, the Mayor's Commission for Hispanic Affairs and the YWCA, among many others.

A resident of the city's East Falls section, Marshall joined PGW in 1968 as a junior clerk typist, and returned to the company in 1980 as an assistant to the chief executive officer. She has been the vice president of government and community relations for PGW, which serves more than 518,000 customers and has annual operating revenues of more than $467

million, since 1988.

Marshall is a graduate of Overbrook High School and Antioch University, and holds a degree in advertising from the Charles Morris Price School of Advertising and Journalism. She will be receiving her master of governmental policy from the University of Pennsylvania in May 1990.

DENVER (MAY 1) PR NEWSWIRE - Western Gas Processors Ltd. (NYSE: WGP) ("Processors") announced the signing today by its general partner, Western Gas Resources Inc. (NYSE: WGR) ("Resources"), of a definitive purchase agreement with Parker Gas Co. Inc. ("Parker") for the acquisition of virtually all of the assets of Parker, except for Parker's subsidiary Parker Gas Treating Co., for $21 million.

Negotiations for the acquisition of Parker Gas Treating are in the late stages. Processors is acquiring operations located in Texas, Louisiana, Arkansas and New York. The most significant asset being acquired is Parker's share (75 percent) of a gas gathering system near Giddings, Texas processing gas from the Austin Chalk formation. The Giddings System has current throughput of approximately 35 MMcfd with a capacity of 65MMcfd, is connected to approximately 400 wells and includes 475 miles of gathering lines. Closing of the transaction is expected to be July or August of 1990. The acquisition is a continuation of Western's ongoing strategy of expansion into new areas with a high potential for additional future development.

MINNEAPOLIS (MAY 1) PR NEWSWIRE - International Multifoods Corp. (NYSE: IMC) has appointed Duncan H. Cocroft as vice president-Finance and chief financial officer for the Minneapolis-based food company.

Cocroft will be responsible for the company's financial strategies, financial reporting, treasury, taxes, risk management, investor relations and management information systems. He will report to Tony Luiso, Multifoods' chairman, president and chief executive officer.

Cocroft, 46, was previously a vice president at Smithkline Beecham, a $7 billion pharmaceutical and health care company formed by the 1989 merger of Smithkline Beckman and Beecham. Prior to the merger, Cocroft was vice president and treasurer for Smithkline Beckman, Philadelphia, with responsibilities for financial strategies, financing domestic and international operations, risk management and insurance, and the company's pension plan.

"Duncan Cocroft's broad financial experience and skills will be important as we continue to grow our businesses and enhance our returns," said Luiso. "We are pleased to have Duncan as part of our management team."

Prior to joining Smithkline Beckman, Cocroft served as vice president and treasurer of PHH Corporation, a Baltimore, Md., revenues service and leasing company, from 1982 to 1987. He also worked as an assistant treasurer for the Marriott Corporation.

Cocroft received a bachelor's degree in economics in 1965 from the Wharton School of Management at the University of Pennsylvania.

International Multifoods, with fiscal 1990 net sales of $2.1 billion, is a diversified food company with major operations in the United States, Canada and Venezuela.

CHICAGO (MAY 1) PR NEWSWIRE - Montgomery Ward & Co. will discontinue its practice of releasing monthly sales data beginning with April, stated Buck Pohlmann, senior vice president finance.

"While the company continues to show market share improvement in all of its strategic specialty businesses, we have decided to no longer publicly distribute our sales numbers," Pohlmann indicated.

"Among retail companies surveyed, Montgomery Ward is the only large private company reporting sales. As the company's stock is not publicly traded, there is no compelling reason to compile and report such data monthly."

Pohlmann further stated that Montgomery Ward achieved improved sales for the 13-week period ended March 31, 1990, the company's fiscal first quarter. Net sales of $976 million increased 2.9 percent on a continuing-lines basis.

DALLAS (MAY 1) PR NEWSWIRE - TeleCom Corp. (NYSE: TEL) today announced that Meyer Europe Ltd., a wholly-owned subsidiary of Meyer Machine Co., TeleCom's manufacturing subsidiary, had exercised its option to acquire 53 percent of the outstanding capital stock of Vi-Tech Conveyors Ltd., a corporation based in the Birmingham, England area. Meyer Europe now owns 80 percent of Vi-Tech. Terms of the transaction were not disclosed.

Vi-Tech, a manufacturer of vibratory conveying systems used primarily in the food industry, will now begin offering Meyer Machine's complete line of proprietary food handling systems throughout the European Common Market and Eastern Europe in addition to its existing product line. Meyer Machine is excited about the prospects of being able to directly offer its line to the European market.

TeleCom Corp. has interests in the manufacture of conveying and processing equipment for the food, beverage, can manufacturing and chemical industries and the wholesale distribution of air conditioning and heating products as well as souvenir, novelty and gift items.

ST. LOUIS (MAY 1) PR NEWSWIRE - Successful integration of major elements of the avionics system which will be used in the F-23 Advanced Tactical Fighter (ATF) has been demonstrated by the Northrop/McDonnell Douglas ATF team.

The avionics integration demonstration used sensor data obtained in a BAC-111, a twin-engine jetliner that was modified to serve as the F-23 avionics flying laboratory. Flight testing of the sensors began in August 1989, at Baltimore International Airport. Radar data recorded during these tests were then transferred here to the F-23 team's ground-based laboratory -- known as the Avionics Ground Prototype -- for a series of tests and demonstrations held April 17 through 20. Engineers from the U.S. Air Force's ATF systems program office observed the tests and demonstrations, which included operation of 15 of the 16 common modules planned for the demonstration/validation phase of the ATF program.

"We demonstrated the most demanding processing modes of the hardware and software for the radar system and the integrated communications, navigation and identification system," said Larry Nanney, manager of F-23 mission systems at McDonnell Douglas. "In the process, we demonstrated more than a half-million lines of Ada software code. We also showed that we can take a limited number of common modules and use them interchangeably to perform a wide range of applications."

The common modules used in the demonstration, according to Nanney, are computer processors -- about the size of a thin paperback book -- that can work in a variety of combinations to handle the full range of F-23 sensor and mission processing tasks. Current fighter aircraft must use many different specialized computers in their avionics systems, Nanney said, and "these common modules allow us to create a more capable and flexible avionics system, with fewer 'black boxes.'"

The ATF is the U.S. Air Force's next-generation jet fighter. It will replace the F-15 Eagle as the Air Force's front-line air superiority fighter. The U.S. Navy also plans to use a variant of the ATF as its future fleet air defense fighter. The Northrop/McDonnell Douglas team is nearing completion of the demonstration/validation phase of the competition for full-scale development of the ATF. The Air Force is expected to select a full-scale development team next year.

#90121p9923 05/01/1990 ~PR Newswire

DALLAS, (MAY 1) PR NEWSWIRE - Westward Communications today announced the

acquisition of The Villager, a 17,500 circulation weekly newspaper in the Woodlands and Montgomery County, north of Houston.

The Villager was Westward's forty-first newspaper acquisition since the company was founded in 1986 by former editors Will D. Jarrett and Kenneth P. Johnson.

Westward also owns Gulf Coast Newspapers in the Houston area which includes three dailies and 13 non-daily publications. Westward's other newspaper properties are in the Austin area, East Texas, Arkansas and Colorado. It also owns Southwest Press Relations Newswire and the Government Newswire.

"We are delighted to have The Villager join our group of Houston area newspapers," said Johnson, chairman of Westward. "The Woodlands and South Montgomery County have the potential to be one of the best growth markets in the entire Southwest and we look forward to participating in that growth and serving the area with our newspapers."

"We have long been attracted to the Woodlands area," said Jarrett, president of Westward. "Mitchell Energy has done a fabulous job of maintaining the natural beauty of the community while planning its future growth."

Westward acquired The Villager from the Sutherland Media group which filed for Chapter 11 bankruptcy protection last fall. The purchase price was not announced.

Westward, which was featured recently in Forbes magazine, was incorporated four years ago by Johnson and Jarrett, both of whom had served as senior editors on large metropolitan daily newspapers. Jarrett had been the managing editor and editor of the Dallas Times Herald, editor of the Denver Post and a managing editor of the Philadelphia Inquirer. Johnson had been editor of the Times Herald and night managing editor and vice president for operations at the Washington Post.

Ken Wilson, publisher of The Villager, will continue in that position. The Villager will be printed at Westward's daily newspaper in Montgomery County, the Conroe Courier.

WINSTON-SALEM, NC (MAY 1) PR NEWSWIRE - Piedmont Aviation Services, Inc., a subsidiary of USAir Group (NYSE: U) and forerunner of the former

Piedmont Airlines, is planning a 50th anniversary celebration May 24 at its Winston-Salem Smith-Reynolds Airport headquarters.

The anniversary ceremonies will feature Edwin I. Colodny, chairman and president of USAir Group; Thomas H. Davis, founder of Piedmont Aviation, and Max Bleck, president of the Beech Aircraft Corporation. Several new Beech aircraft, including the high-technology Starship, will be displayed at the 7 p.m. invitation anniversary event.

Organized July 2, 1940, Piedmont Aviation Services provides new and used aircraft sales, charter service, general aviation flight training, parts sales and maintenance, and overhaul of most general aviation aircraft components.

It is one of the largest Beech Aircraft distributors in the nation, and has six full-service general aviation operations bases at Norfolk and Roanoke, Va., and Asheville, Monroe, Winston-Salem and Greensboro, N.C.

A subsidiary division, Piedmont Aviation Supply, based in Atlanta, is the supply arm of the company -- warehousing and distributing aircraft parts from 18 locations throughout the United States and Canada.

#90121p9947 05/01/1990 ~PR Newswire

RICHMOND, VA (MAY 1) PR NEWSWIRE - Universal Corporation (NYSE: UVV) announced today that gross revenues decreased in the third quarter to $703 million versus $753 million last year. For the nine-month period gross revenues were $2.27 billion versus $2.34 billion last year. The lower revenues in the quarter resulted principally from a planned reduction in trading of palm oils by the agri-products segment of the company.

Earnings for the third quarter ended March 31, 1990, were $8.6 million or 52 cents per share compared to $12.4 million or 73 cents per share last year. The decline was primarily due to non-recurring costs at Lawyers Title associated with the adoption of a voluntary early retirement plan and the write-off of certain non-productive assets. In addition, the company incurred higher income tax expense through the adoption of FAS 96 "Accounting for Income Taxes" earlier this year. Before these factors, after-tax operating results were slightly above last year. Net income for the nine-month period was $49.6 million or $2.94 per share compared to $52.2 million or $3.08 per share.

Operating results of Lawyers Title during the three months were lower primarily because of the continued slowdown of real estate markets. The company expects to realize a substantial benefit from the above-mentioned non-recurring charges since the annual salary and employee benefit costs have been reduced approximately $8 million ($5.3 million after tax) as a result of these programs. The staff reductions and write off of assets reduced third quarter earnings by $3.1 million or $.18 per share.

Foreign tobacco operations reported increased earnings in the quarter aided by financing techniques which reduced the inventory and operating costs of the Brazilian operations. Results from other foreign tobacco operations were up. The nine-months results of foreign tobacco still reflect a decline when compared to the prior year because of sharp

increases in costs in Brazil due to the government's monetary policy. Preliminary indications reveal inflation is slowing considerably due to the introduction of a new economic plan which for the long term bodes well for the company's Brazilian operation, provided a reasonable foreign exchange policy also exists.

Results of domestic tobacco operations were below those of the third quarter of 1989 due principally to the timing of shipments. For the nine-month period earnings were higher, attributed principally to increased efficiency in the processing plants.

Agri-products earnings increased in the quarter primarily due to a combination of improved results in coffee, tea, peanuts, and lumber. For the nine-month period, agri-products earnings were up marginally.

DETROIT (MAY 1) PR NEWSWIRE - GM International Export Sales (IES) Executive-in-Charge Dale Hermiller has announced the appointment of William F. Fullam to the position of regional marketing manager - Puerto Rico/U.S. Virgin Islands. Fullam's appointment is effective today (May 1).

Fullam's responsibilities will continue to focus on market development and selection of North American-produced vehicles and those produced by other GM subsidiaries which IES exports into Puerto Rico and the U.S. Virgin Islands.

Fullam began his career with General Motors as a statistician in 1963 for General Motors Overseas Operations in New York City. In 1974, he was promoted to administrator responsible for distribution of Isuzu products to dealers outside of the United States and Canada. The following year, he moved to Honolulu as manager of staff operations, and later was appointed sales manager. He was transferred to Detroit in 1981 as manager, field merchandising, and a year later was promoted to the position of advertising manager. In 1984, Fullam was appointed manager of advertising, and sales promotion for IES, the position held until his appointment to the regional marketing office located in San Juan, Puerto Rico, in 1988.

#90121p9967 05/01/1990 ~PR Newswire

CALGARY, ALBERTA (MAY 1) PR NEWSWIRE - Norcen Energy Resources Limited (AMEX, Toronto, Montreal: NCN) today announced that its actual financial and operating results for the first quarter of 1990 were essentially unchanged from the earlier announced estimates.

Net earnings for the quarter amounted to $37.9 million, up 16 percent, and cash generated from operations totalled $92.6 million, up 26 percent compared to the same period of 1989. On a per share basis, earnings were 58 cents per ordinary share compared to 52 cents in the previous period and cash generated from operations was $1.51 compared to $1.22.

The significant improvements in both earnings and cash flow reflected the effects of crude oil price gains as well as sharply higher production rates for oil and gas.

Sales and other revenues amounted to $268.3 million, up from $222.1 million in the first quarter of 1989.

Production of crude oil and natural gas liquids averaged 59,000 barrels per day, up 23 percent and natural gas production averaged 262.1 million cubic feet per day, up 12 percent. The production increases were primarily the result of the major acquisition of oil and gas properties from Westmin Resources Limited late in 1989 and the expansion of Norcen's crude oil producing operations in Australia.

In propane marketing, propane sales volumes totalled 428.3 million litres, up 3 percent.

During the first three months of 1990, Norcen participated in 53 working interest wells, resulting in 10 gross (4.2 net) oil wells and 17 gross (4.4 net) gas wells in Canada, and 2 gross (0.5 net) oil wells and 1 gross (0.6 net) gas well in the U.S.

#90121p9972 05/01/1990 ~PR Newswire

ROCKY MOUNT, NC (MAY 1) PR NEWSWIRE - Hardee's Food Systems, Inc., today announced increased systemwide sales, revenues, and operating earnings during the First Quarter, ending March 31, 1990.

Hardee's total systemwide sales for the period registered a 9.5 percent advance to $847.2 million against the comparable period last year.

During the same time, Hardee's reported that company revenues increased 9.2 percent to $357.5 million, and that its operating earnings jumped 81 percent to $6.8 million.

Also showing an increase is the average unit sales volume of Hardee's company-operated restaurants, which increased 4.1 percent during the First Quarter.

"The first three months showed positive gains for Hardee's," said Bill Prather, President and Chief Executive Officer. "We are among the industry leaders in our operating performance, and we are on track for another successful year."

Prather attributed the company's First Quarter sales boosts to the continued success of Crispy Curls, a lightly-seasoned, curled french fry product, the return of the Big Twin sandwich to Hardee's standard menu, and a Lental promotion featuring several fish products.

Helping to boost earnings was the continued rollout of automated kitchen equipment such as the Top Side Cooker grill, and the automated Drink Dispensing System into Hardee's restaurants. That machinery and other innovative pieces of equipment maximize the productivity of Hardee's restaurant employees, minimize labor usage and reduce product waste, while delivering superior tasting food products to customers.

With the increased emphasis in the media on the use of saturated oil in foods by Phillip Sokolof of the American Heartsavers Association and others, Hardee's has continued to receive praise for being the only major fast-food company to use all-vegetable oil to cook all of its fried products. Hardee's made the voluntary switch two years ago, long before health groups began asking fast-food restaurnats to discontinue the use of beef tallow and/or tropical oils to prepare their fried food products.

In reporting the First Quarter results, Prather added that the company had completed the acquisition of 648 Roy Rogers restaurants from Marriott Corporation, giving Hardee's strong penetration in the Washington, D.C., Baltimore, Philadelphia, and New York markets. Conversion of the Baltimore area Roy Rogers restaurants is now underway, with plans for other areas to convert on a market-by-market basis.

The third largest fast-food hamburger restaurant chain in America, the company operates 3,312 Hardee's and 648 Roy Rogers restaurants in 42 states and 9 foreign countries. Combined total sales of the two restaurant concepts exceed $ 4.1 billion.

#90121p9983 05/01/1990 ~PR Newswire

CEDAR RAPIDS, IA (MAY 1) PR NEWSWIRE - IE Industries Inc. (NYSE: IEL), a Cedar Rapids-based holding company, announced 1990 first quarter earnings of 30 cents per share. That compares to 47 cents per share for the like period in 1989. Earnings for the 12 months ended March 31, 1990, were $2.14 per share compared to $2.30 per share for the like period a year earlier. The 1989 earnings included approximately 24 cents per share related to an initial public offering of stock by Teleconnect, now Telecom USA (NYSE: TTT), a company in which IE Industries has an investment.

Net income for the first quarter of 1990 was $4.41 million, compared with $6.68 million for the like period in 1989. Revenues for the quarter were $111.4 million, compared with $116.3 million for the first quarter of 1989.

Iowa Electric Light and Power Co., the principal subsidiary of IE Industries, reported a 2.8 percent decrease in kilowatt hour sales for the quarter, primarily due to the impact of self-generation by a major customer. March electric results include a partial month of interim rates collected, subject to refund, in a current rate case. The interim increase of $12.8 million was granted by the Iowa Utilities Board on March 8, 1990.

Natural gas and contract carriage sales were off 13.5 percent, primarily because of mild weather in the first quarter. In June, 1989, Iowa Electric filed for a $6.4 million annual increase in gas rates. In November 1989, the company placed an interim rate increase of $4.1 million into effect. On April 30, 1990, a final rate increase of $3.6 million was approved. As a result, a refund of approximately $300,000 will be required.

At its regularly scheduled meeting May 1, 1990, the board of directors declared a quarterly dividend of 51.5 cents per share on the common stock, for an indicated annual dividend of $2.06. The dividend is payable July 1, 1990, to shareholders of record on June 15, 1990.

In seperate actions, the Iowa Electric Board continued dividends for each of its preferred and preference stock issues.

#90121p9995 05/01/1990 ~PR Newswire

HOUSTON (MAY 1) PR NEWSWIRE - Baroid Corp. (NYSE: BRC), a worldwide supplier of petroleum services and titanium products, today announced that net income for the first quarter of 1990 was $6.1 million, or $.10 per share compared to $1.5 million or $.03 per share for the first quarter of 1989. Net sales for the quarter were $188.4 million compared to $116.5 million in the same quarter a year ago. The 1990 results include the operations of Baroid's wholly owned subsidiary, Titanium Metals Corp. of America (TIMET), which were consolidated effective Jan. 1, 1990.

Operating income of the company's petroleum services operating units improved by 27 percent on a sales increase of 9 percent over the first quarter of 1989. Drilling fluids and drilling services experienced significant gains while oilfield equipment fell below last year's sales and operating income levels.

Drilling fluids operating income increased 49 percent to $4.9 million on net sales of $73.7 million compared with operating income of $3.3 million and sales of $64.7 million a year ago. Improvements were realized in both domestic and international operations as drilling activity surpassed 1989's levels.

Drilling services operating income increased 150 percent to $1.6 million on net sales of $34.5 million compared with operating income of $.6 million on net sales of $30.7 million a year ago. These improvements were primarily due to increases in measurement- while-drilling and survey revenues in the United States and international markets during the first quarter of 1990.

Oilfield equipment operating income decreased to $.3 million on net sales of $18.9 million compared to operating income of $1.4 million on sales of $21.1 million a year ago. The decline in revenues and operating income resulted primarily because the first quarter of 1989 included significantly sales of Shaffer equipment to the Soviet Union, which do not recur ratably during the year and did not occur in the first quarter of 1990. Shaffer also experienced increased new product development costs during the 1990 quarter. Shaffer's current backlog of $31 million represents a 150 percent increase over the first quarter of 1989 and includes approximately $7 million in planned sales to the Soviet Union for the third quarter of 1990.

Group expenses not allocated to product lines increased in the first quarter of 1990 over 1989 due to foreign currency-related losses and higher variable incentive compensation expense in 1990.

TIMET's operating income for the first quarter of 1990 was $11.3 million on net sales of $61.2 million. On a pro forma basis, assuming TIMET had also been consolidated in the 1989 period, the first quarter 1989 operating income of the titanium metals segment would have been $7.9 million on sales of $56.5 million. The 1990 results reflect improvements in pricing and sales growth of higher margin product lines.

Interest expenses in 1990 includes a charge for approximately $1.3 million of unamortized fees associated with a bank credit agreement which was replaced by a new credit agreement in March 1990.

Minority interest in 1990 includes $2.1 million related to TIMET prior to it becoming 100-percent owned in March 1990.

Baroid Corp. is headquartered in Houston.

NEW YORK (MAY 1) PR NEWSWIRE - Alan Friedberg has been named to the position of chairman of Loews Theatre Management Corp., a Columbia Pictures Entertainment company, it was announced today by Jon Peters and Peter Guber, co-chairman of the parent company. Loews Theatres is the fifth largest motion picture exhibition circuit in the United States, operating 850 screens in 14 states. The appointment is effective immediately. Friedberg will also serve as a member of the board of directors of Columbia Pictures Entertainment Inc.

Friedberg began his career with Sack Theatres as theatre manager. He then became general manager, in which he oversaw operations, concessions, real estate, advertising, publicity and personnel. Later, he was named president and chief executive officer and head film buyer of USA Cinemas. The 317-screen Boston-based company evolved from the old 23-screen Sack Theaters until its acquisition by Loews in 1988.

Friedberg, articulating his eagerness to work with Guber and Peters, professed his delight to return to Loews, where he served as senior executive vice president up until Oct. 1, 1988.

#90121u0071 05/01/1990 ~United Press International

CHICAGO (APRIL 30) UPI - Rookie Jeremy Roenick scored a pair of first-period goals to set the tone, and Steve Larmer had a goal and four assists, powering the Chicago Blackhawks to a 8-2 domination of the St. Louis Blues Monday night in the decisive seventh game of the Norris Division final.

Larmer's five points enabled the Blackhawks to take their second straight seven-game series and earn a berth in the Campbell Conference final for the second year in a row.

They will take on the well-rested Oilers in the best-of-seven Stanley Cup semifinal series, starting Wednesday night in Edmonton.

Larmer equalled the club record for most points in a playoff game, originally set by Stan Makita in 1973, also against St. Louis. Chicago's two short-handed goals tied another team playoff record.

After his short-handed goal to start the second period, Larmer set up Denis Savard, then Dave Manson to give Chicago a 5-0 lead midway through the second. The blowout was in complete contrast to the first six games of the series, decided by a total of eight goals.

The Blues' Paul MacLean ruined the shutout bid of rookie goaltender Ed Belfour at 12:06 of the second with a power-play goal. Belfour, starting his fourth straight game, was brilliant throughout.

Greg Gilbert and Adam Creighton added to the rout early in the third period, with Larmer assisting on each of their goals. Creighton's goal came short-handed. Adam Oates and Chicago's Duane Sutter exchanged goals late in the third.

The Blackhawks, who finished atop the Norris in the regular season, also eliminated the Blues in the division final last season.

The 20-year-old Roenick, Chicago's No. 1 selection in the 1988 entry draft out of Thayer Academy in Boston, gave the Blackhawks the lead on the first shot of the game, two minutes and 47 seconds in. He took a perfect feed from Doug Wilson on the right wing, skated in over the blue line, moved beautifully around defenseman Jeff Brown and put a backhander past goaltender Vincent Riendeau on the near side.

But Roenick made an even better move on his second goal of the game and ninth of the playoffs with 6:57 left in the period. The rookie scooped up the puck along the right boards and moved in on veteran defenseman Harold Snepsts. Steering the puck with just his right hand on his stick and holding off Snepsts on the other side, Roenick moved in on Riendeau and snuck a shot through the goalie's pads. Snepsts ended up sitting in the

net, shaking his head.

The Blackhawks outshot their opponents 12-5 in the opening period, then picked up where they left off in the second.

Larmer beat Riendeau on a blast from the top of the left circle with his team short-handed at 3:03 in, and Savard connected on a shot from the slot at 7:28.

Blues Coach Brian Sutter, who had gone with Riendeau the entire series after rookie Curtis Joseph injured his left shoulder in the final game of their opening round, finally removed Riendeau and replaced him with Joseph after Savard's goal.

But Chicago kept up the pressure, with Manson scoring on the power play at 10:22. MacLean made it 5-1 less than two minutes later, and the period ended that way after the Blues were forced to kill off a five-minute major penalty.

SEOUL (MAY 1) UPI - The South Korean government freed 1,078 prisoners, including the brother of former President Chun Doo Hwan, to mark the Buddha's 2,534th birthday.

The prisoners, 898 adults and 180 juveniles who were ordinary convicts with good behavior, came out of correction houses across the country on special paroles Tuesday morning, a Justice Ministry spokesman said.

Among the freed was Chun Ki Hwan, older brother of former President Chun, who had served 1 1/2 years of a two-year sentence for influence-peddling and bribery.

The Buddha's birthday in South Korea falls on Wednesday this year. The government frequently grants special pardons on big holidays and free prisoners with good prison records.

#90121u0174 05/01/1990 ~United Press International
(MAY 1) UPI - The municipal airport in Chico, California, was the scene Monday of a fiery plane crash. Officials say a D-C-4 leased to the state to fight forest fires slammed into the airport runway when its left landing gear collapsed... triggering a fiery explosion. Both the pilot and co-pilot escaped UNhurt. They had been practicing touch-and-go landings when the accident occurred.

Connecticut's governor signed into law Monday a bill giving a woman the right to choose abortion before the fetus is deemed able to live outside the womb. The measure, which goes into effect October 1st, also requires girls under age 16 to undergo counseling before having an abortion. Abortion proponents call the law the strongest abortion rights measure passed since last July, when the Supreme Court gave states more power to restrict abortion.

The gynecologist who in 1971 identified the link between the use of the

drug D-E-S by pregnant women and vaginal cancer in their daughters is dead. Officials at Massachusetts General Hospital in Boston say Dr. Howard Ulfelder died of pneumonia Sunday. He was 78.

(MAY 1) UPI - Newly freed hostage Frank Reed was flown from Damascus, Syria, to Wiesbaden, West Germany... where he'll undergo medical checkups, some debriefing and be reunited with his wife. The 57-year-old American educator was released by his Lebanese captors Monday after three-and-a-half years as a hostage. Before leaving Damascus, Reed spoke by telephone to President Bush.

Salvadoran rebel leaders say they'll meet with a U-N representative Tuesday in Mexico City with proposals for talks aimed at ending the 10-year-old civil war. The announcement follows a meeting Monday in San Jose with Costa Rican President Oscar Arias. The guerrillas say the talks probably will be held in May... but NOT on Thursday... as tentatively agreed to in Geneva earlier this month.

The South Korean government marked Buddha's 25-hundred-34th birthday by releasing more than one-thousand prisoners with good behavior records Tuesday. Among those freed- the older brother of former President Chun Doo Hwan, who was serving a two-year sentence for influence-peddling and bribery.

The shuttle Discovery's new all-carbon brakes showed NO signs of damage after landing Sunday. But NASA officials say many more touchdowns at California's Edwards Air Force Base are needed before shuttles can resume landings in Florida. Landings in Florida have been banned since 1985 when one of Discovery's right-side brakes locked up after touchdown in a stiff crosswind.

Academy Award-winning actress Shirley MacLaine will undergo arthroscopic surgery on her right knee within the next two days. The 56-year-old actress hurt her knee Sunday during rehearsal of her song-and-dance revue, ''Out There Tonight,'' which was scheduled to open at a Hollywood theater Tuesday night. The injury will postpone the show's opening until August 28th.

(MAY 1) UPI - SPORTS TRANSACTIONS

BASEBALL

Atlanta - Claimed pitcher Joe Hesketh off waivers; optioned pitcher Rick Luecken to Richmond of the International League (AAA).

Baltimore - Optioned pitchers Jay Aldrich and John Mitchell to Rochester of the International League (AAA); sent pitcher Ben McDonald to Rochester on a rehabilitation assignment.

Boston - Optioned pitcher Daryl Irvine to Pawtucket of the International League (AAA).

California - Sent pitcher Willie Fraser to Edmonton of the Pacific Coast League (AAA).

Chicago (AL) - Traded pitcher Bill Long to Chicago (NL) for minor-league pitcher Frank Campos; placed outfielder Dave Gallagher on the 15-day disabled list; purchased the contract of outfielder Rodney McCray from Birmingham of the Southern League (AA); waived first baseman Greg Walker for the purpose of giving him his unconditional release.

Chicago (NL) - Optioned infielder Greg Smith and pitcher Dean Wilkins to Iowa of American Association (AAA).

Cincinnati - Placed pitcher Danny Jackson on the 15-day disabled list.

Cleveland - Claimed pitcher Sergio Valdez off waivers; optioned pitcher Kevin Bearse to Colorado Springs of the Pacific Coast League (AAA).

Houston - Activated outfielder Eric Anthony from the 15-day disabled list; placed outfielder Mark Davidson on the 15-day disabled list; sent infielder Dave Rohde to Tucson of the Pacific Coast League (AAA).

Los Angeles - Optioned infielder Jose Vizcaino to Albuquerque of the Pacific Coast League (AAA).

Milwaukee - Placed pitcher Tom Filer on the 15-day disabled list; moved pitcher Mike Birkbeck to the 21-day disabled list.

Minnesota - Released pitcher Rich Yett.

Montreal - Placed pitcher John Costello on the 15-day disabled list; named Richard Morency vice president of communications.

New York (AL) - Placed pitcher Pascual Perez on the 15-day disabled list; optioned outfielder Deion Sanders to Columbus of the International League (AAA); sent pitcher Chuck Cary to Tampa of the Gulf Coast League (Rookie) on a rehabilitation assignment.

New York (NL) - Placed outfielder Keith Miller on the 15-day disabled list; purchased the contract of outfielder Darren Reed from Tidewater of the International League (AAA); claimed outfielder Daryl Boston on

waivers; sent outfielder Lou Thornton and pitcher Julio Machado to Tidewater and outfielder Chuck Carr to Jackson of the Texas League (AA).

Oakland - Sent infielder Mike Bordick and pitcher Dave Otto to Tacoma of the Pacific Coast League (AAA).

Philadelphia - Optioned pitchers Brad Moore and Todd Frohwirth to Scranton-Wilkes-Barre of the International League (AAA).

Pittsburgh - Sent pitcher Mike Roesler and catcher Tom Prince to Buffalo of the American Association (AAA); named Jim Mallon manager at Welland of the New York-Penn League (Rookie).

San Francisco - Outrighted first baseman Mike Laga to Phoenix of the Pacific Coast League (AAA).

St. Louis - Placed third baseman Terry Pendleton on the 15-day disabled list.

Toronto - Outrighted catcher Ozzie Virgil and optioned pitcher Paul Kilgus to Syracuse of the International League (AAA).

Texas - Returned pitcher Ramon Manon to New York (AL).

BASKETBALL

Rockford (CBA) - Announced the resignation of coach Charley Rosen.

COLLEGE

Ball State - Named Rus Bradburd men's basketball assistant.

Dartmouth - Announced the resignation of hockey coach Jeff Kosak.

Oklahoma State - Announced resignation of athletic director Myron Roderick to become president of the National Wrestling Hall Of Fame.

Oregon State - Named Dutch Baughman athletic director.

FOOTBALL

Atlanta - Signed tight end Joe Meerton and cornerback William Evers.

NFL - Banned New Orleans defensive lineman Frank Warren for violating the league's substance-abuse policy.

Philadelphia - Signed center Dave Rimington to a 2-year contract.

Phoenix - Signed linebackers Vernon Maxwell, Bob Davis, Lawrence Oliver and Eldonta Osborne; wide receivers Darren Flutie, Bill Hess, Amod Field and John Jackson; quarterback Mike Johnson; fullback Dewaine Jones; tight end Dennis Smith; kickers Win Lyle and Kevin Nicholl; cornerback Preston Waters; defensive linemen Mike Applewhite and Jeff Mathis; guard John Brandom; tackle Mike Pfeifer; and offensive lineman Lance Prouty.

San Francisco - Signed wide receiver Reggie Byrum and cornerback Kevin Lewis; released offensive lineman Matthew Fitts; defensive end Tom Flesher and running back Garry James.

Seattle - Signed tackles Todd Oberdorf and Michael Lindsey, fullback Felton Parquet, wide receiver Alvin Lee, linebacker Xavier Jordan, safety Jonathan Watts and linebacker Willie Walker.

HOCKEY

Washington - Called up defensemen Mark Ferner and Bill Houlder; goaltender Jim Hrivnak; forwards Tyler Larter, Steve Maltais and Kent Paynter; and centers Steve Seftel and Alfie Turcotte from Baltimore of the American Hockey League.

WASHINGTON (MAY 1) UPI - One out of every 20 elderly Americans may be a victim of abuse - a 50 percent increase over the past decade - with women more likely to be abused than men and sons more likely to inflict the abuse, a congressional report said.

''Elder Abuse: A Decade of Shame and Inaction,'' a report by a House Select Aging subcommittee, found the incidence of elder abuse has increased 50 percent, from 1 million victims in 1980 to more than 1.5 million today - or about one out of 20 senior citizens.

The abuse, ranging from theft to neglect to violent physical abuse, is less likely to be reported than child abuse, according to the congressional report, which was released Monday.

While one out of three child abuse cases is reported, one out of eight cases of elder abuse is reported, the study says. The subcommittee's 1980 report estimated one in five cases of elder abuse was reported.

Subcommittee Chairman Rep. Edward Roybal, D-Calif., admonished Congress for failing to approve legislation that would provide funds to states with mandatory reporting laws to help identify and protect elder abuse victims.

''The lack of meaningful elder abuse programs and funding, coupled with

the rapid growth of America's elderly population, is a prescription for even greater disaster than now exists,'' Roybal said.

The subcommittee report said that ''absent the passage of legislation providing assistance to the states in this area, the states are severely hampered in channeling monies into this newly designated social services area - elder abuse protective services - on their own authority. In fact, some states, such as Louisiana, have simply stopped providing elder abuse protective services.''

Physical violence, including negligence, and financial abuse remain the most common forms of abuse, followed by abrogation of basic constitutional rights and psychological abuse, the report said.

Women are more likely to be abused than men, the report found, while their abuser most likely is a son.

''The likely abuser will usually be experiencing great stress. Alcoholism, drug addiction, marital problems and long-term financial difficulties all play a role in bringing a person to abuse his or her parents.

''The son of the victim is the most likely abuser, followed by the daughter of the victim. It is interesting to note that the abuser, in many cases, was abused by the parents of the child,'' the report said.

#90121u0387 05/01/1990 ~United Press International

OTTAWA (MAY 1) UPI - Lithuanian Prime Minister Kazimiera Prunskiene, on a North American tour that brings her to the United States, said suspending or revoking the republic's independence declaration ''is not even the remotest of possibilities'' as a gesture to promote talks with Moscow.

However, Prunskiene said Monday that Lithuania was discussing the possibility of slowing some of the ''documentary details'' associated with implementing the March 11 declaration. She did not elaborate.

''Suspending of the declaration or revocation is not even the remotest of possibilities,'' she told reporters after meeting in Ottawa with External Affairs Minister Joe Clark.

Prunskiene planned to travel to Toronto Tuesday before heading to New York and Washington later in the week.

Prunskiene said Lithuania was considering suggestions made by France and West Germany for a compromise proposal that would help launch negotiations. However, she said there were several interpretations of the proposal as to whether it was based on a suspension of the declaration.

West Germany and France, Prunskiene said, have affirmed that the declaration is valid and acceptable under the framework of international law. Even if Lithuania were to declare a freeze on the implementation of the independence decree, the declaration itself would still be valid, she added.

At the same time, Prunskiene appeared to link any freeze on independence to the issue of Soviet troops remaining in Lithuania.

A freeze ''very much will depend on how this part of the question is resolved,'' she said, adding there was a ''myriad of possible solutions'' ranging from total demobilization of troops to having some forces remain in Lithuania.

Prunskiene also said Lithuania would require ''international guarantees'' of support from West Germany and France if it accepted their suggestion for a compromise.

''From the moment other nations become involved in solutions they become players,'' she said.

Prunskiene said she had planned last month to visit North America to develop contacts with other parts of the world. Specifically, Lithuania wants to improve its forest products technology and begin manufacturing products like wood briquettes, furniture and telecommunications equipment.

But Prunskiene made it clear that even though Lithuania wants to expand trade ties with Europe and North America, it would never cut trade links with the Soviet Union.

''They have always existed and they will continue to exist,'' she said.

Prunskiene, who spoke to officials in Vilnius two hours before meeting with reporters, said there had been no easing of the economic blockade imposed by Moscow in an effort to halt Lithuania's secessionist drive.

Although she did not openly criticize President Bush's decision last week not to impose retaliatory sanctions against Moscow, Prunskiene said Lithuania was seeking ''a stricter kind of reaction'' from Western nations.

(MAY 1) UPI - The New York Mets, who for several seasons have let their pitching do the talking, gave new meaning to the phrase Monday night.

Met's pitcher David Cone, who made a serious error in judgement by getting involved in a heated argument with an umpire while two Atlanta runners rounded the bases to score, accepted complete responsibility for the New York's 7-4 loss to the Braves.

''It's an embarrassing moment'' said Cone. ''It cost our team maybe a ballgame and I'm willing to accept responsibility for that.''

The moment occured in the fourth inning when Cone became consumed with a controversial play at first base, choosing to argue the call with first-base umpire Charlie Williams rather than concentrating on two base runners in scoring position.

With Dale Murphy and Ernie Whitt on first and second, Cone induced Mark Lemke to hit a soft grounder, which second baseman Gregg Jefferies collected and flipped to Cone covering first. Cone took the toss and apparently made the putout, but Williams ruled the pitcher missed the bag.

On the seemingly innocent play both runners advanced one base, but while Cone protested vehemently, neglecting either to return the ball to a teammate or call for time, Murphy and Whitt scampered home to boost Atlanta's lead to 4-1.

Jefferies even took hold of Cone, physically twisting him in the direction of the home plate in an effort to get the pitcher to focus on the action behind him.

''I'm an emotional person,'' Cone said. ''I snapped emotionally and it's something I'm going to have to live with.''

John Smoltz, 1-2, earned the win as the Braves scored back-to-back wins for the first time this season.

''This is one we needed,'' Smoltz said. ''We got some breaks in the game that we've been waiting for a long time.''

In the fifth, Atlanta made it 6-1 with two more runs off Cone. Oddibe McDowell walked and rode home on Jeff Treadway's first home run of the year.

New York cut the deficit to 6-2 in the sixth when Mark Carreon double and scored on a groundout by Kevin McReynolds.

Atlanta made it 7-2 on an RBI-single by Andres Thomas in the sixth before New York closed to 7-4 on Howard Johnson's two-run homer in the eighth.

New York seized a 1-0 lead in the third when Kevin Elster walked and later scored on an RBI-single by Cone.

Atlanta made it 2-1 in the bottom of the inning on McDowell's two-run homer, driving home Lemke.

Elsewhere in the National League, Houston dropped Montreal 4-2, Cincinnati pounded Philadelphia 6-2 and San Francisco topped Los Angeles 8-4.

In the AL, it was: Oakland 6, New York 0; Milwaukee 6, Detroit 1; Toronto 10, Cleveland 4; Baltimore 2, California 1 in 12 innings; Boston 11, Seattle 0 and Chicago 5, Texas 4.

-- AROUND THE NL --

Astros 4, Expos 2

At Montreal, Glenn Davis hit two home runs, including the 150th of his career and Rafael Ramirez singled home two runs to power Houston. Dennis Martinez, whose 19-inning scoreless string was broken in the fourth, dropped to 2-1. Larry Andersen improved to 2-0 and Dave Smith pitched the ninth for his seventh save.

Reds 6, Phillies 2

At Cincinnati, Paul O'Neill stroked a two-run single to cap a three-run first inning and Jeff Reed homered to lead Cincinnati to its league-best 13th victory. Jose Rijo, 1-1, struck out six in seven-plus innings and Rob Dibble notched his third save. Ken Howell, 2-2, took the loss.

Giants 8, Dodgers 4

At Los Angeles, rookie John Burkett hurled seven innings to win his first big-league start and Will Clark homered to ignite a string of six straight hits in a four-run fourth inning that powered San Francisco. Wetteland, 1-2, making his first start of the season, surrendered hits to all five batters he faced in the fourth. Burkett, 1-0, allowed seven hits, two runs while striking out three.

#90121u0419 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - Three St. John's University athletes, charged in a masked sexual attack on a foreign exchange student, have been suspended from the Queens school.

The defendants on Monday pleaded innocent to the charges they sexually

assaulted the student after forcing her to drink vodka at an off-campus house, and were released without bail.

Justice Charles Thomas noted all three defendants had surrendered voluntarily but made no comment on the prosecutor's request that the three - two of whom are members of the university lacrosse team - be held on $25,000 bail each.

Later Monday, the university announced it had suspended the trio, and would conduct an investigation - and if necessary - a due process hearing.

The indictment handed up in state Supreme Court in Kew Gardens charged Andrew Draghi, 20, Walter Grabinowitz, 21, and Michael Calendrillo, 20, with numerous counts of sodomy, sexual abuse and unlawful imprisonment. All three pleaded not guilty.

Prosecutors said the three wore masks during part of the March 1 attack.

Draghi, a junior, and Grabinowitz, a senior, are members of the lacrosse team at the university, while Calendrillo, a junior, was a member of the rifle club.

The three men, all from Bethpage in Nassau County, wore gray suits and sat expressionless as a prosecutor described the incident.

Assistant District Attorney Peter Reese said Calendrillo offered the unidentified woman a ride after rifle practice and then instigated the attack by inviting her home with him.

Calendrillo allegedly asked her to come into the house, known as the Trump Palace, some 10 minutes from campus, to meet his roommates.

He mixed a vodka with orange juice and forced her to drink it despite her protests. He then allegedly began massaging her shoulders, telling her, ''Just relax, this will make you feel better,'' Reese said.

After a second drink, she passed out and when she awoke, ''Calendrillo was orally sodomizing her,'' Reese said. Grabinowitz also began touching her in a sexually abusing way, the assistant district said.

She then passed out a second time, and when she came to, other men had joined the sexual assault, Reese said. During the second sexual attack, the defendants all wore masks, which were recovered by investigators using a search warrant, he said.

The defendants then carried the woman horizontally to a party, where she was sexually and verbally abused. The attacks ended only when a witness intervened on her behalf, the prosecutor said.

''This investigation is by no means over. They by no means acted alone,'' Reese said.

Members of the lacrosse team held a meeting after the attack and agreed to cover up the sexual attack at the second house, Reese said.

Defense lawyer Stephen Scaring called the allegations completely unsupported.

''It's not unusual for a woman to make accusations like this and then juice it up a little, make it more sexy, so it will play well,'' Scaring said.

The defendants were told to return to court May 22.

#90121u0454 05/01/1990 ~United Press International
(MAY 1) UPI - Around the world... around the clock... U-P-I brings you the world, next:

Former hostage Frank Reed kissed the ground and flashed the V-for-victory sign after arriving at a U-S air base in West Germany on a flight from Syria today. Reed's Moslem captors released the American educator yesterday after holding him since 1986. Reed is the second U-S hostage released in eight days.

Earlier in Syria, Reed said he was happy to be released... but he voiced anguish over the fate of other captives in Lebanon. Reed said he never learned why he was kidnapped in September 1986... speculating that- in his words- ''the bottom line was because I was American.''

Even as Reed was being released... the State Department released its annual report on global terrorism. The State Department listed Iran and Syria for continuing support of international terrorism. President Bush publicly thanked the governments of Syria and Iran for their help in winning Reed's release.

Panamanian President Endara has another busy day ahead of him in Washington. Endara will meet with Vice President Quayle this morning, followed by a session with House and Senate leaders. He also is scheduled to address the National Press Club and visit the Organization of American States.

Connecticut Governor O'Neill has signed a bill into law that affirms a woman's right to choose an abortion. The law gives a woman the sole right to choose abortion before the fetus is deemed viable to live outside the

womb. The measure requires counseling before girls under 16 can get abortions.

(MAY 1) UPI - Exxon today launches its scaled-down efforts to clean up after the Exxon Valdez oil spill, with workers expecting to hit the beaches later this week. A report by Alaska Governor Cowper says oil had been discovered in the organs of pollock, a fish that is one of the mainstays of the state's fishing industry.

There's new life for the Hubble Space Telescope. NASA engineers freed an antenna on the telescope that was stuck while trying to unfold. Since the telescope's deployment last week... NASA has fallen a week behind schedule as engineers begin the process of turning on the telescope's many systems.

A congressional report says one out of every 20 elderly Americans may be a victim of abuse. That's a 50-percent increase from 10 years ago. The report, titled ''Elder Abuse: A Decade of Shame and Inaction''... also says women are more likely to be abused than men and sons more likely to inflict the abuse.

A major mental health study from Rutgers University shows that television watching tends to make people more tense and less alert than almost any other activity. The report also concludes that people who are lonely and feel their life is empty may use television to fill it.

Officials say John F. Kennedy Junior... the 29-year-old son of the late president... flunked the New York state bar exam for a second time. Said Kennedy... ''Obviously I'm very disappointed again.'' He has one last chance to pass or lose his job as an assistant prosecutor in New York.

#90121u0460 05/01/1990 ~United Press International

(MAY 1) UPI - The Baltimore Orioles should be ashamed of themselves, treating Angels that way.

The Orioles first robbed, and then tricked California Monday on the way to their second consecutive victory in their final at-bat, a 2-1, 12-inning win.

First, Angel catcher Lance Parrish was robbed of a three-run homer in the eighth when outfielder Steve Finley made a leaping catch of his drive over the center field fence.

''Give him credit,'' added Parrish. ''You hate to have it happen to you,

but he saved the game for them.''

Finley said leaping catches are all timing.

''It kept carrying but was hit high enough so I could jump,'' said Finley. ''No over the fence catch is easy. It's all timing.''

Then, in the bottom of the 12th, Orioles Manager Frank Robinson deceived California. With no outs and runners on first and second the skipper let hitting hero Brady Anderson swing away.

''It was a bunt situation, but it was run-and-hit so I was swinging no matter where the ball was,'' said Anderson, whose game-winning single scored Joe Orsulak from second base.

''Frank crossed them up, I didn't,'' added Anderson, who was sent up to pinch hit for designated hitter Sam Horn against relief pitcher Mike Witt, 0-3.

''They fooled everybody,'' said Angels catcher Lance Parrish. ''I thought he was bunting all the way with two runners on first and second base and no outs. Frank had something up his sleeve. Ninety-nine out of a hundred times you expect a bunt in that situation.''

Brian Holton, 1-0, got the win even though Bob Milacki became the first Oriole to work into the ninth inning and Gregg Olson stretched his scoreless inning streak to 39.

''I can't say enough about our pitching,'' said Robinson. ''We got another outstanding performance. If we can get some timely hitting, I think you'll see this club take off.''

Elsewhere Monday in the American League, Oakland blanked New York 6-0, Milwaukee ripped Detroit 6-1, Toronto walloped Cleveland 10-4, Boston trounced Seattle 11-0, and Chicago outlasted Texas 5-4 in 13 innings.

In the National League, it was: Cincinnati 6, Philadelphia 2; Houston 4, Montreal 2; Atlanta 7, New York 4; and San Francisco 8, Los Angeles 4.

Athletics 6, Yankees 0

At New York, Bob Welch scattered six hits and Rickey Henderson hit two homers for the A's, who improved their record to a league-leading 14-5, 10-2 on the road. Welch, 3-1, who lowered his ERA to 1.06, struck out four in recording his first shutout. Mark McGwire and Jose Canseco added solo homers for Oakland and Mike Gallego snapped an 0-for-25 slump with an RBI single. Yankee starter Clay Parker, 0-1, took the loss.

Brewers 6, Tigers 1

At Detroit, Mark Knudson, 2-0, fell one out shy of his first major league shutout when Cecil Fielder blasted a shot into the upper deck for his seventh home run. His victory makes Milwaukee's starters 9-0 with a 2.07 ERA. Solo homers by Robin Yount and Greg Brock paced the first-place Brewers to their sixth win in seven games and 10th in 12. Jeff Robinson, 1-2, allowed the Brewers five earned runs in 8 1-3 innings. The Tigers committed three errors, two by third baseman Tony Phillips.

Blue Jays 10, Indians 4

At Cleveland, Glenallen Hill, Junior Felix, George Bell and Tony Fernandez hit home runs to lead Toronto to a fight-marred victory. It was the Indians' first loss at home this year. Toronto pounded out 19 hits and snapped a four-game losing streak. Todd Stottlemyre, 3-2, picked up his third straight win. Cleveland starter Kevin Bearse, 0-2, lasted two-thirds of an inning. A bench clearing brawl occurred in the third when Stottlemyre hit Mitch Webster, who then rushed the mound. It was the sixth hit batter in five games between the two teams

Red Sox 11, Mariners 0

At Boston, Tony Pena belted a three-run homer and Mike Boddicker, 2-3, combined with two relievers on a six-hitter, sparking the Red Sox to a rain-delayed victory. Pena went 3 for 5, raising his average to .403, and Wade Boggs reached base five times to key Boston's fourth win in its last five games. Seattle starter Brian Holman, 3-2, was tagged for six runs and seven hits in 3 1-3 innings.

White Sox 5, Rangers 4 (13 innings)

At Chicago, Lance Johnson's one-out RBI single off Jamie Moyer, 0-3, in the 13th inning gave the White Sox the victory. The run was set up by a two-base error as second baseman Julio Franco hurried a throw that sailed into the dugout. Chicago reliever Bobby Thigpen, 1-1 picked up the win. Texas Manager Bobby Valentine was ejected by home plate umpire Tim Welke after Jeff Huson was called out on strikes in the seventh. Harold Baines smacked his fourth home run for Texas.

#90121u0510 05/01/1990 ~United Press International

BARCELONA, Spain (MAY 1) UPI - Maverick Moscow communist Boris Yeltsin came through emergency surgery for a herniated disk in fine shape and should leave the hospital by the end of this week, the Soviet lawmaker's doctor said Tuesday.

Yeltsin, who had complained of stabbing back pains and numbness in his right foot Monday, was doing ''very well'' following the 90-minute operation, said Dr. Josep Llobet Tapies, who performed the surgery.

The neurosurgeon described the 59-year-old Yeltsin, who was recovering in an intensive care ward, as a ''strong patient'' who should be released from the hospital in three to five days.

''Operate,'' the largest daily in El Pais, Spain, quoted the animated Yeltsin as instructing his doctor, ''because it wouldn't be good for the future president of the U.S.S.R. to have a paralyzed foot.''

Yeltsin, the most popular Soviet political figure after Gorbachev, is scheduled to be a candidate for president of the Russian Federation when its Parliament meets in mid-May.

Election to that post would give him a powerful base for an eventual challenge to Soviet President Mikhail Gorbachev because the Russian Federation is the largest of the 15 Soviet republics.

Yeltsin was moments away from appearing on a Barcelona television news panel to discuss the future of Gorbachev's perestroika reforms when he fell ill, the official Soviet news agency Tass said in a dispatch from Madrid.

Doctors at the television station examined Yeltsin and ordered his immediate hospitalization.

The outspoken Soviet opposition leader had traveled to Spain Saturday to attend an international conference called ''The New Humanism'' in Cordoba.

He also had planned visits in Madrid this week with Spanish President Felipe Gonzalez and with local Barcelona officials. The sudden illness forced him to cancel his appointments.

Yeltsin became the people's favorite when he was fired as Moscow's Communist Party boss in November 1987 for criticizing Gorbachev and saying perestroika had given the people little in material goods.

He later was ousted from the ruling Politburo, but in a remarkable political comeback, won overwhelming election to the new Soviet Parliament garnering more votes than any other candidate.

In the elections to the new Russian Parliament, he again was the top vote getter, running as a candidate from the city of Sverdlovsk.

#90121u0544 05/01/1990 ~United Press International

(MAY 1) UPI - Dense fog and rain hovered over much of New England early Tuesday, while winter storm warnings were issued for southwest Colorado and the Four Corners area and San Francisco bounced back from high winds that knocked out power.

The National Weather Service reported that Boston and Cape Cod were socked in with fog and cold drizzle, and temperatures sank to the 40s. Scattered thunderstorms rumbled across much of the remainder of the region.

Skies over Pennsylvania, New Jersey, Delaware and Maryland cleared somewhat overnight, but areas of patchy fog remained. Western Pennsylvania and parts of West Virginia remained cloudy. Temperatures ranged from the 40s to mid 50s.

In the South, Georgia was recovering from sweltering summerlike daytime temperatures, including a record 96 in Hinesville, Ga. Thunderstorms rolled into the Carolinas, with North and central North Carolina under a severe thunderstorm watch.

Atlanta had a 70-degree temperature reading early Tuesday. Charleston, S.C., was 74.

Thunderstorms rolled across southern Missouri, southern Illinois and the western border of Indiana. Temperatures were in the upper 40s to mid 50s.

Wisconsin, Michigan and most of Illinois were clear to partly cloudy. Sault Ste. Marie in Michigan's Upper Peninsula had clouds and 33 degrees.

The weather service said winter storm watches remained in effect early Tuesday for the southwest mountains of Colorado, the Four Corners region, the Alamosa Valley and the Sangre de Cristo mountains into northern New Mexico.

In Texas, a weak stationary front stretched across Texas from the state's far northeast corner past San Antonio and into the Big Bend National Park in the far south. Oklahoma and Arkansas were mostly cloudy.

San Francisco was balmy with 9 mph winds as residents recovered from high winds that knocked out power to 18,000 East Bay electricity users early Monday. Most power was restored by late Monday morning, according to a PG&E spokesman. Wind gusts of up to 33 mph had whipped power lines into each other, causing shorts, according to the utility.

Temperatures in San Francisco's Bay area dipped to 64 degrees overnight after hitting 80 in Oakland on Monday, snapping a 13-year high for the day.

In Southern California, spotty rain showers briefly deluged some areas and

barely touched others.

In the Pacific Northwest, skies were sunny late Monday, with temperatures in the 60s. Oregon was warm and dry but cool east of the Cascades.

In Nevada, a cold front moving through southern Nevada pushed temperatures below the 70-degree mark, well below normal.

#90121u0617 05/01/1990 ~United Press International

JERUSALEM (MAY 1) UPI - Jewish settlers ordered out of a disputed building in the Old City's Christian Quarter Tuesday apparently have abided by the ruling of Israel's High Court of Justice and left their new residence, Army Radio reported.

Last week, Israel's High Court of Justice ordered the 150 Jewish residents out of the building, known as St. John's Hospice, by noon Tuesday. However the court ruled that 20 representatives of a Panamanian company that bought a lease to the property could remain until the right of occupancy is decided by a lower court.

A spokesman for the settlers said Tuesday only 20 people remained in the building by the noon deadline and the other residents had left the building, Army Radio reported. It was not clear when the Jewish settlers ordered out had left, and journalists and representatives of the Greek Orthodox Church were refused entry to verify the settler's statement, Army Radio reported.

The Greek Orthodox Church owns the property and is seeking to regain control of the 72-room building.

Relatives of an Armenian who lived in the building for nearly 40 years have said the family was unaware the new residents were Jews and were tricked into selling the lease to the property, which is around the corner from the Church of the Holy Sepulchre, the traditional site of Jesus's crucifixion and burial.

The Jewish occupation of St. John's Hospice April 11 in the middle of Christian Holy Week sparked strong criticism from Christians, Moslems and Jews, including Jerusalem Mayor Teddy Kollek. It also has strained Israeli relations with the United States, Jerusalem's chief ally in the world and largest source of economic aid.

The Construction and Housing Ministry's acknowledgement late last month that it provided $1.8 million to purchase the lease further fueled the dispute. The office of caretaker Prime Minister Yitzhak Shamir, who had remained quiet on the subject until then, issued a statement saying that

''every Jew has the right to live in Jerusalem'' but Israel also would work toward ''peace and tranquility'' between communities in the city.

#90121u0625 05/01/1990 ~United Press International

(MAY 1) UPI - Another American hostage is set free... U-P-I has the details of that story and other top news from around the world and across the nation.

Frank Reed is enjoying his first full day of freedom today in Wiesbaden, West Germany, where he'll undergo a medical checkup and some debriefing... and, most importantly, a reunion with his wife and nine-year-old son.

Moslem extremists in Lebanon turned Reed over to Syrian authorities who in turn handed the 57-year-old educator over to U-S officials in Damascus yesterday. Reed spent more than three-and-a-half years in captivity. The release comes eight days after the release of another U-S hostage, Robert Polhill.

Reed described his captivity to Syrian television as lonely and boring... but added- quoting here- ''Of course, I am very happy to be free.''

Syrian officials say now it's time for Washington to return what they call the ''gesture of good will'' by working for the release of Arab hostages. They include a Moslem fundamentalist leader held in Israel... 400 Shiite Moslems held by Israel... and 16 Shiites convicted of bombings in Kuwait.

In Washington, President Bush was welcoming Polhill to the White House. Bush thanked Syria and Iran for their help in freeing both hostages... but added that a ''thank you'' was all they'll get as long as other hostages are held.

Six Americans and 10 other Westerners remain hostage in Lebanon.

#90121u0637 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - One of every five students of Italian descent drops out of city schools, and some specialists are placing at least partial blame on the stereotypes of Italians generated by popular culture, a report said.

A report by the John D. Calandra Italian-American Institute of the City University of New York said the extent of the Italian-American dropout problem has not been recognized by city officials.

The study, the first to focus on Italian-Americans, was presented Monday

at a CUNY conference, It estimated 20 percent of the city's 140,000 Italian-American students fail to complete high school.

Italian-Americans make up about 15 percent of the school system.

Study specialists said at least part of the problem is that Italian-American students are influenced by popular culture, and that over the years, the image portrayed of that ethnic group is one of inferiority and criminality.

Researchers also said the reasons for the high dropout rate included not only low self-esteem and a self-image that precluded academic excellence, but also traditional factors like peer pressure, parental ignorance about education and the belief that the long-term benefits of education did not outweigh the short-term benefits of working.

''The notion that we are all either bigots, bums or buffoons still lives '' Frank Arricale II, superintendent of Community School District 11 in the Bronx, said in Tuesday's New York Times.

In New York City schools, Hispanic students have the highest dropout rate, with 31.78 percent. Blacks are second, at 24.54. The rate for other whites is 18.55 percent.

The profile of Italian-American educational attainment, prepared by the institute, showed those students lagging behind those elsewhere in the country. Nationally, 15.5 percent of the Italian-Americans have less than an eighth-grade education. In New York, the figure is 24.9 percent. Nationally, 18.7 percent have some college work, compared with 12.5 percent in New York.

#90121u0642 05/01/1990 ~United Press International

(MAY 1) UPI - Panamanian President Endara has a busy itinerary today.

On the second full day of his U-S visit, Endara is scheduled to kick off the day with a pow-wow with Vice President Quayle. Endara will top off today's activities with an afternoon get-together with Senate leaders.

It's too early to gauge whether Endara's first U-S visit since becoming president will result in his receiving American assurances of desperately needed foreign aid.

However, yesterday there were signs that Capitol Hill lawmakers will respond the pressure by President Bush and pass a stalled 720-Million-dollar economic aid package for Panama and Nicaragua.

Last night, the Senate removed two amendments from the aid package that had stymied its passage. The House has yet to reach an agreement on the bill.

Bush and Endara met yesterday for two hours. A White House aide says the two men discussed emerging U-S-Panamanian relations and how to improve the bond between Washington and Panama City.

NASA officials say things are looking up for the Hubble Space Telescope.

The space agency says fervent work by ground controllers appears to have corrected a problem that had frozen one of Hubble's two ''high-gain antennas.''

To prevent the problem of the antenna getting stuck again, controllers plan to restrict its range. Officials say the restriction should limit the antenna's usefulness to about 75 percent of its capacity.

But the deputy manager for the Hubble project says the limitation should NOT effect the depth of information the telescope provides researchers during the course of its mission. Jean Olivier says the same data will be gained, it may take a little longer for the information to be transmitted to Earth.

The unjamming of the antenna means the telescope may beam its historic first glimpses of the cosmos back to Earth as early as next weekend.

#90121u0657 05/01/1990 ~United Press International

(MAY 1) UPI - A panel of House Democrats in Washington issued scathing criticism of the Salvadoran military in its probe of the murders of six Jesuit priests.

The 19-member task force named by House Speaker Thomas Foley reports that Salvadoran investigators have done little to discover whether top military officials ordered last November's slayings of the Jesuits and two other people.

Foley said yesterday in an interim report that the killings are part of a continuing pattern of human rights abuses by the Salvadoran military.

A military spokesman in El Salvador said- quoting here- ''The armed forces will NOT have any reaction to the report.''

Six Jesuits, their cook and her daughter were killed by uniformed men at the University of Central America in San Salvador during the height of an offensive by leftist rebels. An army colonel and eight U-S-trained members

of the armed forces have been charged in the killings.

The U-S task force said ''good police work'' by the Special Investigations Unit led to the arrests... but that the investigation is now at a ''standstill.'' They say the colonel may NOT even stand trial.

Exxon is scheduled today to kick off this season's clean-up effort of Alaskan waterways and beaches soiled by last year's Valdez oil spill.

A Coast Guard official yesterday declared that this summer's work will concentrate on making the region as clean as practically possible.

But there are questions by state officials is such an effort goes far enough.

Alaska Governor Steve Cowper disclosed in a state-wide radio broadcast yesterday that damage from the massive oil spill appear to be more wide-ranging than initially suspected.

Cowper referred to the discovery of oil in the organs of pollock, a bottom dwelling fish that is one of the mainstays of the Alaska fishing industry.

The head of the environmental division of the National Marine Fisheries Service in Seattle says she was surprised to ''find exposure to hydrocarbons in such deep fish and offshore.''

An Exxon official denied that the spill is responsible for the effect on the pollock.

#90121u0801 05/01/1990 ~United Press International
(MAY 1) UPI - Newly released American hostage Frank Reed has been reunited with his wife and nine-year-old son in Wiesbaden, West Germany. Reed was freed by his captors yesterday in Lebanon, making him the second U-S captive to go free in an eight-day period. Reed, a Massachussetts native, says that during his 44-month captivity he was often kept blindfolded. Although noticably thinner and visibly exhausted, Reed expressed elation when he arrived in West Germany earlier today.

President Bush expressed gratitude to Syria and Iran for gaining the release of hostage Frank Reed. But Bush said thanks is all that the two countries will get as long as Americans are held captive in Lebanon. Bush said yesterday he hopes it's clear that hostage-taking is NOT the way to effect change in the international community. Syria's foreign minister said he hoped Washington would respond more generously to Reed's release.

New York police are searching for five or six teen-agers this morning

after the gun-toting group opened fire on crowded Brooklyn street last night. The melee left four bystanders wounded, including an eight-year-old boy. A police spokeswoman says a 12-year-old girl was the gang's target, but she escaped unharmed. Police are questioning the girl to identify her would-be assailants.

The House Democratic leadership appears to have won the support of many conservative party members in the lower chamber. The support of an estimated 35 of 40 conservative Democrats could assure passage of the Democrats' 1991 budget when it goes before the entire House today. But one right-leaning Democrat- Florida Representative Earl Hutto- says he won't back the Democrat plan because it reduces military spending by too much.

#90121u0814 05/01/1990 ~United Press International

BRUSSELS, Belgium (MAY 1) UPI - France, a member of NATO but not its military command, is resisting efforts by the United States and other countries to have the alliance play a greater political role in post-Cold War Europe, NATO diplomats say.

The French, favoring an enhanced diplomatic role for the European Community, have been ''foot-dragging'' in high-level NATO discussions on the alliance's political role in the 35-nation Conference on Security and Cooperation in Europe, sources said this week.

A CSCE summit is expected this fall and there have been a half-dozen meetings at NATO just below the ambassadorial level to formulate an alliance position on the new architecture of Europe.

France will discuss a European security role for NATO, but refuses, sources say, to constructively participate in talks on NATO's political role.

''The French say, 'Why are we meeting here? What's the purpose? We will be at the CSCE summit as 35 individual countries and it would be quite wrong to have any kind of consolidated position,''' said a top NATO diplomat.

A spokesman for France's NATO delegation says, ''We are concerned about a widening of political consultations inside NATO. This is true.

''We do not think NATO is the place to be talking about issues other than security,'' he said. ''We think there are other places to speak about political issues, particularly the European Community.''

The French position seems on the surface to be only a diplomatic annoyance for other NATO officials. It strikes at the heart, however, of NATO's uncertain future in a Europe no longer fearful of a Warsaw Pact attack and

highlights the growing competition between NATO and the increasingly confident European Community.

NATO Secretary-General Manfred Woerner seeks to recast NATO as a crucial political organization, rather than merely a military alliance, in a Europe dramatically altered by communism's sudden collapse in Eastern Europe.

Only NATO, he says, provides a transatlantic link in a time of rapid change and public support in the New World is seen as critical to Woerner's success.

''The French refuse to appreciate that a political role for NATO is important from a public-opinion perspective in the United States,'' said a top NATO diplomat from neither country.

''If there is a perception in the U.S. that NATO is not a place for political consultation, then people will ask why the U.S. has billions of dollars in weaponry invested in Europe, given the collapse of a Soviet threat,'' the diplomat said.

French reluctance to allow a wider NATO role has also extended, sources say, to Brussels consultations on the ''two-plus-four'' talks on German unification, which reach the foreign minister's level for the first time on Saturday in Bonn. The talks will involve representatives of the two Germanys and the four World War II allies - the United States, Britain, France and the Soviet Union.

''The word the French have used is that they don't want to be 'subordinated' to NATO,'' says one NATO diplomat.

Another diplomat said initial French aversion to NATO talks on the two-plus-four process recently softened because the meetings are designed to inform other NATO members rather than formulate a common alliance position.

Although Woerner says NATO and the European Community can complement each other rather than compete, a rivalry of waning subtlety has crystalized in recent weeks.

Of the 12 EC countries, only neutral Ireland is not a member of the 16-nation NATO.

''There are many situations where the European Community tries to speak with a common voice,'' says a French diplomat in Brussels. ''It was decided that there should be preparation at the Community level for the CSCE.''

A U.S. diplomat replies: ''The French want the CSCE to be seen only as a matter for the EC. We simply don't accept that.''

Adds another top NATO diplomat: ''What we don't want is for the EC to lock into a position on the CSCE summit and only then for NATO to begin formulating its own position.''

The British and Dutch have been ''highly supportive'' of American insistence that NATO play a high-profile political role in CSCE, a source says, while Belgium has tilted toward the French preference for the European Community.

France, a founding member of NATO in 1949, pulled out of its military command in 1966 but remained a member of the alliance.

French President Francois Mitterrand has led recent calls for faster European Community integration. At a summit last weekend in Dublin, EC heads of state gave initial endorsement to a proposal for European Community ''political union,'' including a common foreign and defense policy, by 1993.

European integration is fine, say U.S. diplomats, but the average American is not terribly interested in it.

''We have public support for NATO because it is something we do in common with our allies,'' says a high U.S. official. ''If we're told that the only common position will be a European one, and we're just a police force while Europe completes its unification process, then support in the U.S. will quickly disappear.''

#90121u0923 05/01/1990 ~United Press International

MIDDLETOWN, OH (MAY 1) UPI - Rep. Donald Lukens, R-Ohio, who was convicted of having sex with a teenage girl, will make an announcement Wednesday about his political future, his office said. Press secretary Tracey St. Pierre said Lukens will discuss his political plans, but other details have not been set.

Lukens was to participate Tuesday in his first debate for the 8th Congressional District seat, but he decided not to attend. Bill Jarrell, the congressman's chief of staff, said Lukens went to Washington to vote on budget legislation. "There is very good reason for him not to be there," Jarrell said.

In a written statement, Lukens said, "Time and time again when I meet with my constituents, they tell me the deficit is the most pressing issue confronting this country."

St. Pierre said, "In light of the negative campaigns being launched by other candidates, his failure to vote on the budget would have been the center of their negative attacks."

In the congressional race, state Rep. John Boehner has broadcast television commercials that attack fellow Republican Tom Kindness, citing Kindness' voting record during his 12 years as the district's congressman and his ethics for registering as a lobbyist during his years away from politics. Boehner and Kindness are the leading Republicans in the four-way May 8 primary.

Lukens has declined to announce his plans until an appeals court rules on his conviction for contributing to the unruliness of a minor for his relationship with a 16-year-old girl.

Lukens had sex with the girl in his Columbus apartment in November 1988. At his trial last year, Lukens never testified and his lawyer did not present any witnesses in his defense. Following the conviction, Republican Party leaders demanded that Lukens resign, but he refused.

Polls suggest Boehner and Kindness are leading in the congressional race. In recent months, Lukens has waged a quiet campaign to retain his seat, returning to the southwest Ohio district every weekend to meet with constituents.

#90121u0928 05/01/1990 ~United Press International

(MAY 1) UPI - Selective buying of light electrical issues pushed prices on the Tokyo Stock Exchange higher in light trading Tuesday, one of only two days of tradingduring Japan's Golden Week of national holidays.

The blue-chip Nikkei average of 225 selected issues, which gained 160.22 points Friday, added 105.03 points to 29,689.83.

The broader-based Tokyo Stock Exchange Price Index of all major issues, which was added 5.86 points Friday, climbed 8.82 points to 2,214.78.

The stock market was closed Monday and will be close Thursday and Friday for the holidays.

Trading was extremely light with most traders unwilling to make large investments before the long holiday weekend.

An estimated 240 million shares changed hands, compared with 488 million shares Friday.

Advances edged out declines 467 to 427, while 205 issues remained unchanged.

''Traders bought light electrical issues on the expectation they will rise next week,'' said Toshiyuki Nishiguchi, a trader with Daiwa Securities.

On the trading floor, Sony and TDK led the surge in light electricals.

Nippon Mining paced the actives, followed by Isuzu, TDK, Hitachi and Sankyo Aluminum.

Nonferrous metals, petroleum issues, shipping stocks and some precision instruments were higher.

Elsewhere in Asia, prices closed slightly lower in light trading on the Hong Kong Stock Exchange.

The key Hang Seng Index, which lost 36.24 points Monday, eased 4.91 points to 2,945.18. Utilities lost 25.64 points, financials dropped 8.53, industrials closed up 8.23 points and properties shed 4.92 points.

Volume was light at 720 million shares, compared with 818 million shares Monday.

Stocks fell from the the opening bell.

Analysts said as the key Hang Seng Index fell by more than 21 points, investors staged a mild rally and made up most of the day's losses in the final few minutes of trading.

Analysts said many investors have decided to remain on the sidelines while the first anniversary of China's crackdown on democracy advocates draws near.

Following the military action on June 4, Hong Kong's stock market plunged.

''Most people don't feel any need to overextend themselves on the market right now,'' said David Harman, an analyst with Morgan Grenfell. ''June 4 is coming closer and many people are just taking a wait-and-see attitude to see if that date affects the market.''

In Singapore, financial markets, banks and most major businesses were closed for the Labor Day holiday. Trading will resume Wednesday.

In Australia, stocks were slightly higher in light trading on the Sydney Sharemarket.

The key All Ordinaries Index, which tumbled 21.8 points Monday, rose for

the first time in eight days by 5.6 points to 1,440.1.

Turnover amounted to 76.1 million shares, compared with 64.3 million shares traded Monday.

Among the day's highlights, David Jones lost 20 cents to $8.30, Lend Lease slipped 10 cents to $12.40, News Corp. eased 4 cents to $9.70, Coles Myer added 4 cents to $7.40 and Pacific Dunlop added 2 cents to $4.54.

In the banking sector, ANZ bank added 1 cent to $4.79.

Among the top resource stocks, MIM Mining slipped 1 cent to $2.05 and WMC Mining lost 5 cents to $4.47.

#90121u0949 05/01/1990 ~United Press International

HO CHI MINH CITY, Vietnam (MAY 1) UPI - The long-suffering Vietnamese quietly celebrated May Day Tuesday, 15 years and a day after victory in war gave them a communist regime that promised more than it has delivered.

Still economically isolated by trade sanctions despite its claim to have ended an 11-year military occupation of neighboring Cambodia, Vietnam suffers grinding poverty.

Worried by the collapse of orthodox communist regimes in Eastern Europe, Vietnam's leaders have so far failed in their efforts to expand significantly the role of free enterprise.

The aging leadership of the nation's Communist Party evidently remains determined to oppose the multi-party democracy forced on East European communist governments.

The subdued mood of this May Day contrasts sharply with the joyous celebration I witnessed a decade and a half ago on May 1, 1975, in this city then named Saigon.

The South Vietnam government had surrendered unconditionally a day earlier just hours after the last of the official Americans had fled in helicopters to U.S. warships in the South China Sea.

To the victors, any success that could be dreamed seemed achievable, but hard times lay ahead for the hapless Vietnamese.

After some successful but limited reforms, the communist regime is still trying to get a handle on the problem of how to make communism work.

This city named for the revolutionary leader revered by the Vietnamese

celebrated this May Day quietly.

Le Cercle Sportif, the sports club built by the French and later frequented by Americans, was decked out festively. It is now called the Workers Club.

Inside the club, youngsters attended a concert. Outside, adults played some desultory tennis.

Tran The Huong, who teaches high school students English, was using the holiday to view at the club a display of weaponry left over from the war.

''English has become very popular,'' he said.

The government openly courts establishment of diplomatic relations with the United States, which so far has demonstrated little interest.

A former interpreter for U.S. forces during the war told me close ties with the Americans could help lift Vietnam out of poverty.

An unreconstructed anti-communist, he invited me to his home, a one-room shack in an alley where he lives with his wife and five children.

As we walked through the alley, my host pointed out various neighbors.

''That one there is a Charlie,'' he whispered, meaning a supporter of the government.

He also pointed to a few neighbors who, like himself, took a dim view of the government.

From a locked cabinet, my host carefully removed a sheaf of documents. He explained they comprised the paperwork aimed at eventually getting his family to the United States under what is called the orderly departure program.

After we went back to my hotel, he said, ''You have now seen my house. Now you know how poor I am. I hope you will not look down on me.''

In the GI English we used to communicate, I reassured him, saying approximately, ''No way.''

#90121u0964 05/01/1990 ~United Press International

(MAY 1) UPI - May Day, the international workers' holiday... is taking on a different look in 1990 than it had a year ago. Today in Moscow, the traditional parade in Red Square was organized for the first time by the

city council of trade unions.

In China, May Day was held with little public fanfare. The government asked to workers to help maintain what it called ''political and social stability.'' Most Chinese were off work for May Day, a national holiday.

The wife of former hostage Frank Reed arrived today in West Germany to meet her husband, who until yesterday was a prisoner in Lebanon for more than three years. Reed's wife and their nine-year-old son flew in from Massachusetts.

In Washington, former hostage Frank Polhill, who was released last week... met yesterday with President Bush and delivered a ''private message'' from his captors. The White House would NOT reveal its contents.

Panamanian President Endara begins a busy day in Washington today by having breakfast with Vice President Quayle. Endara also is to meet Congressional leaders and address the National Press Club.

Israeli Army Radio is reporting that 150 Jewish settlers have obeyed an order from Israel's High Court of Justice and left a building in Jerusalem's Christian Quarter. The Jewish residents were ordered out by noon today.

Salvadoran rebels will meet today in Mexico City with U-N representatives to present them with peace talk proposals aimed at ending the 10-year-old Salvadoran civil war. The conflict has claimed more than 72-thousand lives.

#90121u0981 05/01/1990 ~United Press International
(MAY 1) UPI - Police in New York say a gang of gun-toting youths wounded four people last night on a crowded Brooklyn street as they chased after a 12-year-old girl. Police say the gunmen escaped... but the girl apparently knew her attackers.

A federal official in Virginia Beach, Virginia, says mail bombs sent to the Christian Broadcasting Network last week and a Texas church in January are similar. The officials say there may be a link between the two incidents.

After months of controversy, Stanford University has turned over bones and artifacts of about 300 Indians from its museum to members of the Ohlone tribe for formal burial. University archaeologists found the relics at burial sites.

Honduras is yanking the welcome mat on the Contras. President Callejas says Honduras ''never again'' will allow the rebels on its territory.

Honduras also reportedly will NOT sign pacts allowing permanent U-S military bases.

One of Colombia's most powerful drug kingpins is denying reports that he ordered last week's assassination of a left-wing presidential candidate. Carlos Pizarro was gunned down aboard a commercial airline flight.

A National Research Council report says American universities are failing to provide adequate funds and administrative support for mathematics research. The report says the situation threatens U-S technological leadership.

Romanians may find democracy overwhelming. They'll have more than 76-hundred candidates from which to choose this month in their first democratic elections in 40 years. 73 parties exist, including one called the Party for Shy People.

-30- 1788

#90121u1013 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - Guillermo Endara, on his first trip to Washington as Panama's president, thanked the United States for his nation's freedom while the Senate was poised to respond by approving a Latin aid plan.

Endara, who met Monday with President Bush at the White House, was to confer Tuesday with Vice President Dan Quayle and House and Senate leaders address the National Press Club and visit the Organization of American States.

''Democracy is on the upsurge in the world. We must nourish it always and we must protect it day and night,'' said Endara after his talks with a sympathetic and supportive Bush.

The Senate took a big step late Monday night on the $2.3 billion emergency money bill - which includes $420 million for Panama and $300 million for Nicaragua - by approving two amendments that had threatened to kill, or at the very least, delay the legislation.

By voice vote, the Senate approved language to allow the District of Columbia to use its own funds for abortions and to allow the death penalty for drug murders in the nation's capital.

Approval of the amendments cleared major obstacles although some sensitive amendments were expected to be addressed prior to final passage. Senate Democratic leader George Mitchell said he hoped to finish the bill Tuesday.

The administration has threatened to veto the bill if the liberal abortion

language remained in the legislation after a final compromise is worked out by Senate and House negotiators. The House bill passed last month does not mention abortion.

In another development, the Senate rejected an effort to cut $30 million from the allocation for Panama and transfer the money to the Justice Department to investigate and prosecute fraud in the savings and loan scandal.

Bush initially proposed $500 million in aid for Panama in January, and in March he recommended Congress approve that amount plus another $300 million for Nicaragua. Both the House and Senate trimmed that figure to $720 million.

Endara, who arrived Sunday, is on his first visit to Washington since the Dec. 20 U.S. invasion of Panama that ousted Gen. Manuel Noriega from power and allowed him to take elected office.

The president used the occasion to once again call on Congress to approve the $720 million aid package for Panama and Nicaragua that he initially wanted on his desk for signature by April 5.

''It is embarrassing ... it is frustrating,'' Bush said of the delays caused by the House and Senate tacking onto the legislation hundreds of millions of dollars in unrelated domestic projects.

''The people of Panama can't hope to make the leap to liberty and prosperity with only half-hearted support from her neighbors to the north '' he said.

Assistant Secretary of State Bernard Aronson said Endara told Bush his government needs help not only to battle unemployment of 30 percent to 40 percent, but to instill political confidence ''that democracy in fact meant a better life for ordinary people.''

''The people of Panama will always be grateful for the support and friendship of the American people, and for the sunshine of freedom that we currently enjoy,'' Endara said.

Bush and Endara discuss the aid package during their two-hour talk, as well as emerging U.S-Panamanian relations.

Afterward, Bush announced four new accords with Panama, three involving joint drug-fighting efforts and one for the return of the Peace Corps to the Central American nation.

In addition, Bush announced he intends to nominate Gilberto Guardia Fabrega as the first Panamanian administrator of the Panama Canal

Commission. The United States is scheduled to turn over the canal to Panama in the year 2000.

#90121u1021 05/01/1990 ~United Press International

NIANTIC, CT (MAY 1) UPI - A fan obsessed with David Letterman has been sentenced to jail for breaking into the late-night television host's house for the sixth time, correction officials said Tuesday.

Margaret Ray, 38, of Paonia, Colo., was convicted Monday in Norwalk Superior Court by Judge Lawrence L. Hauser of criminal trespass. The judge sentenced her to a maximum of one year at the Connecticut Correctional Institution for women in Niantic.

Ray gained notoriety in May 1988 when she was caught driving Letterman's midnight-blue Porsche on the New Jersey side of the Lincoln Tunnel heading to New York City with her 3-year-old son.

Ray had told a toll collector she was Letterman's wife and introduced her son as David Letterman Jr.

Letterman, who was not married, had testified at her trial on the current charge that he never knew ''she was on this planet'' until the incidents began two years ago at his house in New Canaan, an affluent suburb not far from New York City.

The latest break-in took place March 19, just three days after Ray completed seven months of a nine-month sentence for breaking into Letterman's house last August. She also had been ordered out of his house by police the day before, authorities said.

In May 1989, Ray had received a one-year suspended sentence and three years probation after pleading guilty to two previous counts of criminal trespass and one count of using a motor vehicle without permission.

As a condition of probation, she was ordered to return to her home state of Colorado and continue psychiatric treatment.

Last August, however, Ray was ordered to spend nine months at the Niantic prison when she violated her parole by wandering around the tennis courts at Letterman's home.

In the 1988 incident where Ray took Letterman's car, police said she apparently had lived in Letterman's three-bedroom home for a couple of days while Letterman was out of town.

She was arrested three days after the Lincoln Tunnel incident when she

took a taxi to Letterman's home. When police arrived they found her eating canned pineapple and writing what she said were scripts for Letterman's television show.

She also was arrested twice in February 1989 in connection with break-ins at Letterman's home. In one of those episodes, police found Ray wearing Letterman's watch, which she said she was using to time herself while she cleaned his house.

Ray initially was ordered to undergo psychiatric treatment in September 1988.

#90121u1072 05/01/1990 ~United Press International
(MAY 1) UPI - Freed American hostage Frank Reed celebrated his arrival on West German soil today by dining on a medium-rare steak and a bottle of beer. Joining him were his wife and nine-year-old son, who arrived in Wiesbaden several hours after Reed completed his journey from Damascus. Despite significant weight loss, Reed appears in good spirits.

A published report in Iran quotes an Iranian government official as saying Tehran engaged in intensive talks with Reed's captors to gain his release yesterday. Reed, who was held hostage for 44 months, said his captivity was hard to endure because he had NO idea of whether he'd ever be released.

The Chinese government allowed Beijing's Tiananmen Square to remain open for today's May Day celebration. However, Chinese authorities have NOT announced if they'll keep the symbolic square open on Friday's 71st anniversary of the ''May Fourth Movement,'' a student-led nationalist protest movement in 1919.

A non-profit think tank says NASA should NOT be responsible for selecting the best way to explore the moon and Mars. The George C. Marshall Institute recommended yesterday that a national panel should replace NASA in the decision-making process since the space agency is one of several competitors flaoting ideas for the exploration.

The House Democratic leadership is confident that it has enough support to push through its one-point-two-TRILLION-dollar 1991 budget. The entire lower chamber is scheduled to consider the proposal this morning. House leaders appear to have won the support of conseravtive party members despite sharply lower defense spending.

#90121u1080 05/01/1990 ~United Press International
MIAMI (MAY 1) UPI - A wildfire apparently started by lightning scorched

5,000 acres of sawgrass in the Florida Everglades and firefighters tried to halt it Tuesday by dropping water from helicopters and setting backfires.

The fire began Monday and quickly spread through the drought-stricken area. Fueled by high winds, it covered 2,000 acres inside Everglades National Park and 3,000 acres outside the park Tuesday.

The fire outside the park just west of Miami was contained but still burning and the flames inside the park were advancing at the rate of about 1 mph, firefighters said. That was slow enough for wildlife to flee in front of it, they said.

''That doesn't traditionally cause any trapping threat for animals,'' said Charles Maynard, a spokesman for the state Divison of Forestry.

About three dozen firefighters from the National Park Service and the forstry division battled the fire with four helicopters and several all-terrain vehicles.

''They're using the helicopters to drop water on it. They have all-terrain vehicles that carry water and they're using those to press the sawgrass down and soak it,'' Maynard said.

''They're also using backfires to burn out the natural fuel and control it. In that area, they try to do as much as possible to avoid disturbing the soil with heavy equipment such as bulldozers.''

There were no reports of injuries or danger to structures and the park remained open to visitors Tuesday.

A 20-month drought had left the region tinder-dry, increasing the threat that naturally occurring fires could burn out of control, firefighters said. The fire was the largest so far this year.

(MAY 1) UPI - A small army of New York police is scouring a Brooklyn neighborhood for a gunman who shot and critically wounded a police officer early this morning. The N-Y-P-D is using helicopters and bloodhounds to aid in the search for the assailant. The officer, a 17-year veteran, and his partner stopped the gunman for allegedly being involved with a car-stripping circle.

A New Jersey judge is scheduled to sentence convicted killer John Emil List today. List, who was found guilty April 12th of killing his wife, three teen-age children and elderly mother, faces a maximum sentence of

five consecutive life prison terms. List evaded authorities for nearly 18 years.

The State Department says terrorist activity declined slightly last year. In a report to Congress yesterday, the State Department listed 528 international terrorist attacks around the world in 1989, a decrease of 38 percent from 1988 when 856 such attacks took place. The report also revealed there's been a reduction in terrorist involvement by nations such as Syria, Iran and Libya.

El Salvador's leftist rebels say they are NOT opposed to a possible cease-fire as long as the Salvadoran government guarantees democracy through ''political agreements.'' The F-M-L-N rebels say they will reveal proposals to the United Nations today for peace talks tentatively scheduled for this month.

A study of the graduation rates in the New York City public schools reveals that one of every five students of Italian descent drops out of city schools. Several Italian-American professionals say partial blame for the high drop out rate stems from stereotypes of Italians as bigoted buffoons by popular culture.

#90121u1130 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - The U.S. manufacturing economy showed renewed strength in April, ending an 11-month decline, the National Association of Purchasing Management reported Tuesday. The Purchasing Managers' Index rose to 50.2 percent in April, up from 48.8 percent in March.

A reading below 50 generally indicates the manufacturing segment of the economy is experiencing a decline in growth. A reading above 50 usually indicates that the manufacturing portion of the economy is expanding.

"The 50.2 percent signaled an expansion in the manufacturing economy, ending a string of 11 consecutive months of decline which slowed the entire economy," said Robert J. Bretz, chairman of the group of purchasing executives and director of materials management at Pitney Bowes Inc. The Index last dropped below a reading of 50 in May 1989, when it stood at 49.8 percent.

"The rebound should be sufficient to sustain solid production growth for several months and buoy the entire economy over the balance of the second quarter," Bretz added.

Making a major contribution to the overall index was the New Orders Index which rose to 60.5 percent in April, a full point higher than in March and the highest reading since September 1989. The report is based on data

compiled from purchasing executives at more than 300 corporations.

"Clearly, the improvement came as the result of a significant increase in New Orders, particularly the continued strong performance in New Export Orders," Bretz said.

The New Orders index rose for the third consecutive monthly increase to 55.5 percent from 50.4 percent in March. It was the highest increase reported since February 1989's 56.9 percent.

The New Export Orders index rose for the 28th consecutive month. The number of members reporting export activities also increased in April to 74 percent, up from 71 percent in February and March.

The Imports Index stood at 50.5 percent, unchanged from March. The index has remained at the same level in the first four months of the year. "This apparent stabilization in growth of imports coupled with the increasing growth in exports bodes well for a continued decline in the U.S. trade deficit," the association said.

The Production Index continued to show strength with a reading of 53 percent in April, although it was down from 54.4 percent in March. Supplier deliveries were faster for the 12th consecutive month, at 47.6 percent up from 45.8 percent in March, and the highest reading since June 1989.

Inventories continued to decline for the 17th consecutive month, with a reading of 41.6 percent in April, unchanged from March. The Price Index rose to 50.8 percent, up a full two points from March's 48.2 percent. The Employment Index declined in April for the 14th consecutive month at 45.1 percent, down from 45.2 percent.

The average lead time for capital expenditures in April was 145 days, down slightly from March's 147 days. The average lead time for maintenance, repair and operating supplies in April was 22 days, down from 26 days, the average in the previous three months.

#90121u1135 05/01/1990 ~United Press International

DAYTON, OH (MAY 1) UPI - The General Motors Corp. board of directors will be asked to double the pension for retiring Chairman Roger Smith, whose company lost 11 percent in market share during his leadership, it was reported Tuesday.

The Dayton Daily News, in a copyright article, said the new plan would increase Smith's pension from $550,000 to $1.1 million a year.

The company's board of directors said the retirement plan for top GM executives is noncompetitive and shortchanges them.

Union officials at GM plants in the Dayton area greeted the bid for higher executive pensions cooly and said it may complicate upcoming negotiations between the United Auto Workers union and the Big Three carmakers.

The current executive retirement plan for Smith, who will step down July 31, bases his pension on his salary. The company's proxy statement, which recently went out to GM shareholders, said the revised plan compute pensions by combining salaries, bonuses and stock awards.

Proxies list issues on which shareholders vote. Results of the vote will be announced at GM's annual meeting May 25 in Detroit.

''The (current) retirement benefits are extremely uncompetitive,'' company spokesman Terrence Sullivan said, explaining the company needs higher executive pensions to attract and retain top-level managers.

The proxy says GM's board of directors studied other companies' retirement plans and requested the increase for GM officers after finding their current pensions ranked in the bottom 21 percent.

Sullivan said he did not know which companies the directors surveyed.

The plan for a hefty pension boost got little sympathy from UAW spokesman Frank Joyce.

''We've said it before and we'll say it again. All of the Big Three need to be restraining already excessive executive compensation instead of trying to keep up with the Joneses,'' he said.

Joe Hasenjager, president of UAW Local 696, encouraged shareholders to vote against the issue, saying, ''I don't think anyone is worth $1.1 million for retirement.''

''I don't feel Roger Smith has done any favors for GM,'' said Mike Fisher, president of Local 755 of the International Union of Electronic Workers. ''I voted against it.''

Since Smith took over in 1981, GM's U.S. market share has dropped 11 points to 34.7 percent last year.

But the company had a profitable year in 1989 because of earnings from its overseas operations and domestic non-automotive businesses, and Smith received $2.5 million in salary and stock awards.

The compensation angered GM workers who had received $50 under GM's

profit-sharing plan.

#90121u1149 05/01/1990 ~United Press International
DETROIT (MAY 1) UPI - Chrysler Corp. posted Tuesday first quarter earnings of $71 million, or 32 cents a share, down 79.8 percent from a year before as sharply lower production rates and a doubling of costly buyer incentives sapped profits.

The latest figures for the nation's third-largest automaker compared with a net income of $351 million or $1.50 a share earned during the first quarter of 1989.

Chrysler's net sales during the quarter ended March 31 were $6.5 billion, down 24.8 percent from $8.6 billion a year before. Its cash and marketable securities as of March 31 declined to $1.86 billion, as against $2.01 billion at the end of the 1989 first quarter.

Despite the sharply lower earnings, company Chairman Lee Iacocca said the latest results are a substantial improvement from the fourth quarter of 1989, when Chrysler lost $664 million - its first loss since 1982.

''We posted a profit in our automotive operations, despite lower volumes and incentive costs nearly double what they were a year ago,'' said Iacocca, who skipped his usual quarterly press conference at the company's Highland Park headquarters.

During the quarter, Chrysler pumped up first-quarter U.S. car and truck sales through aggressive rebate programs, including lucrative $1,000 rebates on its popular minivan models during January.

But its total North American retail car and truck sales during the period fell 23.7 percent to 443,987 vehicles, as against 581,768 units sold in the year ago quarter.

Unlike other automakers, Chrysler has virtually no overseas business to cushion the heavy buyer incentive costs in its North American operations, although during the quarter it formed a joint venture with Steyr-Daimler-Puch to build minivans in Austria starting early next year.

Chrysler Financial Corp. (CFC) reported record first-quarter earnings of $89 million, up 37 percent from the $65 million earned by the financing and leasing subsidiary in the year-ago quarter.

During the quarter, Chrysler also repurchased about 1.4 million shares of its common stock, nearing its goal of reducing the number of outstanding shares to 200 million. Chrysler currently has about 221.4 million common

shares outstanding.

Industry leader General Motors Corp. and second-ranked Ford Motor Co. are expected to report sharply lower first-quarter earnings this week, also because of substantial production cuts and heavy buyer discounts during the period.

#90121u1214 05/01/1990 ~United Press International

MOUNT CLEMENS, MI (MAY 1) UPI - A jury awarded $150,000 to a police dispatcher for years of sexual harassment by a sergeant who repeatedly unhooked her brassiere and once pulled down her blouse so a photographer could take a picture of her breast.

Sydney Brauer, 38, of Bruce Township, said the harassment by Sgt. Robert White began in 1981 with unwanted neck massages, which escalated into tickling and repeated unhooking of her bra.

White once pulled down her blouse and bra so another officer could photograph her exposed breast, Brauer testified during a month-long trial.

On Monday, the Macomb County Circuit Court jury awarded Brauer $90,000 from White for harassment and intentional infliction of emotional distress $30,000 from the village of Romeo for not stopping it and $30,000 from retired Chief Paul Uerling for retaliating against Brauer when she filed the 1987 complaint by criticizing her work.

The jury also awarded $11,000 to Anne Graber, 25, a former dispatcher who also accused White of sexual harassment.

According to court documents, all of the incidents involving Brauer took place at police headquarters in Romeo, a northern Macomb County village of 3,400 people.

White, a 23-year veteran of the force, still works for the Romeo Police Department, as do Brauer and officer Douglas Wills, who testified that White intentionally exposed Brauer's breast. Uerling retired last month.

Brauer, a 17-year veteran of the Romeo force, said she never considered quitting.

''I didn't do anything wrong,'' Brauer said. ''But I was trying to change things since 1981 when it (the harassment) started.''

Charles Gerlach, Brauer's lawyer, said working with White was ''like the Chinese water torture. One drop a day, day after day after day.''

Brauer testified that White unhooked her bra six to eight times through her clothing, between 1981-84.

White testified he got the idea from an episode of the television program ''Happy Days'' in which the character Fonzi showed Ritchie he could unhook brassieres. White said it was a joke between him and Brauer and that she challenged him to do it.

Defense attorney Mary Cauley said White ''admitted it was a childish prank but stopped doing it when it became an old joke.'' Cauley described the alleged incidents as ''good-spirited horseplay'' between Brauer and White.

But Gerlach said the incidents were no joke to Brauer. ''This was not a challenge. Mrs. Brauer didn't want it. She didn't invite it,'' he said.

Gerlach said the ''physical'' sexual harassment continued for three years and stopped only after Brauer announced she was pregnant with her second child. He said White then began making crude remarks about Brauer's weight gain and eating habits and berated her for being a working mother.

#90121u1239 05/01/1990 ~United Press International

NEW DELHI, INDIA (MAY 1) UPI - The office of the dalai lama and the self-proclaimed Tibetan government in exile derided China's decision to lift martial law in Lhasa Tuesday as a public relations ploy and urged Beijing to open negotiations on the status of their homeland.

The Assembly of Tibetan Peoples Deputies charged Beijing's move was forced by widespread condemnation of its ''deplorable'' human rights record and the efforts of the dalai lama, the temporal and spiritual leader of the world's 6 million Tibetans, to win international recognition for the Tibetan issue.

''By their announcement, the Chinese are trying to divert international attention from the gross violations of human rights in Tibet,'' said the assembly is a statement issued from its headquarters in the Himalayan foothills town of Dharmsala.

''We would like to state categorically that mere announcement of the lifting of martial law will not satisfy the Tibetan people, who have been making unequivocal demand for complete independence,'' the statement said.

The assembly is the self-proclaimed Tibetan government in exile, but is not recognized by any country. Its base in Dharmsala also serves as the home of the dalai lama, who has lived in India since fleeing his homeland with tens of thousands of followers in 1959 after a failed uprising against Chinese rule.

The dalai lama, winner of the 1989 Nobel Peace Prize, has stopped short of endorsing demands for complete independence of Tibet, contending that such a stand would eliminate any chance of negotiating with Beijing.

He is currently promoting a proposal under which Tibet would receive autonomy in all areas, save for defense and foreign policy.

Beijing announced on Monday it would lift on Tuesday martial law slapped on Lhasa on March 8, 1989, after several days of rioting by Tibetans demanding independence from Beijing.

In its second statement on the issue in as many days, the dalai lama's New Delhi office said only ''a fundamental change in the attitude of the Chinese leadership'' could lead to a resolution of the Tibet issue.

The statement from the office and that from the assembly both called on Beijing to accept the dalai lama's proposal for negotiations at any location of its choosing on the status of Tibet, which China claims as part of its territory, a contention rejected by Tibetans.

''If the Chinese leadership is sincere in its desire to resolve the Tibetan issue, they must respond positively to his holiness' proposal for negotiations,'' the office statement said.

''While we welcome the decision of the Chinese government to lift the martial law in Tibet, which we had repeatedly asked for ever since it was imposed in March last year, we cannot help but see it as more of a public relations exercise in view of the growing international criticism,'' said the statement.

''Two days before the announcement, a massive public trial was held in Lhasa. According to a Radio Lhasa broadcast, 43 Tibetans were publicly tried and sentenced for vague criminal charges which can be tried in the normal court of law,'' it continued.

It said Chinese authorities warned during the trial that ''if anyone continues to indulge in criminal activity, stern action will be taken.''

''This was done to intimidate the Tibetan people before the lifting of martial law,'' contended the statement. ''It is, however, impossible to find a solution to the Tibetan problem through intimidation and superficial changes.''

The assembly statement called on Beijing to abandon its ''repressive policies'' and lift other restrictions on Tibet, including permitting entry to foreign reporters and human rights groups.

(MAY 1) UPI - Former hostage Frank Reed was reunited with his family today in West Germany... less than 24 hours after his release from captivity in Lebanon. A spokesman for the medical team examining Reed at a U-S military hospital in Wiesbaden says Reed is- quoting here- ''weak and tired from his ordeal.'' But he was NOT too tired to enjoy a beer and a medium-rare steak.

Kremlin watchers in Moscow saw a new face at today's annual May Day parade. Soviet President Gorbachev and other Politburo members watched the parade from atop the Lenin Mausoleum along with newly chosen liberal Moscow Mayor Gabrill Popov. The annual parade of more than 100-thousand people offered official union leaders the chance to express concerns about

planned economic reform.

In Nicaragua, hundreds of Sandinista workers spent the weekend preparing signs and banners for May Day demonstrations to protest the new government's economic recovery plan. The Sandinista government stepped aside last Wednesday after its February 25th election defeat. Thousands of Sandinistas planned to gather for a march expected to be led by former President Daniel Ortega.

A 17-year New York police veteran is in critical condition after being shot in the head early this morning. Authorities say the 43-year-old officer... whose identity is being withheld... was shot as he pulled over a suspect in an auto-stripping operation in Brooklyn. Police say the alleged gunman was arrested less than four hours later at his father's home in Brooklyn.

#90121u1281 05/01/1990 ~United Press International

KATMANDU, NEPAL (MAY 1) UPI - King Birendra met with Nepal's new prime minister to discuss the creation of a constitution Tuesday as workers celebrated May Day for the first time in the Himalayan kingdom.

Prime Minister Krishna Prasad Bhattarai also took the day to move his few worldly goods - some books, clothes and an umbrella - from his nephew's damp apartment, where he had been staying, to his luxurious official residence.

''We discussed various issues including the formation of a constitution drafting committee,'' Bhattarai said after his meeting with Birendra, who conceded to the formation of a new multi-party government following weeks of violent pro-democracy demonstrations.

''No concrete decisions were reached,'' Bhattarai said.

Bhattarai, 65, a bachelor known for his austerity, had spent over 10 years in prison under Birendra and Birendra's father, King Mahendra, for his outspoken criticism of absolute monarchies. His Nepali Congress Party joined with a coalition of seven communist parties to form the new government earlier this month - Nepal's first multi-party government in 29 years.

Despite Birendra's capitulation to democratic reform, unruly demonstrations have continued to plague the impoverished kingdom.

Calm returned Tuesday to Pokhara, a town 110 miles west of Katmandu, after daylong violence between pro-democracy demonstrators and supporters of the fallen partyless system left two people dead, officials said.

''Pokhara is calm today,'' said Home Minister Yog Prasad Upadhaya after returning to Katmandu from a visit to the town. He said the town's chief police official had been replaced because of the unrest.

Guards at the police official's home had shot at a crowd of pro-democracy demonstrators Monday when they gathered outside to demand the arrest of arsonists who set fire to a government building. Two were killed and a third critically injured in the incident.

Katmandu remained under a curfew for the ninth day Tuesday but state radio said it would be eased considerably, taking effect only between the hours of 9 p.m. and dawn.

The curfew was imposed in an effort to halt escalating violence between democracy demonstrators and police. Police officials and representatives of the political parties discussed the formation of vigilante groups to patrol the capital when the curfew is abolished, spokesmen said.

More than 15,000 people attended a May Day rally in the capital, the first legal celebration of the international communist labor holiday in Nepal.

Minister of Forestry Jalnath Khanal, a communist member of the interim government, told the crowd that ''reactionary forces'' were attempting to destroy the kingdom's new multi-party government.

''Reactionary forces are still active. They have a wide network and they are conspiring to overthrow the multi-party government,'' Khanal said in his address to the rally.

#90121u1303 05/01/1990 ~United Press International

HOLLYWOOD (MAY 1) UPI - It took five weeks, but "Pretty Woman" finally flipped "Teenage Mutant Ninja Turtles" on its back in the weekly box-office race.

"Pretty Woman," starring Richard Gere as a bigshot businessman and Julia Roberts as a fetching Hollywood streetwalker with a heart, was No. 1 for the week with a gross of $7.1 million on 1,710 screens.

In six weeks the romantic comedy based very loosely on Bernard Shaw's "Pygmalion" has succeeded mostly by word-of-mouth to pile up a surprising $81.3 million.

"Teenage Mutant Ninja Turtles" plopped down into second place for the first time since its release five weeks ago. The violent turtle terrors reaped $6.9 million last week in 2,377 theaters for a five-week total of

$98 million, assuring it a $100 million gross next week and a place in turtle heaven.

Four newcomers barely kept the box-office boom rolling. None promised to be a major financial bonanza. According to tabulations by Entertainment Data Inc., the best of the lot was "The Guardian," a William Friedkin-directed occult tale starring Jenny Seagrove as a betwitching Druid who kidnaps infants for nefarious blood rites. "The Guardian," No. 3 sopped up $5.5 million in 1,684 situations in its debut week.

Following "The Guardian" in fourth position was "Spaced Invaders," a whacko comedy involving a bunch of Gomer Pyle-type Martians who attack planet Earth on hearing a contemporary radio re-broadcast of Orson Welles' 1938 "The War of the Worlds." In its first week, "Spaced Invaders" collected $4.4 million on 1,821 screens.

No. 5 was "The Hunt for Red October" with $2.9 million and a spiffy $99 million nine-week tally. The other two newcomers, "Q&A" and "Wild Orchid," were sixth and seventh in the rankings.

"Q&A" stars Nick Nolte as a legendary New York cop and Timothy Hutton as an idealistic district attorney in a confrontation over the issue of justifiable homicide. It grossed $2.8 million in 913 houses.

"Wild Orchid" presents Mickey Rourke at his greasy worst playing a mysterious billionaire who seduces a young and beautiful attorney (played by Carre Otis) in a mindless script set in romantic Rio. It took down $2.6 million on 819 screens.

Daily Variety reported the domestic box office for April measured 45 percent more than a year ago. But last week's receipts were off from the equivalent week in April of 1989. Last week North America's 23,000 theaters took in $72.3 million compared with $75.2 in 1989. To date this year's grosses are $1.3 billion versus $1.2 billion in record-setting 1989.

The top ten, last week's gross, total gross, weeks in release:

1. "Pretty Woman," $7.1 million, $81.3 million, 6 weeks.
2. "Teenage Mutant Ninja Turtles," $6.9 million, $98 million, 5 weeks.
3. "The Guardian," $5.5 million, 1 week.
4. "Spaced Invaders," $4.4 million, 1 week.
5. "The Hunt for Red October," $2.9 million, $99 million, 9 weeks.
6. "Q&A," $2.8 million, 1 week.
7. "Wild Orchid, $2.6 million, 1 week.
8. "Driving Miss Daisy," $1.6 million, $96.1 million, 20 weeks.
9. "Miami Blues," $1.46 million, $5.4 million, 2 weeks.
10. "Crazy People," $1.42 million, $9.9 million, 3 weeks.

#90121u1307 05/01/1990 ~United Press International

HOUSTON (MAY 1) UPI - Two groups who have not been paid dividends on their Texas Air Corp. preferred stock for 18 months may force the financially troubled airline holding company to let them elect additional members to the board of directors.

In a filing Monday with the Securities and Exchange Commission, the New York-based securities firm PaineWebber Inc. said it would seek to elect two new members to the Texas Air board.

PaineWebber owns 1.79 million shares, or 29.8 percent, of Texas Air's preferred shares - called the 6.75 percent cumulative convertible junior preferred stock - said Robert Berson, PaineWebber's senior vice president and general counsel.

Because shareholders have not received 42-cent-a-share dividends for six straight quarters on the stock series, they have the right under company bylaws to elect two additional directors, Berson said.

Last week, another investor group led by Mark Schwarzman of Greenwich, Conn., said it also may seek to put its own representative on the board. Schwarzman's group holds 6.8 percent of the same class of stock.

Two other classes of Texas Air preferred shareholders also have not received quarterly dividends. Together, they also have the right to elect two additional directors. The new directors would sit on Texas Air's board until all back dividends are paid off, the preferred shareholders said.

Texas Air has been unable to pay dividends because of the heavy debt load it carries, primarily as a result of Eastern Airlines' bankruptcy. A recent SEC filing revealed that, at the end of last year, Texas Air was saddled with $1.78 billion of long-term debt, and some of its debt repayment plans stipulated the airline make no dividend payments to preferred shareholders.

It was not clear what effect the election of four additional directors would have on the balance of power on Texas Air's board, which now has 11 members. It appeared unlikely that Chairman Frank Lorenzo, who owns a commanding share of the company's stock, would lose control of the company.

When adding seats to the board, Texas Air management would nominate its own slate of directors. To propose their own slate of candidates, the preferred shareholders must gain approval from 20 percent of the members in their class.

Texas Air spokesman Art Kent said the company will issue its slate of

directors by May 7, the mailing deadline for proxy statements to be sent to shareholders. The company's annual meeting is set for June 6.

Thomas Longman, an airline analyst with Bear Stearns & Co. of New York, said the election of new members could alter the dynamics of Texas Air's board, especially if the four are outsiders. "If they're not management's nominees, it's possible, sure," Longman said. "No question four members would have more impact."

#90121u1319 05/01/1990 ~United Press International

PITTSBURGH (MAY 1) UPI - Financier Carl Icahn claims shareholders have the power to raise the value of their holdings in USX Corp. by 40 percent by voting to split the oil and steel conglomerate, an analysis the company warned was flawed and posed a serious threat to the value of USX stock.

Icahn and USX placed opposing advertisements Tuesday in the Wall Street Journal in a continuing attempt to gain shareholder support before the May 7 annual meeting in Findlay, Ohio, and a vote on Icahn's proposal to incorporate separately the United States Steel division.

"The more things change, the more they stay the same. Sad but true. It's in your power to change it," said Icahn's investor group, the USX Shareholders Advisory Committee, in its fourth ad geared to shareholders which also appeared in the Pittsburgh Post-Gazette.

Icahn, with 13.3 percent of USX stock, is the company's largest shareholder. His proposal to make USX two distinct companies - Marathon Oil Co. and U.S. Steel - will be presented to stockholders in a non-binding resolution.

Using numbers adjusted for the 3-for-2 stock split on June 1, 1976, Icahn's advertisement claimed that on April 26, 1965, the price of what was then U.S. Steel on the New York Stock Exchange was 36 1/4.

On that same date this year, the closing price of a USX share was $34, despite the acquisition of Marathon in 1982 and the recent completion of the best year in the company's history in terms of operating income, the ad said.

"As separately traded companies, we believe U.S. Steel would be worth $9 per share and Marathon would be valued at $39 per share," the investor group reiterated. "The combined value of these shares would thus be approximately $48 per share, representing a premium of 40 percent over the current price of USX and total additional shareholder value approximating $3 billion."

But the company again warned stockholders that Icahn's analysis is flawed and his proposal "represents a serious threat to the value of your investment in USX."

"Icahn is trying to tell you that your USX investment hasn't paid off. You know better than that," the company ad said. Icahn has failed to note that since the firm's reorganization in 1986, USX has outperformed the top 500 companies as rated by Standard & Poors "by approximately 92 percent to 50 percent, as measured by capital appreciation and reinvestment of dividends paid," USX said.

NEW YORK (MAY 1) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 147.00 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.45-$4.60 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $123.00-124.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $474.00-$476.00; dealer-approx., $468.00-$472.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $103.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $107.17 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 301.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and

imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 83.00-83.75 c-lb.

WASHINGTON (MAY 1) UPI - Spending on new construction projects fell 1.4 percent in March to $432.5 billion after scoring strong increases during the unseasonably warm months of January and February, the government said Tuesday.

The weak showing, which was in the range predicted by private analysts, is the worst since a decrease of 1.5 percent in February 1989.

''The January and February numbers were temporarily stimulated by the good weather,'' said David Seiders, an economist at the National Association of Home Builders in Washington. ''Now we're going to be seeing a fairly pronounced weakness over the next couple of quarters.''

According to revised estimates released by the Commerce Department, construction spending stood at $438.6 billion in February and $425 billion in January, increases of 3.2 percent and 2.4 percent over previous months.

''Some kind of correction was called for in March,'' said David Wyss, an economist at the consulting firm DRI/McGraw Hill in Lexington, Mass. ''But the correction was kind of on the low side. We're still up for the year.''

Construction spending on residential buildings, which includes houses as well as apartments, increased 1.8 percent in March to $203.2 billion, the department's Census Bureau said in a monthly report.

Economists attributed the advance to work on existing structures.

''There are a lot of additions, alterations and repairs, especially after the California earthquake and Hurricane Hugo,'' Wyss said.

But construction spending on non-residential buildings fell 4.7 percent in March to $101.1 billion, led by a decline in the industrial, office and commercial projects, the government said.

Spending on churches and private schools held steady, while motels, hotels and hospitals reported slight increases.

Overall private spending stood at $341.7 billion in March, down 0.4 percent from February.

Public construction spending totaled $90.7 billion in March, a decline of 4.8 percent, with marked decreases in the categories of highways and streets, public schools, sewer systems and conservation projects, the Commerce Department said.

Construction spending on public housing and water supply facilities increased during the month.

All the numbers were adjusted to account for seasonal factors such as the weather and calculated at an annual rate.

Not accounting for inflation, March construction spending in stood at $358.6 billion in 1982 dollars.

MONTREAL (MAY 1) UPI - The president of the National Bank of Canada said he expects Robert Campeau to regain control of the troubled real estate and retailing empire he founded 40 years ago.

But Andre Berard, in an interview published in the Financial Post Tuesday, said if Campeau fails to keep the terms of the deal announced last week, "we're back to square one."

The deal could result in Campeau regaining majority control of the business he founded with a cousin 40 years ago in Ottawa. His personal stake fell to less than 20 percent earlier this year but if the National Bank deal succeeds, Campeau would control 50.9 percent of the company's shares fully diluted.

Last Thursday, the National Bank said it struck a near $70 million deal with Robert Campeau to clear a loan default that resulted in the bank seizing 29 percent of Campeau Corp.'s common shares.

The agreement concerned a reported $128 million loan, currently in default to one of Campeau's personal companies and the Campeau Corp. securities pledged as collateral.

Campeau agreed last week to pay the bank $34 million by May 31 and another $34 million plus interest by Jan. 31, 1992 with interest accumulating from May 31.

In early January, the bank seized control of 13.03 million Campeau Corp. common shares and $51.3 million principal amount of 7-1/2 percent convertible debentures that were secured against the defaulted loan.

Campeau's stock price, which dropped from a high of $18.91 in September, 1989 to a recent low of 72 cents, closed up 15 cents at $1.51 on the Toronto Stock Exchange Monday.

Campeau's U.S. subsidiary, Federated Stores Inc. filed for Chapter 11 bankruptcy protection on March 30, about 2 1/2 months after Federated Department Stores Inc. and Allied Stores Corp. filed for similar protection.

#90121u1409 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The administration, arguing that two proposals to revamp the federal crop insurance system would be costly and inadequate urged a House panel Tuesday to look at a bill to set up a disaster safety net.

The bill is similar to the approach suggested by the White House. However, it would use different ''trigger'' points to determine when aid would be available and it would cover more counties.

''We believe this bill would provide an adequate safety net of coverage for all farmers in America,'' Deputy Agriculture Undersectary Jonathon Kislak told a House Agriculture subcommittee.

Despite opposition among farm-state congressmen to the White House proposal to abolish the money-losing insurance system, the subcommittee has been unable to agree on a replacement. Its members have offered four different bills, ranging from privatization to a federal guarantee of a basic level of coverage.

Rep. Steve Gunderson, R-Wis., said he filed the disaster payment bill after concluding ''I don't see how we can provide a viable (insurance) program for everyone'' with the amount of money - $800 million - likely to be available.

Gunderson's bill would provide payments when countywide crop losses exceed 30 percent and a farmer loses at least 40 percent. Payments also would be available in adjoining counties.

The administration has proposed different trigger levels and would not cover adjacent counties. Critics call the plan skimpy and ill-suited to losses that vary farmer to farmer.

Kislak said a privatization bill sponsored by Rep. Fred Grandy, R-Iowa, and a plan by Rep. Larry Combest, R-Texas, to offer more inducements to farmers to buy insurance were likely to drive up costs to about $850 million a year but would not encourage more farmers to buy insurance.

Without higher participation rates, Congress would be more likely to approve special disaster programs - a duplication of services that the White House says the government cannot afford. It has been spending an average of $1.5 billion a year on crop insurance and diaster aid.

The General Accounting Office said a bill sponsored by panel Chairman Glenn English, D-Okla., would meet four of the eight criteria the GAO used in assessing the various plans. English's bill would give farmers automatic coverage for 35 percent of their usual yields, a provision GAO said could discourage farmers from taking steps to prevent losses.

The GAO said Grandy's bill also failed that test. It would give farmers vouchers to pay part of their insurance bill.

The American Farm Bureau said it supports the Grandy bill as ''the absolute best shot'' at making crop insurance work.

Four insurance industry trade groups also announced support for the Grandy bill. They said it would bring full-scale reform to the system and would require rates to be actuarially sound.

The National Farmers Union said English's bill was the best and said Grandy's would lead to higher premiums for farmers. Kislak said premiums could go up 12 percent under that bill.

#90121u1410 05/01/1990 ~United Press International

JEFFERSON CITY, MO (MAY 1) UPI - A prison inmate condemned to die for stabbing a guard dead while serving a life sentence for another murder calmly sat in an isolation cell Tuesday awaiting word from the Supreme Court on a request for a stay of execution.

Bobby Lewis Shaw, 38, was scheduled to receive a lethal injection at 12:01 a.m. Wednesday at Potosi Correctional Center for the 1979 killing of a jailer in another Missouri prison.

Shaw, who has an IQ of 73 and may have suffered brain damage when hit by a brick as a child, had been in prison that year for the slaying of a man in St. Louis in 1975.

The condemned man and his lawyers were waiting Tuesday for word on an appeal for a stay of execution that was pending in the U.S. Supreme Court.

If executed, Shaw would be the 124th inmate executed in the United States since the Supreme Court lifted its ban on capital punishment in 1976 and the third in Missouri since that state restored its death penalty in 1977.

Meanwhile in Florida, lawyers for a man condemned to die for the 1976 murder of two police officers at a south Florida highway rest stop fought to block their client's scheduled Wednesday execution. Attorneys for Jessie Tafero, 43, prepared to argue before a federal judge for a stay of execution. Tafero was scheduled to die at 7 a.m. Wednesday in the Florida electric chair.

Shaw was being held at Potosi in an isolation cell. Dale Riley, assistant director of the Missouri Division of Corrections, said Shaw appeared to have slept well Monday evening and did not seem distressed.

''He's not a very talkative individual,'' Riley said. ''He hasn't had any visitors, and he has not chosen any witnesses to his execution.''

Shaw ate a breakfast of hot cakes, cereal, milk and coffee, Riley said. The condemned man also surprised prison officials with his special request for the traditional last meal served to a person facing execution.

''He made one of the more unusual requests we've received,'' Riley said. ''He asked for eight White Castle hamburgers with onion rings, French fries and a 2-liter bottle of Pepsi.''

Riley said a member of the prison staff would be dispatched to St. Louis to obtain the food from a White Castle restaurant in that city. The meal was to be served to Shaw at about 6 p.m.

Corrections officers transferred Shaw from death row on Monday to an isolation cell directly across the corridor from the execution chamber at the maximum-security prison.

The doomed convict has been on death row since Dec. 1, 1980, after a jury gave him the death sentence for the fatal stabbing in 1979 of Walter Farrow, a guard at the Missouri State Penitentiary. Another prison guard was seriously injured in the attack and required a year to recover from wounds.

At the time Farrow was murdered, Shaw was serving a life sentence for the 1975 murder of Calvin Morris in St. Louis.

Defense attorneys have been unsuccessful in helping Shaw with appeals heard by state and federal courts for almost a decade. Many of the appeals centered on his mental condition.

Shaw has an IQ of 73. Psychiatrists have testified he may have suffered brain damage when he was 9 years old and was struck on the head with a brick.

He is one of 10 children in a family that moved to St. Louis from Hayti, Mo., when he was 10.

#90121u1420 05/01/1990 ~United Press International

GENEVA, SWITZERLAND (MAY 1) UPI - OPEC oil ministers, meeting in a quick emergency session, intend to boost sagging world crude prices by "voluntary" restraints on widespread production cheating in the 13-member cartel, high-ranking officials said Tuesday.

OPEC secretary general Subroto of Indonesia confirmed that the first half output ceiling of 22 million barrels daily would remain unchanged for now. "We will look at the current market demand and price situation and see what can be done to improve prices," Subroto told reporters.

"The first-half ceiling will not be altered and a ceiling for the second half will be discussed in June" at the regularly scheduled June 25 meeting Subroto told reporters.

Algerian oil minister Sadek Boussena, the current OPEC president, convened the emergency talks, which officially open Wednesday, and proposed restraints on output cheating in May and June as a means of giving prices a fast boost.

The 22 million-barrel ceiling was set in November by the Organization of Petroleum Exporting Countries for the first six months of 1990. OPEC pumps more than a third of the world's oil and attempts to control world prices by limiting its output.

But Kuwait and the United Arab Emirates, with excess production capacity, have flagrantly violated their assigned quotas. Saudi Arabia has raised its daily output by about 600,000 barrels over its 5.4 million-barrel quotas in order to maintain its 24.5 percent share of cartel output.

These violations have played a major role in the recent plunge in oil prices, which saw crude lose 14 percent of its value in the early part of April. Combined OPEC production currently is running around 23 million barrels a day or about one million barrels above the official 22-million-barrel ceiling.

Output reached a peak of about 24 million barrels a day nearly a month ago but industry sources said this has fallen almost one million barrels as a result of buyer resistance in the face of the glut of world crude that has

developed.

"We are here to find a solution to the glut, so there will have to be a cut in production, particularly by those who are exceeding their quotas," said Iraqi minister Abdel Raheem Al-Chalabion as he entered the conference hotel.

Gulf sources recently told United Press International that Saudi Arabia and Kuwait tentatively agreed to cut their output by 600,000 and 200,000 barrels, respectively, if the UAE would match the Kuwaiti reduction. The focus may therefore be on the UAE at the Geneva meeting.

OPEC officials said they thought the emergency session would last two days although various delegates said haggling over who should cut by how much could take anywhere from one to three, or even four days. "It depends on the amount of argument and if it gets nasty," one said.

The OPEC target price of $18 a barrel - based on the average price of a "basket" of seven crude oils of low to top quality - plunged as a result to less than $15 and is currently just above the $16-a-barrel level.

Iranian oil minister Gholamreza Aghazadeh blamed overproduction by "certain members" for low prices and he specifically accused Kuwait and Saudi Arabia. Venezuela is producing only slightly above quota while some members, and especially Nigeria, are unable even to pump as much as officially permitted.

OPEC members hope that the current glut, following a warm winter in Europe will soon be mopped up because of greater Western Hemisphere use of automobiles in the summer and stockpiling for next winter. Ministers were meeting at the Hotel Intercontinental and were under strict Swiss police protection.

Officially, the session involved the eight-member Market Monitoring Committee comprising the ministers of Algeria, Indonesia, Iran, Iraq, Kuwait, Nigeria, Saudi Arabia and Venezuela.

Ministers of the other five members also flew to Geneva, however, so that the meeting could be turned into the full ministerial council required to take important decisions. The other five OPEC members are Ecuador, Gabon, Libya, Qatar and the United Arab Emirates.

Ministers said little or nothing as they arrived to settle into top-floor suites and engage in private contacts ahead of the full meeting Wednesday. "No declaration and no comments," Venezuelan oil minister Celestino Armas told reporters. "First I have to conduct some consultations."

CAPE CANAVERAL, FL (MAY 1) UPI - The shuttle Columbia's upcoming night launch on a Spacelab astronomy mission likely will slip a day to May 17, sources said Tuesday, with no word on whether one of the ship's crew members will be grounded because of medical problems.

Columbia and a seven-member crew - a post-Challenger record - are tentatively scheduled to take off at 12:45 a.m. EDT May 17 to kick off a long-awaited flight to study high-energy astronomical targets in an ongoing U.S. drive to explore the universe from space.

The third post-Challenger night shuttle launch had been planned for May 16 but sources said Tuesday that NASA managers have tentatively pushed the 36th shuttle flight back one day because of a tight around-the-clock processing schedule and a desire to give the launch team a day off.

Flight processing has been proceeding smoothly, but contamination in a launch pad liquid hydrogen rocket fuel line could delay the launch another two to five days if the propellant line has to be replaced. The issue was unresolved Tuesday.

Also up in the air was the status of civilian astronomer Samuel Durrance, 46, who was named to Columbia's crew in 1984. Shuttle program chief Robert Crippen announced last week that Durrance had developed an unspecified ''medical condition'' that could force NASA to bar him from the mission.

Durrance's backup, astronomer Kenneth Nordsieck, replaced his colleague Saturday during a critical dress-rehearsal countdown at the launch pad, fueling speculation that Durrance would be bumped from the flight after more than six years of training.

But William Lenoir, NASA's associate administrator for space flight, strongly hinted Sunday that Durrance may get to fly after all.

''We think that's working itself out so there will be no need to change the primary payload specialist, who's had a questionable medical condition '' Lenoir said at a news conference after the shuttle Discovery's California landing.

''We believe ... there will be no need to make a crew change. If there is, we have a backup who is also ready.''

Durrance's crewmates for the mission are commander Vance Brand, 59, co-pilot Guy Gardner, 42, John ''Mike'' Lounge, 43, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomer Ronald Parise, 38.

Parise and Durrance are the first non-astronauts assigned to a shuttle flight since New Hampshire schoolteacher Christa McAuliffe and satellite engineer Gregory Jarvis blasted off on the ill-fated shuttle Challenger's final voyage.

The last time an astronaut was bumped from a flight so close to launch came in 1970 when Ken Mattingly was taken off the crew of the Apollo 13 moon mission after he was exposed to German measles.

Columbia's seven-member crew is scheduled to work in two shifts around the clock throughout the upcoming mission to operate a battery of telescopes in the shuttle's cargo bay that were built to study ultraviolet and X-ray radiation from deep space targets that is blocked by Earth's atmosphere.

The mission officially is scheduled to last nine days, although NASA officials have said the flight would be extended an extra day if conditions permit.

Data from Columbia's mission will complement that from the Hubble Space Telescope launched last week by Discovery, which is designed to study the universe in visible light.

Other NASA satellites scheduled for launch this decade include large gamma ray, X-ray and infrared telescopes.

#90121u1467 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - The mystery of ''Caroline?'' proved more popular than the fall of Jim and Tammy Faye, ''America's Funniest Home Videos'' was the most-watched show of the week, ''and NBC remained the top network, it was reported Tuesday.

''Caroline?'', a Hallmark Hall of Fame presentation that was the CBS Sunday movie, was the fourth-ranked show of the week in the Nielsen ratings, while NBC's Sunday movie, ''Fall From Grace'' about the Bakkers, tied for 8th place with NBC's ''Wings,'' the most-watched of the new spring shows.

The ABC Sunday movie, ''Summer Dreams: The Beach Boys,'' came in 48th.

Fox proved again it had a pair of hits in ''The Simpsons,'' in 13th place, right behind ABC's ''Tim Conway's Funny America,'' which had the big

advantage of following ''Home Videos,'' the No. 1 show. Fox's ''Married...With Children,'' which follows ''The Simpsons,'' was 18th.

Among the new spring shows, ''Wings'' was tops, holding on well to the audience from its lead-in, ''Cheers,'' the No. 2 show of the week.

The next batch of new shows in the ratings were all NBC - ''Carol & Company'' tied for 23rd, not too far down from its lead-in, ''Golden Girls '' which was in 17th. ''Down Home,'' while follows ''Carol,'' was in 43th place.

''The Marshall Chronicles'' (ABC), was in 44th, followed by the slipping ''Twin Peaks'' in 45th place, down from 28th the previous week.

Other new spring shows: ''Sidney'' (CBS) in a special Monday showing after ''Major Dad'' was 49th, but in its regular time period tied for 79th with its schedule-mate, ''Normal Life.''

''Shannon's Deal'' (NBC) was 52nd; ''Equal Justice'' (ABC), tied for 53rd; ''Bagdad Cafe'' (CBS), 56th; ''His & Hers'' (CBS) tied for 57th; ''Sugar & Spice'' (CBS) and ''Capital News'' (ABC), tied for 64th; ''A Family For Joe'' (NBC), tied for 66th; ''Working Girls'' (NBC), 75th; ''In Living Color'' (Fox), 82nd and ''Sunset Beat'' (ABC), 85th.

NBC was the most-watched network on Tuesday, Wednesday, Thursday and Saturday, while CBS took Monday and Sunday and ABC had Friday.

NBC won the week ending April 29 with a 12.9 rating and a 23 share. ABC came in second with an 11.4 rating and a 20 share, while CBS had an 11.1 rating and a 19 share.

The official 30-week prime time season ended Sunday, April 15, but working on a 52-week season, as of the week ending April 29 NBC has a year-to-date rating of 14.4 and a 24 share. ABC is second with a 12.8 rating and a 21 share and CBS third, with a 12.0 and a 20 share.

In the evening news race, ABC's ''World News Tonight'' with Peter Jennings continued to dominate with a 9.5 rating and a 21 share. ''CBS Evening News'' with Dan Rather stayed in second place with an 8.4 rating and a 19 share, while ''NBC Nightly News'' with Tom Brokaw was third with a 7.8 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 regular series for the week ending Sunday, April 29, according to the A.C. Nielsen Co., were:

1. America's Funniest Home Videos (ABC)

2. Cheers (NBC)

3. A Different World (NBC)

4. Caroline?, CBS Sunday movie

5. The Cosby Show (NBC)

6. (tie) 60 Minutes (CBS)

7. Roseanne (ABC)

8. (tie) Wings (NBC)

9. Fall From Grace, NBC Sunday movie

10. Unsolved Mysteries (NBC)

#90121u1470 05/01/1990 ~United Press International
WASHINGTON (MAY 1) UPI - A scientific survey has found a strong link between Agent Orange exposure and eight health problems, and the government should compensate Vietnam veterans suffering from such disorders, veterans' groups said Tuesday.

In the latest round of a 15-year controversy surrounding health effects of the wartime herbicide, the American Legion, Vietnam Veterans of America and the National Veterans Legal Services Project convened a panel of seven scientists to review all existing data concerning exposure to dioxin, a poisonous contaminant in Agent Orange.

The review found ''clear-cut evidence'' that Agent Orange is linked to the rare cancers non-Hodgkin's lymphoma and soft tissue sarcoma, as well as a skin disorder, symptomless liver damage and a metabolism abnormality, said panel member Dr. Samuel Epstein.

Although evidence was not found to be as convincing for three other health problems - Hodgkin's disease, nerve damage and birth defects - the report said they would still meet the Department of Veterans Affairs' standards for disability compensation.

''The evidence is inescapable using the VA's own strict and tightly constructed standards,'' said Epstein. The professor of environmental medicine at the University of Illinois in Chicago called past VA efforts to review the health hazards of Agent Orange ''flawed in the extreme,''

noting his panel's review included about 150 studies not examined by the VA.

''Strong evidence on Agent Orange exists. It has existed for a long period of time. Vietnam veterans have waited too long. It's now time for them to be compensated,'' said Sen. Tom Daschel, D-S.D., who along with other members of the Vietnam Veterans Caucus held a news conference outside the Capitol to release the report.

Agent Orange was sprayed from 1965 to 1970 in Vietnam to destroy enemy crops and ground cover. About 36,000 Vietnam veterans have filed claims contending they were medically disabled by Agent Orange.

''We are hopeful that Secretary Derwinski will accept the findings of the independent scientific task force and authorize disability compensiation for each of the eight health effects,'' said Mary Stout, president of Vietnam Veterans of America.

VA spokesman Bonner Day said the agency ''has not had a chance to evaluate'' the veterans' study, and noted an independent advisory panel is supposed to make its recommendations on the health risks of Agent Orange to the VA by the end of May.

In March, VA Secretary Edward Derwinski directed his agency to pay more than $20 million a year to about 1,600 Vietnam veterans stricken by non-Hodgkin's lymphoma. The action was spurred by a study from the federal Centers for Disease Control that showed the risk of the rare cancer was 50 percent greater among Vietnam veterans than among veterans who served elsewhere. However, that study did not directly point to Agent Orange or any other factor as causing the increased cancer risk.

Daschel said he did not know the exact number of veterans afflicted with the eight diseases singled out in the new report, or how much it would cost the VA to compensate them.

The House and Senate are both considering legislation to reimburse veterans with Agent Orange-related health problems - the House plan is expected to cost about $89 million annually and the Senate plan would cost about $36 million per year.

Rep. James Bilbray, D-Nev., said he thinks the reason the VA has failed to find any association between serious health problems in Vietnam veterans and Agent Orange ''is they don't want to pay money for a cure and to take care of these people.''

Neither the CDC study nor the review commissioned by the veterans' has been published in a scientific journal. Epstein said six of the seven members on his panel worked for free, and American Legion officials

estimate the total cost of the study was no more than $10,000.

#90121u1472 05/01/1990 ~United Press International

MANAGUA, NICARAGUA (MAY 1) UPI - Workers from the Rio Grande to the Panama Canal planned Labor Day parades Tuesday, highlighted by political tension in Nicaragua and protests against austerity programs in other countries with eroded buying power.

The new government of Nicaraguan President Violeta Chamorro, which assumed office last Thursday, faced an onslaught of protesting workers from her own coalition and the opposition Sandinistas.

Hundreds of Sandinista workers spent the weekend preparing signs and banners for demonstrations to protest the new government's economic recovery plan and the failure of the Contra rebels to disarm.

Thousands of Sandinistas, mostly bureaucrats and employees of government-run industries, planned to gather at two points in central Managua for a march expected to be led by Sandinista leaders, including former President Daniel Ortega.

Workers aligned with Chamorro's 14-party coalition, the National Opposition Union, planned their own march in another part of the capital.

In El Salvador, union organizers predicted a large turnout for the May Day march despite lingering tensions from a state of siege imposed during a major rebel offensive last November.

The last restriction under the siege, which banned all public gatherings, was lifted in mid-April.

A military spokesman said authorities would stay away from the march ''as long as it remains peaceful, without disturbing public order or damaging public or private property.''

Salvadoran labor leader Humberto Centeno said Monday that marchers will demand that President Alfredo Cristiani hold serious peace talks with El Salvador's leftist rebels and will protest Cristiani's economic program.

Criticism of the program, which cuts government subsidies, removes price controls and aims to privatize the banking system and other state-run industries, has dropped slightly since Cristiani announced a 22 percent minimum wage increase last month.

''Our goal is to bring out 100,000 people,'' said Centeno. ''We believe this march will be the biggest in five years.''

In Mexico City, tens of thousands of workers were scheduled to march to Constitution Square and gather in front of the National Palace at a meeting traditionally attended by the president and labor leaders.

Mexican workers are unhappy with a purchasing power that has declined by 50 percent in the past eight years.

Parade promoters on Mexico's northern border predicted there would be no repeat of previous years' violence and no blocking of international bridges into the United States during Labor Day celebrations.

Workers from Panama's three major unions also planned marches in the first show of strength since the Dec. 20 U.S. invasion by a labor movement hit by economic problems and perceived government hostility.

More than four months after the invasion that ousted military strongman Manuel Antonio Noriega, unemployment is at least 20 percent and a number of businesses looted during the invasion remain closed.

Hector Aleman, secretary general of Panama's National Federation of Public Employees, said the labor movement also feels threatened by government plans to privatize state-run companies and revise the labor code.

Mauro Murillo, secretary general of the National Panamanian Workers Union, said the government ''criticizes the workers. They accuse us of being Noriega supporters and want to reduce the force of the unions.''

#90121u1480 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - Legislation requiring the Federal Aviation Administration to inspect aging commercial aircraft could make the federal government liable for air disasters, an FAA official told a House panel Tuesday.

FAA associate administrator Anthony Broderick told the aviation subcommitee of Public Works and Transportation that the proposal ''would represent a fundamental change in the way FAA works to ensure aviation safety. The FAA's longstanding role has been one of regulation.''

The subcommittee is considering legislation by its chairman, Rep. James Oberstar, D-Minn., that would require the FAA to conduct detailed inspections of aircraft during the last year of their ''economic design life.'' Planes would need an FAA certificate of airworthiness to continue in service.

Oberstar said the legislation is a result of hearings and studies

conducted on the nation's aging airline fleets after a 1988 accident in which the top of an Aloha Airline Boeing 737 fusilage blew away at 24,000 feet, sweeping a flight attendant to her death. Metal fatigue of the 19-year-old jet was found to be a cause of the incident.

Broderick said he was concerned the legislation ''would substitute the FAA's own safety inspection of an aircraft for an air carrier's inspection ... thus shifting responsibility from the airline to the FAA, probably even so far as to make the U.S. government liable for tort damages.''

But Oberstar said he saw no new government liability under the proposal.

''I think you've got a lawyer advising you with an overactive mind,'' he told Broderick.

The FAA official also argued the agency would have to hire ''hundreds'' of additional inspectors and in the first year alone would have to inspect more than 1,000 aircraft at a cost of millions of dollars to both the government and the airline industry.

Since the Aloha incident, the FAA has tightened its regulations on inspections by the air carriers and has set requirements for the replacement of critical airplane parts at specific times ''in lieu of mandating more and more inspections,'' Broderick said.

''I feel strongly that the agency's aging aircraft program represents the best thinking and cooperative effort of government and industry,'' Broderick said.

But without inspections, Oberstar said, the data and calculations used by the FAA to determine the mandatory retirement time of most airplane parts are unreliable for predicting the normal life of an aircraft's basic structure because of stress and corrosion factors.

''The hull exoperience and working life is very different from other parts of an aircraft,'' Oberstar said.

#90121u1489 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - Sid Caesar and Imogene Coca have reunited for their first ever New York club engagement to mark the 40th anniversary of ''Your Show of Shows.''

Playing an open-end date at popular Michael's Pub, the comedy team are packing them in nightly with a reprise of some of their celebrated television skits plus some new material. The audience seems to be nicely balanced between old fans and new converts who were too young to have seen

Caesar and Coco on NBC show that made if fun to stay at home on Saturday nights from 1950 to 1954.

Caesar, 67, and Coca, 81, have made a few appearances together since ''Our Show of Shows'' but this is their first sustained attempt at a comeback and it's titled ''Together Again.''

In recent decades, Coca has been active in television and on the stage, as has Caesar. He had signal success with an off-Broadway revue last season but it failed to attract an audience when it moved to Broadway.

Since then, Caesar has put together 65 helf-hour shows from more than 450 hours of ''Our Show of Shows'' material that are currently being shown on MTV's HA! channel. This offers another chance to get acquainted with Caesar & Coco's brand of humor, distanced by the television screen and the passage of time.

But a visit to Michael's Pub provides the opportunity of seeing two of the most perfectly matched comics of the century working their chemistry in the flesh, a little older but no less funny for that. Although much of the material dates from an era when sex, politics and religion were verboten as comedy subjects on television, most of it doesn't seem dated.

That's because the humor of Caesar & Coca is deeply rooted in the human condition and does not depend on current events or topical causes. It is concentrated on the never-ending battle of individuals to keep in check primal animal instincts when they threaten the conventions of civilized behavior.

The fun is in seeing them react, more through gesture and facial and body language than by dialogue, to the triumph of instinct over mere manners - or vice versa. Caesar is still best as everyman put-upon by life's outrageous realities and Coca as the wispy lady who turns into a tigress when she gets her dander up, which is often.

When they meet on the pub's tiny stage, shared with pianist Elliot Finkel, they take a little time in recognizing one another, then cover over their embarrassment with a mutual exclamation, ''Isn't it a small world!''

Caesar gets the gig off to a fast start with his hilarious impersonation of a bridegroom walking down the aisle and pondering basic truths about marriage, such as ''At least I won't have to drive her home every night.'' Then he takes us through one of his famous mime routines, ''Man Getting Up in the Morning,'' which says a lot about shaving and why such unsophisticated pantomime has pretty much followed vaudeville into oblivion.

Coca joins Caesar for a argument to the music of Beethoven's Fifth

Symphony, a truly inspired example of master miming, followed by another Caesar solo, ''Mumbler,'' about one of those people who wander around the city talking to themselves about the high cost of living or whatever. Coca then does a solo turn as Miss Jet Lag, a coy stripper in a cashmere sports coat.

Other skits, some of which include longtime Caesar collaborator Lee Delano are ''At the Movies,'' a popcorn triangle with surprise ending, and ''The Professor,'' with Caesar as the multi-tongued Prof. Ludwig von Knowitall. These are the best of the lot and would have the audience rolling in the aisles if space at Michael's Pub permitted.

Coca is adorable in ''May Walk,'' but this is an essentially corny solo that has not weathered well. Dressed in lace and carrying a be-ribboned shepherdess staff, she seems to have missed out on a man in spite of considerable seductive effort. ''Did the May Walk walk away from me?,'' she sings plaintively.

They conclude the show with ''The Best of Times,'' which contrasts the ''now'' with the ''was,'' which in the case of Caesar and Coca is a subtle blending of the present and the past, forever funny and always welcome.

#90121u1499 05/01/1990 ~United Press International

MCKENZIE, TN (MAY 1) UPI - The McKenzie Banner is looking for part-time and full-time scum busters.

A help wanted advertisement in the West Tennessee weekly newspaper is urging readers to turn in drug dealing ''scums'' by writing the names of drug suspects on a coupon and mailing it to the district attorney's office.

The strongly worded appeal is a public service ad by the newspaper and is proving to be successful, according to Banner managing editor and ad originator Joel Washburn.

But the ads are in bad taste journalistically and may be illegal, according to the American Civil Liberties Union.

''It was an idea that I came up with after reading about a similar incident in another part of the country. I had several comments after it was published,'' Washburn said. ''There's only been praise from the general public.''

According to Washburn, the ad reads: ''Valuable Coupon. Turn in a Drug Dealer! Rid Your Community of Unwanted Lesions. This Coupon Allows You To Report the Scums Who Are Ruining Your Community.''

The ad instructs the reader to write the name of a drug suspect on the clip-out coupon along with a license plate number and suspicious activity and mail it to the District Attorney's Drug Task Force in Huntingdon.

''The DA's office won't comment on the number of leads they've got but they say the ad has been beneficial and they even offered to pay for the ad,'' Washburn said. ''But we're continuing to offer it as a public service.''

Washburn said the district attorney's drug task force is always looking for help in breaking up drug operations. He believes the ads will help out a new team of drug-sniffing dogs the county recently acquired.

The ad will also start appearing in the neighboring weekly newspapers The Carroll Leader and The Dresden Enterprise.

Washburn does not see anything wrong with the ads legally or ethically. He said he chose hardhitting words like ''scums'' and ''lesions'' to catch readers' attention.

''This gives them a way to turn in people anonymously without getting traced,'' Washburn said.

He said he will continue to run the ads as long as they are effective.

But the American Civil Liberties Union is concerned that the ads are sending out the wrong message.

George Brenkert, of the Tennessee ACLU, said the ads are journalistically suspect and could raise constitutional questions if authorities actually use them to launch investigations.

''Obviously there's a real problem here by pitting citizen against citizen '' Brenkert said. ''I'm sure the ACLU would be opposed ... by an attempt of the newspaper to deputize the general public to turn in citizens.

Brenkert said the ads are an attempt by the paper to pump up sales which ''raises questions of journalistic ethics.''

But he said there could be serious legal problems if residents are questioned or arrested based on newspaper ads.

''If the search and seizure is going to take place on the basis or rumor and innuendo, then there are some constitutional problems there,'' Brenkert said.

#90121u1514 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The Food and Drug Administration Tuesday approved treating chicken and other poultry with radiation to control microbes that can cause food poisoning.

FDA officials emphasized that the irradiation process does not pose a health threat to consumers because it does not make the poultry radioactive.

In a notice to be published Wednesday in the Federal Register, the FDA said it has determined that the use of gamma radiation, electron radiation and X-ray to treat chicken, turkey and other fresh or frozen, uncooked poultry is safe at the levels being approved.

FDA scientists described the process as the first approved method of ''pasteurizing'' solid foods. As in the heat-pasteurization of milk, the irradiation process greatly reduces but does not eliminate all harmful bacteria. That means irradiated poultry would be safe longer than untreated poultry but would still require refrigeration, just as pasteurized milk does.

The Department of Agriculture, which is responsible for inspecting meat and poultry products, and Radiation Technology Inc. of Rockaway, N.J., had both sought approval for irradiation.

The move marks the first use of radiation aimed at controlling bacteria in food that cause illness in humans, the FDA said. Irradiation has previously been authorized to control pests, spoilage, parasites in grain, fruit and pork.

Although there are no exact figures of food poisoning cases, FDA experts have estimated that almost every American suffers a food-borne illness in the span of a year or two. Such episodes can range from a simple stomach ache to debilitating illnesses that occasionally may result in death.

In the United States, from 1973 to 1987 poultry accounted for 9.6 percent of the food-borne illness outbreaks reported to the federal Centers for Disease Control.

Irradiation could be used to control such food-borne microbes as Salmonella, Yersinia and Campylobacter, which are common in poultry and can make humans sick when poultry is not thorougly cooked or when it contaminates other foods.

The FDA said its decision was based on studies that included several in which diets containing irradiated poultry were fed to test animals. The agency said such studies showed the treatment to be effective and the treated foods to be safe.

Irradiation could be used to preserve food since the early 1920s. Research has shown that while irradiation does not make foods radioactive or unsafe it does cause minor changes like those caused by canning, cooking or freezing, which may affect the flavor and texture of foods.

Treated foods must have labeling that states they were treated with radiation and carry an international logo symbolizing the process. Food irradiation has been used for various purposes in Japan, China, the Soviet Union, the Netherlands and France.

#90121u1526 05/01/1990 ~United Press International

(MAY 1) UPI - Just Freed U-S hostage Frank Reed is in Wiesbaden, West Germany, where he ate a steak-and-beer breakfast and saw his family for the first time after 44 months in the hands of Lebanese kidnappers. A U-S military hospital spokesman says Reed ''lost significant weight and muscle mass from a lack of exercise and a marginal diet.'' The 57-year-old school director was reunited with his Syrian-born wife and their nine-year-old son at the hospital.

Soviet President Gorbachev received a less than warm welcome today at a May Day parade in Moscow's Red Square. Gorbachev and other Soviet leaders were booed by marchers shouting ''shame'' and ''resign'' at the end of the procession. More than 100-thousand people participated in the parade dominated this year by workers' fears of economic reforms. They waved banners calling for protection from a market economy.

Panama's recently installed president meets in Washington with Vice President Quayle today while the Senate stands ready to respond by approving aid to Central America. President Guillermo Endara met with President Bush yesterday.... and the Senate last night approved two amendments that threatened to kill a two-BILLION-dollar emergency spending bill. Those amendments were obstacles to passage of the bill that includes financial aid for Panama and Nicaragua.

Jewish settlers say they have moved out of a house owned by the Greek Orthodox Church, but the Panamanian firm which bought the lease to the house in the Christian Quarter now controls the building. Most of the 150 Jewish settlers left during the last few days. A court hearing is scheduled tomorrow on whether the Panamanian firm has the legal right to occupy the building.

#90121u1530 05/01/1990 ~United Press International

HOUSTON (MAY 1) UPI - Superconductivity expert Paul Chu and his team of

University of Houston researchers have taken a major step toward applying the technology to industrial uses, a newspaper reported Tuesday.

University officials apparently will make an announcement of the advance within a few weeks, after information on it is published in a scientific journal.

Chu confirmed researchers at the Texas Center for Superconductivity have made ''a great advancement'' in the application of superconductivity, but he would not reveal details, The Houston Post reported.

''It's a processing to make the material in a useable form, still using a large (electrical) current,'' Chu said of the development. ''I think that's all I can say now.''

Superconductivity is the ability of a material to conduct electricity without resistance when chilled to a very low temperature.

Superconductivity research has helped fuel speculation about a futuristic world of resistance-free electrical movement in which commuters could ride to work on ''flying'' trains, computers could compute at the speed of light and rockets could be shot into space from ''electromagnetic launchers'' without burning fuel.

In February 1989 a Texas Center for Superconductivity research team announced it had transmitted four times the previous record level of electrical current through rod-shaped samples of an yttrium-barium-copper oxide superconductor and under a magnetic field.

At the time, Chu, director of the center, said, ''The next obstacle is to make the material into wire form for practical applications.'' Such an achievement would allow it to be used in motors, generators, magnets or power transmissions, he said.

Asked Monday if researchers had achieved superconductivity in wire form, Chu responded, ''It's along that line, but not exactly.''

Because it involves ''a large current application, in that sense, it's a very important advancement. A step forward,'' he said.

''It certainly has not solved all the problems yet, but it's getting close ... We have no doubt what we are seeing. It's real,'' Chu said.

The advance is not as big as when Chu's team achieved superconductivity at minus 234 degrees Fahrenheit two years ago, he said. That achievement brought worldwide acclaim to Chu and his research team.

''This (latest) advancement has nothing to do with temperature advancement

'' he said. ''But from an industrial standpoint, this is very significant.''

The advancement is important enough, however, that the White House staff and presumably President Bush have been informed of it, University of Houston officials said.

#90121u1539 05/01/1990 ~United Press International

ELIZABETH, NJ (MAY 1) UPI - John Emil List, who said he killed his wife, teenage children and mother in 1971 to keep them close to God, was sentenced Tuesday to a maximum of five consecutive life prison terms for the slayings.

The sentence means the quiet, 64-year-old accountant would not be eligible for parole for nearly 75 years.

List, a devout Lutheran who vanished after the killings and eluded authorities for more than 17 years, chatted with his lawyer before the sentencing hearing, appearing more animated and relaxed than he did during his trial.

He was convicted April 12 on five counts of murder after jurors rejected claims he was driven by a religious obsession and legally incapable of premeditation.

''I wish to inform the court that I remain truly sorry for the tragedy that happened in 1971,'' List said in his first public statement since his arrest last year.

''I feel that due to my mental state at the time I was unaccountable for what happened,'' he added. ''I ask all those who were affected by this for their forgiveness, their understanding and their prayers.''

Superior Court Judge William L'E. Wertheimer called List ''a man without honor'' and said his name ''will be eternally synonymous with concepts of selfishness, horror and evil.''

''Because of him, one must always feel that any person can do anything to any other person, no matter how horrendous or vile,'' Wertheimer said. ''It has been brought to this court's attention that an entire generation of children grew up throughout the area fearing that some day, somehow, some way, their father, their protector and provider might mindlessly murder them.''

Spectators in the crowded courtroom, many of them young people who were children at the time of the murders, clapped as Wertheimer finished his statement.

List's sentencing was determined by the criminal code in force on Nov. 9, 1971, when List shot his family and disappeared, leaving their bodies in his Victorian mansion in Westfield for the police to find a month later.

At the time, New Jersey had no death penalty law, and judges had far more discretion at sentencing than they do now.

List, who has been held in isolation in the Union County Jail, where he spends his time reading his Bible and books on Civil War history, will be transferred to a New Jersey state prison when space is available. A spokesman for the Department of Corrections said List's age and physical condition - he is a diabetic - do not require special treatment.

Assistant Prosecutor Eleanor Clark asked for the maximum sentence, while List's lawyer, public defender Elijah Miller Jr., asked for a single life sentence, arguing the slayings were a ''single act.''

''It's not going to be the assistant prosecutor, it's not going to be the Union County prosecutor's office that's going to decide which life is more valuable,'' Clark said. ''Sometimes to be merciful to the cruel is to be cruel to the good.''

Police found the bodies of List's wife and three teenage children laid out in the ballroom of the family's heavily mortgaged home. List, who stopped the mail and told his children's schools the family would be out of town, left behind letters to relatives and his pastor admitting the killings.

Before the bodies were found, List was in Denver, where he applied for a Social Security card under the name Robert P. Clark.

List was arrested June 1, 1989, in Richmond, Va., where he was working as an accountant. He had moved there the year before with his new wife, Delores, a woman he met through a Lutheran singles group in Denver who knew him only as Clark.

FBI agents acted on a tip called in to the Fox Network's ''America's Most Wanted'' television program, which aired a re-enactment of the slayings and used a sculpture showing how List may have aged while on the run.

Since his arrest, List has been incarcerated in the Union County Jail, where he spends his time reading books about the Civil War and the Bible. He has been visited only by Lutheran pastors.

List continued to deny his identity until Miller filed a motion to suppress a five-page confession he left for his pastor in 1971. The lawyer argued that the letter was covered by the priest-penitent relationship, but Wertheimer allowed it into evidence.

In the letter, List said he killed his children, Patricia, 16, John Frederick, 15, and Frederick, 13, to save them from poverty and to keep them from turning away from the Lutheran church. He also told the Rev. Eugene Rehwinkel that his wife, Helen, 46, had stopped going to church and that his mother, Alma, 84, would not want to survive the family.

BEIRUT (MAY 1) UPI - A delegate of the International Committee of the Red Cross who had been trying to win the release of two Swiss workers kidnapped six months ago returned home Tuesday, saying she was ''very disappointed'' at having failed.

Meanwhile, hours after the release of U.S. hostage Frank Reed, Iran said it would suspend its mediation efforts to free all foreign hostages held in Lebanon until Western nations responded with a gesture of good will.

''We are very disappointed but we will keep on working,'' said Marjolane Martin, the ICRC Press Attache, before returning to Switzerland.

Martin said she hoped for ''a very quick release'' of Elio Erriquez and Emmanuel Christen, who were abducted Oct. 6 near the Palestinian refugee camp of Ein El Hilweh on the outskirts of the port city of Sidon, 24 miles south of Beirut.

The ICRC envoy held a series of meetings and talks with Lebanese militia groups and Palestinian factions in Sidon during her six-day mission.

There was no claim of responsibility for the abduction. But the shanty town near which Christen, 32, and Erriquez, 23, were snatched is controlled by various guerrilla factions. Analysts believe they are being held by Abu Nidal's terrorist Fatah Revolutionary Council.

''There has been appeals and nothing came out of these calls,'' Martin said. ''There is no new information.''

Libyan leader Col. Moammar Gadhafi recently called on the captors of all 16 Western hostages held in Lebanon to free them on the occasion of the three-day Moslem feast of Al Fitr which ended Sunday.

Hopes to free the two Swiss were high last week but rivalries among competing groups in the Sidon region delayed their expected release.

In Tehran, the English-language newspaper Tehran Times said Iran will not resume its mediation to secure the release of the Western hostages believed held by pro-Iranian Moslem extremists unless it received an ''adequate response from the Western states.''

Iran's delegate at the United Nations Kamal Kharazi said Monday that his country's efforts to ''close the hostages file'' depend on the willingness of the United States and Great Britain to exert pressures on Israel to free hundreds of Arab prisoners.

#90121u1608 05/01/1990 ~United Press International

PALMER, AK (MAY 1) UPI - A strong earthquake Tuesday shook a broad area of southern coastal Alaska, but the quake was centered deep below the surface and caused no damage or injuries, the Alaska Tsunami Warning Center reported.

The quake measured 6.4 magnitude on the Richter scale and hit at 8:12 a.m. Alaska Time (12:12 p.m. EDT) with an epicenter 10 miles south of the town of King Salmon, 300 miles southwest of Anchorage, said Wayne Jorgensen of

the warning center.

Widely separated towns, hundreds of miles apart, reported feeling the quake, said Bill Zitek of the earthquake station in Palmer north of Anchorage.

The tremor originated at a fault known as the Aleutian Megathrust 132 miles beneath the Earth, Zitek said. He said the depth of the quake helped prevent damage that a quake of that magnitude is capable of causing. He said the depth of the quake also spread the energy over a broad area, causing distant towns to feel it.

The earthquake was felt as far away as Valdez, 400 miles from the epicenter, Zitek said, and jolts hit Anchorage, Kodiak, Seward and a list of other towns.

But almost above the epicenter in King Salmon, there was little effect. Nothing fell off shelves at a local supermarket and a clerk said she didn't even know there was a quake - except someone who felt the temblor in Kodiak 175 miles away called to check on King Salmon.

''We felt very moderate effects,'' said Lt. Col. Tom Beil at the King Salmon Air Force base. ''There was some swaying of window blinds. But a lot of folks here were not aware that an earthquake had occurred. From a common sense point of view, it didn't correlate with what we know the magnitude to be and where the epicenter was.''

State transportation department worker Erin Hunt in King Salmon said, ''Air hoses that were hanging up were swinging.''

''To me it was scary,'' said Sherry Liimatta, a school employee in Naknek, about 25 miles from the epicenter. ''The floors moved and shook.''

#90121u1617 05/01/1990 ~United Press International

LONDON (MAY 1) UPI - Prices ended sharply higher Tuesday in moderate trading on the London International stock exchange.

The blue-chip Financial Times 100-stock index, which slipped 3.2 points Monday, closed up 14.5 points at 2,117.9. The narrower top 30 industrial average gained 9.9 points to 1,663.5.

Volume amounted to around 370 million shares, up from 327 million traded Monday.

Analysts said stocks continued their technical rebound from Monday's lows, pulled higher in part by a stronger British pound, which rose against the

U.S. dollar to $1.6392 from $1.6375 on Monday, and shaking off worries about inflation, company profits and pressures on the ruling Conservative government.

Among the most widely traded issues, Imperial Chemical Industries, which climbed 34 cents Monday on better-than-expected first-quarter earnings, added another 13 cents to $17.40.

Analysts noted ICI, considered a barometer of British industry, also was rumored to be planning to sell its interest in Enterprise Oil, which jumped 26 cents to $9.14 on the speculation.

The chemical distribution company Ellis and Everard fell 26 cents to $2.88 after announcing a $29 billion rights issue to finance U.S. acquisitions.

Adverse comment on Monday's announcement of a rights issue by Allied Irish Banks undermined its shares, which fell 12 cents to $3.66 and which prompted a drop of 16 cents to $3.64 for Bank of Ireland.

Among the day's other highlights, Fairline Boat surged 88 cents to $12.72 and British Aerospace fell 16 cents to $8.22.

Elsewhere in Europe, most financial markets, government offices, banks and businesses were closed for the May Day holiday. Trading will resume Wednesday.

#90121u1624 05/01/1990 ~United Press International

MANILA (MAY 1) UPI - Communist guerrillas tossed a grenade at a truckload of soldiers Tuesday but the device hit a wall, bounced back on the rebels and killed two of them, the military said.

The report said the incident occurred at the town of Santa Maria just north of Manila while the military truck was at a gasoline station.

The grenade guerrillas of the communist-led New People's Army hurled at the soldiers struck a 10-foot concrete wall and bounced back on the attackers, the report said. Two of the guerrillas died in the blast.

In the logging town of Butuan on Mindanao island, 500 miles southeast of Manila, the military said suspected guerrillas threw a grenade inside a 4-wheel drive vehicle Monday, killing two civilians and wounding three others.

The regional military commander, Brig. Gen. Triumpo Angeles said the attack was believed carried out by guerrillas as part of a rebel summer terror campaign.

#90121u1636 05/01/1990 ~United Press International

WIESBADEN, WEST GERMANY (MAY 1) UPI - Freed American hostage Frank Reed was reunited with his family and had a beer and a medium-rare steak Tuesday, only hours after he cheerfully set foot in the West for the first time following 44 months in captivity.

The 57-year-old school director, the second hostage released from Lebanon through Syria in eight days, seemed in good spirits as he strode off a U.S. military plane at the Rhein-Main air base.

''Dr. Reed is weak and tired from his ordeal,'' said a spokesman for the medical team examining Reed at a U.S. military hospital in Wiesbaden.

''He has lost significant weight and muscle mass from a lack of exercise and a marginal diet,'' the spokesman said. ''He otherwise feels well and is talking with his family and medical staff.''

Reed was reunited with his Syrian-born wife Fahimeh and their son Tarek, 9 at the hospital only a few hours after his arrival at the nearby U.S. Rhein-Main base.

Reed smiled, raised both hands in a V-for-victory sign, shielded his eyes from the sun and touched the ground after stepping off the C-141 Starlifter that flew him from Damascus to West Germany. Reed said he was blindfolded much of the time he was held hostage.

President Bush offered Reed ''greetings from the American people'' by telephone Monday while meeting with ex-hostage Robert Polhill, who was freed last week. White House press secretary Marlin Fitzwater said Bush put Polhill on the line with Reed and the two former hostages ''exchanged greetings.''

Looking pale and fatigued, but elated, Reed received a red-carpet welcome and a ceremonial salute by a military color guard holding aloft the American and German flags.

Reed, dressed in an elegant dark suit and tie and sporting a neatly trimmed beard, was taken by helicopter to the Wiesbaden medical center, where he was given a rousing welcome by patients and staff.

A huge banner at the hospital said: ''Welcome to the free world.''

''Upon arrival Dr. Reed asked for a Heineken and a large steak cooked medium-rare. Dr. Reed got what he asked for,'' the spokesman said.

He said Reed had his first check-up in Damascus, which ''revealed no major medical problems,'' and added Reed was expected to remain at the medical center two to three days.

Officials said U.S. intelligence teams will debrief Reed to assess the patterns of kidnappings in the Middle East and conditions under which hostages are held.

On April 22, Robert Polhill, 55, was let go by his kidnappers after 39 months of captivity and he followed the same course to freedom. Reed and Polhill were the first American hostages freed since three others were released in the fall of 1986 as part of the secret Iran-Contra arms-for-hostages swap between the United States and Iran.

''It was lonely. It was boring,'' Reed told Syrian television Monday after his release.

Reed, a Massachusetts man who was kidnapped Sept. 9, 1986, while driving a van in Moslem west Beirut, was freed by his captors Monday in Beirut and turned over to Syrian troops, who drove him to Damascus.

Syrian Foreign Minister Farouk Al Shaara said after delivering Reed to U.S. Ambassador Edward Djerejian: ''I hope this second gesture of good will will be met with a similar gesture of good will (from the United States) in the process of releasing the hostages.''

In Washington, where President Bush was welcoming Polhill to the White House, Bush thanked Syria and Iran for their help in freeing both hostages and said he was optimistic other Middle East hostages would be released. Six Americans and 10 other Westerners remain hostage in Lebanon.

Bush said he was unaware of any deals for releasing hostages, could not explain what prompted their kidnappers to free Polhill and Reed, and added tha a ''thank you'' was all Syria and Iran could expect as long as the other hostages were held.

A previously unknown group calling itself the Organization of Islamic Dawn said Sunday that Reed would be released within 48 hours ''carrying a message to the U.S. administration.''

Iran and its allies in Lebanon have been trying to trade the remaining Western hostages for the release of 400 Shiite Moslems held by Israel, 16 Shiites convicted of terrorist bombings in Kuwait and Moslem fundamentalist cleric Sheik Abdul Karim Obeid, who was abducted by Israeli commandos in July.

Iran also wants the United States to release the $8 billion to $9 billion in Iranian assets it froze after Iranians seized hostages from the U.S.

Embassy in Tehran in 1979.

In Iran, the English-language Tehran Times newspaper quoted an unidentified Iranian official as saying the promise for Reed's release followed extensive talks between the kidnappers and Iran.

Reed, who moved to Lebanon in 1977 and converted to Islam, was an educational adviser to the Lebanese International School in the Moslem sector of the Lebanese capital at the time he was abducted. He served five years as headmaster of the U.S.-affiliated International College.

Reed told reporters in the Foreign Ministry building that being a hostage is more difficult than being a prisoner because ''When you are a prisoner, you know that you have a sentence and how long you are going to stay.''

In captivity, Reed said he was given liquid food and had the opportunity to take a shower.

Reed thanked the Lebanese people and the Syrian government for helping to free him, but said he had no idea where he was held or the identity of his kidnappers.

#90121u1660 05/01/1990 ~United Press International

BOSTON (MAY 1) UPI - When today's baby boomers reach old age, the price for their health care could exceed the nation's current annual budget deficit, a study showed Tuesday.

Dr. Edward Schneider, of the University of Southern California, said unless more research funds are spent on preventing disease among the elderly, by the year 2040 nearly 10 million Americans will be disabled by Alzheimer's disease and other forms of senile dementia, requiring as much as $149 billion a year for their care in 1985 dollars.

''These numbers approach the magnitude of current federal deficits,'' which have been running about $150 billion per year, Schneider and Dr. Jack Guralnik said in a study published in the Journal of the American Medical Association.

It could cost another $139 billion a year to keep 6 million people in nursing homes by 2040 and federal Medicaid reimbursements might exceed $50 billion annually by then, they said.

He and Guralnik said the options include cutting federal Medicaid and Medicare reimbursements to reduce costs or rationing health care for the elderly. They noted that former Colorado Gov. Richard Lamm and others have suggested that medical care be provided to people beyond their early 80s only to relieve suffering.

However, ''there are those who feel that those are not the answers - that the public in general will not accept rationing of health care,'' said Guralnik, an epidemiologist at the National Institute on Aging.

A better response is an increase in research funds for disorders that largely affect the elderly, such as Alzheimer's and hip fractures caused by bone thinning, he said.

''We're proposing that the government spend $1 billion a year, rather than the current $400 million'' to probe the cause of disease in the elderly, Schneider said.

Schneider said there are 70 million baby boomers between 30 and 45. Declines in deaths from heart disease among them could mean that a substantial number, especially the women, will live to 80 and beyond, he said.

Right now, he said one-quarter of Americans aged 85 and older are in nursing homes. But if researchers can ''understand how the brain ages, how and why we age,'' they may be able to slow or prevent illnesses that force people into nursing home care, Schneider said.

''It is time for the government to stop wasting time and start investing in aging research. The elderly population is going to increase so rapidly that spending a little bit more here and there will accomplish nothing,'' he said.

In addition to research on Alzheimer's disease, Schneider and Guralnik said more study is needed of such illnesses of the elderly as osteoarthritis, peripheral blood vessel diseases, bone thinning and Parkinson's disease, a progressive neurological impairment that affects movement.

They point out that past research investments in disease prevention have yielded impressive results, producing antibiotics and vaccines that put an end to polio and tuberculosis epidemics in the United States.

''If, instead of research, we had relied solely on cost containment or rationing, we might still have tuberculosis sanitariums and iron lungs,'' they said.

#90121u1665 05/01/1990 ~United Press International

GRAND RAPIDS, MI (MAY 1) UPI - Steelcase Inc. announced Tuesday it has purchased Interior Woodworking Corp., a custom millwork firm, of New Paris, Ind. The purchase price was not disclosed. Interior Woodworking will become a division of Stow & Davis, Steelcase's wood office furnishings division.

Frank Merlotti, president and chief executive officer, said the deal is part of Steelcase's effort to provide additional resources to its customers, particularly to architectural and design professionals.

Interior Woodworking was established in 1978 and employs 300 people. Josef Hauth will continue as president of the firm. Steelcase is the nation's largest manufacturer of office furniture. Its Stow & Davis division is headquartered in Kentwood, Mich., with manufacturing operations in Kentwood and in Fletcher, N.C.

-30- 995

#90121u1686 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The Senate agreed Tuesday to include $31 billion used to buy assets from troubled savings and loans in this year's budget deficit.

An amendment to not count the money as part of the deficit was knocked out of a $2.3 billion spending bill that includes emergency aid for Nicaragua

and Panama.

Sen. Ernest Hollings, D-S.C., objected on the grounds that the law required such an amendment be passed by the Budget Committee, and his point of order was accepted - stripping the provision from the bill. The amendment to exclude the money had been adopted by the Senate Appropriations Committee.

But supporters of removing the $31 billion from budget calculations, which are used to determine whether mandatory cuts should be made under the balanced budget law, maintained their position eventually would become law.

The $31 billion will be advanced to the Resolution Trust Corp., the agency supervising the savings and loan bailout, to buy assets from troubled thrifts in hopes of selling them in the future.

Supporters of removing the $31 billion from budget calculations argued the money will be involved in transactions over several years in which the agency will both spend and receive money.

They said this year's budget would be artificially inflated by including the $31 billion in the calculations - an accounting practice Sen. Pete Domenici, R-N.M., called ''fiscally insane.''

But Hollings warned against expecting great returns from the eventual re-sale of assets, and said it was time to be more realistic about the actual size of the deficit.

''This is a good opportunity for the Senate to sober up,'' he said. ''If this is not the time to do something about the deficit, when is?''

#90121u1701 05/01/1990 ~United Press International

PORTLAND, OR (MAY 1) UPI - About 1,500 Weyerhaeuser Co. paper workers in Oregon and Washington are voting this week on a five-year contract offer, but the union has not recommended its approval.

The voting began Monday and ends Wednesday, with the results to be tallied Thursday at the Portland headquarters of the Association of Western Pulp and Paper Workers.

Union president Ferris Bryson says union negotiators decided to bring a company offer to a vote but "stopped short of making a recommendation for acceptance."

That indicates Weyerhaeuser might have offered less than the union sought. But no details of the offer were disclosed and company officials declined

to comment on the proposal.

If Weyerhaeuser workers accept the contract, it could set a pattern for other contract talks, Bryson said. The union represents workers at Weyerhaeuser paper mills in Springfield and North Bend in Oregon and Longview, Cosmopolis and Everett in Washington, the second-largest work force now bargaining for new contracts.

The AWPPW has more than 6,500 members at 15 Oregon and Washington mills where contracts expire this year.

"We would hope if this offer is ratified it will have a positive effect on our negotiations with Georgia-Pacific at Toledo," Bryson said. More than 400 workers at that mill went on strike two months ago after contract talks broke down, and no new negotiations are scheduled.

-30- 1622

#90121u1753 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - Standard & Poor's Corp. Tuesday placed Union Texas Petroleum Holdings Inc.'s debt on CreditWatch, saying a prospective sale of the large international oil exploration company could weaken its credit quality.

The move, S&P said, follows the decision by the company's board of directors to explore a sale and other alternatives for enhancing the value of Union Texasequity. About $500 million of rated debt is outstanding, S&P said in a statement.

S&P estimated the potential cost of purchasing the company, including its debt and preferred stock, in a range between $2.5 billion and $3 billion. "Credit quality could either strengthen or weaken depending on the outcome of the eventual change in ownership, as well as the financing and structuring plans of the acquiring company," the rating agency said.

S&P put Union Texas' subordinated debt, rated BB+, on CreditWatch with developing implications, meaning either an upgrade or a downgrade of the rating is possible.

The rating agency said that about 80 percent of Houston-based Union Texas is owned equally by Allied-Signal Corp. and affiliates of Kohlberg Kravis Roberts & Co. and that the company has oil exploration and development interests in Indonesia, the North Sea and the Gulf of Mexico with 475 million barrels of oil equivalent in reserves. The company also has a 42 percent interest in an ethylene plant having an annual output capacity of 1.2 billion pounds, S&P said.

Announcing the move Monday, Union Texas said: "No assurance can be given

that the board's activities will result in any transaction. In the event that the board chooses to proceed with a sale of the company, such sale is not expected to be consummated before November 1990."

Union Texas last week reported first-quarter net income of $31 million, down from $50 million in first quarter of 1989. Revenues were $311 million up from $307 million a year earlier.

Earnings for the year-ago quarter included business interruption insurance accruals from the 1988 Piper Alpha platform explosion in the North Sea. Union Texas reached a settlement with insurers for final payment of all future periods' business interruption insurance in the second quarter of 1989.

The company was formed in 1896 in Louisiana, entered the oil and gas industry in the mid-1920s and was acquired by Allied Corp. in 1962. Allied agreed in 1985 to sell 50 percent of Union Texas to an investment group that included members of Union Texas management and Kohlberg Kravis Roberts for $1.4 billion cash and $300 million of Union Texas preferred stock.

NEW YORK (MAY 1) UPI - A former Philippines auto assembler and distributor testified Tuesday that President Ferdinand Marcos sent one of his generals to shake him down for $900,000 as ''commission'' on a loan for his company.

Ricardo Silverio, who owned the Delta Motors Corp. in the Philippines and now is a real estate developer in Daly City, Calif., also testified he had set aside 20 percent of his stock for Marcos, but he did not pay him any dividends because the president never paid for it.

Silverio, 60, took the stand in U.S. District Court in Manhattan as the racketeering trial of Marcos's widow, Imelda, entered its second month.

The trial, expected to last well into the summer, got another week added to it Tuesday when Judge John Keenan denied Mrs. Marcos's request to travel to the Philippines to take depositions but granted a defense request to recess for a week in June to question potential witnesses in

her homeland.

Mrs. Marcos, 60, is charged with racketeering, conspiracy, fraud and obstruction of justice by plotting with her husband to divert more than $200 million from the Philippines treasury for personal use.

Silverio said in the mid 1970s he applied for and received a $6 million loan from the Japanese repatriations fund for machinery and equipment to manufacture car engines in the Philippines.

''Mr. Marcos called me by telephone in my office and said Gen. Eulogio Balao was going to my office and talk to me about reparations,'' Silvario said.

He said a few days later, the World War II hero, then on Marcos's staff, arrived and told him, ''I have to receive 15 percent commission'' out of the $6 million.

Silverio said he wrapped $900,000 in peso notes in paper bags and ''he delivered it to Mrs. Marcos.''

Silverio, who said he occasionally played golf with Marcos, testified that in 1966 the chief executive promised to help him get an original government loan for $6 million for his business as the exclusive assembler and distributor of Toyota products in the Philippines.

He said Marcos told him he ''needed some security for his children and wanted 20 percent of our capital stock, and said he would pay for it.''

Silverio said he wrote the stock shares in his own name, leaving the endorsement blank, and personally delivered them to Marcos.

He said at the time the stocks had a market value of $900,000.

''I was waiting for him to pay and to take the intiative, but I did not ask him to pay for it,'' he said.

After a month the loan was approved, he said, and when stock dividends were declared, shares that were given in lieu of cash were not delivered to Marcos ''since he did not pay for the original 20 percent share of the company.''

Silverio said by 1984, Marcos's original 20 percent was diluted to about 5 percent. He said he then borrowed $30 million from the Philippine National Bank and the Marcos government foreclosed on his company when he couldn't pay it back.

BEIJING (MAY 1) UPI - Authorities in southern Guangdong Province have executed 14 people during the past week for serious crimes, news reports said Tuesday.

Provincial radio in the city of Guangzhou (Canton) said the executions followed the sentencing of 31 people convicted of murder, rape, robbery and other serious offenses in outlying towns and counties.

The verdicts were announced at public rallies, according to the radio report, which was monitored by the British Broadcasting Corp.

Three of those executed were condemned in the town of Zhaoqing on Saturday for involvement in the distribution last November of tainted liquor. The poisoned brew left 20 people dead and seven blinded.

Eleven ''criminals who seriously disturbed public order'' were executed in the city of Shantou between April 24 and 27, the radio said. the crimes committed included murder and rape.

BOGOTA, COLOMBIA (MAY 1) UPI - Police have linked Medellin cartel leader Pablo Escobar to the murder of a leftist presidential candidate aboard a commerical airliner, a Columbian newspaper reported Tuesday.

El Tiempo, quoting unidentified police intellegence sources, said suspects arrested after the assassination of Carlos Pizarro last week indicated a ''man of confidence,'' or close associate of Escobar, contracted and paid the gunman.

The alleged Escobar associate was only named as ''Tyson''.

Pizarro, a former commander of M-19 guerrillas, was shot 13 times while on a flight Bogota to the northern coastal city of Barranquilla. His killer, Gerardo Gutierrez Uribe, was killed moments later by Pizarro's bodyguards.

Escobar, who is blamed for numerous assassinations, is the head of the powerful Medellin Cartel that has been waging a war with the government since August of last year. The cartel supplies most of the world's cocaine drug experts say.

Escobar, in a letter sent to police and Colombian news media Monday, appeared to try to refute charges he was involved in the Pizarro murder. He said he was friends with most M-19 leaders and at one time had hidden two guerrlla leaders on one of his ranches.

Pizarro was the third presidential candidate killed in less than a year in Colombia and the government was studying whether to allow the four major surviving candidates to use military aircraft for campaign appearances.

President Virgilio Barco has said campaign time would be given the candidates on television and radio, with reduced public appearances.

In other developments:

-The government has rejected a proposal made by a communist guerrilla group, the Revolutionary Armed Forces of Colombia, to have former President Jimmy Carter and Venezuelan President Carlos Perez mediate a peace treaty.

Government Minister Horacio Serpa Uribe said the government was not willing to allow outside parties to participate in any peace talks with guerrilla groups operating in Colombia.

#90121u1791 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The United States and Soviet Union should work towards exploring Mars together to help provide a ''positive vision of the future,'' astronomer Carl Sagan and Russian scientist Roald Sagdeev said Tuesday.

''These are the two principal space-faring nations on the planet,'' said Sagan at a news conference with Sagdeev. ''The possibility of sharing expertise, sharing costs, sharing vision I think is very (important).''

Such an effort is especially critical as the East-West relationship changes, said Sagan, an astronomer at Cornell University who is also president of The Planetary Society.

''Here are two Cold War adversaries with the opportunity before them to work together on a long-term, high-technology, benign, hopeful aperture to the future. And I'm personally very concerned about the absence of hopeful visions of the future for young people in the United States and elsewhere '' he said.

''It's almost always a kind of hysterical, negative post-nuclear Holocaust kind of vision of the future that the media presents. The idea of the exploration of another world, a world of wonders, I think is an example of a positive vision of the future, which I think has very important social value,'' he said.

Both nations have expressed a commitment to explore Mars. Soviet leader

Mikhail Gorbachev has called on a cooperative effort. President Bush, who met with congressional leaders Tuesday to discuss the nation's space program, has said his administration was exploring closer U.S.-Soviet cooperation.

A recent report by the National Research Council urged the two nations to coordinate their efforts but continue to pursue independent programs.

Sagan cited surveys that found support for cooperation between the two countries and released the Planetary Society's ''Mars Declaration'' in support of such efforts, containing more than 100,000 signatures.

Sagan and Sagdeev acknowledged both countries have major pressing social problems that are creating pressure to divert money and resources from space exploration.

Sagdeev, a former director of the Soviet Space Research Institute who is a Deputy in the People's Congress of the USSR, acknowledged economic concerns have prompted his country to scale back its space program.

''The timing is not the best for the Soviet Union. Sometimes (we) are overwhelmed with short-term problems, short-term goals, and sometimes we are kind of suppressing our vision of (the) future,'' he said. ''To abandon completely (the) space program I think would be grave mistake.''

Sagan said sending humans to Mars would be ''a monumental historical event'' which could provide insights into Earth's fate.

''The first footfall of human beings on another planet is ... an extremely important historical step and in the long run represents a key step in the transformation of humanity to a multi-planet species,'' he said.

#90121u1800 05/01/1990 ~United Press International

MIAMI (MAY 1) UPI - Helilcopters scooped up giant buckets of canal water and dumped it on a wildfire that charred 5,500 acres of sawgrass in and around Everglades National Park Tuesday.

Another fire burned 500 acres in Shenandoah National Park near Crimor, Va. but firefighters said that one was ''99 percent contained'' Tuesday.

The Florida fire, just west of Miami, originally was thought to have been caused by lightning.

''What we've found out now is that it was human cause, but they haven't determined exactly how,'' said Everglades park spokeswoman Darlene Koontz.

The fire began Monday on state land south of the main park road and quickly spread through the drought-stricken area.

About two dozen firefighters from the National Park Service and the state Division of Forestry battled the fire with four helicopters and all-terrain vehicles, hoping to have the wildfire under control by nightfall.

Ground crews dug fire lines, set backfires and cleared scrub brush from around the smoldering hammocks to eliminate potential fuel.

''They knocked down the head of the fire where the high flames were. There's really no active flame right now. They're looking at hopefully calling it contained by tonight,'' Koontz said.

''The helicopters are dropping buckets of water on it. It (helicopter) lowers down over the canal and drops a big bucket into the water and scoops it up then they release it.''

There were no reports of injuries or danger to structures. The fire was in a remote part of the park where there are no roads and few visitors, said park spokeswoman Pat Tolle.

Most of the wildlife had already moved out of the area in search of water, and the fire moved slowly enough for the rest to flee in front of it, firefighters said.

''That doesn't traditionally cause any trapping threat for animals,'' said Charles Maynard, a spokesman for the state Divison of Forestry.

A 20-month drought had left the region tinder-dry, increasing the threat that the fires could burn out of control, firefighters said. The fire was the largest so far this year.

The Shenandoah fire, which began Saturday, was burning eight miles northeast of Waynesboro, Va.

''At this time, we've estimated that 500 acres have burned,'' said Robbie Brockwehl, park spokeswoman. ''The cause of the fire is still under investigation.''

Firefighters included park service personnel, state forestry department workers and local fire departments, as well as crews from North Carolina.

At both sites, firefighters dug fire lines by hand instead of using bulldozers in order to avoid scarring the wilderness areas.

#90121u1820 05/01/1990 ~United Press International
WASHINGTON (MAY 1) UPI - Defense Secretary Dick Cheney extended a freeze on $7 billion in new military construction Tuesday and ordered a review of 207 congressionally approved projects at bases for possible cancellation.

On his review ''hit list,'' which totals an additional $1.2 billion, are four of the Navy's six new strategic home ports, including Staten Island, N.Y., which is nearly complete.

Cheney made the announcement as the House began debating a 1991 budget that would cut some $24 billion from President Bush's $306.9 billion defense plan, but he denied his review list was meant as a warning to Congress.

''It's not sent as a signal to anybody,'' Cheney said, adding that the timing of the announcement was ''purely coincidental'' as his previous freeze on new military construction projects was to have expired at midnight Monday.

But Cheney said at a news conference that members of Congress should have no doubt that deep defense budget cuts will likely hurt everyone, including those bases and projects in their home districts and states.

''There are a lot of members of Congress who would like to be able ... to go out on the floor and vote to cut the defense budget and then pick up the telephone and call me and say, 'Dick, you're not going to shut my base down, are you?'

''There's a certain amount of hypocrisy involved in that,'' Cheney said.

''The thing members of Congress have to understand is, cutting the defense budget means cutting the defense budget. It means personnel ... procurement ... bases ... military construction, it means everything right across the board.''

Cheney extended his Jan. 24 order freezing new military construction projects for 45 days, until June 15. The order, which affects more than $7 billion in new construction contracts, was to have expired April 30.

''In light of the enormous uncertainty over the level of funding that Congress will approve for future defense budgets ... I have no choice but to extend the construction freeze,'' Cheney said.

He also ordered a review of 207 ''lower priority'' construction projects as ''candidates for rescission,'' indicating he may recommend that Congress revoke the funding approved earlier for the projects.

Cheney said Deputy Defense Secretary Donald Atwood will review the department's planned construction projects for possible cancellation and submit a list of proposed rescissions to Cheney by June 1.

Cheney said he will probably send a package of these proposed project cancellations to Congress later next month. Congress then would have to approve them.

Atwood will consider potential base closings, changes in force structure, consolidations and budget cuts in recommending which projects should be canceled, Cheney said.

''If in fact the kinds of (defense budget) reductions that are currently being contemplated in some quarters on the Hill, on the order of $20 (billion) or $24 billion in budget authority cuts for fisal year '91 come to pass, then there's no question but what a large number of these projects on this list of 207, plus additional ones, will ultimately have to be canceled,'' Cheney said.

Among items on the review list are four of the six locations identified by the Navy as new strategic home ports - Ingleside, Texas; Mobile, Ala.; Pascagoula, Miss.; and probably the most controversial one, Staten Island, N.Y.

New York Mayor David Dinkins has asked Cheney to cancel the Staten Island home port, but several members of the New York congressional delegation favor the project.

The idea behind the strategic home ports is to spread the Navy's nuclear ships up and down the coast of the United States so they could not be all destroyed at once in a nuclear attack.

Those not included on the review list and that appear to be safe are in Everett, Wash., and Pensacola, Fla.

Other major items on the review list include: $110 million for a rocket test facility at Arnold, Tenn.; $60 million in improvements at Fort Hood and Red River Army Depot, Texas; and $37 million for the consolidated maintenance facility at Tooele, Utah.

Many other projects are in West Germany, where the United States hopes to make substantial troop cuts in the next few years.

#90121u1836 05/01/1990 ~United Press International

CAMDEN, NJ (MAY 1) UPI - The Campbell Soup Co. eliminated a total of 364 jobs at its worldwide headquarters Tuesday, amounting to a 19 percent reduction in its home office staff. The cuts came on top of the elimination of more than half of the jobs at the company's research facility in northwestern Ohio announced earlier in the day.

The cutbacks also come after the company eliminated 2,800 production jobs in 1989 when it closed two plants in England and one each in Canada, Maryland, Tennessee and the 120-year-old plant in Camden where condensed soup was invented.

About 97 of the jobs at the headquarters have already been eliminated through attrition and the remaining 264 cutbacks will come through layoffs of employees, the company said. The staff reductions will save the company an estimated $17 million a year, said Campbell CEO David Johnson.

"These staff reductions are painful for the company to have to make, and we are losing many employees who have made valuable contributions to Campbell," Johnson said in a prepared statement. Johnson took over Campbell Jan. 15 after he was hired away from Gerber Foods where he boosted earnings by cutting costs and selling businesses.

A power struggle involving members of the Dorrance family, which controls Campbell, broke out after the death of John Dorrance, Jr. the company chairman and family patriarch, in April 1989.

Nieces and nephews of the former Campbell leader wanted to sell the

company to increase the return on their holdings while his children wanted to keep the company independent.

Johnson was hired to increase earnings, which had remained sluggish over the last few years. Johnson said the company must undergo a radical change in its "corporate culture" by begining to compare its performance against the activity of its competitors.

"It should be clear to anyone that the kind of financial performance we have been reporting cannot continue," he said. "We are refocusing our objectives, moving from primary emphasis on new products and sales volume to a balanced, long-term strategy in which the bottom line takes top priority."

Employee severance packages will amount to four weeks' pay, plus one week's pay for each year of service up to 15 years and two weeks' pay for each year after that. The employees will also receive job placement assistance, the company said.

Earlier in the day, Campbell announced it was laying off 26 of the 40 employees at its Institute for Research and Technology in Napoleon, Ohio, which specializes in research on mushrooms and vegetables. The facility will not be closed and a nearby plant with 1,800 workers will not be affected, said David Hackney, a company spokesman.

The cuts are "streamlining the organization in the true sense of the word," Johnson said. "We are empowering our people to win by eliminating numerous functions, reports, and layers of supervision," he said. "This, in turn, will improve decision-making, communications, and flexibility and will result in much greater productivity." The cutbacks will leave the company with 1,588 employees at the headquarters compared with 1,952 employees, the company said.

The company is continuing to review its operations with an eye to selling some assets, Hackney said. Only its Juice Bowl subsidiary is officially up for sale, although last week the vice-president of the troubled Mrs. Paul's seafood subsidiary in Roxborough, Pa., and the category general manager for convenience foods both resigned their jobs. A reorganization of the convenience foods unit will be announced in the near future, Hackney said.

In the second quarter of the company's 1990 fiscal year, which ended Jan 28., Campbell reported earnings increased 11 percent to $105.2 million, or 81 cents a share, compared with $94.9 million, or 73 cents a share, a year ago. Sales for the second quarter were $1.72 billion, compared with $1.58 billion for the second quarter of 1989.

For the first six months of 1990, earnings increased 14.6 percent to $188.2 million, or $1.45 a share, compared with $164.2 million, or $1.27 a

share, for the same period of 1989. Sales for the first six months were $3.25 billion, compared with $2.92 billion for the same period a year ago.

#90121u1846 05/01/1990 ~United Press International

CHICAGO (MAY 1) UPI - Grain and soybean complex futures tumbled about midday Tuesday on a flurry of commercial and professional selling.

Closing prices were mostly lower in active trading on the Chicago Board of Trade. The exceptions were in soybean meal and nearby corn where a late rally boosted prices.

Soybeans had rallied to sharply higher levels just before midday with July up 23 cents, then tumbled in sympathy with the sharp drop in soybean oil futures. Beans were lower across the board at the final bell, but above session lows.

Traders said the weakness in soybean oil developed on concern that imports of vegetable oils would offset tight supplies.

Soybeans and meal had been supported by indications the Brazilian soybean crop may not be as large as expected. But while bean prices fell on spillover from soyoil, meal futures held firm and were moderately higher at the final bell.

The grains also rallied to session highs about noon, then gave up the gains to profit-taking and liquidation. Nearby corn recovered from the lows and turned higher on active commercial buying during the closing minutes.

Country movement was light.

At the close, corn was up 2 1/2 to off 2, soybeans down 2 1/2 to 6 3/4, wheat off 6 3/4 to up 2 1/2 and oats off 3/4 to up 1/4.

#90121u1853 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - President Bush, under renewed criticism for his go-easy approach to the Soviet-Lithuanian conflict, will meet Thursday with the prime minister of the breakaway Baltic republic, his spokesman said Tuesday.

But White House press secretary Marlin Fitzwater said Bush will meet with Kazimiera Prunskiene as ''a freely elected representative of the Lithuanian people,'' not as ''prime minister of independent Lithuania.''

The meeting in the Oval Office will mark the first direct contact between the two nations since Lithuania announced its break from the Soviet Union March 11.

Fitzwater, asked how the Bush would address Prunskiene, said, ''Prime minister, I suppose.'' But he quickly reiterated that Bush would not be recognizing her as one.

The United States, seeking to get Lithuania and the Soviet Union to peacefully resolve the conflict, has declined to officially recognize Lithuania's declaration of independence.

Bush decided last week not to take any action against the Kremlin in response to Moscow's economic blockade of Lithuania, and his reluctance to pressure Soviet President Mikhail Gorbachev over the issue drew fire again Tuesday from Senate Democratic leader George Mitchell of Maine.

Mitchell warned the United States cannot ''leave the impression that we believe a negotiated solution can be born of economic sanctions.''

''We should not lead President Gorbachev to infer that the United States condones his decisions to cut off supplies of vital raw materials to Lithuania,'' Mitchell said.

''Yet I fear that the United States, by failing to take concrete steps to express our opposition, may be leading Gorbachev to precisely that conclusion.''

At the same time, Mitchell told reporters that, while he is urging Bush to action, the specific response is a perogative of the president.

Bush is scheduled to hold a summit with Gorbachev at the end of this month and reluctance to jeopardize the meeting - and a possible strategic arms control agreement - has been cited as a reason for the low-key response to the embargo.

Also, U.S. officials have said the benefits to be gained from Gorbachev's long-term success in reforming the Soviet Union outweigh the immediate concerns of Lithuania.

Prunskiene, in Ottawa Monday as part of a North American tour, did not openly criticize Bush's decision not to retaliate against Moscow, but said her nation hopes for ''a stricter kind of reaction.''

Fitzwater said Bush hopes to use the meeting with Prunskiene to better understand the situation in Lithuania.

''The purpose is to hear her interests, her concerns, find out as many

facts as we can,'' Fitzwater said. ''But it is not to try to dictate any course of action.''

He said, ''She can give us a first-hand account of what's happening.... This is a rare opportunity to get a first-hand analysis.''

#90121u1856 05/01/1990 ~United Press International

LONDON (MAY 1) UPI - Anti-Semitism has cast a shadow over a renewal of Jewish life in the nations of Eastern Europe that have shed communist control, an international Jewish research group said Tuesday.

In a 32-page report, the Institute of Jewish Affairs noted similarities in the revival of Jewish identity and the strenthening of ties with Israel in Bulgaria, Czechoslovakia, East Germany, Hungary, Poland, Romania and Yugoslavia.

But it also said nationalist groups and political parties have used anti-Semitism to gain support for their causes, exploiting the fact that several individuals among the new political leadership are of Jewish origin.

The report expressed concern that the nations ''lack the democratic and legal traditions essential for keeping anti-Semitism in check.''

''The collapse of communism, the rapid pace of political liberalization and the renewal of ties between some of the new governments and Israel have stimulated a significant strengthening of Jewish identity,'' Antony Lerman, the group's research director, said.

''But the new freedom brings with it the license to indulge in anti-Semitic propaganda, with nationalist groups and mainstream political parties using anti-semitism to further their political ends.''

The report identified a pattern in which Jewish community leaders who were closely identified with communist authorities were ousted from their posts.

The institute is an international research group sponsored jointly by the Anti-Defamation League of B'nai Brith and the World Jewish Congress.

-In Hungary, the 80,000 to 100,000 Jews who form the largest East bloc Jewish community outside the Soviet Union feel threatened by growing popular anti-Semitism, the report said. ''Anti-Semitism is now clearly apparent in the political arena. Some of the new political parties declare themselves 'Christian,' which in Hungary has traditionally meant the exclusion of Jews.''

-In Czechoslovakia, where 12,000 Jews live, Jewish issues are being discussed ''freely and sympathetically'' in the mass media for the first time since the suppression of the Prague Spring in 1968, the report said. ''Jewish life has been strengthened by the priority given by President Vaclav Havel to the reestablishment of diplomatic relations with Israel.''

-Romania's 23,000 Jews were freer in the past to practice their religion than those in other communist countries, the report said. But it expressed fears that the previous freedom might provide an excuse for ''extreme right politicians, emerging from years of silence or returning from exile ... (to) whip up anti-Semitism.''

The report quotes Iftene Pop, vice president of the National Peasant (Democratic and Christian) Party, Romania's biggest political party, who said, ''Jews have made their contribution to our culture but their influence is out of proportion in an unhealthy way.'' Pop also has claimed evidence that nearly 400,000 Jews who died in the Nazi Holocaust were killed by Romania's wartime fascist regime is ''an extraordinary lie.''

-In Poland, where 6,000 to 12,000 Jews live, various groups are trying to make political gains by attacking Jewish Solidarity leaders through anti-Semitic propaganda, the report said. Jews are often associated in the public mind with the former Communist government, especially during the harsh Stalinist years.

-Jewish leaders in East Germany believe their community of 400 could double as people are free to turn to their religion. They are concerned, however, about threats from neo-Nazi skinheads. Authorities have been supportive, the report said, filing 144 court actions againt 296 people alleged to be skinheads.

The report also noted as a promising sign a move by the new East German democratic government to accept responsibility for the Holocaust.

It said East Germany has ended its military training program for Palestinian terrorist groups and asked those still in the country to leave. The shipment of weapons to the Palestine Liberation Organization has also been halted.

-With heightened tensions between the various ethnic nationalities in Yugoslavia, the 5,500 Jews who do not regard themselves as Serbs, Croatians or any of the other nationalities are turning to their Jewish roots, the report said.

Jews have been attacked, however, by Franjo Tudjman, a leader of the nationalist Croatian Democratic Union, who wrote, ''A Jew is still a Jew ... even in the Nazi camps they retained their bad characteristics - selfishness, perfidy, meanness, slyness and treacherousness.''

-Bulgaria's Jewish community of about 5,000 has been the least harmed by anti-Semitism of the seven countries, and ''it is unlikely that anti-Semitism will rise there,'' the report said. The Jewish community ousted its old leadership, which was closely linked to former Communist leaders.

#90121u1857 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - Thomas Cook Travel introduced Tuesday a travel information service that can be accessed via touch-tone telephone and facsimile machine.

The new service, called "Thomas Cook Express," enables customers to receive complete flight and fare information from an "Express Planner" facsimile document and can also arrange for car rental and hotel bookings.

To use the service, a customer enters on a touch-tone phone the various codes listed in a special guide for the cities of departure and arrival and details of the customer's itinerary.

About 90 seconds after the request is entered, the customer receives over a fax machine a list of best flight options and lowest fares available.

The information also lists seating availability, meal service, the on-time record of the airline, stops, connections and cancellation penalties. The customer can then place reservations, again via touch-tone phone.

Thomas Cook, the third-largest travel agency in the United States with about $1.3 billion in revenues last year, keeps records of more than 400,000 fares on a daily basis.

#90121u1868 05/01/1990 ~United Press International

(MAY 1) UPI - May Day observances in Moscow and East Europe today reflected the recent dramatic changes in the area... contrasting sharply with the tightly controlled Communist-led celebrations of past years. Many Eastern Europeans headed for the mountains and beaches instead of lining the streets for May Day parades. Soviet leaders were jeered and there were signs of other protests during the events in Moscow's Red Square.

President Bush says he woN'T reveal a private message from the abductors of former U-S hostage Robert Polhill. Bush also says there'll be NO rewards for Syrian and Iranian mediators calling for reciprocal gestures until all Western hostages in Lebanon are freed. The president expressed relief at the freeing of Polhill, and more recently, Frank Reed... but

stands by his position of NOT negotiating with the kidnappers.

An Elizabeth, New Jersey, judge today declared John List a ''man without honor'' and sentenced him to a maximum of five consecutive life prison terms for killing his wife, three children and his mother in 1971. List told the judge ''he was truly sorry.'' His sentence was determined by the criminal code in force on November 9th, 1971, when List shot his family and dropped out of sight. At the time New Jersey had NO death penalty law.

A one-TRILLION-dollar Democratic spending plan is scheduled for a vote by the House today with party conservatives apparently ready to accept the plan's lower defense spending. One G-O-P aide said that Republicans decided NOT to offer a White House budget plan for a vote after it became clear it would get only 100 votes, even though there are 176 House Republicans. The Democrats' budget plan calls for sharply lower defense spending than President Bush wants.

#90121u1870 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - An attorney for the alleged triggerman in a Brooklyn racial killing brought his defense to a close Tuesday after making futile efforts to introduce new evidence favoring his client.

Attorney David DePetris rested his defense of Joseph Fama, 19, who allegedly shot Yusuf Hawkins on a street in the predominantly Bensonhurst section neighborhood. The Aug. 23 slaying inflamed racial tensions citywide and sparked a series of protests.

State Supreme Court Judge Thaddeus Owens refused to let DePetris introduce a witness who would cast doubt on Fama's alleged jailhouse confession that he shot the black teen.

''I feel the judge severely curtailed my defense,'' DePetris said outside state Supreme Court in Brooklyn, where the trial is being held. ''I wish the jury could have heard it.''

DePetris said he had hoped to use the testimony of several witnesses, including the father of prosecution witness Robert Russo, a convicted swindler who said he heard Fama confess to the shooting while the two were in jail.

When called to the stand, the elder Russo tried to tell the jury about a phone conversation with his son but the judge upheld prosecution objections that the testimony was hearsay.

Outside the courthouse, DePetris said Russo would have testified that his son was making up the alleged confession to get out of jail.

Fama and his co-defendant, Keith Mondello, 19, allegedly headed a bat-wielding mob that killed Hawkins, 16, who had come to the neighborhood with three friends to look at a used car.

Fama and Mondello are both charged with second-degree murder and a variety of other charges stemming from the attack.

Jurors will hear closing arguments next Tuesday and then begin deliberations after the judge gives his instructions on the charges. Fama and Mondello are the first of eight young men to be tried in the case.

DePetris also questioned several detectives about notes suggesting that an important prosecution witness who placed Fama at the scene of the crime originally misidentified him while looking at a collage of photographs.

#90121u1871 05/01/1990 ~United Press International

MOSCOW (MAY 1) UPI - Glasnost surged onto Red Square behind the May Day parade Tuesday with marchers booing and shouting insults at President Mikhail Gorbachev over his handling of Lithuania's independence drive and economic reforms.

''Shame, shame,'' some marchers railed at Gorbachev and the other Soviet leaders watching from atop the Lenin Mausoleum. Others were heard shouting ''Resign'' as the officials turned and left.

Other marchers from ''informal groups'' allowed onto the square at the end of an official parade and rally organized by trade unions carried Lithuanian flags and chanted ''Freedom to Lithuania'' in support of the Baltic republic in its battle with the Kremlin over independence.

The open hostility seemed to surprise even Gorbachev, who has been widely praised for his policy of ''glasnost,'' or openness, in Soviet society.

Before Gorbachev's reforms, May Day parades were carefully staged events featuring bland slogans calling for hard work for the good of socialism. Open dissent was unheard of and those questioning the leadership in places far less public than Red Square were dealt with harshly.

''Several banners even recently would have been hard to imagine on Red Square,'' the official Tass news agency said, describing some of the marchers' slogans as ''extremist.''

Even the official portion of the demonstration to mark the ''international day of solidarity among working people'' offered little comfort to Gorbachev.

Marchers brought in by bus from enterprises around Moscow waved banners asking for protection from the effects of economic reforms, and leaders of official unions told the crowd of about 100,000 they were afraid Gorbachev's plans would raise prices and lower workers' living standards.

''We cannot, we do not have the right to leave war and labor veterans, single mothers, orphans and students one on one with the unpredictability of the market,'' said Gennady Yanaev, recently named national chairman of the official trade unions.

For the first time in Soviet history the May Day demonstration was organized by the official City Council of Trade Unions rather than the Communist Party.

Annual May Day events organized by the party were scrapped in many parts of the Soviet Union. In Leningrad, a 70-year tradition of official rallies was replaced by ''a meeting of democratic movements of the city,'' Tass said.

In Yerevan, Armenia, the demonstration was canceled ''in accord with the wishes of working people,'' who preferred to celebrate with ''fairs, public merry making and concerts,'' the news agency said.

Despite the critical banners and protests at the end of the Red Square march, for the most part, the main event was still tightly controlled, with thousands of Interior Ministry and KGB troops keeping marchers in line as they filed through the square past a huge picture of Karl Marx, Friedrich Engels and Vladimir Lenin.

Gorbachev, Prime Minister Nikolai Ryzhkov and other Politburo members were joined by newly chosen liberal Moscow Mayor Gavrill Popov in the places of honor atop the Lenin Mausoleum on a cloudy, windy morning.

Speaker after speaker called for controls on prices and unemployment expected to rise with a move to a market economy.

''Many wise men from economics call on us to step briskly into the random forces of the market, saying this will get us out of the crisis,'' said Evgeny Kuznetsov, union leader at the ''Hammer and Sickle'' metal plant.

''It won't get us out if we don't think in time about the consequences of this step - growth in prices, a fall in living standards and unemployment.''

Although less than a month ago Gorbachev was calling for the acceleration of market reforms that would likely lead to inflation and unemployment, he assured workers in the Urals last week there would be no ''shock therapy.''

Among the colorful banners with names of participating enterprises and slogans supporting worker solidarity were signs showing how the reforms are feared.

''Prices should be monitored by the unions,'' one said. ''The market yes, unemployment no,'' read another. ''Down with the bureaucrats from the party apparatus,'' another said.

The onlookers in the square seemed mostly disinterested in the official speeches, preferring instead to chat with friends and in the case of one group of men to work on a crossword puzzle.

''I don't think it achieved anything,'' said Aleksandr Slavatsky, a subway construction worker.

Although some in the crowd like Tatyana Konova said they attended ''just because it's a holiday,'' others like retiree Nikolai Demidov said they felt it was ''important to show solidarity.''

(MAY 1) UPI - A West Tennessee newspaper is searching for ''scum busters.'' The McKenzie Banner urges readers to turn in what it calls drug dealing ''scum,'' by writing the names of drug suspects on a coupon and mailing it to prosecutors. But the American Civil Liberties Union says the strongly worded public service ad in the weekly paper may be illegal. The A-C-L-U argues that the ads are in bad taste and says the ads tend to pit citizen against citizen.

Tickets sold for 100 dollars each, but some people paid scalpers up to 400 dollars for a chance to see a preview of rock star Prince's new European tour. About 650 people jammed into Rupert's Nightclub in Golden Valley, Minnesota, to see Prince perform a benefit jam for the family of his late bodyguard and close friend, Chick Huntsberry, who died last month. Prince's ''Nude Tour'' begins June 2nd in Rotterdam in the Netherlands.

#90121u1918 05/01/1990 ~United Press International

HOUSTON (MAY 1) UPI - Superconductivity expert Paul Chu and his team of University of Houston researchers have taken a major step toward applying the technology to industrial uses, a newspaper reported Tuesday.

University officials apparently will make an announcement of the advance within a few weeks, after information on it is published in a scientific journal.

Chu confirmed researchers at the Texas Center for Superconductivity have made ''a great advancement'' in the application of superconductivity, but he would not reveal details, The Houston Post reported.

''It's a processing to make the material in a useable form, still using a large electrical current,'' Chu said of the development. ''I think that's all I can say now.''

Superconductivity is the ability of a material to conduct electricity without resistance when chilled to a very low temperature.

Superconductivity research has helped fuel speculation about a futuristic world of resistance-free electrical movement in which commuters could ride to work on ''flying'' trains, computers could compute at the speed of light and rockets could be shot into space from ''electromagnetic launchers'' without burning fuel.

In February 1989 a Texas Center for Superconductivity research team announced it had transmitted four times the previous record level of electrical current through rod-shaped samples of an yttrium-barium-copper oxide superconductor and under a magnetic field.

At the time, Chu, director of the center, said, ''The next obstacle is to make the material into wire form for practical applications.'' Such an achievement would allow it to be used in motors, generators, magnets or power transmissions, he said.

Asked Monday if researchers had achieved superconductivity in wire form, Chu responded, ''It's along that line, but not exactly.''

Because it involves ''a large current application, in that sense, it's a very important advancement. A step forward,'' he said.

''It certainly has not solved all the problems yet, but it's getting close ... We have no doubt what we are seeing. It's real,'' Chu said.

The advance is not as big as when Chu's team achieved superconductivity at minus 234 degrees Fahrenheit two years ago, he said. That achievement brought worldwide acclaim to Chu and his research team.

''This latest advancement has nothing to do with temperature advancement '' he said. ''But from an industrial standpoint, this is very significant.''

The advancement is important enough, however, that the White House staff and presumably President Bush have been informed of it, UH officials said.

#90121u1951 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - Senate Republicans, on a collision course with Democrats over how to change campaign finance laws, proposed Tuesday that all political action committees be eliminated and groups such as labor unions be banned from taking an active role in campaigns.

The bill, sponsored by 34 of the 45 GOP senators, was immediately criticized by Democrats because it would not place a spending limit on congressional races. The Democrats also have not suggested eliminating PACs and they generally rely heavily on organizations such as unions.

The Republican plan, which was similar in many aspects to a bill proposed by President Bush, was unveiled as the Senate prepared to take up the testy reform issue, perhaps by the end of the week.

''If we are serious about reforming campaign spending, we can either get serious or continue to make speeches and protect the status quo on Capitol Hill,'' said Senate Republican leader Robert Dole of Kansas. ''Today's proposal should put to rest any distortions and misconceptions that Republicans oppose reform. We are committed to reform and we will work to make it happen.''

But even before the plan was formally announced, Senate Democratic leader George Mitchell of Maine conceded there were ''vast differences'' between the parties.

The key parts of the Republican bill would:

-Eliminate political action committees, known as PACs, which have been criticized for having too much influence with lawmakers. If the ban was thrown out by the courts, the bill would cut maximum PAC contributions from $5,000 to $1,000.

-Ban the use of so-called soft money. Under current law, unreported contributions can be made to state parties, which then use the money for specific candidates.

-Ban groups such as labor unions and trade associations from taking part in campaigns. Democrats often use organized labor to do things such as operate telephone banks for candidates.

-Cut from $1,000 to $500 the maximum a candidate could receive from an out-of-state individual.

-Provide a discount for candidates' commercials on radio and television.

-Would eliminate free mailing privileges for incumbents during an election year.

However, missing from the plan was the key item that Democrats have been pushing - overall limits on spending. Many Democrats also want some form of public financing of campaigns, but that item is particularly contentious and has destroyed campaign reform negotiations in the past.

Following a closed-door party conference, Democratic senators said there still were differences among themselves over what should be in a Democratic bill, but that a spending limit was essential.

''The main thing, the consensus here, is to have a (spending) cap,'' said Sen. James Exon, D-Neb.

Michael McCurry of the Democratic National Committee added that instead of moving closer together, both sides appeared to be drifting further apart.

''If we were getting closer to a bill, you would see both sides talking about how they were going to limit PAC contributions and have some spending limits,'' said McCurry. ''Both parties would be looking at giving up some of their cherished possessions.''

That feeling was also echoed by some lawmakers, some of whom said they believed that instead of working toward a compromise, both sides were trying to put the best face on their plans, so they could defend themselves in November if no bill is passed.

#90121u1959 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - A subcommittee plan to restructure the sugar program could cost $500 million over a five-year period as well as possibly violating world trade rules, an administration official said Tuesday.

"You have a program that's skating on thin ice already ... being loaded up with a lot more baggage," Deputy Agriculture Undersecretary John Campbell told reporters.

A House Agriculture subcommittee gave its approval to the changes Tuesday, sending them to the full committee. They include an inflation "escalator" for the sugar support price, an assessment on sugar and corn sweeteners to pay for a special "re-export" program and a marketing quota program as a means of assuring foreign growers are allowed to sell at least 1.25 million tons of sugar in the United States.

Subcommittee members approved similar escalators, keyed to the overall inflation rate, for the target prices for cotton and rice. Agriculture Department analysts estimated the escalators would add $530 million to the cost of the cotton program and $378 million to the rice program.

Rep. Jerry Huckaby, D-La., the panel chairman, contended his panel was acting within international trade rules. A subcommittee staff worker scoffed at Campbell's contention the sugar program "is carrying more baggage than any other commodity."

The Bush administration opposed any change in the sugar program, preferring to let it be a subject of world trade reform negotiations. Sugar is one of the world's most heavily protected crops.

Campbell distributed a two-page critique, adorned with borders composed of dollar signs, of the subcommitte plan. He said the marketing quota plan could cost $500 million because growers would seek crop loans on their excess production and then forfeit the sugar to the government. In addition, he said, food manufacturers and consumers would face $500 million annually in higher sugar costs.

Inflation indexing is likely to raise the sugar support price to 24.69 cents a pound, an increase of 2.54 cents, and encourage more production, he said. A world trade panel ruled last year the United States was violating trade rules with the way it implemented its quota on sugar imports.

Campbell said the subcommittee added three provisions that could violate trade rules. They are the re-export program, language to discourage other nations from buying sugar from Cuba and language to create lower quotas on

products with a high sugar content. Rep. Arlan Stangeland, R-Minn., said some nations were trying to evade the U.S. sugar quota by shipping sugar disguised as food.

Under the proposed re-export program, raw sugar from Caribbean and low-income nations would be eligible for a five-cent a pound bonus if it was brought to U.S. refineries and then sold overseas. Campbell said assessments to pay for the program would cost corn and sugar farmers $50 million a year.

#90121u1974 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The Department of Energy Tuesday said it has added three more projects to its list of successfully negotiated Clean Coal Technology projects.

The projects are part of a $5 billion, joint government-industry effort to showcase advanced methods for using coal economically while improving the quality of the nation's air.

TransAlta Resources Investment Corp. of Calgary, Alberta, the first non-U.S. firm to be chosen as a prime sponsor of a Clean Coal Technology project, will outfit an Illinois power plant with specially designed coal burners that offer a relatively inexpensive way of capturing acid rain-causing pollutants.

Southern Company Services Inc., the Birmingham, Ala.-based engineering arm of the multi-state Southern Company utility system, will test an advanced device that removes nitrogen oxide pollutants from the smoke of a power plant.

Combustion Engineering Inc., Windsor, Conn., and CQ Inc., Homer City, Pa., a subsidiary of the Electric Power Research Institute Inc., Windsor, Conn. will collaborate on a project to produce a computerized software program that can aid utilities in choosing the right quality of coal.

The department said the projects bring to 19 the number of completed agreements in the Clean Coal Technology Program, the nation's largest energy and environmental initiative. Congress has up to 30 days to review the agreements before the department can give its final approval.

Another 19 projects are in contract talks with the government, and the Energy Department plans two more rounds of private sector competition before wrapping up the project selection phase of the Clean Coal program in 1992.

CAPE CANAVERAL, FL (MAY 1) UPI - The charred shell of the Apollo 1 capsule in which three astronauts died in 1967 will be moved to Florida and sealed inside two abandoned missile silos, joining the debris of the Challenger disaster in a permanent space tomb, NASA announced Tuesday.

The charred Apollo 1 capsule, its heat shield and 81 cartons of hardware and ''investigative material'' will be moved from Langley Research Center in Hampton, Va., to the Cape Canaveral Air Force Station on about May 20.

''Until about 10 years ago the container holding the material was kept in a low-pressure nitrogen atmosphere to minimize corrosion. The container has been deteriorating and several small leaks have developed,'' a NASA statement said.

''Routine repairs were made to the container, but due to its age it cannot be effectively maintained on a continuing basis,'' it said. ''To recover storage area and to gain relief from the open-ended maintenance required on the storage containers, NASA decided to place the Apollo ... hardware in permanent storage in the missile silo.''

The Apollo 1 fire, NASA's first disaster, happened the night of Jan. 27, 1967 - 19 years and one day before the Challenger disaster.

Astronauts Virgil ''Gus'' Grissom, Edward H. White and Roger B. Chaffee climbed aboard their Apollo capsule at launch complex 34 after an early lunch for a routine ''plugs out'' test in which the sealed spaceship would be disconnected from ground power for a crucial launch simulation.

Locked inside by a cumbersome hatch, the astronauts were breathing pure oxygen, which was standard procedure. The test quickly fell behind schedule because of a variety of problems and near sunset, a communications problem caused another 10-minute delay.

Then, at 6:31 p.m., the men in the blockhouse and in the launch pad ''white room'' heard a terrifying cry over the radio from inside the capsule: ''There is a fire in here.''

Pad leader Donald Babbit yelled to co-worker James Gleaves: ''Get them out of there!'' seconds before flame erupted from the moonship.

The men in the white room, gasping for air, struggled in vain to open the capsule while controllers in the blockhouse sat paralyzed with horror.

RCA employee Gary Propst, watching the capsule on closed-circuit television from the blockhouse, said later the flame steadily rose for about three minutes and that he could see the arms of one of the astronauts inside the burning capsule struggling to open the complex hatch.

''Blow the hatch, why don't they blow the hatch?'' he yelled, according to a NASA history. But the Apollo 1 capsule was not equipped with explosive bolts on its main hatch.

Finally, 5.5 minutes after the fire started, the hatch was open and 14 minutes after the first outcry, physicians G. Fred Kelly and Allan Harter reached the astronauts. An autopsy blamed death on asphyxiation from toxic gases.

The disaster later was blamed on frayed wiring that set the stage for a short circuit and spark that ignited flammable equipment in the pure-oxygen cabin atmosphere.

Challenger was destroyed 73 seconds after blastoff Jan. 28, 1986, by the failure of the ship's right-side solid-fuel rocket booster.

Commander Francis ''Dick'' Scobee, co-pilot Michael Smith, Ronald McNair Ellison Onizuka, Judith Resnik, satellite engineer Gregory Jarvis and New Hampshire school teacher Christa McAuliffe were killed in history's worst space disaster.

Remains of all seven astronauts later were recovered from the shattered remains of Challenger's crew cabin, but NASA was unable to determine the exact cause of death, saying the astronauts probably passed out shortly after the shuttle's break up.

The wreckage amounts to some 20,000 cubic feet of debris, and many major components of the shuttle were never even brought to shore because they were not vital to the accident investigation. For example, Challenger's nearly intact left wing still lies at the bottom of the Atlantic Ocean.

#90121u1998 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - Dennis Levine, the admitted Wall Street insider trader whose case led to the prosecution of Ivan Boesky, said in a magazine article released Tuesday that insider trading was an addiction because "it was just so easy."

Levine, who served 15 months on insider trading charges, said in an article he wrote in the May 21 issue of Fortune that, while he was an investment banker, "My ambition was so strong it went beyond rationality." "I gradually lost sight of what constitutes ethical behavior," he wrote.

Levine, a former partner at Drexel Burnham Lambert Inc., pleaded guilty to four criminal counts related to insider trading in 1986 and agreed to cooperate with government. He was sentenced to two years in prison and also agreed to pay $11.6 million to settle civil charges of insider trading.

Levine, 37, said he began trading on insider information as a Citibank trainee in 1978. "In the early years I regarded the practice as just a way to make some fast money," he said. "Of course I soon realized what I was doing was wrong, but I rationalized it as harmless."

In seven years, he said, he built $39,750 into $11.5 million by trading on nonpublic information. "Eventually insider trading became an addiction for me," he said. "It was just so easy."

Levine was the first major Wall Street figure netted in the government's investigation of insider trading, which eventually led to prosecution of Boesky, who had made his fortune as an aggressive arbitrager.

Levine said he met Boesky at Drexel's annual high-yield bond conference, dubbed the Predators' Ball, in 1985, and the two began swapping insider information.

"My relationship with Ivan Boesky began innocently enough," Levine said. But, he said, "I began giving him tips in exchange for access to the vast store of market information in Ivan's head."

Eventually, Levine agreed to accept payment from Boesky, although he never took any money from him. At the time Levine was arrested, he said he was due $2.4 million from Boesky under the terms of their arrangement.

Boesky, who pleaded guilty to one felony count of conspiracy to violate securities law in 1987, agreed to pay a $100 million penalty for trading on inside information. Boesky also agreed to cooperate with government investigators and was sentenced to three years in prison. He was released last month.

Levine said he used insider information to tade on a personal account at a Swiss bank, Bank Leu, which funneled much of his business through Merrill Lynch. Someone at Merrill Lynch blew the whistle to the Securities and Exchange Commission, and the Swiss bank, in exchange for immunity from prosecution, agreed to testify against him, Levine said.

"I knew I was finished, and in the end my attorneys advised me that I had no choice but to settle with the government and tell the truth about everything and everybody involved in my case," he said.

Levine, who now is barred from the securities industry, is permitted to act as a financial advisor and has set up his own firm, Adasar Group, in New York.

He also gives lectures to business school students, "hoping to steer them away from the mistakes I made." "I will regret my mistakes forever," he

said.

#90121u2019 05/01/1990 ~United Press International
NEW YORK (MAY 1) UPI - Computerworld, the flagship magazine of International Data Group, said Tuesday it was introducing this month in Czechoslovakia a new computer industry publication.

"Computerworld Czechoslovakia" is expected to have an initial circulation of 43,000 copies which should reach 60,000 by yearend, the publisher, based in Framingham, Mass., said.

The bimonthly tabloid newspaper will be produced by a joint venture between IDG's subsidiary IDG Communications, the world's largest publisher of computer magazines with 650 computer full-time reporters and editors worldwide, and Orbis, the largest publishing company in Czechoslovakia.

"The market for corporate information systems involving mainframes and minicomputers has an installed base of 15,000 systems in Czechoslovakia with a value in excess of $8 billion," said IDG Chairman Patrick McGovern.

"There are now over 200,000 personal computers and workstations installed in Czechoslovakia with an installed value of over $1 billion," he said. "The market forecasts call for an annual expenditure of nearly $1 billion a year over the next three years for new computer hardware and software."

The U.S. government recently lifted export controls on mid-range computer systems and personal computers to Eastern European countries and the Soviet Union.

IDG already has similar publishing joint-venture agreements in East Germany, Hungary, Yugoslavia, and the Soviet Union. IDG Communications publishes 135 computer newspapers and magazines in 44 countries.

#90121u2026 05/01/1990 ~United Press International
WASHINGTON (MAY 1) UPI - Secretary of State James Baker denied charges Tuesday that he is attempting to pressure Israel into negotiating with the Palestine Liberation Organization.

In a testy exchange with Sen. Arlen Specter, R-Penn., before a Senate Appropriations subcommittee, Baker disputed charges that have also been raised by right-wing Israeli politicians.

Specter, an ardent supporter of Israel, said be believes the PLO has continued to practice terrorism despite the public renunciation of

terrorism by Chairman Yasser Arafat in December 1988. The State Department reported to Congress in March that the PLO appears to be living up to its commitment.

Specter then went on to raise the Israeli charges that Baker's peace plan is really an attempt by the United States to bring the PLO into the Middle East peace process.

''That's not right,'' Baker interrupted. ''I'm sorry to have to correct you, Senator, but that's not right.''

Baker said Israel had been given assurances and safeguards in the private negotiations that would prevent any unwanted contact with PLO representatives.

Prime Minister Yitzhak Shamir, now heading a caretaker Israeli government, has not agreed to Baker's plan for direct talks with Palestinian representatives on the issue of local elections in the occupied West Bank and Gaza Strip.

With his time for questioning up, Specter left the room after the tense exchange, but when his turn came around again, he began by telling Baker, ''Upon reflection, I accept your statement that it's not U.S. policy to get Israel into negotiations with the PLO.''

Baker responded by telling Specter that it is one of the realities of the Middle East that the PLO will have to ''acquiesce'' before any Palestinians enter into negotiations with the Israeli government.

He was asked by several senators if Israel's annual $3 billion in U.S. economic and military assistance is conditioned on Israel's willingness to enter into to the peace process negotiations.

Baker said the aid to Israel is not conditional, as far as the administration is concerned.

Baker also got some unexpected support for his desire to remove congressional ''earmarks'' from the U.S. aid program. The earmarks, such as the one designating $3 billion for Israel, oblige the administration to give that full amount even if the total aid money available is later cut by Congress.

In practice that means some less favored countries, frequently in sub-Saharan Africa and the Caribbean, ''zero out,'' meaning they get don't get their allotted funds because no money is left in the aid budget.

''This may be heresy,'' said subcommitte Chairman Patrick Leahy, D-Vt., ''but I support you on getting rid of earmarks.''

Sen. Frank Lautenberg, D-N.J., joined in and said he would like to see a ''selective'' cutting back of the congressional earmarks.

#90121u2031 05/01/1990 ~United Press International

HERNDON, VA (MAY 1) UPI - Thai Airways International has ordered eight A330 and five A300-600R aircraft from Airbus Industrie, the European consortium said Tuesday.

Value of the contract was not given. According to the Airbus' commercial office in Herndon, list price for the A330 is $94 million and for the A300 $77 million, in both cases without engines.

The company noted that with this order Thai Airways reasserted itself as the largest customer of Airbus in the Far East, taking firm orders for the A300/340 program to more than 200.

Thai's Airbus A330s will be delivered between 1993 and 1994, and will provide extra capacity to satisfy regional routes. The airline's additional A300-600Rs will also meet growth on these services and will be handed over between 1992 and 1993.

Toulouse, France-based Airbus said that firm orders for the Airbus A330 and A340 now stand at 202 from 22 customers, while those for the A300 and A310 total 630 from 71 customers.

JERUSALEM (MAY 1) UPI - The head of the Jewish Agency announced that more than 10,000 immigrants arrived in Israel during March, a record number mostly made up of Soviet Jews, state-run Israel Radio said Tuesday.

Simcha Dinitz, head of the quasi-governmental agency, said 200 of the Soviet newcomers had settled in the occupied West Bank and Gaza Strip.

Absorption Minister Yitzhak Peretz told the Cabinet the vast majority of the immigrants were moving to communities outside the major urban areas of Jerusalem and Tel Aviv, the radio reported. Most are from the Soviet Union.

Palestinians and Arab nations have called on the Soviet Union and the United States to halt the flow of Soviet immigrants out of fear that they will displace Arabs in the occupied territories.

BURBANK, CA (MAY 1) UPI - Cartoon producer DIC Enterprises said Tuesday it plans to open an animation studio tour in December that will feature each phase of the animation process. The initial plans call for developing the cartoon tour at DIC's headquarters in Burbank, with a permanent site to be selected next year.

The tour will be only a few miles east of MCA's Inc.'s Universal Studios Hollywood tour, one of the top tourist attractions in Southern California. The tour had more than five million visitors last year.

"We constantly receive requests from parents and children to visit our facilties and to watch how we make cartoons," said DIC President Andy Heyward. "We have been working on the concept of the tour for some time, and when we unveil it, there will be nothing like it."

DIC said the tour will include interactive attractions that will allow visitors to participate in the cartoon process by recording voices, painting, and actually animating a scene. It is also planning to open a retail store that will offer a variety of products, including collector edition cels.

DIC may expand the tour to include performers in a musical review, similar to one that DIC tested last year at another amusement park, Knott's Berry Farm in Brea, Calif.

DIC describes itself as the largest single producer of children's programs in the United States. It produces animated programs for network, cable, and syndication, will debut 12 series this fall, including "Captain Planet and the Planeteers," "The Wizard of Oz," "The New Kids on the Block," "Slimer! and the Real Ghostbusters," "Super Mario Bros. 3" and "Camp Candy."

DIC recently signed a five-year $150 million co-production deal with Reteitalia, of Italy, under which the companies will produce as much as 100 half-hours per year of animated series and specials for the domestic and European markets.

MALDEN, MA (MAY 1) UPI - "We'll be glad to see you," Frank Reed's 91-year-old mother told her son.

It was the understatement of the year. Leota Sprague had not spoken to her son since he was kidnapped by gunmen in Lebanon 3 1/2 years ago.

As Reed's Syrian-born wife, Fahimeh, and the couple's 9-year-old son Tarek were reunited with the freed hostage in West Germany, other relatives gathered Tuesday at the family home in Malden, a suburb of Boston, to wait for more news.

Marilyn Langston, Reed's daughter, said she spoke to her father on the telephone.

''He sounded very good - so much better than yesterday,'' after his captors first delivered the 57-year-old educator to Syrian officials, she said.

Langston, Reed's daughter from a previous marriage, said her father indicated that he had seen Terry Anderson, the Associated Press correspondent who was kidapped March 16, 1985, and another hostage, Thomas Sutherland, dean of the American University of Beirut's agriculture school who was abducted June 9, 1985.

''He honestly thought that Terry Anderson and Sutherland had been released. He told me that he hadn't seen them for awhile,'' Langston said.

''He had seen them at one time.''

Sprague, who was 87 when her son was abducted, said she had only a brief conversation with her son and did not know when he would return home or what his plans were.

Reed has entered a U.S. military hospital in Wiesbaden, West Germany, where he is expected to remain two to three days.

Sprague said that despite the rigors of his captivity - Reed has said he was blindfolded much of the time he was held hostage - her son ''sounded fine.''

''I think he's all right. I think he's always had that kind of a personality. He had that philosophy of life that he could do anything. Now God has removed the mountain and he's free,'' she said.

''We're not going to talk about what he's been through,'' Sprague said. ''We're going to live each day as it comes.''

In Malden, where Reed grew up, bells in churches across the city were rung Monday night ''for tribute and recognition of Frank Reed's release,'' a spokesman for Mayor James Conway said.

City officials were already considering ways to honor the freed hostage, but said they wanted to discuss their plans with the Reed family.

''We look forward to sharing his joy and triumph in an appropriate fashion after he has had sufficient time with his family,'' Conway said.

#90121u2058 05/01/1990 ~United Press International

MIAMI (MAY 1) UPI - A new tool that helps physicians predict if an individual is likely to suffer a stroke within a certain number of years was unveiled Tuesday by university researchers.

''We've developed a practical tool for identifying patients on a stroke-risk profile,'' said Dr. Philip Wolf of Boston University School of Medicine.

The key elements in the formula, unveiled as part of National Stroke Awareness Month, are an individual's age, sex, blood pressure, history of smoking, and whether they suffer from diabetes, cardiac abnormalities such as heart disease or an enlarged heart.

''For example, a 70-year-old woman with an increased blood pressure of 180 who has diabetes and smokes cigarettes has an 11 percent chance of having

a stroke in 10 years,'' said Wolf at a news conference at a meeting of the American Academy of Neurology.

By identifying an individual's stroke risk within a given period of time, physicians may alter a patient's treatment - persuading him to stop smoking or take steps to lower his blood pressure - in time to reduce their chances of having a stroke.

''If you tell someone he has a 25 percent chance of having a stroke within five years, he'll be much more likely to stop smoking cigarettes and take his high blood pressure medication than if you simply tell him he's at high risk for stroke,'' said Wolf.

''The bonus is that risk reduction can occur immediately and be completed within the first year or two.''

The formula, developed through the Framingham Heart Study, will be available to physicians within six months, he said.

''One of the worries about this is that it is something appropriate for a patient's physician to use,'' said Wolf. ''It is not somthing to be read out of a newspaper like a horoscope.''

A recent study by the Mayo Clinic indicates that for some unkown reason the incidence of stroke has begun to rise in the United States.

''After many years of decline, the incidence of stroke is on the rise and we're not sure what's causing that,'' said James J. Lannon, president of the National Stroke Association. ''Two factors may be that we have more heart attack survivors and better diagnosis of strokes.''

A stroke is a sudden interruption of blood flow to a part of the brain, resulting in the death of brain cells in the affected area and loss of body functions controlled by those areas of the brain.

Men are 20 to 30 percent more likely to suffer a stroke than women and a blood pressure of 180 doubles an individual's risk of having a stroke.

Stroke is the third leading killer of Americans and the second leading cause of death among individuals over 70 years of age, Lannon said. It is also the No. 1 cause of adult disability. About 500,000 people suffer strokes annually and of those, one-third die within a month after the stroke, he said.

AUSTIN, TX (MAY 1) UPI - Two University of Texas fraternities that were involved in racial incidents last month were suspended Tuesday for one year and ordered to perform 1,200 hours of community service.

In addition, Delta Tau Delta and Phi Gamma Delta will be required to enroll in ''multicultural training'' through the 1994-95 school year and to participate in chapter development activities.

After reinstatement, both fraternities will be on probation for one year, said Sharon Justice, UT dean of students.

''I have tried to design the penalty so that it is appropriate for the offenses that were committed in these cases,'' said Justice. ''I certainly believe punishment is justified, but I do not want my decision merely to be punitive, but also to be educational.''

Racial tensions flared on the 50,000-student campus after the two incidents that happened a month ago at Round-Up, an annual spring student and alumni celebration.

Racial slurs were found painted on an old car outside the Delta Tau Delta fraternity house after a parade on Apr. 6. And the Phi Gamma Delta fraternity, also called Fijis, sold T-shirts on Apr. 7 emblazoned with a caricature of ''Sambo.''

The incidents at the off-campus fraternity houses sparked student marches and rallies, including an Apr. 13 rally at which some 400 students booed and shouted down UT President William Cunningham.

Neither Cunningham nor Vice President for Students Affairs James Vick would comment Tuesday because of the possibility the fraternities might appeal.

There was no immediate comment from student body president Toni Luckett, who is black and has been a protest leader.

Justice said the community service to be performed by each fraternity during the next 12 months must ''emphasize exposure to the needs and accomplishments of African-Americans in Austin.''

Each fraternity member must perform at least five hours of the community service and participate in 20 hours of ''approved multicultural training'' during the next year.

Suspension of the fraternities as campus organizations means they will not be alowed to use UT facilities, participate in intramural sports, raise funds on campus, sponsor or participate in any campus performances or

other events, publicly assemble or demonstrate, install a booth or post signs on campus.

#90121u2092 05/01/1990 ~United Press International

LOS ANGELES (MAY 1) UPI - Warner Bros. announced Tuesday it has reached an agreement with Andrew Lloyd Webber to produce a film based on his hit musical ''Phantom of the Opera.''

The movie, scheduled to begin shooting later this year with Michael Crawford reprising his Tony award-winning role, is expected to be in theaters by Thanksgiving 1991.

The announcement brings to reality a long-held dream of Lloyd Webber, who has enjoyed huge financial success in the theater but has never succeeded in crossing over into the film industry.

''Film has always fascinated me and I think there's great possibilities there. We really hope to bring 'Phantom' to the screen,'' Lloyd Webber said in an interview several months ago. ''It's something I've wanted to do for a long time.''

Co-produced by Lloyd Webber and Warner Bros., the film version of the hit musical, which opened in London in 1986, will feature Crawford and his original co-star, Sarah Brightman, Lloyd Webber's wife, in the roles of the Phantom and Christine.

''With Andrew Lloyd Webber, Michael Crawford and Sarah Brightman the integrity of the original will be carefully maintained,'' said Mark Canton Warner Bros. executive vice president.

Crawford left the production's Los Angeles company Sunday after performing the part more than 1,000 times.

''I'll be getting a long-deserved rest until we start the filming,'' Crawford said.

Joel Schumacher, who directed ''St. Elmo's Fire'' and ''The Lost Boys,'' has been tapped as director of the film with Britain's well-known Sir Kenneth MacMillan assigned as choreographer.

Lloyd Webber, considered theater's most succesful impresario, has also written the hits ''Cats,'' ''Starlight Express,'' ''Evita'' and ''Jesus Christ Superstar,'' which was also made into a film in the 1970s, but Lloyd Webber was not involved in that production.

''Phantom of the Opera'' is the dark, yet sometimes comic, tale of the

misanthropic Phantom who lives under the Paris Opera House and is obsessed by the ingenue soprano Christine.

#90121u2098 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - Cuba charged Tuesday that U.S. military exercises in the Caribbean were ''a rehearsal'' for invading Cuba and said its armed forces would hold their own maneuvers to prepare for an attack.

''Three (U.S.) military maneuvers scheduled to take place in early May seem to be a rehearsal of a military aggression against our country,'' Cuba said in a statement released Tuesday through the Czechoslovakian

Embassy, where Cuba maintains a special interests section.

The statement said the U.S. maneuvers were unwarranted in light of sweeping changes in Eastern Europe that have all but eliminated the Warsaw Pact, and changes in Central America that have led to the installation of a U.S.-backed president in Panama and a U.S.-supported president in Nicaragua.

''At this specific point in time, this spectacular deployment of manpower and military equipment with warlike intentions lacks a justifiable stance '' said the statement, signed by the Ministry of the Revolutionary Armed Forces.

Pentagon spokesmen denied that the exercises threatened Cuba, saying they were being conducted far from the island and were not on the massive scale Cuba described.

Cuba said the United States launched ''Ocean Venture'' naval exercises April 20, and was planning simultaneous ''Global Shield'' maneuvers that would simulate a U.S. response to a nuclear war. It said last year's ''Global Sheild'' military exercises included a practice airstrike against Cuba, 70 miles off the coast of Florida.

The statement said ''Ocean Venture'' was utilizing an amphibious landing ship, two LST-type landing ships and two military transport aircraft it claimed could be used to reinforce American troops at the Guantanamo Bay Naval Base the United States maintains on Cuba.

At the same time, Cuba claimed, the United States planned to conduct defense exercises known as ''Defex'' at the Guantanamo base.

''We find this conincidence to be rare and dangerous,'' the statement said.

Pentagon spokesman Air Force Lt. Col. Rick Oborn denied the charges, saying that the annual ''Global Shield'' exercise would take place ''nowhere near Cuba'' and that ''Ocean Venture'' is an amphibious exercise involving only seven ships. He said he had never heard of the ''Defex'' exercise that Cuba cited.

Cuba said in its statement that the 82nd Airborne Division, the 101st Air Assault Division and the 24th Mechanized Infantry Division would take part in the exercises, which would use B-1B and B-52 bombers, numerous other aircraft and the battleship BB-64 Wisconsin.

Oborn said bombers would only be operating in conjunction with ''Global Shield,'' and that some parachutists would be dropped on Puerto Rico in the ''Ocean Venture'' exercise.

The Cuban statement said simultaneous exercises ''renew tensions and let an open door to the possibility of a United States government attack against Cuba.''

Cuba said it had implemented measures to deter a surprise attack, but did not say what steps had been taken.

''Our armed forces and our people will accordingly hold the required exercises and maneuvers,'' the statement concluded.

Cuban spokesmen at the Czecholoslovakian Embassy could not be reached for comment because of the May Day holiday.

Cuba's Fidel Castro, who has staunchly stood by his communist principles, has become increasingly isolated in the region and in the world.

The U.S. invasion of Panama in December toppled Panamanian strongman Manuel Noriega, a sometimes Cuban ally, and Nicaraguans in February voted out of power the Sandinista government that had forged close ties with Castro.

Democratic reform in Eastern Europe and the Soviet Union has led to the virtual demise of communism in countries Cuba had grown to depend on for trade concessions and military support.

#90121u2109 05/01/1990 ~United Press International

JERUSALEM, ISRAEL (MAY 1) UPI - A militant Israeli settlement leader was sentenced Tuesday to one year in prison, with seven months suspended, for the 1988 slaying of a Palestinian shopkeeper in the West Bank town of Hebron.

Rabbi Moshe Levinger is the most well-known settlement leader convicted in the shooting death of an Arab during the 28-month-old Palestinian uprising against Israel's occupation of the West Bank and Gaza Strip. His indictment stunned the settlement community, of which he is a leader in the militant Gush Emunim, or Block of the Faithful.

As part of a plea bargain, the Jerusalem District court reduced the original charge of manslaughter in the Sept. 30, 1988, slaying of Khayed Salah to causing death by negligence.

Salah and a customer were standing outside his shoe store when Levinger began shooting randomly toward shops and pedestrians during the incident.

''The defendant wrongly and unintentionally caused the death of a person due to a rash action, illegally injured a person while carrying a weapon

and illegally vandalized property,'' the court said in its ruling.

Levinger will serve five months in prison and seven months suspended on the condition he does not commit ''any violent criminal action'' for two years after his release, the district court said in handing down Levinger's eighth criminal conviction.

In an interview with Army Radio after the sentencing, Levinger blamed former Defense Minister Yitzhak Rabin for failing to control the violence in the territories. Levinger said he opened fire after his family car was attacked by ''tens of rioters with hundreds of stones'' while driving through Hebron and after they stopped at a military checkpoint.

The court held that Levinger's life was not in danger but there was justification for his feelings of danger and fear.

''I was in a dangerous situation, and in this situation they claim that I did not act exactly as one should act,'' Levinger yold Army Radio. ''Maybe I could have shot in a different way, opened fire in a different way.

''It is possible that I was not exactly accurate. ... I do not think that anyone else who was in such a difficult situation could have acted better.''

Levinger, injured last week when hit on the head by a stone while walking in Hebron, said he and his friends would continue to travel along West Bank roads and ''if we will be in a difficult situation we will shoot.''

A spokeswoman for B'tselem, an Israeli human rights information center, criticized Levinger's sentence as too light in comparison to the sentences given Palestinians in the territories for lesser crimes.

The stiffest penalty against a Jewish settler in connection with a Palestinian death during the uprising was against a resident of the West Bank settlement of Shiloh. Yisrael Ze'ev was sentenced to five years in prison, with two years suspended, for shooting and killing an Arab shepherd who had brought his sheep to graze near the Jewish settlement.

B'tselem said 29 Arabs in the Israeli-occupied territories are believed to have been killed by Israelis during the Palestinian uprising. Of those, indictments have been presented in four cases, with two convictions and two trials pending.

In the Hebron incident, the original court indictment said Levinger opened fire after stones were thrown at his car while driving through the West Bank Town. He fired randomly, killing Salah and wounding another man who were standing outside Salah's shoe store, the court said. The rabbi also overturned several market stalls during the incident.

Levinger led the first group of Jewish settlers to Hebron in the spring of 1968 after Israel gained control of the West bank, 19 years after Jordan banned Jews from living in the town which is revered by both Jews and Moslems.

Shortly after Israeli authorities forced Levinger's group out of Hebron, the Jewish settlers established the nearby West Bank community of Kiryat Arba. Levinger and his followers, however, eventually restablished their presence in the center of Hebron and there have been periodic flare-ups in the conflict between Jews and Arabs there.

WASHINGTON (MAY 1) UPI - The following is a state-by-state list of the military construction projects in the United States, and estimated cost, that Defense Secretary Dick Cheney has ordered to be reviewed for possible cancellation.

Alabama

Army's Applied Instruction Facility, Fort McClellan; $2.7 million.
Army's Laboratory Facility Addition, Redstone Arsenal; $17.5 million.
Navy's Mess Hall, NS Mobile; $880,000.
Navy's Physical Fitness Facility, NS Mobile; $2.2 million.
Navy's Site Improvement Mitigation, NS Mobile; $865,000.
Air Force's Software Dev Fac-PH III, Gunter AFB, $6.4 million.

Arizona

Air Force's add to flight sim., Luke AFB; $1.9 million.
ADAL Sqdn Ops For, Luke AFB; $807,000.
Dormitory, Luke AFB; $3.2 million.
Munitions Storage Igloos, Luke AFB; $770 million.
A-10 add to alter A/C engine shop, Davis-Monthan AFB; $2 million.
Aircraft Maintenance Dock, Davis-Monthan AFB; $2.2 million.
Traffic management complex, Davis-Monthan AFB; $4 million.
Relocate U.S. Customs, Davis-Monthan AFB; $950,000.

Arkansas

Air Force's civil engineering shop facility, Eaker AFB; $2.7 million.
Munitions Convoy roads, Eaker AFB; $500,000.
Water well and storage tank, Eaker AFB; $850,000.
Improvements to family housing, Eaker AFB; $475,000.
Improve Wherry Hsg, Eaker AFB; $175,000.
Housing community plan, Eaker AFB; 60,000.

California

Army's automated record fire range, Fort Ord; $2.45 million.

Army's microwave/radar maint. fac., Sacramento Army Depot; $3.9 million.
Navy's bachelor enlisted quarters, NAF El Centro; $7.2 million.
Navy's child care center, NAS Moffett Field; $1 million.
Navy's water supply system, PWC San Francisco; $3.55 million.
Navy's missile engagement sim. arena, China Lake; $17.5 million.
Navy's family housing, NAS Moffett Field; $6.6 million.
Navy's new family housing construction, San Francisco; $28.35 million.
Navy's pier mods and mess hall, NS Treasure Island; $5 million.
Air Force's alert crew facility, Beale AFB; $3.1 million.
Dormitory, Beale AFB; $5.6 million.
U2R-weather shelter, Beale AFB; $3.52 million.
Upgrade alert complex, Beale AFB; $1.25 million.

Connecticut
Navy's electromagnetic systems laboratory, NSS New London; $12.6 million.

District of Columbia
Navy's laboratory expansion, Washington Naval Observatory; $2.5 million.

Florida
Air Force's addition to computer services center, Eglin AFB; $9.9 million.

Illinois
Army's modernization with dining facility near St. Louis; $3.75 million.

Kentucky
Army's physical fitness training center, Fort Knox; $5.42 million.

Maryland
Army's ADP facility addition, Aberdeen Proving Ground; $1.7 million.

Massachusetts
Upgrade to geophysics laboratory, Hanscom AFB; $5.6 million.

Michigan
Navy's reserve center rehab, NAF Detroit; $1 million.

Mississippi
Navy's general warehouse, NS Pascagoula; $1.11 million.
Bachelor enlisted quarters, NS Pascagoula; $3.94 million.
Magazines, NS Pascagoula; $3.14 million.
Physical fitness facility, NS Pascagoula; $2.22 million.

Missouri
Marine Corps' finance and data processing center, Kansas City; $10 million.

New York
Navy's bachelor enlisted quarters, NS New York; $4.6 million.
Child care center, NS New York; $3 million.
Utilities and site improvements, NS New York; $18 million.
Land acquisition, NS New York; $3 million.

Ohio
Air Force's installation of fireplaces in SOQs, Wright-Patterson AFB; $56,000.

Oklahoma
Air Force's integrated support, Tinker AFB; $17 million.
Secure storage, Tinker AFB; $5.2 million.
Avionics facility, Tinker AFB; $9.6 million.
Land acquistion, Altus AFB; $2.3 million.

Pennsylvania
Navy's hazardous and flammable storehouse, Phil Naval Shipyward; $10 million.

South Carolina
Air Force's add to acft maint. facs., Myrtle Beach AFB; $2.35 million.
ADAL field training, Charleston AFB; $1.9 million.
Shorfield assault strip, Charleston AFB; $2.75 million.
Upgrade family housing, Myrtle Beach AFB; $4.1 million.
Housing community plan, Myrtle Beach AFB; $115,000.

Texas
Army's barracks modernization, Fort Hood; $11.2 million.
Battalion headquarters, Fort Hood; $2.8 million.
Vehicle Wash facility, Fort Hood; $7 million.

#90121u2148 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The airline industry offered a reward of up to $1 million Tuesday for information leading to the arrest and conviction of international air terrorists.

The reward, announced by the Air Transport Association, will supplement the $2 million offered by the State Department for the same information.

Law enforcement and airline officials hope the $3 million in reward money will be enough to foil potential terrorist acts by enticing conspirators to turn in their partners in crime.

''The U.S. airline industry is committed to using every resource at its disposal to make its passengers the safest in the world, and if that means offering a bounty, we'll do it,'' said Robert J. Aaronson, the association's president.

''Three million dollars should be a powerful incentive for people within, or close to, terrorist organizations to reveal plots before they are hatched,'' Aaronson said.

Particularly, it is hoped the additional reward money will encourage someone to come forward with information about the 1988 bombing of Pan Am flight 103. The flight suffered a midair explosion over Lockerbie, Scotland, killing all 270 passengers and crew members.

Capt. Bruce Smith, a Pan Am pilot whose wife, Ingrid, was aboard the doomed flight, said the additional reward is the result of efforts by families of the victims of the disaster to bring those responsible to justice.

''This reward is proof that relatives are getting more than sympathy from America,'' Smith said. ''The reward is a milestone, but it's not the end of the road.''

Families of Pan Am 103/Lockerbie, an organization of 160 families of the bombing's victims, supported the reward and is hopefull it will lead to a breakthrough in the case.

There have been no arrests in connection with the bombing, said William Baker, assistant director of the Criminal Investigative Division of the FBI.

Aaronson said the association's members, the nation's major airlines, are

ready ''write the checks'' when the State Department receives information determined instrumental in terrorist convictions.

Morris Busby, the State Department's counter-terrorism ambassador, said some of the department's $2 million in reward money already has been distributed for information obtained.

He declined to say how much has been paid out or to identify the cases for which the information was used.

BUCHAREST, ROMANIA (MAY 1) UPI - Five leading opposition parties threatened Tuesday to boycott the May 20 elections unless the provisional government halts what they charged is a ''sabotage campaign,'' including murder, against them.

The opposition groups, facing an uphill struggle against the dominant National Salvation Front, alleged in a statement that the government is unfairly restricting their access to the mass media and silencing their candidates through harassment and even violence.

''Our delegates are being violently attacked throughout the country, and even being murdered,'' the statement said.

Describing the action against them as a ''sabotage campaign,'' the parties accused the government of systematically blocking the distribution of campaign literature and disrupting their political rallies.

The statement was signed by leaders of five opposition parties, including the leading opposition groups the National Liberal Party and the Peasant Party.

The ruling National Provisional Unity Council, in a prepared statement, said it was politically neutral and committed to ''guaranteeing equal chances'' for all parties. The statement did not address the specific allegations of the opposition groups, however.

Cristian Unteanu, spokesman for the provisional government, said a formal response to the allegations was being drafted.

With less than three weeks remaining before the polls, the National Salvation Front is believed headed for a landslide victory in Romania's first democratic elections in over 40 years, despite last week's anti-government demonstrations in Bucharest and other cities by protesters demanding the removal of former communists from the government.

The Front took power after the Dec. 22 overthrow of communist dictator Nicolae Ceausescu, who was quickly executed, and is the leading force in the provisional government.

The statement's reference to political slayings apparently was an allusion to two Peasant Party candidates who were hacked to death by an ax-wielding mob while campaigning in a provincial town in February. Opposition groups have never publicly accused the provisional government of being behind the killings.

The five parties said their access to radio and television is restricted and any statements that do make the airwaves are either not broadcast in full or are interspersed with comments by the news readers.

In contrast, the National Salvation Front has unlimited access to the state-run news media and uses them in much the same way as the former communist regime, the parties said.

''It reminds us of the deisgraceful election campaign which preceded the fixed elections of 1946,'' the statement said.

WIESBADEN, WEST GERMANY (MAY 1) UPI - Freed American hostage Frank Reed enjoyed a steak and a beer on his first day of freedom in 3 1/2 years Tuesday, but the White House tried to damp optimism over the early release of six remaining Americans held in Lebanon.

The Iranian government, which along with Syria helped push for Reed's release Monday, remained silent Tuesday. Sources in Tehran said Iran and its Moslem fundamentalist allies in Lebanon were waiting for a gesture from the Bush administration to reciprocate for the release of two American hostages in just over a week.

Reed, a 57-year-old educator from Massachusetts who was kidnapped in Beirut Sept. 9, 1986, and kept blindfolded most of his time in captivity, was undergoing medical tests at a U.S. military hospital in West Germany.

President Bush offered Reed ''greetings from the American people'' by telephone Monday while meeting with ex-hostage Robert Polhill, who was freed April 22. White House press secretary Marlin Fitzwater said Bush put Polhill on the line with Reed and the two former hostages ''exchanged greetings.''

Bush welcomed Reed's release as ''joyous news'' but rejected calls from Iran and Syria for the United States to reward their help with concrete actions.

''The ball has always been in their court,'' Fitzwater said. ''It will be as long as there are hostages yet to be released.''

''We have to take the situation as we find it today,'' he said. ''But I don't think we can register long-term optimism.''

An editorial in the official Tehran Times, published Monday just prior to

Reed's release, said the ball would be in the Western court after he was set free, and that the Islamic Republic would want to see a show of goodwill in return for their goodwill.

Syrian Foreign Minister Farouk Al Shaara said after delivering Reed to U.S. Ambassador Edward Djerejian: ''I hope this second gesture of good will will be met with a similar gesture of good will (from the United States) in the process of releasing the hostages.''

Bush said he could not explain what prompted the kidnappers to free Polhill and Reed, and added a ''thank you'' was all Syria and Iran could expect as long as other hostages are held.

Reed, seemingly in good spirits after his ordeal, was reunited with his Syrian Moslem wife Fahimeh Dalati Tuesday in Wiesbaden. Reed was freed Monday in Beirut and turned over to Syrian troops, who drove him to Damascus. From Syria, he flew in a U.S. Air Force C-141 Starlifter to Wiesbaden.

''Dr. Reed is weak and tired from his ordeal,'' said a hospital spokesman. ''He has lost significant weight and muscle mass from a lack of exercise and a marginal diet.''

''Upon arrival Dr. Reed asked for a Heineken and a large steak cooked medium-rare. Dr. Reed got what he asked for,'' the spokesman said.

He said initial checks on Reed ''revealed no major medical problems'' and that Reed would probably remain at the medical center two to three days.

In an interview with Syrian television shortly after his release and in brief remarks to reporters in Damascus, Reed described his ordeal.

''It was lonely. It was boring,'' Reed said.

Reed said being a hostage is more difficult than being a prisoner because ''When you are a prisoner, you know that you have a sentence and how long you are going to stay.''

He said he was given liquid food and had the opportunity to take a shower.

Reed and Polhill, 55, were the first American hostages freed since three others were released in the fall of 1986 as part of the secret Iran-Contra arms-for-hostages swap between the United States and Iran.

Iran and its allies in Lebanon have been trying to trade the remaining Western hostages for the release of 400 Shiite Moslems held by Israel, 16 Shiites convicted of terrorist bombings in Kuwait and Moslem fundamentalist cleric Sheik Abdul Karim Obeid, who was abducted by Israeli

commandos in July.

Iran also wants the United States to release the $8 billion to $9 billion in Iranian assets it froze after Iranians seized hostages from the U.S. Embassy in Tehran in 1979.

Fitzwater Tuesday renewed a U.S. call for the ''release of all hostages'' without saying whether it applied to the prisoners held by Israel.

''Israel is a sovereign nation,'' he said, ''and we will not attempt to pass judgment on any specific act or to give definition to this situation.''

Fitzwater indicated that U.S. refusal to bargain for the release of the hostages did not preclude small steps to underline Bush's promise that ''goodwill begets goodwill.'' He cited public U.S. gratitude, respect for the Tehran government and a stated interest in better relations and dialogue.

But residents of Tehran said Iranian officials appeared miffed about a State department report released Monday which mentioned Iran and Syria as nations which support terrorism.

The official Islamic Republic News Agency said in a commentary late Tuesday: ''The U.S. State Department accuses Iran of being a terrorist state whereas there are abundant evidence which would direct the same accusation towards the United States.''

Reed, who moved to Lebanon in 1977 and converted to Islam, was an educational adviser to the Lebanese International School in the Moslem sector of the Lebanese capital at the time he was abducted. He served five years as headmaster of the U.S.-affiliated International College.

NEW YORK (MAY 1) UPI - The television series ''Twin Peaks'' will broadcast its concluding - but maybe not conclusive - episode on a Wednesday night, ABC announced Tuesday.

''Peaks,'' the off-beat mystery from David Lynch and Mark Frost that has developed a cult-like following, ordinarily airs on ABC Thursday nights, 9-10 p.m. Eastern time. It will air in that time period for its fifth and sixth episodes, this week and next.

The seventh and final episode of the season will air on Wednesday, May 23, 10-11 p.m. Eastern time, preempting ''Equal Justice'' one time only.

The mystery about ''Twin Peaks'' involves more than the murder of a character on the show. Neither the producers nor the network will say whether the crime will be solved this season, or whether viewers will have to wait until fall. Adding to that mystery, ABC has not yet announced whether ''Twin Peaks'' will return to its fall schedule.

''Twin Peaks'' will be replaced on Thursday nights by reruns of ''The Young Riders,'' starting May 24.

Prior to that, ''The Young Riders,'' which has been on hiatus, will return to the schedule for a two-part season finale Monday, May 7 and May 14, 8-9 p.m. Eastern time.

#90121u2216 05/01/1990 ~United Press International

FAYETTEVILLE, NC (MAY 1) UPI - The Fayetteville Observer, North Carolina's oldest newspaper, and the Fayetteville Times, one of the newest will combine into one morning newspaper within a year, publishing company officals said Tuesday.

Publisher Ramon L. Yarborough said the merger will produce a newspaper that retains the best features of the afternoon Observer and the morning Times. The combined newspaper will have a larger news staff than either of the individual newspapers and will be able to provide more thorough local and regional news coverage, he said.

The merger, tentatively scheduled for late fall or early spring, leaves the state with just two cities, Asheville and Durham, that have morning and afternoon newspapers.

''It's just a sign of the times,'' said Terry Saylor, executive director of the N.C. Press Association. ''The newspaper industry needs a boost.''

Yarborough said the need to buy equipment to carry the company through the next decade made it desirable to combine the newspapers earlier than had been anticipated. With the merger pending, he said, even day-to-day decisions had become difficult.

The merger had been delayed because owners and managers did not want to disrupt work schedules and careers of newspaper workers, Yarborough said. Early planning will allow the company to make staff reductions through turnover and retirements with few layoffs, he said.

The decision to combine the two Fayetteville newspapers is the latest in a long line of decisions that left four other North Carolina cities without an afternoon newspaper during the 1980s.

The casualties include the Greensboro Record, the Sentinel in Winston-Salem and the Charlottle News. The Raleigh Times was added to the list last year.

All were respected newspapers with strong editorial viewpoints and had concentrated on local coverage, often beating their morning rivals to the punch on local stories.

Officials at the two remaining newspapers' publishing companies say they have no plans to stop their afternoon publications.

''...At this point, we still have a healthy afternoon paper,'' said Larry Pope, editor of the Asheville Citizen. ''We're not considering any change in the make-up of our newspapers.''

The Citizen has a morning circulation of 50,000 while the Asheville Times has 9,000 in the afternoon.

''There are no changes planned, as far I know,'' said Larry Ham, managing editor of the Durham Morning Herald. ''We're planning to move into a new building. We didn't plan a new building based on a merger.''

Ham said the merger of the Fayetteville newspapers is troubling ''because it is one of the few newspapers in the country where the afternoon paper is stronger than the morning paper.''

''You can't ignore the demographic realities. That's what is fueling it. It came with the decline of tobacco and textile mills,'' he said.

The first step toward the conversion will be taken around June first when the staffs of the Observer and Times are combined. This will allow the company tooperate with fewer workers without damaging the quality of its products, and it will help implement staff reduction through attrition, Yarborough said.

The Observer's circulation exceeds 40,000 and that of the Times exceeds 30,000.

#90121u2217 05/01/1990 ~United Press International

(MAY 1) UPI - Defense Secretary Dick Cheney says the UNcertainty over the future level of military funding is causing him to extend a freeze on seven-BILLION-dollars in new military construction. The freeze... originally scheduled for January 24th through April 30th... is being stretched to June 15th. Cheney also ordered a review of more than 200 congressionally approved projects for possible cancellation.

Convicted killer John List avoided the death penalty for the 1971 slaying of his family because the state did NOT have capital punishment at the time. But an Elizabeth, New Jersey, judge still handed down a harsh sentence today... giving List five consecutive life prison terms. List apologized for the murders of his wife, three teen-aged children and elderly mother and asked for forgiveness and prayers.

The joy felt by the United States with the recent release of hostages Frank Reed and Robert Polhill is NOT being felt by the International Committee of the Red Cross. An I-C-R-C delegate who had been trying to win the release of two Swiss workers kidnapped in Lebanon six months ago returned to Switzerland, saying she was ''very disappointed'' at having failed. The envoy held a series of talks with Lebanese and Palestinian groups during a six-day mission in Lebanon.

The Himalayan kingdom of Nepal is celebrating May Day for the first time today, as King Birendra met with the country's new prime minister. Demonstrations persist even though King Birendra bowed to demands for democratic reforms, including a multi-party government. A town 110 miles west of the capital of Katmandu was reported quiet, after two people died yesterday in clashes between pro-democracy protesters and supporters of the fallen partyless system.

#90121u2218 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The Defense Department said Tuesday it will sponsor a ''Journey to Victory'' celebration in Europe June 4-8 that will honor President Dwight D. Eisenhower by tracing the route taken by Allied forces from London to Paris in 1944.

The event - which marks the beginning of the department's commemoration of the 50th anniversary of World War II - will also be part of the centennial celebration of Eisenhower's birth in 1890, the announcement said.

It will highlight Eisenhower's military service, with particular emphasis on his role as supreme commander of the Allied Expeditionary Forces in Europe.

The commemoration will begin June 4 with a ceremony at Norfolk House, site of Gen. Eisenhower's London headquarters, and will be followed by a ceremony at Greenham Common, where Eisenhower spoke to the soldiers of the 101st Airborne Division before they took off to jump into German-occupied France on D-day.

The family delegation, led by the president's son, John Eisenhower, will participate in a wreath-laying ceremony at the Normandy American Cemetery in France on June 6, the 46th anniversary of the Allied invasion of

Normandy.

The commemoration will conclude on June 8 with a combined Eisenhower-de Gaulle centennial observance in Paris at the Arc de Triumph.

#90121u2222 05/01/1990 ~United Press International

(MAY 1) UPI - May Day observances in the Soviet Union and Eastern Europe Tuesday reflected newly won freedoms, while workers around the world used the 100th international labor day to press demands ranging from improved human rights to the dismantling of U.S. military bases.

Many Eastern Europeans celebrated their first communist-free May Day in more than 40 years with lines of traffic bound for the mountains and beaches replacing the usual workers' parades.

Glasnost surged onto Moscow's Red Square behind the May Day parade with marchers booing and shouting insults at President Mikhail Gorbachev over his handling of Lithuania and economic reforms.

''Shame, shame,'' some marchers railed at Gorbachev and the other Soviet leaders watching from atop the Lenin Mausoleum. Others were heard shouting ''Resign'' as the officials turned and left.

Other marchers from ''informal groups'' - allowed onto the square at the end of an official parade and rally organized by trade unions - carried Lithuanian flags and chanted ''Freedom to Lithuania'' in support of the Baltic republic in its battle with the Kremlin over independence.

An estimated 70,000 people from both sides of the Berlin Wall converged on Germany's former Parliament for the first joint May Day rally in more than 40 years attended by East and West German labor groups. They heard speeches about the need for German unity, as thousands of youths at a second rally called for the nation to remain divided.

More than 20,000 East Germans streamed across frontier points, most in a huge procession through Potsdamer Platz, the former heart of Berlin that was reduced to a wasteland by wartime bombing and postwar division.

Accustomed to being herded like cattle into the streets and public squares for communist-sponsored May Day ceremonies, East Europeans were delighted this year simply to be left alone.

Solidarity founder Lech Walesa went fishing and did not take part in the low-profile May Day parade sponsored by the East Bloc's first independent labor movement in his hometown of Gdansk.

The Polish Communist Party attracted only several thousand supporters to participate in this year's May Day parades and were met by anti-communists hurling tear gas grenades and burning a poster with the Soviet emblem.

In Bucharest, Romania, four months after the revolution that toppled ruler Nicolae Ceausescu, there was a conspicuous absence of government-sponsored rallies or ceremonies of any kind. The only parade was a steady stream of klunky Soviet-made cars heading out of the city for the countryside or for resorts in the Transylvanian Alps and along the Black Sea.

''Romanians are very tired,'' said Mihai Radu, 28, an official tour guide in Bucharest. ''We don't know the feeling of going out on the streets of our own free will. We only know wht is like to be pushed.''

Hungarians skipped the traditional May Day workers' parade in favor of picnics sponsored by the newly formed independent trade unions.

In Prague, remnants of Czechoslovakia's Communist Party threw a very non-traditional May Day bash in a grassy lot. Polkas blared from loudspeakers and volunteers dished out free goulash and beer and sold raffle tickets to fill the party's coffers in advance of the June elections.

''We came because they give us free beer,'' admitted one of the revelers, 26-year-old mechanic Raymon Biel.

GREENBELT, MD (MAY 1) UPI - NASA engineers Tuesday tested the Hubble Space Telescope's antennas and pointing system and hit yet another glitch - this time in gyroscopes used to position the giant orbiting observatory.

''They really don't know what the problem is,'' said NASA spokesman Jim Elliott. ''But they don't think it's serious.''

The problem occurred at about 1:13 a.m. while engineers at the Goddard Space Flight Center were testing the $1.5 billion telescope's three ''fine guidance sensors,'' which are used to locate and lock onto celestial targets.

''All three found stars and transmitted their locations to Goddard for further identification by astronomers on the ground,'' a NASA statement said.

But while conducting the tests, engineers ''ran into what they called a 'frequency anomaly' while they had two of the sensors in a locked position '' the statement said.

At the time, the spacecraft's four gyroscopes, which are used to help determine the telescope's position, were operating at a ''low-rate observer mode,'' the statement said.

''When the frequency anomaly developed... it triggered the spacecraft's safemode body rate test'' - a test of whether the craft is safe - ''and switched to the higher rate mode,'' the statement said.

''When the gyros switched, the engineers terminated the activity. They are investigating the cause of the anomaly today,'' the statement said.

The glitch occurred just after technicians completed nearly five hours of tests on the telescope's two ''high gain antennas'' as part of an effort to prevent them from becoming jammed again.

The 12-ton telescope was placed into orbit last week by the space shuttle Discovery for a 15-year mission to search for clues about the birth, structure and destiny of the universe by studying planets, stars and

galaxies more clearly than ever before.

Problems in the initial steps of slowly starting the telesopce forced NASA about a week behind schedule in the eight-month process, delaying the historic first image of the heavens until the weekend at the earliest.

The most significant problem involved one of the telescope's two ''high-gain antennas,'' two parabolic dishes mounted on 15-foot masts on each side of the telescope to beam critical scientific data to astronomers on the ground.

Using computers and a makeshift model made of Tinkertoys and a lamp cord, engineers Sunday determined one of the antennas had jammed when a counterweight hit a loose power cable.

After freeing the antenna, technicians moved both antennas around to determine exactly how far they can go before coming into contact with nearby power cables.

Programmers planned to re-write the computer program that runs the antennas to permanently limit the movement of the antennas, said Jim Moore a telescope project manager.

The changes will probably restrict movement of each antenna 10 percent to 15 percent, Moore said. But he stressed that would not have a significant impact on the telescope's ability.

''We really don't interpret this as a constraint at all to operations. The systems really is way overdesigned,'' he said. ''There realy will be no impact on the planned observing program.''

In addition to investigating the gyroscope glitch, engineers prepared to begin transmitting to the antennas and finally slowly begin turning on the telescope's many systems and five high-tech instruments.

''I think we're ready to roll,'' said Moore. ''I think we should be moving smartly into the activity of getting on with .... starting to turn things on.''

CRAWFORDVILLE, FL (MAY 1) UPI - Residents of rural Wakulla County were shocked Tuesday to find out a promising high-school athlete had died of a gunshot wound after learning his grades would keep him from playing this year.

Shay Barwick, 16, was found shot to death at his home at about 5 p.m. Monday. A spokesman for Sheriff David Harvey would not discuss details of the investigation and would only say that the youth's death ''was by gunshot.''

''I just couldn't believe it,'' said Wakulla County Judge Mike Carter, who had known Barwick for four years.

''He was a confident individual who was strong in his ideas of what he wanted in life, and he had the athletic and mental ability to accomplish whatever he wanted,'' said Carter.

The youth had been expected to start at quarterback for Wakulla County

High School, where a coach said he was considered one of the all-time best athletes the school has produced.

''He was one of the top three athletes of the school ... of all time,'' said Wakulla High's head football coach J.D. Jones.

Friends said Barwick had already caught the attention of some major college scouts and had been looking forward to a good year to improve his chances of college play.

Carter said Barwick came from an athletic family. He had two older brothers who were football standouts, one of whom, Parrish Barwick, had been an offensive lineman at Florida State University and was a successful amateur wrestler.

#90121u2285 05/01/1990 ~United Press International

PANAMA CITY, PANAMA (MAY 1) UPI - Thousands of Panamanian workers shouted ''Get out Yankee invaders'' Tuesday during a May Day march that marked the first sizable anti-American protest in Panama since the U.S. invasion last December.

About 5,000 marchers carried signs and chanted such slogans as ''Here, there, the Yankees will die'' as they walked down Central Avenue in downtown Panama City.

''Nobody likes to be invaded,'' said Alcibiades Jimenez, a public employee at the peaceful march, which ended at noon.

Some marchers carried posters reading, ''Panama: Occupied Territory,'' with a picture of a U.S. soldier arresting a Panamanian.

Until Tuesday's march, organized by the country's three largest unions, there had been no large protests against the December 1989 invasion, which ousted dictator Manuel Antonio Noriega.

The U.S. Southern Command radio station Tuesday morning warned U.S. military personnel to stay away from downtown.

Aniano Pinzon, secretary general of the Panamanian Confederation of Workers asked the crowd, which rallied in downtown Santa Ana Park, to observe a moment of silence for Panamanians killed in the invasion.

The U.S. military says about 500 Panamanian soldiers and civilians were killed in the military operation but unofficial estimates place the death toll as high as 1,000.

Pinzon also called for Dec. 20, the date of the invasion, to be designated a national day of mourning and referred to those killed in the fighting as ''martyrs and heroes of the homeland.''

''Your heroic example in fighting the U.S. invasion and fighting for the rights of poor people in Panama is an example for the world,'' said Diane Goldberg, a union leader from Detroit who was invited to speak at the rally.

The May Day march, an annual event to mark the international labor day, also stressed issues dear to the unions. Workers carried signs rejecting proposed changes in the labor code and called for fired government workers to be rehired.

Leaders of the labor movement, which enjoyed close ties to Panama's military governments over the past 21 years, say the U.S.-installed government of President Guillermo Endara is hostile to unions and that 10,000 public employees, including 150 union leaders, have been fired by the new government.

Under Gen. Omar Torrijos, Panama's populist leader who died in a 1981 plane crash, the government passed a labor code that has helped Panamanian workers maintain a much higher standard of living than their Central American neighbors.

''The government that promises democracy is persecuting the unions and laying off employees,'' Pinzon said in his keynote address.

The Endara government - viewed as an ally of the private sector - is also considering reforming the labor code, which could make it easier to fire unproductive workers and lower overtime wages. The government may also privatize several state-run businesses.

Labor views such moves as hostile to its interests. But the private sector supports such actions and claims that the public payroll is bloated and that state factories are inefficient.

More than four months after the U.S. invasion, unemployment is at least 20 percent and several businesses looted in the wake of the invasion remain closed.

Hector Aleman, secretary-general of the National Federation of Public Employees, said about 15,000 more workers may lose their jobs as the government imposes austerity measures to obtain fresh loans from the International Monetary Fund.

Aleman said the labor movement also feels threatened by government plans to privatize state-run companies and revise the labor code.

''They criticize the workers. They accuse us of being Noriega supporters and want to reduce the force of the unions,'' said Mauro Murillo, secretary general of the National Panamanian Workers Union.

About 30 percent of Panama's 700,000-strong labor force are members of labor unions.

Leftist union leaders, including Aleman and Murillo, were arrested and

detained by U.S. troops for 17 days after the invasion.

There have been no labor strikes since the invasion, although the government has yet to take firm steps to change the labor code or privatize state-run fruit, concrete and sugar companies.

TALLAHASSEE, FL (MAY 1) UPI - At least five shots were fired toward a group of about 40 children on the playground of a middle school Tuesday afternoon, but authorities said no one was injured.

Teachers kept students inside classrooms for the rest of the school day, while law enforcement officers stepped up patrols around Fairview Middle School on the city's southside.

''Fortunately, none of the children was hit and no one in the school was hit,'' said Dick Simpson, spokesman for the Leon County Sheriff's Department.

The incident occurred at about 12:10 p.m., when a burgundy or rust-colored car with a white top was seen to stop at an intersection outside the school grunds.

Witnesses saw a handgun being pointed at the playground about 150 yards away and heard at least five shots fired, Simpson said.

There were at least two male occupants of the car, but authorities had little else to go on.

''The coach and some kids heard sounds coming from the road, which is quite a distance from where they were, and said they sounded like shots,'' said Fairview principal Kae Ingram. ''It could have been shots or backfires or any such thing.''

Ingram said she reported the incident because of concerns through Tallahassee about increased drug and youth violence. Fairview is in a low-income neighborhood.

#90121u2293 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - The dollar ended mixed in thin New York trading Tuesday as most European markets were closed for the May Day workers' holiday and as fewer players than usual showed up in Tokyo amid Golden Week observances.

But foreign exchange traders said the dollar did perk up somewhat on a U.S. purchasing managers report showing manufacturing growth for the first time in 11 months.

The purchasing executives said their index rose to 50.2 percent in April, up from 48.8 percent in March. A reading above 50 percent usually indicates industrial growth.

Trader Stephen Burnett of the Bank fur Gemeinwirtschaft in New York said the report afforded some relief to a down-drifting dollar. But he noted the market was chiefly propelled by mark-yen cross-trading - direct, non-dollar trading of the West German and Japanese currencies.

In late New York trading, the dollar was quoted at 1.6805 West German marks, up from 1.6790 marks Monday. Against Japan's currency, the dollar was changing hands at 158.80 yen, off from 158.95 yen.

When currency markets stall like they have this week, players sometimes turn to technicians, who watch chart patterns instead of economic data.

Technical analyst James Chorek of MMS International's Chicago office said he thought the dollar was in for a "downside breakout," based on a so-called Elliott Wave analysis of dollar-mark price movements.

Chorek said a sequence of four waves culminating in last week's high of 1.7050 marks to the dollar should lead to a "fifth-wave collapse" bringing the dollar below the third wave's bottom at 1.6490.

"I wouldn't be surprised to see us test the all-time low of 1.5610," set in January 1988, he said.

Other dollar rates: 1.4550 Swiss francs, up from 1.4525; 5.6355 French francs, ahead from 5.6325; and 1,231.50 Italian lire, up from 1,230.25. The British pound advanced to $1.6440 from $1.6410.

While May Day halted most European trading, the pound rose in London to $1.6395 against $1.6375 in quiet activity ahead of bellwether local elections Thursday.

The pound was "trapped within a narrow range because dealers have put themselves on hold" until results of local council elections are known, said Warren Pinner, a Kleinwort Benson dealer.

But James Capel Co. analyst Gwynn Hache said the pound's strength probably would not last. Local election results and adverse inflation news expected next week were likely to pressure the unit, he said.

In Tokyo, the dollar edged down against the yen in thin trading while most players stayed on the sidelines between "Golden Week" holidays, closing at 158.90 yen, off slightly from 159.08 Friday.

The Tokyo foreign exchange market was closed Monday and will close Thursday and Friday for the observance of holidays. Players also were waiting for key U.S. economic data like the April employment report.

Republic National Bank in New York closed cash gold at $370.25 an ounce, up from $369 Monday. The New York Commodity Exchange settled spot gold at $370 an ounce, up from $368.40. Trading halted for May Day in Zurich, where gold closed Monday at $367 an ounce. London gold moved up to $368.25 an ounce from $367.25 the previous day.

Republic closed cash silver at $5.045 an ounce, up from $4.955 Monday. Comex spot silver ended at $5.013 an ounce, up from $4.932. Silver, which was at $4.95 an ounce Monday, did not trade in Zurich. London silver rose to $4.97 an ounce from $4.92.

#90121u2298 05/01/1990 ~United Press International
WASHINGTON (MAY 1) UPI - The House, on a party line vote, passed a $1.2 trillion Democratic budget Tuesday that slashes Pentagon funds and increases domestic spending by larger amounts than President Bush wanted.

The vote was 218-208 in favor of the Democratic plan. None of the 176 House Republicans supported the Democratic spending blueprint while 34 of the 258 Democrats broke party ranks and opposed it.

House Speaker Thomas Foley, D-Wash., in his first floor speech on legislation, said ''members can be proud to vote for this budget'' because ''it makes investments in our children, our transportation, our infrastructure.''

''The budget here provides for a transition from a cold war economy to a peacetime economy and that is what we need to do for the future,'' House Budget Committee Chairman Leon Panetta, D-Calif., said in urging passage of the Democratic budget he crafted.

But Assistant House Republican leader Newt Gingrich of Georgia argued against the Democratic budget, saying it reminded him of defense proposals from liberal Democrats.

''This is the Dukakis platform, this is the Mondale platform, this is the Carter presidency, this is the McGovern movement,'' Gingrich said.

''If you believe we are under-taxed, vote for the Panetta (Democratic) budget, if you believe we are under-spending, vote for the Panetta budget '' Rep. Bill Frenzel, R-Minn., ranking member on the House Budget Committee, said in opposition.

Lawmakers earlier defeated, on a 334-90 vote, a ''quality of life'' alternative budget submitted annually by the Congressional Black Caucus. That plan proposed deeper defense cuts and more domestic spending than the Democratic proposal and raised corporate and other taxes.

Democrats had a partisan field day bashing Republicans for their last-minute decision not to offer Bush's $1.23 trillion spending plan for the federal fiscal year beginning Oct. 1 as a substitute for the Democratic plan. A Democratic attempt to bring it to the floor was objected to by Republicans.

House Republican leader Bob Michel of Illinois said neither plan means much since final budget decisions would be made later. Republicans have been pushing for a ''budget summit'' between Congress and the White House.

''It's all a charade for the moment so why waste the time,'' Michel said

when asked why Bush's budget was shelved. ''There's not going to be anything decided.''

He said some numbers in Bush's budget, prepared last winter, were ''totally unrealistic'' because of changing world and economic conditions.

Foley told reporters that the unexpected GOP move was a ''total abandonment'' by Republicans of Bush's budget and the spending priorities it represented.

''This is, in effect, a quiet, if secret, repudiation of the president's proposals,'' Foley said.

Panetta said Democrats had assumed the GOP could get 120 to 150 votes for Bush's budget from the 176 House Republicans.

''Obviously, that's not the case,'' Panetta said, grinning. ''Republicans are copping out of the (budget) process.''

But Frenzel, the ranking Republican on the budget panel who was to offer Bush's plan, acknowledged ''there are pockets of resistance to the Bush budget in a number of areas (among House Republicans).''

But he declined to say whether support among Repulbicans for the Bush plan was so low as to embarrass the White House.

Some Republicans are opposed to Bush's proposals to scrap annual cost of living raises for federal retirees, cut agriculture programs and slash $5.5 billion from Medicare, Frenzel said.

Frenzel said Republicans decided it would be better to focus attention on expected near unanimous GOP opposition to the Democratic plan than to show a split in Republican ranks over Bush's plan.

The five-year Democratic plan includes $295 billion in Pentagon spending next year with long-term defense spending authority set at $283 billion - the amount that can be obligated in one year but spent over several years. That is $8 billion less in outlays and $24 billion less in spending authority than Bush sought.

Democrats also proposed new domestic spending of about $6 billion for a ''rebuild America'' initiative to funnel more money into transportation, education, research, health and the drug war.

The Democratic blueprint also calls for $1.7 billion in Medicare cuts instead of the $5.5 billion Bush sought. And it eliminates several of Bush's proposed domestic spending cuts.

It adopts the Bush budget's call for $13.9 billion in new taxes and federal revenues in fiscal 1991 without making specific recommendations on how that money will be raised.

It projects a budget deficit of $63.8 billion next year - just below the $64 billion target required by the Gramm-Rudman balanced budget law.

The budget resolution is a non-binding spending, savings, revenue and deficit reduction plan that guides the actions of other committees. It does not go to Bush for his signature or veto but Bush can veto bills implementing the plan.

#90121u2301 05/01/1990 ~United Press International

ANCHORAGE, AK (MAY 1) UPI - The underwater rocks of Bligh Reef that ripped open the Exxon Valdez in America's worst oil spill soon will sprout a large light tower sending out bright warnings to tankers to steer clear, the Coast Guard said Tuesday.

The imposing new Bligh Reef lighthouse is designed to jolt mariners into full awareness of where those steel-ripping rocks lie hidden, said the man who designed the structure for the Coast Guard, engineer Bud Morris.

The Bligh Reef lighthouse, with a flashing white light at the top, will stand 59 feet above water level at low tide, rising from the submerged rocks where the Exxon Valdez ran aground in the first few minutes of March 24, 1989.

Every 4 seconds the tower will flash a bright reminder of the 11-million-gallon oil spill that devastated wildlife, ruined fishing and splattered crude oil on 1,200 miles of shoreline in Prince William Sound and the Gulf of Alaska.

Exxon launched its second season of cleanup Tuesday, sending boats of workers out to islands where its oil infiltrated the environment and remains as thick goo, tar and even weather-hardened wilderness pavement.

A Seattle company, Western Marine Construction Inc., won the $367,000 job to light up Bligh Reef 25 miles south of the Valdez oil terminal. Work will start by July and be finished by mid-August, said Bill Kerzie, a company official. Holes will be drilled 20 feet into Bligh Reef for the steel tower legs.

Bligh Reef is well-marked on charts, well-known to mariners and even sports a small lighted floating buoy - which the Exxon Valdez crew somehow failed to heed, according to statements to the Coast Guard, the National Transportation Safety Board and in the trial of Exxon Valdez skipper

Joseph Hazelwood.

Morris said the lighthouse was designed to be impossible to ignore.

''We're not dealing in technical navigational terms,'' noted the civil engineer for the Coast Guard shore maintenance detachment in Juneau. ''We're dealing in psychological terms. You just can't sit and look at a big bright light for 25 minutes and not respond.''

Referring to what happened on that fateful March night last year, Morris said, ''Maybe you can look at a dimmer light for 5 minutes and not react.''

The new Bligh light will have a 9-mile range and be visible for some time to tankers traveling 12 mph, Morris said. Bligh buoy floats 9 feet above the surface and a range of 3 miles.

Solar panels will power batteries that turn on the light. Alaska is so far north the panels must be almost vertical, pointing south, but Morris said the panels will collect enough energy to keep the light flashing during long dark winters.

The steel structure of the lighthouse will be bright flourescent reddish orange and white to glow colorfully on gloomy overcast days, Morris said.

When the Exxon Valdez smashed into Bligh Reef, it was on a detour around icebergs calving from nearby Columbia Glacier. Morris said he designed the steel structure to resist the ''growlers'' and ''bergie bits,'' as mariners refer to the chunks of ice floating in Prince William Sound.

Coast Guard Rear Adm. David Ciancaglini, the federal on-scene commander for the Exxon spill cleanup and the top-ranking Coast Guardsman in Alaska, said the new light tower will make tanker traffic safer, but he also said, ''It was not so important to me how high it was because to me the other one was quite sufficient. How they hit Bligh Reef I have no idea. But the captain is ultimately responsible. ... Masters are expected to navigate those ships properly.''

However, after the wreck of the Exxon Valdez, Morris said it was no surprise to be assigned the job of designing Light List No. 25662, as the new Bligh light is officially known.

''It was not a surprise,'' he said. ''It's almost a Coast Guard tradition: When you have a major wreck, you build a lighthouse.''

#90121u2305 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - Stock prices ended higher in moderate trading

Tuesday on the New York Stock Exchange amid some favorable economic news and mild program buying.

The blue-chip Dow Jones industrial average, which climbed 11.71 points Monday, closed up 12.16 points at 2,668.92.

Among broader market gauges, the New York Stock Exchange composite index rose 0.73 to 182.22 and Standard & Poor's 500-stock index rose 1.45 to 332.25. The price of an average share gained 14 cents.

Advances outpaced declines 812-672 among the 1,947 issues crossing the NYSE tape. Big Board volume was 149,020,000 shares, above the 122,750,000 shares changing hands on Monday.

"Some little firmness in the bond market" was one of several factors that helped boost stocks, said Trude Latimer, market analyst with Josephthal & Co.

The market opened sharply higher but turned mixed around midday following a better-than-expected report on the nation's economy from corporate purchasing managers.

In its monthly report, the National Association of Purchasing Management said the nation's manufacturing economy increased slightly in April after declining 11 straight months.

The association's index rose to 50.2 percent in April, up from 48.8 percent in March. Economists had expected the index to show a reading of around the 48.9 percent level.

Analysts explained a reading below 50 generally indicates the manufacturing segment of the economy is experiencing a decline in growth, while a reading above 50 usually indicates the segment is expanding.

"The 50.2 percent signaled an expansion in the manufacturing economy, ending a string of 11 consecutive months of decline which slowed the entire economy," said Robert J. Bretz, chairman of the group of purchasing executives and director of materials management at Pitney Bowes Inc.

Market watchers said investors pulled away from the market or cut their buying as bonds eased slightly in response to the report. Treasury bonds, which had been up as much as 3/8, eased. Long-term issues also slipped and the yield on the benchmark 30-year bond topped nine percent again after slipping below that level late Monday. Rates are expected to stay under pressure before next week's quarterly Treasury refunding, analysts said.

In a seperate report, the purchasing managers said the nation's economy will continue to grow in 1990, but only moderately. In its latest

semiannual forecast, by a margin of more than 4 to 1, the purchasers do not expect a recession to begin in 1990.

In other economic news, the Commerce Department reported construction spending in March fell 1.4 percent to a seasonally adjusted $432.5 billion after scoring strong increases during an unseasonably warm January and February.

The 1.4 percent decline, which fell in the range predicted by private analysts, is the largest since a decrease of 1.5 percent in February 1989, economists said.

On the trading floor, Security Pacific paced the actives, ending unchanged at 36. Chase Manhattan followed, slipping 3/8 to 25.

Tosco was the third most active stock, falling 5 1/4 to 17 1/4. The oil refiner announced it abandoned efforts begun last year to sell the company or its refining business.

Among blue-chip issues, Boeing, a major Dow component, climbed 2 1/2 to 72 1/4. On Monday, the airplane maker reported first-quarter earnings soared 87.5 percent to $302 million, boosted its quarterly dividend to 37.5 cents a share and announced a 3-for-2 stock split.

Georgia-Pacific gained 5/8 to 41 5/8 after its board authorized management to "pursue the sale of certain assets."

In the auto sector, Chrysler gained 3/4 to 15 1/4. The nation's No. 3 automaker posted first-quarter earnings of $71 million, or 32 cents a share, down 79.8 percent from last year.

General Motors ended unchanged at 44 1/4, but Ford added 1/4 to 44 3/8. Both car builders are expected to report lower first-quarter earnings later this week.

Mobil eased 1/8 to 60 1/8, but ARCO climbed 1 to 112 1/8 and Phillips Petroleum gained 3/8 to 25 1/4 as OPEC oil ministers met in an attempt to boost sagging world crude prices.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 176,145,100 shares, compared with 148,202,550 shares traded in the previous session.

Prices ended slightly higher in moderate trading on the American Stock Exchange. The Amex Market Value index rose 0.22 to close at 343.32. Advances edged out declines 286-277 among the 821 issues traded. The price of an average share rose one cent. Volume totaled 10,640,000 shares, compared with 9,220,000 shares traded Monday.

Composite volume totaled 12,476,550 shares, compared with 10,815,300 shares traded Monday.

In their trading debut, Solomon put warrants on the Financial Times Stock Exchange 100 Index led the Amex actives, ending the day at 3 5/8. They were offered at $3.47 a share.

The National Association of Securities Dealers composite index rose 1.78 to 421.85.

#90121u2331 05/01/1990 ~United Press International

RIGA, LATVIA (MAY 1) UPI - Thousands of ethnic Russian workers warned against ''a second Lithuania'' at a May Day rally Tuesday, two days before Latvia's new Parliament considers proclaiming independence for the Baltic republic.

While the anti-independence forces, most of them ethnic Russians, demonstrated along the Daugava River, an informal pro-independence ''people's parliament'' decreed as ''illegal and inoperational'' the forced bestowal of Soviet citizenship on Latvians.

The 265 delegates, gathered at the Latvian Philharmonic Hall on the second day of the ''Citizens Congress of the Latvian Republic,'' also demanded ''immediate discussions begin on the procedure by which the occupant military force of the U.S.S.R. shall leave the territory of the Latvian Republic.''

The delegates, including 30 representing Latvians abroad, were chosen in non-sanctioned elections April 8 by 700,000 direct descendants of Latvians who lived in the republic before its June 17, 1940, annexation. Its sister Baltic states of Estonia and Lithuania were annexed in the same year.

The Citizens' Congress met to form a shadow government it said would rule when the Baltic state secedes from the Soviet Union, a move that a survey showed has near unanimous support among native Latvians.

About 15,000 non-ethnic Latvians rallied amid a sea of red Soviet flags at the May Day protest organized by Interfront, a Russian nationalist group that bitterly opposes secession from the Soviet Union.

Gorbachev has warned Latvia and Estonia they will face the same harsh reprisals that he imposed in Lithuania if they move rapidly to secede.

''The example of Lithuania is plainly visible to us,'' Viktors Alksnis, a conservative Latvian deputy in the Soviet Parliament, told the crowd.

''They made a decision in haste, and now suddenly it becomes clear that the cost of independence is $1 billion a year for oil. And Latvia would need to pay $1.5 billion.

''Do we really want a repetition of the Lithuanian alternative? No, in Latvia this will not do,'' he said.

One of dozens of signs and banners held aloft by the demonstrators on a sunny spring day read: ''We will not allow a second Lithuania.''

In retaliation for Lithuania's March 11 declaration of independence, Soviet President Mikhail Gorbachev cut off oil shipments two weeks ago and halted most deliveries of other raw materials to the defiant republic.

Throngs of Riga residents gathered at the Latvian capital's Monument to Freedom and held largely impromptu debates on whether their republic should follow Lithuania in a bid to break free from 50 years of Soviet rule.

Others enjoyed the fine holiday weather with family strolls along Brivibas Street, the tree-lined central boulevard that carried Soviet state founder Vladimir Lenin's name until it was changed two months ago.

Proselytizers from the Hare Krishna sect, taking advantage of Gorbachev's religious reforms, did a brisk business selling Russian-language copies of the Bhagavad-Gita.

The Latvian Popular Front canceled a separate May Day demonstration it had planned in support of independence. One spokeswoman said the group did not want to provide an opportunity for ''provocations.''

Evgeni Petrovsky, a 46-year-old welder at the Interfront rally, criticized the Popular Front for vowing to use its new parliamentary majority to try to pass a declaration of Latvian independence when the legislature convenes Thursday.

''Those forces who are pushing for secession are just pursuing their own personal gains,'' Petrovsky said.

''They're not thinking of the simple people,'' he said. ''They may be able to build big careers for themselves, but the common man - Latvian as well as Russian - will suffer.''

An opinion poll published Monday in the official Soviet government newspaper Izvestia showed that 92 percent of the republic's native Latvians support secession from the Soviet Union.

More ominously for Moscow, the survey indicated that 45 percent of the

republic's non-Latvian population, including 935,000 Russians, favor independence.

Latvian Popular Front leaders have blamed a whiplash of fear over the Lithuanian crisis for the nationalist group's poor showing Sunday in key runoff elections it had hoped would ensure passage of an independence proclamation by the Latvian Parliament.

The runoff results left the Popular Front's parliamentary caucus several seats shy of the outright two-thirds majority needed to proclaim independence, but its leaders say seven or eight non-aligned deputies will fill the gap.

#90121u2346 05/01/1990 ~United Press International

SEATTLE (MAY 1) UPI - While "great headway" has been made in reducing Japanese trade barriers, the United States cannot ease up on pressuring for even more concessions, Michael Armacost, the U.S. ambassador to Japan, said Tuesday.

Armacost said there is a long way to go before significant progress is made in reducing the trade deficit with Japan, which was about $49 billion last year.

The ambassador noted while U.S. exports to Europe have grown substantially over the past five or six years, the U.S. trade deficit with Japan has remained static.

"I think we have to firmly press our requests, but there is the subissue of the manner in which the pressure is applied," said Armacost, referring to the administration's decision last Friday not to list Japan under the "Super 301" provision of the 1988 Trade Act.

The Super 301 provision, which holds the threat of trade sanctions, is reserved for countries considered to have egregious trade barriers to U.S. products.

"The administration's judgment is that we have made great headway in interim reforms" with the Japanese, Armacost said. "There has been a gesture of good faith by the Japanese government, so this may be an inappropriate time to apply the 301 provisions."

However, Armacost added, "the fact that these issues were wrapped up in April, close to the deadline (for sanctions), suggests the deadline had some impact." The most recent round of talks with Japan focused on supercomputers, telecommunications and processed wood products.

U.S. Trade Representative Carla Hills announced last week a tentative accord on lumber, with Japan agreeing to revise its grading procedures, building codes and other obstacles preventing imports of American processed wood products.

The announcement brought a mixed reaction in the wood products industry, with some saying it did not go far enough to reduce barriers to some U.S. products such as plywood.

But Armacost said the Japanese have expressed a willingness to deal with other trade barriers "in a positive way" at the General Agreement on Tariffs and Trade talks currently underway in Uruguay.

He also said the next few years will be a good test period to see if Japan is serious about reversing its trade patterns. He said the Japanese government is expected to order ten supercomputers in the next two years, and the decisions will be closely watched.

The United States controls about 90 percent of the world market for supercomputers, although at least one U.S. company - Cray Research Inc. - has charged the Japanese with erecting barriers designed to help Japanese concerns such as NEC Corp.

Armacost said while talks on specific industries have yielded progress, he said the most significant steps taken by the Japanese will be in altering structural impediments, such as changing their complex distribution system and laws that allow "mom and pop" retailers to veto construction of large stores that are much more likely to import foreign goods. He also said Japan's vows to improve its infrastructure, such as roads and ports, will improve trade as well as help the Japanese.

Armacost said he believes progress on eliminating Japanese trade barriers will accelerate as the Japanese begin to understand that they benefit as well, and that their actions will affect overall relationships with the rest of the world.

"These commitments have been taken on in the last month at least in part because there is a growing sense of urgency about the need to address these problems," he said. "And there is a growing realization in Japan that these reforms are good for them."

-30- 3878

#90121u2352 05/01/1990 ~United Press International

UNITED NATIONS (MAY 1) UPI - Poor and indebted countries failed Tuesday to get a commitment from developed nations for significant reduction of their foreign debt, but both sides agreed to try to eliminate poverty and give Eastern Europe an economic role in the 1990s.

The failure was recorded in a declaration adopted by the U.N. General Assembly after three days of intense negotiations, preceded by a weeklong debate on international economic cooperation for the next decade.

Led by the United States, industrialized nations opposed demands that part of the more than $1 trillion owed by the Third World be written off and the debt of the Least Developed Countries (LDC) be totally forgiven.

Instead, the declaration called for a ''durable and broad'' solution to the external debt problem. Recent measures to reduce the ''stock and service of debt, or to provide debt relief for developing countries, should be broadly implemented,'' it said.

It said relief measures should aim at the resumption of vigorous growth and development and address all types of bilateral debt of the developing countries.

Developing countries had demanded that debt reduction be ''sufficiently large'' to allow resumption of growth and also wanted ''total forgiveness'' for the LDCs to be taken immediately. The demands stalled adoption of the declaration planned for last Saturday.

U.N. officials played down the failure, saying that the document was a compromise by both sides.

Greek Ambassador Constantine Zepos, who chaired the negotiations, said the declaration will influence the September meeting in Paris on the LDCs, the upcoming talks on U.N. trade and development and the Uruguay meeting to liberalize trade.

The declaration called for rich governments to set aside 0.7 percent of their Gross National Product (GNP) for official development assistance in developing countries and 0.15 percent in the LDCs.

The document, adopted by consensus, noted the ''positive transformation'' in international relations and urged the United Nations to seize the opportunity to revitalize growth and development that the Third World had lost in the 1980s.

''As the world changes around us, we must respond positively,'' the declaration said.

It called for economic development that must be ''environmentally sound and sustainable'' and blamed rich countries as the ''major sources'' of pollution, urging them at the same time to meet their responsibility.

It said in the 1990s, ''eradication of poverty and hunger, greater equity

in income distribution and the development of human resources remain major challenges everywhere.''

''There is a need to integrate Eastern European countries into the world economy and the international economic system,'' it said, pointing out that these countries would bring ''positive impulses'' for world trade and development.

U.N. officials said it was the first time the United Nations had been able to adopt by consensus a document on economic cooperation.

WEST PALM BEACH, FL. (MAY 1) UPI - First lady Barbara Bush called Tuesday for an end to discrimination against AIDS victims and more private support in caring for babies infected with the disease.

Bush briefly visited Connor's Nursery, a private shelter for children born with cocaine addiction and the AIDS virus.

The first lady was in the area to bring her ailing mother-in-law, Dorothy Walker Bush, back to Washington for a stay.

''I think it's important that people know these children are like all other children, except they got a little rough start,'' Bush said. ''It's very important to know that you can be hugged and loved and kissed and spit on, and you won't get AIDS. We should not have discrimination against men, women and children that have AIDS.''

The shelter is home to a 2-year-old, a 1-year-old and six other children younger than 4 months, all born with the AIDS virus and an addiction to cocaine.

Kathy Carter, executive director, said 60 percent of the babies would outgrow the HIV virus before age 2, making them easier to place with adoptive parents and likely to live normal lives.

''But, for some children, they'll be here forever,'' Carter said. ''Our

2-year-old will be here until he dies.''

#90121u2422 05/01/1990 ~United Press International
(MAY 1) UPI - The release of two U-S hostages in the past eight days apparently does NOT mean more Americans are about to be freed from captivity in Lebanon. White House spokesman Marlin Fitzwater says officials have to take the situation as they find it today, and he says there is NO ''long-term optimism'' about the release of all the hostages.

NASA says the launch of the shuttle Columbia is tentatively being pushed back one day to May 17th. Reasons include a tight around-the-clock processing schedule and a desire to give the launch team a day off. The nine-day flight will study high-energy astronomical targets as part of an ongoing drive to study the universe from space.

A New Jersey judge today gave convicted killer John List the maximum sentence of five consecutive life prison terms for the 1971 murder of List's wife, three teen-age children and mother. The 64-year-old List WON'T be eligible for parole for nearly 75 years. Judge William Wertheimer called him ''a man without honor.''

Today is May Day, the international labor day that's celebrated in communist and some NON-communist nations. In Moscow, the annual May Day parade in Red Square showed signs of protest. Marchers at the end of the parade, fearful of economic reforms, booed and shouted for President Gorbachev and other leaders to resign.

In Latvia, thousands of workers- mostly ethnic Russians- staged a May Day rally today protesting any moves toward independence from the Soviet Union. The demonstrators warned against ''a second Lithuania.'' The protest comes two days before the Baltic republic's parliament is to consider breaking away from Moscow.

#90121u2424 05/01/1990 ~United Press International
WASHINGTON (MAY 1) UPI - Defense Secretary Dick Cheney met Tuesday with West German Defense Minister Gerhard Stoltenberg and discussed Germany's unification, U.S.-Soviet conventional arms reduction talks in Europe and NATO.

Pentagon spokesman Pete Williams said the two men met privately for about 15 minutes before moving into a plenary session.

He said they did not talk in the plenary about controversial U.S. plans to develop an upgraded version of Lance short-range nuclear missiles, most of

which are stationed on West German soil.

Williams said he did not know if they talked about it in the private meeting.

The West German government has made it clear it does not want the current U.S. Lance missiles replaced in the mid-1990s with newer ones that could only reach what is now East Germany and other East European countries, most of which are now democratic.

The issue is expected to dominate the meeting of NATO's defense ministers May 9-10 near Calgary, Canada, where Cheney may be told by the Europeans to keep what has become known as the ''Follow-on to Lance.''

Williams denied published reports that a high-level U.S.-NATO nuclear group in the past few days had agreed to rule out the modern Lance missile. That did not come up in the Stoltenberg meeting.

''In general they discussed the situation in Europe, and in Eastern Europe they talked about German unification and the forthcoming 'two-plus-four talks' (on the unification process),'' Williams said of Cheney and Stoltenberg's meeting.

''They discussed progress on the CFE (Conventional Forces in Europe) talks. ... They reaffirmed their strong, mutual support for NATO. They talked about the two forthcoming NATO meetings (in Canada and in Brussels May 22-23),'' he said.

Cheney's spokesman declined to elaborate further.

#90121u2425 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The Energy Department plans to restart by late December one of the three troubled weapons reactors at its Savannah River Site in South Carolina, Energy Secretary James Watkins said Tuesday.

In addition, Watkins told the Senate Armed Services Committee he expects to decide later this month on restarting the Rocky Flats plant, which processes plutonium for the government's nuclear weapons program.

The decades-old plant near Denver has been shut down since October 1989 due to persistent operational and safety problems, including the buildup of highly radioactive plutonium in the plant's ductwork.

Watkins said he has received a restart plan for Rocky Flats from EG&G Inc. which operates the plant for the government. He said EG&G had made ''good progress'' in solving the plutonium buildup problem.

As for Savannah River, Watkins said the tentative date for the restart is based on progress to date in improving the safety of the aging reactors, which are operated for the government by Westinghouse Co.

However, he said a final decision depends on the results of an environmental impact study by the department on the resumption of reactor operations at the plant, located near Aiken, S.C.

A draft version of the study is to be released May 4 and then be subject to hearings and public comment.

''Until I am assured that the environment, safety and health considerations have been satisfactorily addressed, I will not approve restart of the reactors at Savannah River,'' Watkins said in a statement.

If things go as expected, he said, the department plans to begin low-power testing of the K Reactor in December, with full operations later that month or in January 1991.

He said P Reactor is tentatively scheduled for full operation by April 1991 and the L Reactor by December 1991.

The three reactors, which date from the 1950's, have been shut down since the spring of 1988 because of problems stemming from deteriorating equipment and poor operating practices.

The shutdown has raised national security concerns because the reactors are the sole source of radioactive tritium gas, which boosts the power of nuclear warheads and must be periodically replenished because it decays.

Since the reactors were shut down, Westinghouse has taken over operation of Savannah River from Du Pont Co. and launched a massive safety improvement program, including more training for reactor operators, equipment modifications and expanded testing for cracks in the reactors.

The Defense Department has been pressing for the restart of the reactors and the Energy Department initially scheduled restart for this fall.

However, activists filed suit to force an environmental impact study and Watkins agreed to do so before the case was heard.

Dan Reicher, attorney for the Natural Resources Defense Council, which filed suit to force the study, said Watkin's restart is ''optimistic given all the outstanding issues and requirements.''

STONINGTON, CT (MAY 1) UPI - Internationally famed singer Sergio Franchi died Tuesday at his estate on Long Island Sound following a bout with cancer, his family said.

Franchi's age was not disclosed, but records indicated he was 57.

Franchi, a native of Italy who made his American debut at New York's Carnegie Hall in 1962, had appeared on stage, screen and in films and had a long recording career with RCA, United Artists and Gold Records.

A frequent guest on the Ed Sullivan television show, Franchi performed in concert halls across the country and was a frequent headliner on the Las Vegas club circuit.

He made his film debut in 1969 in Stanley Kramer's ''The Secret of Santo Vittoria'' and first appeared on Broadway in 1967 in ''Do I Hear a Waltz.'' He later starred for two years in the musical ''Nine,'' for which he received the Tony Award.

Franchi, who recorded more than 25 albums, was a frequent guest on television variety shows and made many benefit appearances, including a White House performance at the request of former President Ronald Reagan.

Franchi died at his home in the historic and picturesque shoreline community on the Rhode Island border, one of the state's last fishing towns, where he had lived for a number of years with his wife, Eva, and other family members.

His death was announced by his brother-in-law, Peter Catalano, in New York who said a private service would be held by the immediate family members.

In addition to his wife, Franchi is survived by a daughter, Greta; a son, Roberto; two grandchildren and two sisters, Mirella Pugliese and Dana Valery Catalano.

#90121u2477 05/01/1990 ~United Press International
WASHINGTON (MAY 1) UPI - The House voted Tuesday to give the Census Bureau some extra help as it works to complete the 1990 Census, saying federal retirees can keep working on the census without losing retirement benefits.

The legislation extends until at least the end of the year a six-month limit on Census Bureau employment for retired federal workers, postal employees and military officers.

If the Senate goes along with the House action, the retirees would not lose retirement benefits to offset the amount they earn from helping with

the decennial count of the nation's population.

The House action came on a unanimous voice vote.

Rep. Thomas Sawyer, D-Ohio, head of the census subcommittee of the House Post Office and Civil Service Committee, said the workers ''will be able to continue as long as they are needed.''

Many of the retirees, he said, are highly skilled retired government workers who have ''already worked their six months and are faced with the difficult decision of whether to quit work or continue and lose retirement.''

Sawyer said the Census Bureau faces a tough job visiting some 37 million households that have not returned their census form and is using 260,000 temporary personnel for the job. Another 56,000 temporary personnel are expected to be hired to help complete the massive job.

#90121u2485 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - Farmers will have fewer worries under an agreement that makes it clear they do not need special permits for most farming practices on converted wetlands, Senate staff members said Tuesday.

Concern had arisen in recent months, especially in Southern states, whether the so-called Section 404 permits would be required on what is called ''prior converted wetlands.''

By some estimates, about 60 million acres of farmland nationwide are prior converted wetlands.

Arkansas Sens. David Pryor and Dale Bumpers, both Democrats, proposed legislation to prevent enforcement of the rules but agreed to drop it in exchange for administrative action to clarify the situation. A statement was expected Tuesday or Wednesday.

Aides to Pryor and Bumpers said the statement was expected to make it clear farmers could continue to use their traditional farming methods on prior converted wetlands without needing a permit for things such as drainage ditches or rice levees.

A spokeswoman for a national environmental group said there would be no objection to a statement that simply explained the impact of clean water laws.

''Farming was not regulated under most circumstances by (Section) 404,'' she said.

Aides to Pryor and Bumpers said some farmers were concerned about missing the planting season because of the waiting period for a permit. Others said they were given little guidance if a permit was needed.

#90121u2486 05/01/1990 ~United Press International

ST. LOUIS (MAY 2) UPI - Emerson Electric Co. pleaded guilty Tuesday to four counts of making false statements to the federal government and has agreed to pay $14 million in a civil settlement, U.S. Attorney Thomas Dittmeier said.

Under terms of the agreement, which came after a two-year grand jury investigation, Emerson also must pay criminal fines totaling $40,000. The fines, plus the $14 million, must be paid within five days.

The violations involved an Emerson subsidiary, Electronics & Space Corp.

The investigation alleged that on certain U.S. military contracts between 1983 and 1987, Emerson provided false and inflated cost estimates and price figures, thus causing the government to pay higher prices.

Dittmeier said no individuals were charged as a result of the investigation.

''The individuals that we investigated were middle-echelon individuals,'' the prosecutor said. ''Perhaps some of them could have been charged. But we did not want to make any individuals scapegoats for what was a very institutionalized way of doing business by Emerson Electric.''

Dittmeier added the investigation found nothing to implicate Emerson's chairman and chief executive officer, Charles Knight.

''We found no evidence that Mr. Knight was involved,'' Dittmeier said. ''We couldn't get past the middle-echelon individuals. It was a true corporate crime.''

In addition to the false information on cost estimates and prices, Dittmeier's office found that Emerson had charged the government for parts that were used by the company on other contracts. As part of the plea agreement, Emerson was allowed to plead only to charges relating to the cost estimates.

However, Emerson was required to pay the $14 million to settle both areas investigated by the grand jury. The company also must pay all expenses, including legal costs, incurred in connection with the case.

Dittmeier said Emerson corrected their practices in 1987 and 1988 and that the company had cooperated with his office during the investigation.

''When it became aware that we had something solid, Emerson Electric cooperated with us fully,'' Dittmeier said.

Emerson manufactures several types of military-related equipment, including armaments, automatic test equipment and electronics, for use in a variety of military weapons systems.

Company officials said the agreement was in the best economic interest of shareholders, resolved all issues from the investigation and would have no effect on Emerson's future earnings.

The settlement with the government was included in Emerson's second-quarter results, which were reported earlier Tuesday. The company announced record earnings and earnings per share for the second quarter of fiscal year 1990.

Federal investigators served search warrants in February 1988 at the company's facility in Ferguson, a suburb of St. Louis.

Earlier this year, Sen. John Danforth, R-Mo., announced Dittmeier would not be reappointed to the post of U.S. attorney for the Eastern District of Missouri.

Danforth's explanation for the change was that the Bush Administration wanted new blood in the office, but media speculation centered on rumors that Knight had lobbied for Dittmeier's ouster in retaliation for the investigation.

Dittmeier said he did not feel vindicated by the results of the investigation.

''After we put together a case we could prove, and now that Emerson has to pay $14 million in fines, I just think it lets the public know that we did the right thing, and it tells the defense contractors that we're watching them,'' he said.

PITTSBURGH (MAY 1) UPI - Shouting and pushing by delegates angry over the

question of voting rights marred the opening here Tuesday of the Pennsylvania AFL-CIO convention.

Hundreds of supporters of opposing slates of candidates for the labor group's top three offices argued loudly over voting rules Tuesday morning in a downtown hotel meeting room, then crowded around the podium where outgoing President Julius Uehlein was shouting for order.

As the crowd grew louder and angrier, several men in black T-shirts bearing union slogans stepped in and shoved the delegates away from the platform. The delegates returned to their seats but kept standing and shouting before order was restored.

''What happened to solidarity?'' yelled one delegate during the fracas.

Uehlein promised to send for a report on credentials and voting privileges and the dispute was expected to come up for discussion before candidates are officially nominated Wednesday.

Delegates involved in the fracas want clarification on the number of votes per member since some hold credentials for more than one local or division of their respective unions.

The annual state convention, attended by about 2,500 delegates, is scheduled to run through Friday.

Uehlein is retiring after eight years as president. Robert McIntyre, executive vice president of the state AFL-CIO, is running against William George, state legislative director for the United Steelworkers union.

#90121u2542 05/01/1990 ~United Press International

NEW YORK (MAY 2) UPI - U.S. gasoline output slipped last week, in what may be a return to maintenance turnarounds, but imports more than doubled to hold supplies relatively firm, the American Petroleum Institute reported Tuesday.

Crude oil inventories remained close to full capacity, indicating the world glut of crude oil has abated little.

For the week ended April 27, gasoline production declined to 6.9 million barrels daily from 7.1 million barrels the previous week. Year-ago output was also 6.9 million barrels a day.

U.S. refineries operated at 83.8 percent of capacity last week, compared with 86.2 percent a week earlier and 83.2 percent a year ago.

The utilization rate had risen over the previous two weeks as it appeared the oil industry was emerging from a period of companies conducting maintenance ''turnarounds'' from heating oil to gasoline production.

An API spokesman could not account for the unusual decline at this time of year but said it might be due to some refineries under-going late turnarounds.

Gasoline imports more than doubled to 507,000 barrels daily from 205,000 barrels daily in the previous week but were less than year-ago imports of 638,000 barrels daily.

Gasoline supplies fell slightly to 221.0 million barrels from 222.5 million barrels in the prior week and were also slightly lower than year-ago levels of 222.7 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also slipped, to 168.9 million barrels from 169.4 million barrels a week earlier, but remained significantly higher than year-ago levels of 154.5 million barrels.

Crude oil stocks dropped a mere 500,000 barrels to 372.4 million barrels, in the upper end of the nation's storage capacity, from 372.9 million barrels in the prior week but stayed well above year-ago levels of 335.7 million barrels.

Crude oil imports rose to 6.1 million barrels a day from 5.7 million barrels a day in the previous week and were higher than year-ago daily imports of 5.9 million barrels.

Imports of all refined products edged up to 2.3 million barrels daily from 2.1 million barrels daily in the preceding week but were below year-ago imports of 3.0 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - fell to 95.5 million barrels from 98.1 million barrels a week earlier and were below year-ago levels of 96.1 million barrels.

Distillate production skidded to 2.8 million barrels daily from 3.0 million barrels daily in the preceding week and was level with year-ago output of 2.8 million barrels daily.

Distillate imports fell to 339,000 barrels a day from 332,000 barrels a day in the previous week but were higher than year-ago imports of 224,000 barrels a day.

#90121u2618 05/01/1990 ~United Press International

WASHINGTON (MAY 1) UPI - The House gave final approval Tuesday to legislation briefly extending the Federal Aviation Administration's power to levy civil penalties of up to $50,000 for violations of airline security, safety and operation standards.

In addition, the legislation gives the state of Hawaii an exemption from a law requiring that funds raised by an airport's operation be spent at the airport. The bill will let Hawaii use excess money raised at airport duty free shops to improve highways within 10 miles of an airport.

Supporters of the measure said Hawaii, because it is almost totally dependent on air service, needs the exemption from the law dealing with how airport money is spent. The exemption will expire in five years and caps the total amount of money that can be devoted to highway construction at $250 million.

Rep. Daniel Akaka, D-Hawaii, told the House the measure would allow Hawaii to make much needed road improvements around the state's airports. He said three airports on the largest islands are expected to be designated as international airports, with associated duty free shops generating money that could go to highway work.

The basic FAA measure extends until Aug. 1 an experimental program in which the FAA assesses civil penalties for violations of FAA regulations. The extension was necessary to let the agency implement court-ordered changes in the way the program is administered. The U.S. Court of Appeals ordered the FAA two weeks ago to separate the roles of prosecutor and judge in its program.

Prior to the experimental program the FAA had to ask U.S. Attorneys' offices to take cases into court for rulings on penalties, but because of understaffing the smaller cases were rarely prosecuted.

The bill, which was approved on a voice vote, will be sent to the White House for the president's signature.

#90121u2635 05/01/1990 ~United Press International

NEW YORK (MAY 1) UPI - Shearson Lehman Hutton Inc. announced Tuesday the sale of its mutual fund and individual investment sevices businesses to Salomon Brothers Asset Management Inc. for $28 million.

As a result of the sale of the Lehman Management Co. division, Shearson said it expects to post a gain of approximately $16 million in the second quarter.

Shearson last week reported a first-quarter loss of $915 million - an industry record - compared with a $28 million loss in the same period a year earlier.

The second-largest U.S. brokerage said the loss reflected two one-time charges totalling $787 million for restructuring and accounting changes.

For several months, the firm has been conducting a review of its core businesses in hopes of increasing profitability.

Salomon, the nation's third-largest brokerage house, last week reported a profit of $119 million in the first quarter, compared with a loss of $28 million for the first quarter of 1989.

Lehman Management acts as investment advisor to five investment companies and to more than 550 institutional and individual acounts. Total assets under management stood at $2.6 billion as of Mar. 31.

The sale to Salomon was announced Mar. 15.

#90121u2655 05/01/1990 ~United Press International

CHARLOTTE, NC (MAY 1) UPI - A federal judge Tuesday refused to dismiss two accounting firms from a $600 million lawsuit filed against them and imprisoned television evangelist Jim Bakker.

U.S. District Judge James B. McMillan ruled against the accounting firms of Deloitte Haskins & Sells and Laventhol and Horwath, who asked to be dismissed as defendants in a class-action suit initiated by Joseph and Helen Teague, two of Bakker's former PTL partners.

The lawsuit seeks remuneration for Bakker's so-called ''lifetime partners '' who typically gave PTL $1,000 apiece in exchange for promises of three nights free lodging each year for life at the ministry's Heritage USA theme park.

Named as defendants are Bakker, his former aide David Taggart, former PTL board member Aimee Cortese, PTL builder Roe Messner and the two accounting firms that audited PTL books.

There is little money to be had from most of the defendants. Bakker and Taggart are in prison, Cortese is a minister in the Bronx, N.Y., and Messner lost $15 million on PTL projects and his Witchita, Kan., construction company is the target of foreclosures.

Bakker was convicted last year on 24 counts of fraud and conspiracy for selling partnerships to more people than PTL could accommodate and

diverting $3.7 million to his own pockets. Taggart was convicted of failing to pay taxes on more than $1 million he stole from PTL.

The two accounting firms, however, are solvent and could be held liable for failing to call a halt to the sale of partnerships at PTL.

''A lot of folks think we're out beating a dead horse,'' said Charlotte attorney Bill Fawcett, of the PTL Litigation Group that filed the lawsuit.

''The criminal trials vindicated the rights of the state but did nothing to help the victims,'' he said. ''This is the time when the defendants have their rights vindicated - that's what this suit is all about.''

Fawcett said the accountants who audited the PTL books each year had an obligation to protect the ministry's partners from fraudulent transactions.

''Bakker committed the fraud, but the others all helped perpetuate the fraud over the course of 3 1/2 years by turning a blind eye when illegal acts took place, concealing information the lifetime partners and others needed to know,'' said Fawcett.

''It was a scheme to which the accounting firms lent their credibility,'' the attorney said. ''It allowed PTL to bilk millions of dollars from Bakker's followers. They have a duty to give a fair and accurate picture of a corporation's financial status, and that was clearly not the case.''

The PTL Litigation Group, in a statement released Tuesday, said if the trial is successful the PTL partners could receive back all of the money given to Bakker for the partnerships.

''If the plaintiffs are successful, each lifetime partner will have the money they invested returned in full, plus damages and interest,'' the statement said. ''Recent asset checks confirm that the defendants, including Deloitte Haskins & Sells and Laventhol and Horwath, can satisfy a judgment of this size.''

PTL carried policies on Bakker insuring him against liability for misstatements made on his television programs, and the PTL Litigation Group said those policies alone should be worth $80 million.

#90121u2706 05/01/1990 ~United Press International

(MAY 1) UPI - U-S officials put damper on expectations of future hostage releases... May Day celebrations take on different flavor in changing East Bloc... Man accused of killing his family in New Jersey in 1971 sentenced to maximum penalty. Details on these major stories, and more, next from U-P-I.

This is the first full day of freedom for former U-S hostage Frank Reed, who was re-united with his wife and son today at a military hospital in Wiesbaden, West Germany.

Reed spent 44 months in captivity in Lebanon before being released yesterday and turned over to Syrian troops who drove him to Damascus. From there he was flown to West Germany.

When he arrived at the U-S military hospital in Wiesbaden, he asked for a beer and a medium-rare steak. A spokesman says he ''got what he asked for.''

In Washington, President Bush offered Reed ''greetings from the American people'' by telephone yesterday while meeting with ex-hostage Robert Polhill, who was released last week.

U-S officials had hoped the release of Polhill and Reed might mean other U-S hostages would be freed.

But signals from the Middle East indicate further help from Iran and Syria will require U-S concessions, which Washington refuses.

Officials say there will be NO concessions until all Americans are released.

This is May Day... the international labor day traditionally celebrated in communist countries... but this year things are different.

Much of Eastern Europe is NO longer communist, and people responded by avoiding the traditional parades and celebrations. In Bucharest, Romania, there were NO government-sponsored rallies or ceremonies. Instead, there was a steady stream of cars heading out of the city for the countryside.

In Hungary, workers skipped the traditional parade in favor of picnics sponsored by the newly formed independent trade unions.

There was a parade in Moscow's Red Square, but even that parade showed signs of change. At the end of it, some marchers booed and shouted insults at President Gorbachev and other leaders who were watching from the top of the Lenin Masoleum. The protesters were angry at Gorbachev's handling of Lithuania and economic reforms.

In South Africa, thousands of black workers celebrated their first official May Day holiday in marches and rallies.

#90121u2759 05/01/1990 ~United Press International
MONTREAL (MAY 2) UPI - Imasco Ltd. reported Tuesday first-quarter earnings of $56.6 million, or 43 cents a share, up 23 percent from the $45.9 million, or 36 cents a share, earned in the year-earlier period.

Quarterly revenues at the diversified company totaled $3.17 billion, up from $2.79 billion in the 1989 quarter.

Imasco said sales in its consumer products and services businesses increased across the board, with the biggest advance coming from the Peoples Drug Stores chain.

Chairman Purdy Crawford called the quarterly results ''very encouraging.''

''Each operating company has improved its performance over last year and we are satisfied that Imasco is on course for another year of earnings growth,'' he added.

In late January, Imasco announced a $365 million deal to takeover the Roy Rogers restaurant chain from Marriott Corp. The deal, completed in mid-April, will mean turning the Roy Rogers restaurants into Hardee's outlets.

Imasco operates tobacco, restaurant, drug store, retail and financial services businesses in Canada and the United States.

Imasco's major shareholder is London-based B.A.T Industries PLC, recently target of a failed billion-dollar hostile takeover bid.

#90121u2764 05/01/1990 ~United Press International
(MAY 1) UPI - Convicted killer John List received the maximum sentence of five consecutive life prison terms today for the 1971 murder of his wife, three teen-age children and his mother.

The sentence was handed down by Judge William Wertheimer in Elizabeth, New Jersey. Wertheimer called List ''a man without honor'' and said his name ''will be eternally synonymous with concepts of selfishness, horror and evil.''

List gave his first public statement since his arrest last year, saying he is ''truly sorry for the tragedy that happened in 1971.''

He avoided capture for nearly 17 years before being arrested June 1st, 1989, in Richmond, Virginia, on a tip generated by the ''America's Most Wanted'' television show.

List shot his family on November 9th, 1971, in their home in Westfield, New Jersey. He left behind letters to relatives and his pastor admitting the killings. He said he killed them to save them from poverty and keep them close to God.

The House is preparing to vote today on a one-point-two-TRILLION-dollar budget bill.

The Democrat-sponsored measure is a substitute for the spending plan developed by President Bush. All indications are the Democrat-controlled House will approve the measure.

The Republicans decided NOT to submit Bush's proposal on grounds it would fare poorly against the Democrat measure.

That proposal appears likely to win approval as a followup to House Democratic leaders working to convince a number of party conservatives to go along with the measure, even though it calls for reduced defense spending.

-30- 1749
#90121u2805 05/01/1990 ~United Press International
(MAY 1) UPI - Panamanian President Guillermo Endara may get some cheering financial news from the U-S Senate today.

The chamber is debating a two-point-three-BILLION-dollar Latin aid bill that earmarks 420-Million dollars for Panama. Indications are the lawmakers may complete action on the measure later today.

Endara is on his first visit to Washington since the December 20th American invasion of Panama that ousted General Manuel Noriega from power. Endara met with President Bush yesterday and expresed his thanks for the military action that led to his nation's freedom.

His activities today include an address to the National Press Club... a meeting with Vice President Quayle and talks with Senate leaders.

In Panama City, labor leaders scheduled a series of marches to celebrate May Day. They are coupling this with complaints that economic problems and government hostility have taken tolls on workers, claiming at least a 20 percent jobless rate.

NASA engineers continue the job of making technical adjustments to the orbiting Hubble Space Telescope.

Technicians today adjusted antennas aboard the telescope to prevent them from becoming snagged on wayward power cables. They also began rewriting

the computer programing that runs the antennas to restrict their movement and keep them from getting stuck.

Workers also are making preparations to begin slowly turning on the one-BILLION-dollar telescope's many systems and five high-tech instruments. A series of technical delays since launch of the telescope from a shuttle flight last week has put NASA about one week behind in the eight-month process of starting the telescope.

This has delayed reception of the first image from the telescope until this weekend at the earliest. These will provide clues about the birth, structure and destiny of the universe.

At Cape Canaveral, Florida, sources say there will be a launch delay of one day for the Columbia shuttle. It is now scheduled to take off on a Spacelab astronomy mission on May 17th.

-30- 2217

#90121u2879 05/01/1990 ~United Press International

BEVERLY HILLS, CA (MAY 1) UPI - Leading film directors George Lucas, Steven Spielberg and Martin Scorsese, citing the need to preserve old movies, announced Tuesday the formation of The Film Foundation, dedicated to the survival of American movies.

''When filmmakers in the 21st century ask what was done to preserve pictures made in this century, they will look to us,'' Scorsese said at a news conference at the Creative Artists Agency.

He said that the foundation plans to raise $30 million for restoration projects to be undertaken by movie studios and archivists.

Scorsese, who directed ''Taxi Driver,'' ''Raging Bull'' and ''The Last Temptation of Christ,'' has been named president of the foundation's board.

He explained that 50 percent of all movies made in the United States prior to 1950 no longer exist because the movies were produced with nitrate cellulose film stock, which is both flammable and prone to deterioration.

''This is really like raiders of the lost negative,'' Scorsese said.

Spielberg, whose hits include ''E.T. - The Extraterrestrial,'' ''Jaws'' and ''Raiders of the Lost Ark,'' announced at the news conference that Universal Studios has pledged $1 million a year for an indefinite period to preserve 50 titles per year from its massive library of 7,000 films.

''We need to studios to help us,'' Spielberg said. ''We can't do this alone.''

Lucas, whose credits include the ''Star Wars'' trilogy and ''American Graffiti,'' said that the studios have improved their preservation efforts in recent years as they realize the economic value of old films for cable and home video markets.

''It's becoming increasingly obvious as corporations sell corporations that the libraries are an asset,'' Lucas said.

Alex Ben Block, editor of the trade publication ''Show Biz News,'' said, ''The studios have been doing a better job with old films, because it's good for their bottom line, but what these directors are saying is that they need to do more, that economics is not enough of a reason.''

Block noted that the key asset in the pending $1.22 billion sale of MGM-UA Communications Inc. to Pathe Communications Inc. is the 1,000-title United Artists film library. MGM-UA is widely regarded as having made the biggest effort in the business to preserve its titles, he added.

''The key with this new organization is that the studios have to listen to these guys,'' Block said. ''The studios have a lot of respect for people like Spielberg.''

The foundation estimated that major American archives house more than 100 million feet of film on nitrate cellulose stock in need of preservation at costs of $1 to $3 a foot.

The directors said that the quality of film stock, which had a tendency to turn red after a few years, has been improved considerably in recent years and is expected to last 60 years without major restoration.

#90121u3064 05/01/1990 ~United Press International

(MAY 1) UPI - An Egyptian report says police shot and killed 14 Moslem extremists in two days of clashes in villages 65 miles southwest of Cairo. The flareup is described as the latest in a series of bloody exchanges between Moslem extremists and law officers.

A fragile truce between rival Lebanese Christian forces north of Beirut held for a fourth day, allowing residents to retrieve their belongings. But in Beirut, street battles killed one soldier and injured two others.

Senate Republicans put forth their version of a campaign reform bill today and it was immediately criticized by the Democrats. The G-O-P plan calls for elimination of political action committees, but Demcrats attacked it because it sets NO spending limit on congressional races.

The defense rested its case today at the trial of an alleged triggerman accused of shooting a black teen-ager in New York City. The August 23rd slaying of Yusuf Hawkins inflamed racial tensions and sparked a series of protests.

A Jewish research group says there have been signs of anti-semitism in Eastern European countries newly freed from communist domination. A report released in London today says some political parties have used anti-semitism to gain support.

Leaders of the African National Congress will begin meetings tomorrow with South African officials aimed at setting guidelines for talks on black power sharing with the white minority government.

The White House says President Bush will meet Thursday with Lithuania's prime minister to discuss the troubled situation in the Baltic republic. The meeting will mark the first contact between Washington and Lithuania, since the republic broke from the Soviet Union March 11th.

The Food and Drug Administration took steps today to make chicken and other poultry safer to eat. The F-D-A approved treating poultry with radiation to control microbes that can cause food poisoning. Officials say the process poses NO health threat to consumers.

Firefighters are using helicopters to battle a wildfire that has burned 55-hundred acres of sawgrass in and around Florida's Everglades National Park. Another fire burned 500 acres in Virginia's Shenandoah National Park but officials say that blaze is mostly contained.

Police in Norridge, Illinois, captured a robbery suspect by calling him on his pager and tracing his answering calls. Joseph Ciccia was arrested this morning. He's suspected in a February 23rd armored car robbery during which a guard was killed.

-30- 2695

#90121u3267 05/01/1990 ~United Press International

(MAY 1) UPI - Newly freed American hostage Frank Reed telephoned members of his family from a U-S military site in West Germany today. Among those on hand at Malden, Massachusetts, for the call were Reed's 91-year old mother and his daughter, Marilyn. He indicated to his daughter that he had seen American hostages Terry Anderson and Thomas Sutherland during his captivity and had believed they had been freed earlier.

University researchers in Miami disclosed a new tool that will help doctors gauge whether a person is likely to suffer a stroke within a certain number of years. Key elements in the formula are a person's age, sex, blood pressure, history of smoking and whether they suffer from

diabetes or cardiac abnormalities. The so-called stroke-risk profile would enable doctors to advise patients to eliminate certain practices that are harmful to their health.

The Food and Drug Administration today O-K'd the use of radiation to make poultry safer to eat... but a public interest group says it's a ''turkey'' of a move. The radiation is to control bacteria that cause illness in humans. But a spokeswoman for a New York research group says the process hasn't been adequately tested for safety, and says it's NOT a good solution to Salmonella.

The grim remains of the Apollo One fire are being sent to Florida to be sealed inside two abandoned missile silos, along with the debris from the Challenger disaster. NASA says the charred remains of the Apollo capsule are being moved from Langley Research Center in Virginia to the Cape Canaveral Air Force Station later this month. Three astronauts died in the January 27th, 1967 fire during a routine test on the launch pad.

A demonstration in support of an opposition leader in Zaire turned violent when police intervened, but accounts differ as to what happened. Opposition leaders in Brussels say five people were killed and three others beaten yesterday in the incident. The government strongly denies that anyone died.

-30- 2172

#90121u3579 05/01/1990 ~United Press International

(MAY 1) UPI - The Senate this afternoon passed by voice vote a bill granting President Bush nearly all his request of 720-Million dollars in aid for the new Central American democracies in Nicaragua and Panama. But the senators retained a provision in the bill allowing the District of Columbia to fund an abortion program. Bush has threatened to veto the aid bill if it includes the abortion provision.

The Senate is getting ready to consider campaign reform legislation, and today Republicans proposed that all political action committees be eliminated. The bill also calls for barring groups such as labor unions from taking an active role in campaigns. Democrats immediately criticized the bill because it puts NO limit on spending in congressional races. Democratic leader George Mitchell says- ''without limits, there can be NO reform.''

Freed American hostage Frank Reed had a steak and a beer today at the U-S military hospital in Wiesbaden, West Germany, where he celebrated his first full day of freedom in three-and-one-half years. Reed was also re-united today with his wife. Doctors reported finding ''NO major medical problems'' in their initial exams, but said that Reed is- ''weak and tired from his ordeal.''

A rebel attempt to kill Philippine soldiers backfired today when a grenade thrown by the rebels bounced back and killed two guerrillas. The Philippine military says the grenade was thrown at a truckload of soldiers while the vehicle was stopped at a gas station north of Manila. But it struck a 10-foot concrete wall and bounced back on the attackers, killing two of them.

#90121u3638 05/01/1990 ~United Press International
(MAY 1) UPI - Secretary of State Baker got into a testy exchange today with PennsylvaniaSenator Arlen Specter over a U-S plan for talks between Israelis and Palestinians. Specter said he thinks the plan is really an attempt to bring the Palestine Liberation Organization into the Middle East peace process. Baker sharply disagreed, saying ''that's NOT right.'' Baker told a Senate panel that Israel woN'T have any UNwanted contact with the P-L-O.

The airline industry today upped the bounty on air terrorists. The Air Transport Association said it will pay one-Million dollars for information leading to the arrest and conviction of international air terrorists. The U-S State Department has already put out a two-Million-dollar reward for the same information. The industry is especially hoping to crack the 1988 bombing of Pan Am flight 103, which exploded over Lockerbie, Scotland, killing 270 people.

The Castro government is making claims that the United States is preparing to invade Cuba. A Cuban statement issued out of the Czechoslovakian Embassy in Washington says three upcoming U-S military maneuvers in the Caribbean are what's described as ''a rehearsal'' for the invasion. Pentagon officials deny the charges.

Poor and indebted countries failed today in their bid for United Nations action to signifcantly reduce their foreign debt. The failure was reflected in a declaration adopted by the General Assembly that called instead for a ''durable and broad'' solution to the debt crisis. Developed nations did agree with the poorer countries to try to eliminate poverty and give Eastern Europe an economic role in the 1990's.

-30- 1817
#90121u3846 05/01/1990 ~United Press International
(MAY 1) UPI - The House today passed a Democratic budget plan that cuts Pentagon funds and increases domestic spending by larger amounts than President Bush wants. The one-TRILLIONBILLION-dollar budget was approved on a party-line vote of 218-208. House Budget Committee Chairman Leon Panetta says the plan provides ''a transition from a cold war economy to a

peacetime economy.'' Democrats had called for a vote on Bush's budget proposal, but Republicans decided NOT to submit it... apparently because of concern that many Republicans wouldN'T support it.

Defense Secretary Cheney today responded to what he terms ''UNcertainty over the level of funding'' Congress will approve for defense budgets. He extended a freeze on seven-BILLION dollars in new military construction, and ordered a review of more than 200 congressionally approved projects. Included on the review ''hit list'' are four of the Navy's new strategic home ports... including one on Staten Island, New York, which is nearly complete.

The Soviet Communist Party gave up organizing duties for the annual Moscow May Day parade for the first time this year, with the City Council of Trade Unions doing the honors. Marking what's referred to as the ''international day of solidarity among working people,'' some marchers openly booed President Gorbachev, who observed the parade through Red Square from atop the Lenin Mausoleum.

Panama's new government today was hit by the first public demonstration of an anti-U-S backlash during the Panama City May Day parade. Thousands of marching workers shouted- ''Get out Yankee invaders'' or carried banners describing Panama as an ''occupied territory.'' Said one public employee- ''Nobody likes to be invaded.''

-30- 1900

#90121u3879 05/01/1990 ~United Press International

(MAY 1) UPI - Authorities in Tallahassee, Florida, say at least five shots were fired today at a group of children on the playground of the Fairview Middle School on the city's south side. About 40 children were on the playground at the time of the shooting, but NO one was injured. Teachers kept students inside the rest of the day as police patrolled the neighborhood. Police are looking for a rust-colored car seen in the area at the time of the incident.

Another problem developed today with the Hubble Space Telescope, but NASA engineers doN'T think it's serious. Engineers noticed a glitch in the gyroscopes used to position the giant orbiting observatory, and they're investigating to find the cause. The glitch was discovered following tests of the telescope's radio antennas... one of which was stuck until technicians freed it on Sunday. The telescope was put in orbit last week by the space shuttle Discovery.

Zsa Zsa Gabor was sentenced to an additional 60 hours of community service today on charges of inflating her reports of community-service time worked at a Los Angeles-area homeless shelter. A Beverly Hills judge found Gabor had worked less than 35 hours of the 120 hours she claimed in her report.

She was ordered to complete that service- part of the sentence she received for her slapping a police officer- along with 60 additional hours.

The American television audience still loves ''Lucy.'' C-B-S says an estimated 40-Million people tuned in last night for the first-ever broadcast of the original pilot of the ''I Love Lucy'' show. The episode had a 21-point-two rating and a 37 share. The series starred Lucille Ball and Desi Arnaz, and ran originally from October 15th, 1951, to September 24th, 1961.

-30- 1911

#90121u4050 05/01/1990 ~United Press International

(MAY 1) UPI - The U-S-installed president of Panama, Guillermo Endara , is in Washington on his first visit since taking office.

Endara met with President Bush yesterday and followed that with meetings today with Vice President Quayle and congressional leaders.

Endara also monitored the progress of the 720-Million-dollar Central American aid bill moving through Congress.

In Panama today, the nation saw its first real demonstration of anti-U-S backlash since the December invasion. Workers taking part in a May Day parade in Panama City shouted- ''Get out Yankee invaders'' during the march.

But in nearby El Salvador, the annual May Day parade in the capital turned into a peace demonstration. 35-thousand people gathered for what was called a ''March for Peace,'' demanding an end to the country's decade-long civil war.

Violence erupted at the close of a May Day rock concert in West Berlin today, leading to a riot in which more than 500 youths fought pitched battles with police.

Police used water cannon and tear gas in a frustrated bid to control the mob that raged through the neighborhood. Rioters smashed shop windows, set buildings and police cars on fire, and threw rocks and bottles at police.

More than 50 people were arrested. There was NO estimate of how many were hurt.

The violence erupted at the close of a rock concert organized by fringe groups opposed to German unification.

The riot marred the first May Day in 44 years to be celebrated in both

East and West Berlin. Earlier today, about 70-thousand Berliners gathered at the former Parliament building on the West Berlin side to hear May Day speeches about the international labor movement and the need for German unity.

-30- 1904

#90121u4071 05/01/1990 ~United Press International

(MAY 1) UPI - Defense Secretary Cheney hit members of Congress where they live today, instituting a freeze on seven-BILLION dollars worth of military construction across the nation in response to threatened deep cuts in the Pentagon budget.

Cheney also ordered a review of more than 200 congressionally approved military projects for possible cancellation.

Cheney said in a statement that the construction freeze- in his words- ''may NOT be popular with members of Congress.''

But he lashed out at those- quoting here- ''who want to cut the defense budget even as they plead to save the projects in their own states and districts.''

Cheney said he- ''canNOT put construction projects ahead of people.''

Included in the projects for review are four of the Navy's six new strategic home ports- including the nearly completed port in Staten Island, New York.

New York Mayor David Dinkins is an opponent of the Navy's Staten Island port. He called Cheney's moves ''courageous given the pork-barrel pressures he faces.''

Republicans in the Senate floated their proposal for campaign finance reform today, but it drew immediate criticism from Democrats.

The G-O-P proposal calls for elimination of political action committees, which have been criticized as having too much influence with lawmakers. The proposal would also ban the use of so-called soft money, or UNreported contributions... and would bar groups such as unions from taking part in campaigns.

Democrats attacked the plan because it includes NO limits on spending in congressional races. Democratic leader George Mitchell says that omission is ''especially disappointing,'' adding- ''without limits there can be NO reform.''

But Mitchell and Democrat David Boren of Oklahoma said they're still happy

the Republicans introduced their plan. Said Boren- ''At least they have made a gesture.''

The Senate is getting ready to take up the campaign reform issue, possibly by the end of the week.

-30- 2170

#90121u4107 05/01/1990 ~United Press International

(MAY 1) UPI - President Bush is trying to remain neutral in the flap over the struggle for independence by the Soviet Baltic republics.

Bush has agreed to meet Thursday with Kazimiera Prunskiene , the Lithuanian prime minister as she tours North America in search of international support for the breakaway republic.

But the White House was quick to undercut the meeting, saying Bush is NOT meeting with Prunskiene in her role as prime minister of independent Lithuania, but simply as what's described as ''a freely elected representative of the Lithuanian people.''

Prunskiene was in Toronto, Canada, today, where she said Lithuania plans to use the ongoing Soviet reforms as a way of circumventing the cutoff of supplies. She said Lithuania will receive economic help from pro-democracy city councils in Moscow and Leningrad.

Prunskiene also spoke out against the Soviet blockade of Lithuania, saying... ''It's doubtful any nation can solve its economic problems with armed force.''

In the neighboring Baltic republic of Latvia today, thousands of ethnic Russians marched in a May Day parade, warning against an independence movement by saying it would create ''a second Lithuania.''

The U-S airline industry raised the bounty on air terrorists today by one-Million dollars.

In an announcement in Washington, D-C, the Air Transport Association offered one-Million dollars for information leading to the arrest and conviction of international air terrorists.

The State Department has already put a two-Million-dollar price on the heads of air terrorists.

The bounty is especially aimed at solving the 1988 bombing of Pan Am Flight 103, which exploded over Lockerbie, Scotland, killing 270 people.

The air industry hopes the bounty will encourage terrorist turncoats to

inform on their comrades.

In other aviation news, the Federal Aviation Administration today offered testimony against congressional action that would require the F-A-A to inspect commercial airliners for signs of aging.

F-A-A officials said the change would shift safety responsibility from the airlines to the F-A-A, and could make the federal government liable for air disasters.

-30- 2376
#90121u4190 05/01/1990 ~United Press International
(MAY 1) UPI - The House voted largely along party lines today to narrowly approve a fiscal 1991 budget. The one-point-two-TRILLION-dollar Democratic spending blueprint slashes defense funds and increases domestic spending by more than President Bush wants.

The Senate today passed a two-point-three-BILLION-dollar emergency spending bill that includes 720-Million dollars in aid to Nicaragua and Panama. But the White House says President Bush will veto it if it arrives on his desk with an amendment allowing the Distict of Columbia to fund abortions.

Rioting has marred the first May Day in 44 years to be celebrated by Germans from both East and West Berlin. Police arrested more than 50 young rioters, which they describe as ''hard core'' trouble-makers.

Riot-clad police used water cannon and tear gas in a bid to control the mob as it rampaged through a working-class district... smashing shop windows, torching buildings and police cars and barricading streets.

In Latvia, thousands of ethnic Russian workers took part in a May Day rally organized by a group that opposes independence from Moscow. One of dozens of signs and banners held aloft by the demonstrators read- ''We will NOT allow a second Lithuania.''

Argentine President Carlos Menem says recovery of the disputed Falkland Islands is the main objective of Argentina's foreign policy. But he says he'll work toward that objective ''through constructive dialogue with the British government.'' Argentina and Britain went to war over the islands in 1982.

Defense Secretary Cheney met today in Washington, D-C, with his West German counterpart to discuss bi-laterial issues including German unification, U-S-Soviet conventional arms reduction talks in Europe and NATO.

-30- 1933
#90121u4203 05/01/1990 ~United Press International
(MAY 1) UPI - Police have stepped up patrols around a Tallahasse, Florida school that was the target of a gunman earlier today. At least five shots were fired in the direction of a group of children on the playground. NO one was injured.

A strong earthquake measuring six-point-four on the Richter scale shook a wide area of southern coastal Alaska today. Officials say the quake was centered 10 miles south of the town of King Salmon... but originated deep below the surface... helping prevent any damage or injuries.

Opening day of the Pennsylvania A-F-L C-I-O convention in Pittsburgh turned violent today. A shouting match by delegates angry over the question of voting rights turned into a pushing match. NO arrests or injuries were reported.

In New York City, a witness at the trial of former Philippine first lady Imelda Marcos told how Fredinand Marcos shook down Japanese firms for Millions of dollars. Mrs. Marcos is charged with scheming with her late husband to divert more than 200-Million dollars from the Philippines for their own personal use.

A fan obsessed with comedian David Letterman is back in prison. A judge in Niantic, Connecticut, today sentenced 38-year-old Margaret Ray to up to one year in jail for breaking into the late-night television host's house in March for the sixth time.

A New Jersey eye specialist says many people have been confusing bottles of fake fingernail glue with eye drops in similarly shaped bottles. He says the mixup leaves people with glue in their eye and painful injuries.

-30- 1715
#90121u4389 05/01/1990 ~United Press International
(MAY 1) UPI - Missouri will NOT be executing condemned killer Bobby Lewis Shaw as scheduled early tomorrow morning. A federal judge tonight granted a stay of execution... saying he needed time to study motions filed by Shaw's attorney. The 38-year-old Shaw was to receive a lethal injection for fatalling stabbing a prison guard while serving a life sentence for another murder.

The House passed a one-point-two-TRILLION-dollar spending plan for the 1991 fiscal year today. California Democrat Leon Panetta, chairman of the House Budget Committee, describes the plan as ''a transition from a cold-war economy to a peacetime economy.'' It cuts defense spending and pads domestic programs compared to the budget sought by President Bush.

The budget passed 218-208 on a partisan vote.

White House officials say the recent release of two U-S hostages does NOT mean impending freedom for the other six American citizens held in Lebanon. They say if Iran is expecting an official gesture of gratitude from the United States for the release of the hostages, it has a long wait coming. Both Iran and Syria remain on a U-S list of countries accused of supporting terrorism.

The May Day celebration in West Berlin turned violent tonight when rioting erupted at the end of a rock concert organized by opponents of German unity. More than 500 youths rampaged through a district near the Berlin Wall, smashing shop windows and throwing rocks and bottles at police. More than 50 people were arrested, but police had little success in suppressing the gangs. Said one police spokesman- ''It looks as if we are in for a long night.''

-30- 1798
#90121u4412 05/01/1990 ~United Press International
(MAY 1) UPI - The House took steps today to give the Census Bureau some extra help in completing the 1990 census. Lawmakers voted to extend until at least the end of the year a six-month limit on Census Bureau employment for retired federal workers. That means the federal retirees can keep working on the census without losing retirement benefits. The measure must still be approved by the Senate.

Late night television talk-show host Johnny Carson is back in court with alimony problems. His first wife, Joan Wolcott Carson, has appealed to a New York court to have her alimony upped from 13-thousand-500 dollars a year to 120-thousand. She was married to Carson from 1949 to '63. She cites heavy medical bills for the more than 100-thousand-dollar increase, saying- ''For him, that's like paying car fare.'' Carson calls the request a ''baldfaced holdup.''

A California man with a brain tumor is suing the state to allow his head to be cryonically frozen before he dies. Lawyers say mathematician Thomas Donaldson wants his head frozen in hopes that scientists in the future will be able to attach it to a healthy body and cure his brain disorder. The suit is controversial because Donaldson wants to die before the tumor significantly damages his brain. If his request is carried out, it would amount to suicide.

The Coast Guard wants to make absolutely sure NO other oil tankers run into Alaska's Bligh Reef... so they're building a lighthouse that'll be impossible to miss. The 59-foot-high tower will flash its light every four seconds, reminding ship captains of the spot where the Exxon Valdez ran aground on March 24th, 1989... causing the nation's worst oil spill. The

lighthouse is expected to be finished by mid-August.

-30- 1916
#90122b0005 05/02/1990 ~Business Wire
AKRON, OH (MAY 2) BUSINESS WIRE - Officials of Bridgestone/Firestone Inc. (formerly named The Firestone Tire & Rubber Co.) announced that effective May 1, 1990, the merger of Bridgestone (U.S.A.) Inc., based in Nashville, Tenn., and Bridgestone/Firestone Inc., with headquarters in Akron, is completed.

Bridgestone/Firestone Inc., has assumed all of the assets and obligations of Bridgestone (U.S.A.) Inc.

The company changed its name to Bridgestone/Firestone Inc., on Aug. 1, 1989, in anticipation of the merger of the company and Bridgestone (U.S.A.) Inc., and the amalgamation of Bridgestone (Canada) Inc., and Firestone Canada Inc., into Bridgestone/Firestone Canada Inc.

Bridgestone/Firestone Inc., a wholly owned subsidiary of Bridgestone Corp. operates 16 plants in North America which manufacture Bridgestone, Firestone and Dayton brand tires, and a variety of industrial and synthetic rubber products. In addition, Bridgestone/Firestone operates nearly 1,600 MasterCare tire and automotive service centers in the United States and tire manufacturing plants in Europe and Latin America.

Bridgestone/Firestone Inc. markets passenger, high performance, light truck, truck and bus, off-the-road, industrial, agricultural, rally, kart, motorcycle, and motorsport tires, as well as industrial and synthetic rubber goods and aviation tires.

Bridgestone Corp., the parent company, is a global tire and rubber manufacturer with headquarters in Tokyo. Bridgestone Corp., operates some 60 plants in 19 countries, and has research and development facilities in North America, Europe and Asia. Bridgestone Corp. is one of the world's largest tire and rubber companies, and markets its diverse products in more than 150 nations and territories around the world.

DAYTON, OH (MAY 2) BUSINESS WIRE - Barco Graphics, Gent, Belgium, has purchased its U.S. distributor organization for business form, labeling and prepress systems and software - Digi Electronic Operations - from AM International/Harris Graphics. Digi was part of the company's AM Graphics

Specialty Products organization, Dayton.

Barco Graphics also announced the appointment of Joseph A. Verderber, former president of AM Specialty Products and earlier, Varityper, as present of Barco Graphics Inc., its U.S. subsidiary.

The Barco Graphics Inc. U.S. headquarters will be moved from Torrence, Calif., to Dayton, Verderber explained, where it will be merged with the Digi organization.

Barco paid approximately $8 million for Digi's net assets and the assumption of the distribution contract. Digi 1989 turnover exceeded $9 million with a before-tax profit of $625,000. Approximately 36 Digi employees will join the expanded Barco Graphics Inc. organization.

Barco Graphics Inc. is now in a position to offer a "total solution" approach to electronic design and prepress, Verderber continued. This includes not only the former Digi line of prepress workstations, plotters, and related systems and peripherals, but also the BG-200 Aesthedes Series of design systems and the BG-500 Creator Series of color image retouching and manipulation systems.

Barco Graphics Inc. currently operates sales and demonstration centers in Chicago, Dayton, New York, San Francisco, and Torrance.

IRVINE, CA (MAY 2) BUSINESS WIRE - Toshiba America's computer systems division has reduced the suggested retail price of its high-performance 80386-based 25-megahertz T8500 desktop computer from $7,799 to $5,999, effective immediately.

Toshiba, a leader in the portable PC arena, utilized its laptop technology in the packaging and design of the T8500 to create a small footprint desktop PC that is both powerful and highly expandable.

''The 386 desktop market is evolving very quickly. Prices of components such as processors and large-capacity hard disk drives have been moving downward. As a result, Toshiba can reduce the price of its premiere desktop. We think that a 386 PC that has Toshiba quality and technology for $5,999 is an excellent value,'' said Tom Sherrard, director of PC marketing.

The full-featured T8500 is equipped with two megabytes RAM, expandable to

14MB with a 64KB hardware cache; a 100MB hard disk drive, expandable to 200MB; 1.44MB 3.5-inch diskette drive; and built-in VGA display support. There are three dedicated memory expansion slots on the system board and six built-in ports, including SCSI and floppy disk-drive ports.

Additional expansion is possible through three 16-bit, full size IBM/PC AT compatible slots and one dual-function 8-bit half-size, or 16-bit Toshiba slot, that are easily accessed from the side of the unit.

''The T8500 is ideal for business applications including graphics, spreadsheets and document publishing; it supports Windows, OS/2 and UNIX for power users; and, because of its performance and expansion capability, it functions well as a network PC workstation,'' Sherrard said.

The system is available through Toshiba's nationwide sales network. It is supported by a one-year parts-and-labor warranty and on-site service.

Toshiba America Information Systems, computer systems division, is located at 9740 Irvine Blvd., Irvine, Calif., 92718, 800/334-3445.

#90122b0050 05/02/1990 ~Business Wire

IRVINE, CA (MAY 2) BUSINESS WIRE - Toshiba America's computer systems division is now shipping its T1000XE and T1200XE notebook-size personal computers nationwide.

The small, lightweight, fully featured IBM-compatible systems feature hard disk storage, full-function, full travel keyboards and crisp, highly readable displays. Designed to meet the needs of traveling and field professionals, the battery-powered PCs provide fast access to programs and data.

''They fully support sales automation, remote and local terminal emulation and personal productivity applications such as word processing and spreadsheet management,'' said Tom Sherrard, director of PC marketing.

Ken Duckman, president of Source One Systems Inc., a Toshiba dealer in Houston, commented, ''We already have a project that involves many thousands of the T1200XEs. I think it is the best thing Toshiba has come out with on the low end of the product line. And the key is screen and keyboard...they're the best in the business.

''We demo competitive products side by side. So far the reception to the Toshibas has been phenomenal. It has eclipsed the competitors' products

that are on the market today.''

According to Roger Powell, computer product manager of Sears Business Centers, his company is delighted with the new family of notebooks from Toshiba. ''We are very pleased to be able to bring such fine, well-executed systems to the marketplace. Feedback thus far from our sales force and customers has been excellent.''

Both systems have battery management features: intelligent power supply systems with ''gas gauges,'' and automatic display and hard drive shut-down after a specified period of keyboard inactivity. Toshiba's unique AutoResume feature, standard on both models, acts like an ''electronic bookmark.'' When a user needs to interrupt an application, the user simply turns the computer's power off. When powering the PC back on, the user is instantly back to where he or she left off in the application, with no re-booting required.

Toshiba America Information Systems, computer systems division, is located at 9740 Irvine Blvd., Irvine, Calif., 92718, 800/334-3445.

SAN RAMON, CA (MAY 2) BUSINESS WIRE - Michael J. Majors, chief executive officer of Majors Engineering Inc., and William S. Robinson, president of Towill Inc., announced the completion of a merger of the two firms.

Majors Holding Company has been formed with two operating companies as wholly owned subsidiaries: Majors Engineering, a civil engineering and land surveying firm headquartered in San Ramon, with full-service offices in Novato and Sacramento; and Towill, a widely known provider of photogrammetry, mapping, hydrographic and land surveying services headquartered in San Francisco, with other offices in Concord and Redding, California and Pineville, La.

Majors will serve as chief executive officer of Majors Holding Company and president of Majors Engineering Inc. Robinson will continue as president of Towill Inc., and will serve as a director of the Holding Company.

Majors Engineering was founded in 1975 and provides comprehensive development engineering services to a wide range of clients in the residential, industrial, commercial and retail markets, as well as to local, state and federal agencies.

Services include topographic and boundary surveys, planning and design,

landscape architecture, construction staking and construction management. The firm employs 110 professionals and support staff in its three California locations.

Current projects include providing lead engineering services for a 680 acre development project in San Joaquin County which includes a regional food products distribution center; engineering and surveying services for the Tassajara Ranch project, a 1000 unit residential and 30 acre shopping center site in the Danville/Blackhawk area; and design improvements for Caltrans District 3 to 46 freeway ramps in Northern California.

Towill was founded in San Francisco in 1955 and employs a staff of 45 professionals and support personnel. Ongoing projects include surveying and mapping on the Transmission Authority of Northern California (TANC) 500KV transmission line project, San Francisco International Airport CAD mapping program, Bay Area Rapid extension program, and CAD mapping and GIS preparation for San Rafael, Foster City, Daly City and other San Francisco Bay Area communities.

In addition, Towill was selected to provide surveying and survey management services on the Development of Energy Super Collider in Texas, and is presently completing satellite surveys and precise leveling for basic control of the project.

#90122b0087 05/02/1990 ~Business Wire

SAN FRANCISCO (MAY 2) BUSINESS WIRE - Bank of America has named Kris Gagnon and Bruce Frazier as senior vice presidents.

Gagnon manages corporate relationships in the Americas Group's Southwest Region. Frazier manages the bank's Latin America Support Services, with chief-of-staff responsibilities for the region's credit, operations, finance, human resources, and administration.

Gagnon, 38, began his career with four years of offshore assignments in financial services at American Express International. He came to Bank of America in 1981. First an operations trainee, he later managed a retail branch, moving into wholesale banking in 1983 at the Houston Corporate Office.

He has held positions of increasing responsibility since then, being named

acting manager of Southwest Region in January 1990.

Gagnon holds a bachelor's degree in business administration from California State University, Fullerton.

Frazier, 55, joined Bank of America in 1988 as a vice president working in overseas assignments, first as Hong Kong area credit administrator. A year later, he was named to head the bank's Asia Division credit administration. He previously worked for four years in the commercial markets credit division at Seattle First National Bank, a subsidiary of BankAmerica Corp.

A veteran banker, Frazier's career includes experience in retail, middle-market, and international credit administration at other banks in California.

He holds a bachelor's degree in business from California State University, San Jose.

#90122b0094 05/02/1990 ~Business Wire

SACRAMENTO, CA (MAY 2) BUSINESS WIRE - State Health Director Kenneth W. Kizer, M.D., M.P.H., Wednesday announced the settlement of 587 citations issued in the last several years against nursing homes operated by Care Enterprises West.

Care Enterprises West (CARE) is currently licensed by the Department of Health Services to operate 58 long-term care facilities in California. As a matter of compromise, CARE agreed to pay the Department $616,107 and an additional $120,053 if specified conditions are not met. The first payment of $205,369 has been received by the Department.

Four hundred sixty-five of the settled citations had no outstanding balance due at the time of settlement. This is believed to be the second largest fine ever paid by a nursing home operation in the United States. The largest was the settlement with Beverly Enterprises for $800,000 in 1986.

The settlement agreement includes the revocation of the license of Care West Palomar Nursing Center, an Inglewood facility which ceased operation in April 1988; the revocation and stay of the revocation pending successful completion of a one-year probationary period for Mission Convalescent, Sonoma; the revocations and stay pending successful completion of a three-year probationary period for Playa Del Rey, Los Angeles; and Golden State Habilitation, Baldwin Park; and the voluntary

surrendering by CARE of the license of Cedar Haven, Bloomington, (San Bernardino County), which was closed by the company in October 1988.

In conjunction with the Department's desire to improve conditions in CARE facilities, a unique aspect of this agreement is the requirement that CARE work directly with the physician community to increase understanding and sensitivity to the special problems of nursing home patients.

Areas of particular emphasis will include skin care, prevention of falls, special problems associated with the developmentally disabled and elderly, including the effects of drugs on such persons.

Other parts of the settlement specify that in-service training will be conducted for facility staff, and will cover quality assurance, patient care policies, governing body and management, physician's services, infection control practices, patient assessments, and patients' rights. An orientation program will be provided to each newly hired employee.

In addition to the training, CARE will communicate the steps it is taking to ensure high-quality patient care to patients' families, local patient advocacy groups and members of the community, and will invite these groups to present recommendations and concerns addressing the goal of maintaining high quality of care in CARE facilities.

The department will continue to monitor facilities operated by Care Enterprises West to ensure compliance with the terms of the agreement.

This agreement coincides with the approval of the Federal Court of CARE's bankruptcy reorganization plan.

#90122b0109 05/02/1990 ~Business Wire

SOUTH SAN FRANCISCO, CA (MAYW 2) BUSINESS WIRE - In an expansion into the Pacific Northwest, Greyhound Exposition Services Inc. has purchased the general service contractor division of Classic Exposition, with offices in Portland, Ore., and Seattle, and Decorators West, also located in Portland.

''We're very excited by the new acquisition and the prospects of extending our services to this growing market,'' said Nort Rittmaster, president and chief executive officer of Greyhound Exposition.

Dave Pedersen, formerly of Classic, has been appointed vice president/general manager of Greyhound's newest acquisition, with Ron Miller, formerly with Decorators West, serving as vice president/sales.

Greyhound's new Oregon office will serve the Eugene and Portland area with eight convention and show sites totalling more than 650,000 square feet.

The sites are the Lane County Convention Center, Portland Memorial Coliseum Complex, Multnomah County Expo Center, Portland Marriott, Hilton and Red Lion hotels and the Oregon Convention Center opening in September.

The new GES office in Seattle will serve six locations totalling approximately 650,000 square feet.

GES is the largest general service contractor in the Western United States with additional offices located in Las Vegas and Reno, Nev., Los Angeles/Anaheim/Long Beach, San Francisco, San Diego, San Jose, Calif., and Phoenix, Ariz.

GES provides complete one-stop service handling every detail involved in planning a meeting, convention, trade show or special event.

The company has 450 permanent employees -- staffing as many as 1,500 during major shows -- and controls a total of 715,000 square feet of warehouse space in its current locations.

Greyhound is the designated contractor for the two largest shows in the country, CONEXPO and COMDEX, both held in Las Vegas and each with more than 1 million square feet of exhibit space.

#90122b0112 05/02/1990 ~Business Wire

KANSAS CITY, MO (MAY 2) BUSINESS WIRE - UtiliCorp United (NYSE:UCU) Wednesday announced that its shareholders have re-elected one director and approved the issuance of common shares for employee and director stock plans.

The company also announced that its board of directors will be reduced temporarily to seven members following the retirement of board member Raymond Rollins at today's meeting. Rollins, a director for 12 years, will become director emeritus.

Missouri Public Service President Fred K. Little has announced his retirement effective at today's meeting. Since being named president of the division one year ago, Little has overseen the majority of the company's Sibley Generating Station rebuilding project and major improvements to the division's natural gas distribution system.

Prior to joining Missouri Public Service, Little served for three years as president of UtiliCorp's Northern Minnesota Utilities division. A new president of Missouri Public Service will be named soon.

UtiliCorp Chairman and President Richard C. Green Jr. announced that second quarter financial results are expected to decline from the first quarter due to seasonal weather that is historically milder throughout the company's service territory. UtiliCorp achieved record results in the 1990 first quarter. The company reported operating revenues of $278 million, net income of $23 million and primary earnings per common share of $.92.

Green said that another solid financial performance is expected in 1990, due to first-time contributions from recent utility acquisitions, anticipated rate relief in various regulated jurisdictions and increasing contributions from non-regulated subsidiaries. In 1989, UtiliCorp reported operating revenues of $732 million, net income of $48.3 million and primary earnings per common share of $2.04. All of the 1989 results were company records.

UtiliCorp's PSI subsidiary, a nationwide marketer and supplier of natural gas, is experiencing continued increases in its volume of gas sales and production from gas properties. In 1990, PSI will continue to acquire proven gas reserves and intends in the future to acquire gas transportation and pipeline assets.

UtilCo Group, another non-regulated subisidary that owns, develops and operates independent and wholesale power projects, will continue to pursue its long-term goal of acquiring ownership of generating capacity throughout the nation.

Shareholders today re-elected Robert F. Jackson Jr. to a three-year term on the board of directors. Jackson, 64, is the retired president of CharterCorp, a bank holding company. The company has since been renamed Boatmen's Bancshares Inc.

Also approved by shareholders:

-- A proposal to increase compensation of corporate directors through the issuance of stock. Each director will receive quarterly payments of common stock valued at $2,500.

-- A proposal to increase by 500,000 the number of shares available for issuance under the company's Employee Stock Incentive Plan.

-- A proposal to increase by 250,000 the number of shares available for purchase by employees under the company's Employee Stock Purchase Plan.

Based in Kansas City, UtiliCorp provides gas and electric service in eight states through its divisions, Missouri Public Service, Peoples Natural Gas Michigan Gas Utilities, West Virginia Power, Northern Minnesota Utilities

and Kansas Public Service. West Kootenay Power in British Columbia is a Canadian subsidiary.

HOUSTON (MAY 2) BUSINESS WIRE - Chiles Offshore Corp. Wednesday formally announced a proposed public offering of five million shares of its common stock.

According to the company's plan, 4,200,000 of the shares will be offered to the public by Chiles Offshore and 800,000 by current shareholders of the company. The company anticipates that the initial public offering price will fall between $13 and $15 a share. Managing underwriters for the offering are Bear, Stearns & Co. Inc., and Salomon Brothers Inc., both of New York.

Chiles Offshore Corp., with offices in Houston and in Lafayette, La., is engaged in the contract drilling and workover of offshore oil and gas wells for major and independent oil and gas companies. The company owns and operates a fleet of 10 mobile jackup drilling rigs, now active in the United States Gulf of Mexico. The company also currently manages a

self-contained platform rig owned by a major oil and gas company and operated in the Gulf.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers be accepted prior to the time the registration statement becomes effective. This release shall not constitute an offer to sell or the solicitation of an offer to buy these securities. Nor shall there be any sale of these securities in any state in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of such state.

A written prospectus concerning Chiles Offshore Corp.'s public stock offering can be obtained from Bear, Stearns & Co. Inc., at 245 Park Avenue New York, New York, 10167, or from Salomon Brothers Inc. at One New York Plaza, New York, New York, 10004.

RICHMOND, VA (MAY 2) BUSINESS WIRE - James River Corp. (NYSE: JR) announced Wednesday that it will construct a $157 million chemical recovery unit and related black liquor concentration system at its Naheola Mill in Alabama.

The new unit will be large enough to support future pulping capacity increases.

The three existing chemical recovery units will be retired. The new unit will feature the latest technology, including state-of-the-art odor and emission control. Improved efficiency will reduce the amount of fossil fuels burned to generate steam and electricity.

In addition, the rate of airborne emissions will be lowered and safety and reliability will be improved. This project will both improve the operations of the Naheola Mill and provide significant environmental benefits.

The Mill began preparing for future capacity increases with the June, 1989 approval of a $50 million bleach plant project for improving production and environmental efficiency.

That project, which is scheduled for completion this year, will further minimize dioxin levels in effluent and reduce dioxin in the Mill's products to undetectable levels (less than two parts per trillion).

The total program at Naheola over the coming three years, as planned, would expand pulping capacity by approximately 100,000 tons per year and would include similar capacity increases in the future for towel and tissue and bleached paperboard.

James River Corp., headquartered in Richmond, Virginia, is an integrated manufacturer of pulp, paper, and converted paper and plastics products and has an annual sales rate of approximately $6 billion.

SAN JOSE, CA (MAY 2) BUSINESS WIRE - IBM Corp. and Valid Logic Systems Inc. Wednesday announced an agreement for IBM to acquire a minority equity interest in Valid, a leading developer of integrated electronic design automation (EDA) software.

Valid, based in San Jose, had worldwide 1989 revenues of $173.9 million.

Under the terms of the agreement, IBM will make an initial $11.2 million investment in Valid in the form of newly issued voting convertible preferred stock.

The purchase of the convertible preferred stock will be made at a price per common share equivalent equal to 140 percent of the highest average of the closing prices for a share of Valid common stock on any 10 consecutive trading days from today through May 30. In any event, the purchase price of the convertible preferred stock will not be less than $4.20 per share or greater than $7 per share on a common stock equivalent basis.

The initial investment will represent an interest in Valid of between 5 percent and 8.3 percent. Additionally, IBM will purchase warrants for approximately $1.2 million to acquire up to 4.75 million shares of common stock at $11 per share.

The agreement also includes provisions for Valid, at its option, to sell additional convertible preferred shares to IBM. A series of four annual capital calls, to begin in 1991, has been set up to enable Valid to secure additional investment capital.

The amount and price of each capital call will depend on Valid's performance in marketing their EDA applications on IBM workstations. While the terms of the calls allow for up to $90 million in additional capital,

they will not require IBM to acquire an equity interest in Valid greater than 49.99 percent.

Valid currently offers EDA applications for the IBM Personal System/2 and IBM RT system. The firm has announced that its software tools will be available for IBM's new RISC System/6000 family of advanced workstations and servers in the second half of 1990. IBM is a major customer of Valid and is using Valid's EDA applications at several of its locations, including Kingston and Yorktown, N.Y., and Manassas, Va.

Valid designs, manufactures, markets and supports a full line of EDA solutions based on industry standard hardware, operating systems and networks. Valid products are used to develop electronic systems, including integrated circuits (ICs), application-specific ICs (ASICs) and printed circuit boards (PCBs).

Valid corporate headquarters is located at 2820 Orchard Parkway, San Jose, Calif. 95134, 408/432-9400.

#90122b0162 05/02/1990 ~Business Wire

SAN FRANCISCO - Executives of three national securities firms have joined Sutro & Co. Incorporated in a further expansion of its investment banking capabilities, it was announced by Lloyd Greif, Vice Chairman of Sutro.

Greif also announced the formation of a new unit in Sutro's Corporate Finance Department, the Depository Institutions Financing and Advisory Group. The establishment of this new entity reflects the continuing growth of Sutro's involvement with banks, savings and loan associations and other depository institutions, Greif said.

Since 1987, Sutro has arranged 14 transactions involving mergers, acquisitions or leveraged buyouts of financial institutions.

Sutro, a wholly owned subsidiary of John Hancock Freedom Securities, is a 132-year-old regional investment securities firm headquartered in San Francisco. Greif, who also is Managing Director of Corporate Finance for Sutro, is based in the firm's Los Angeles office.

The three new members of Sutro's Corporate Finance Department are Allan G. Bortel, formerly a Senior Vice President of Shearson Lehman Hutton; Theodore Kuh, who comes from Merrill Lynch Capital Markets; and Scott E. Starbird, who was previously with Prudential-Bache Capital Funding.

Bortel and Kuh will be based in Sutro's San Francisco office, and Starbird will be located in the firm's Los Angeles office.

Bortel entered the securities field in 1965 and served as an analyst and research director for several California-based stock brokerage firms during the late Sixties and early Seventies. In 1974-75 he was Assistant to the President of the Federal Home Loan Bank of San Francisco.

From 1975 until he joined Sutro, Bortel was a savings and loan analyst with Shearson Lehman Hutton.

Bortel has been ranked among Institutional Investor magazine's top five savings and loan analysts since 1973. A Chartered Financial Analyst, he is a member of the Security Analysts of San Francisco and the New York Society of Security Analysts. He graduated from the School of Mortgage Banking of the Mortgage Banker's Association of America in 1979.

Bortel holds a B.S. degree from the University of Pennsylvania's Wharton School and an M.B.A. from the University of California (Berkeley). In 1960-61 he attended the London School of Economics.

At Sutro, Bortel will be a key member of the newly formed Depository Institutions Financing and Advisory Group, Greif said.

Kuh has extensive experience in two areas of investment banking, mergers and acquisitions and public underwritings of equity and debt securities. He was formerly a member of Merrill Lynch's Japan Banking Group.

At Sutro, Kuh will be closely involved in a fast-growing specialty area, the arrangement of cross-border investment banking transactions, with emphasis on companies in Pacific Rim countries. Of the 48 mergers, acquisitions and leveraged buyouts arranged by Sutro since 1987, almost a third have involved foreign companies.

For the last three years Kuh has been an Associate in the Mergers and Acquisitions and the Corporate Finance departments of Merrill Lynch Capital Markets in New York. From 1982 to 1985 he was a member of the San Francisco Audit Department of the Coopers & Lybrand accounting firm.

Kuh has a B.S. degree from the University of California (Berkeley) and an M.B.A. from the Wharton School. He is a Registered Securities Representative and a Certified Public Accountant.

Starbird joined Prudential-Bache Capital Funding in its Los Angeles office in 1985, and has been involved in all phases of investment banking. In 1988 he served in the firm's New York High Yield-Leveraged Buyout Group.

In 1981-82 Starbird was an Associate Consultant with Towers, Perrin,

Forster & Crosby, Inc., New York, specializing in financial strategic planning and acquisition search projects.

Starbird graduated magna cum laude from Harvard College with a B.A. degree and went on to earn an M.B.A. degree from the Stanford Graduate School of Business and a J.D. degree from the Boalt Hall School of Law at the University of California (Berkeley).

WASHINGTON, DC (MAY 2) BUSINESS WIRE - William W. L. Taylor of TRW will become chief scientist for the National Aeronautics and Space Administration's Space Station Freedom program effective May 1, Richard H. Kohrs, director of the Space Station Freedom program, announced Wednesday. In this position, Dr. Taylor will be the principal advocate for the space science community in the Space Station program.

Taylor has been with TRW since 1978, most recently as assistant department manager of the Physical Sciences Department of the Applied Technology Division. He is principal investigator of the Waves In Space Plasmas (WISP) investigation and the High Voltage Drainage investigation on the Long-Duration Exposure Facility (LDEF), which was recently returned to Earth by the Space Shuttle.

He is also the U.S. science coordinator for ACTIVE, an international experiment on the propagation of low-frequency radio waves, and a co-investigator on the Space Experiments with Particle Accelerators (SEPAC) investigation. He is working with TRW on the proposed Neutral Environment With Plasma Interaction Monitoring System (NEWPIMS) for the Space Station.

Prior to joining TRW, Taylor worked at NASA where he was program scientist for Space Lab 1. Taylor is the third person named to the two-year chief scientist post for Space Station Freedom and the first to come from industry. Previous appointees were Dr. David Black of NASA's Ames Research Center and Dr. John-David Bartoe of the Naval Research Laboratory.

ANAHEIM, CA (MAY 2) BUSINESS WIRE - Pacific Bell announced Wednesday

plans to offer a system by year's end that will permit business customers more control of network management functions.

The new system, called Pacific Bell Service Manager, will allow customers to electronically access certain of the company's customer support systems using common computer terminals, said Pat Board, Pacific Bell project director. Through Pacific Bell Service Manager, customers can order Pacific Bell services, test certain services and issue trouble reports.

In addition, Service Manager also will provide access to other Pacific Bell network management services.

The company said the new system will be available later this year following technology testing. Both the technology test and the public offering require approval of the California Public Utilities Commission (CPUC).

Pacific Bell Service Manager will provide customers the following capabilities:

-- Service Request -- Allows customers to order Pacific Bell services and receive confirmation, cancel or change active orders, check order status and obtain a history of orders.

-- Trouble Reporting -- Customers can initiate trouble reports directly into Pacific Bell's maintenance system, perform status checks, and complete reports on the history and trends of troubles.

-- Service Testing -- Permits customers to conduct on-line tests of services such as basic business lines, CENTREX, COMMSTAR, 800 Service and multiline hunt groups, and issue a trouble report.

-- Access to Other Services -- Links customers with Pacific Bell's Customer Network Reconfiguration service for Advanced Digital Network (ADN) and a new Centrex Management Service for ISDN. ADN is a private-line data service.

Pacific Bell is subsidiary of Pacific Telesis Group, a diversified international telecommunications corporation based in San Francisco.

SAN FRANCISCO (MAY 2) BUSINESS WIRE - McKesson Corp. announced that its board of directors Wednesday raised the quarterly dividend rate on the company's common stock to 40 cents a share from 36 cents, an increase of

11 percent.

The new 40 cent rate will be payable July 2 to stockholders of record on June 1, 1990.

The board also declared a regular quarterly dividend of 45 cents per share on cumulative preferred stock series A (convertible), payable June 15, 1990 to shareholders of record on June 1, 1990.

In announcing the board's action, Alan Seelenfreund, chairman and chief executive officer, and Rex R. Malson, president and chief operating officer, said, ''The decision to increase the dividend was based on the company's strong cash flow, the strength of our financial position and the positive outlook for the current year.''

McKesson is the nation's leading distributor of pharmaceuticals and non-durable consumer goods. In fiscal 1990 ended Mar. 31, McKesson reported annual sales of $7.8 billion and net income of $99 million.

PORTLAND, OR (MAY 2) BUSINESS WIRE - Precision Castparts Corp. (NYSE:PCP) Wednesday reported much improved earnings on record sales for the fourth quarter and record sales with slightly lower earnings for the year ended Mar. 31, 1990.

E.H. Cooley, board chairman and chief executive officer of the Portland-based manufacturer of investment castings for the aerospace, industrial turbine and health care industries, said that fourth quarter earnings were up 31 percent on a 13 percent increase in sales.

Net income for the period amounted to $8.8 million, or 51 cents per share, on sales of $130.6 million compared to earnings of $6.7 million, or 40 cents per share, on $115.6 million in sales for the prior year's fourth quarter.

Sales for the year were $457.3 million, up 3 percent from the prior year's $443.7 million. Net income declined 1 percent to $29.1 million, or $1.70 per share, from $29.4 million, or $1.75 per share, one year earlier.

In reporting results for the quarter and for the year today, Cooley said that the increase in sales for the fourth quarter was due to the recovery of normal deliveries from the third quarter, which were lower in that period due to the Boeing strike, to increased sales of tooling to customers for new products, and to a one-time sale of replacement castings to a foreign customer.

The backlog of orders at Mar. 31, 1990, amounted to $483.3 million, up 9 percent from $445.2 million one year earlier, and also a new record for the company.

SANTA ANA, CA (MAY 2) BUSINESS WIRE - EECO Inc. (ASE:EEC) announced Wednesday that it has filed for protection under Chapter 11 of the Bankruptcy Code.

The petition was filed for the company's keyboard, switch and keypad divisions only. The company has retained Stutman, Treister & Glatt Professional Corp. of Los Angeles as its bankruptcy counsel. The company stated that, in conjunction with the filing, it had petitioned the court to permit the continued operation of those business by EECO Inc. as a debtor in possession.

Robert Bonney, chairman of EECO, indicated that the company's EECO Computer Inc. (ECI) and EECO Ltd. subsidiaries were not included in the Chapter 11 filing. Bonney explained ECI was excluded because this subsidiary operates as a financially independent business which does not require court protection.

EECO Ltd., with headquarters in Scotland and serving the European market, is a separate company, governed by English law, and is not subject to the provisions of the U.S. Bankruptcy Code.

This subsidiary, which will continue to manufacture computer keyboards and electromechanical switches, is also able to operate as a financially independent business.

EECO Inc. indicated that the decision by its primary lender in March 1990 to cease further funding of the company's restructuring plan coupled with its inability to complete the sale of its Maxi-Switch Division were the primary factors which forced the copy to seek court protection.

Under court protection, EECO intends to strive for continued improvement in cost reduction and profit improvement in these divisions as well as its keyboard operation, which will be significantly downsized to focus primarily on higher margin custom keyboard production.

DeHuff reaffirmed the company's belief that operations under Chapter 11 will allow EECO Inc. to continue progress in its retstructuring activites and support its desire to maximize value for its customers, employees, creditors and shareholders as a going concern.

Trading in shares of EECO common stock was suspended by the American Stock Exchange on Apr. 23, 1990, and has not resumed.

EECO Inc. manufactures and markets computer keyboards, electronic keypads, electromechanical switches and hotel computer systems worldwide.

DALLAS (MAY 2) BUSINESS WIRE - Highlights of A.H. Belo Corp.'s annual meeting of shareholders held Wednesday in Dallas included the approval of an employee savings and investment plan and the election of five Class I nominees to the board of directors.

Re-elected for three-year terms were John W. Bassett Jr., a principal in the law firm of Atwood, Malone, Mann & Turner; Lester A. Levy, chairman of

the board of NCH Corp.; Burl Osborne, president and editor of The Dallas Morning News; William H. Seay, former chairman and chief executive officer of Southwestern Life Insurance Co.; and J. McDonald Williams, managing partner of Trammell Crow Co.

In other business, Belo chairman and chief executive officer Robert W. Decherd announced that a lawsuit filed in Delaware in 1988 challenging Belo shareholders' adoption of a differential voting stock structure has been dismissed. Decherd reported that no activity was ever undertaken by the plaintiffs in the suit beyond the initial filing, and no compensation in any form passed to the plaintiff.

Belo owns The Dallas Morning News and Dallas-Fort Worth Suburban Newspapers Inc., publisher of seven community newspapers in the Dallas-Fort Worth area. In addition, Belo owns and operates network-affiliated television stations WFAA-TV (ABC) in Dallas-Fort Worth and KHOU-TV (CBS) in Houston, Texas; KXTV (CBS) in Sacramento, California; WVEC-TV (ABC) in Hampton-Norfolk, Virginia; and KOTV (CBS) in Tulsa, Oklahoma.

Shares of Belo Series A Common Stock are traded on the New York Stock Exchange, symbol BLC.

SEYMOUR, CT (MAY 2) BUSINESS WIRE - Summagraphics Corp. (NASDAQ:SUGR) Wednesday announced it had completed its acquisition of the Houston Instrument division of Ametek Inc. for $25.2 million in cash and a $5 million, five-year convertible subordinated note that will entitle Ametek to purchase 8.8 percent of Summagraphics' shares.

Summagraphics also announced it had restructured the combined operations of the two companies into four divisions: Summagraphics Digitizer division, located in Seymour, Conn.; Houston Instrument division, located in Austin, Texas; Summagraphics N.V., formerly Houston Instrument's European division, located in Gistel, Belgium; and Summagraphics Sales and Service division, which will have customer responsibility for all divisions worldwide.

Summagraphics announced its intention to acquire Houston Instrument in March 1990. Houston Instrument manufactures peripheral devices principally used in computer-aided design applications. Brand names offered by Houston Instrument include Scan-Cad, Hi Pad Plus and True GRID.

Summagraphics Corp. is a leader in the designing, developing, manufacturing and marketing of digitizing tablets for use with high-resolution computer graphics systems. Brand names offered by the company include SummaSketch, Bit Pad and Microgrid.

ROCHESTER, NY (MAY 2) BUSINESS WIRE - Eastman Kodak Company Wednesday reported sales of $4.1 billion for the first quarter of 1990, down 2 percent from sales of $4.2 billion for the restated first quarter of 1989.

Net earnings declined 6 percent from a restated $212 million to $199 million in this year's first quarter.

''While first quarter results were slightly below those reported at this time last year, they are consistent with the company's business plan for 1990, which calls for higher sales and earnings for the full year,'' said Colby H. Chandler, chairman and chief executive officer.

On a per-share basis, Kodak's earnings were $.61, compared with a restated $.65 for the first quarter a year ago.

Earnings from operations for first-quarter 1990 were $498 million compared with a restated $516 million for the first quarter of 1989, a 3 percent decrease.

Kodak restated its reported results for each of the first three quarters of 1989 to reflect the company's conversion from a 13-period to a 12-month calender year on January 1, 1990. The restated 1989 first quarter comprises 14 weeks' activity, compared with 13 weeks this year. Full year results for 1989 were not affected by the restatement.

#90122b0625 05/02/1990 ~Business Wire

LOS ANGELES (MAY 2) BUSINESS WIRE - Virco Manufacturing Corp. (ASE:VIR) Wednesday reported net income of $187,000, equal to six cents a share, on sales of $182,789,000 for the fiscal year ended Jan. 31, 1990.

In the previous fiscal year, ended Jan. 31, 1989, the company earned $2,648,000, equal to 87 cents a share, on sales of $173,688,000.

Robert A. Virtue, chairman and chief executive officer, said Virco's earnings were substantially reduced by the company's decision to divest itself of the assets of its juvenile furniture division, with a charge of $1,307,000 against fourth-quarter earnings.

As a result, the company reported a net loss of $675,000, or 22 cents a share, on sales of $43,297,000 in the final quarter, ended Jan. 31, 1990, as compared with earnings of $1,224,000, or 40 cents a share, on sales of $40,294,000 in the comparable period a year ago.

The juvenile furniture division, which last year accounted for about 2.4 percent of Virco's revenues, has not met the company's profitability goals Virtue said. Although the company is currently in discussion concerning sale of the assets, the company chose a conservative accounting approach by providing for a contingency shutdown, he added.

The company in October announced a net charge against earnings of $635,000 for legal expenses and settlement costs of charges brought by the Los Angeles County District Attorney's office, alleging improper disposal of hazardous wastes. Virco's chrome-plating operations in Los Angeles, which were the target of the charges, have since been terminated.

Virtue pointed out that earnings from continuing operations were $510,000 in the final quarter and $1,472,000 in the year just ended, as compared with earnings from continuing operations of $1,211,000 in the final quarter and $3,135,000 for the previous year, ended Jan. 31, 1989.

The management's decision to dispose of the underperforming juvenile furniture division, and settlement this year of all remaining charges relating to the terminated chrome-plating operations in Los Angeles, are expected to have a positive effect on Virco's results from continuing operations in the future, Virtue said.

SAN FRANCISCO (MAY 2) BUSINESS WIRE - Chalone Inc. Wednesday released results of operations for the quarter ended March 31, 1990, showing the highest sales and profits for a first quarter in the company's history.

Sales increased by 25 percent over the comparable period in 1988 to $3.4 million, with net earnings of $73,000, as compared to $15,000 for the comparable period in 1988, an increase of 33 percent.

These increases were attributable to an overall rise in sales activity both nationally and internationally, made possible by increased wine availability, most notably at Edna Valley Vineyard.

''We are extremely pleased with the high level of demand for our wines during what is normally our slowest time of the year,'' said William L. Hamilton, vice president, finance. ''The first quarter sets the tone for

the year and we are, therefore, very optimistic about the next nine months '' he concluded.

Chalone Inc., a publicly-owned company based in San Francisco, produces, markets and sells premium white and red varietal table wines. Chalone currently owns and operates Chalone Vineyard in Monterey County, Acacia Winery in the Carneros District of Napa County, Carmenet Vineyard in Sonoma County, and in conjunction with its joint-venture partner, Paragon Vineyard Co., owns and operates Edna Valley Vineyard in San Luis Obispo County.

In addition to these wines, Chalone also markets, primarily in Southern California, the Kermit Lynch Selections, wines imported from small premium wineries in France and Italy. Chalone also concluded in April 1989, a cross-investment with Domaines Barons de Rothschild, owners of the Bordeaux estates of Chateau Duhart-Milon, Chateau Rieussec and Chateau La Cardonne and general manager of Chateau Lafite-Rothschild.

MENLO PARK, CA (MAY 2) BUSINESS WIRE - BANK ONE, Columbus, NA, in Columbus, Ohio, Wednesday announced the availability of ACCURET, a personal computer-based bank reconciliation service.

ACCURET makes it possible for businesses to automatically reconcile every item in a bank statement on a personal computer up to 20 times faster than by hand.

ACCURET was created by Menlo Park-based Intuit Inc., a leader in innovative financial software technology. The ACCURET service is available at other leading banks across the country, including First Interstate Bank of California, Texas, Washington and Alaska; Citibank of Illinois; SunBank of Florida and South Carolina National.

BANK ONE, a technology leader in the banking industry, will be the first bank in Ohio to offer the ACCURET service to small- and medium-sized businesses.

These businesses have traditionally spent from a few hours to several days each month reconciling multiple checking accounts. ACCURET reduces the task to minutes.

ACCURET runs on any IBM PC, PS/2 or compatible personal computer. The ACCURET software reconciles up to 500 transactions per minute -- a 95

percent time-saving improvement over manual reconciliation.

ACCURET examines every item in the bank statement for accuracy and alerts users to discrepancies between their records and their bank statement. When reconciliation is complete, four comprehensive reports can be printed.

Every month banks offering ACCURET mail participating customers their bank account information on a floppy disk, along with the customary paper statement. Because the bank statement data comes on a floppy disk there is no need for a modem or any additional hardware.

ACCURET works with most popular accounting packages and with any accounting system that can transfer data to either standard PC formats -- ASCII or Lotus. Customer support and upgrades are included at no additional charge.

For more information about Intuit Inc. or ACCURET contact Cathy Cloud at McLean Public Relations, 951 Mariners Island Blvd. Suite 370, San Mateo, CA 94404, 415/377-0478.

#90122b0631 05/02/1990 ~Business Wire

CARMEL, IN (MAY 2) BUSINESS WIRE - Conseco Inc. (NYSE:CNC), a financial services company headquartered in Carmel, Wednesday reported record first quarter earnings from operations for the period ended March 31 and announced the completion of $70 million in funding for its acquisition partnership.

First quarter 1990 net income was $8.5 million, or $1 per share fully diluted, up 27 percent on a per share basis from $6.8 million, or 79 cents per share, in the like period last year.

Earnings from operations for the quarter, excluding realized investment losses, were $8.6 million, or $1.01 per share fully diluted, up 51 percent on a per share basis from operating earnings of $5.8 million, or 67 cents per share, in the first quarter of 1989.

Conseco also announced today that the company and several other institutional investors have agreed to provide $70 million in equity capital for its previously announced acquistion partnership. The partnership will acquire and operate life insurance companies. The

partnership's first acquisition -- Great American Reserve Insurance Co. -- also previously announced, is expected to close in the second quarter.

The total of premiums collected and other revenues in the first quarter of 1990 was $401 million, an increase of 40 percent over first quarter 1989. Premiums from annuities marketed through financial institutions were approximately $164 million for the quarter -- up 82 percent. Under accounting rules governing the insurance industry, premiums received for most annuity products are treated as deposits to liability accounts, rather than as revenue.

Total assets grew to $5.4 billion at March 31, 1990 up 30 percent over March 31, 1989, based on the results of new product marketing and the acquisition of National Fidelity Life in June 1989. Asset quality remained strong -- the average quality rating of all of Conseco's bond investments was ''A'' at quarter end, and the percentage of investments in high-yield bonds was 7.6 percent, down from 8.2 percent at year end 1989.

#90122b0632 05/02/1990 ~Business Wire

MENLO PARK, CA (MAY 2) BUSINESS WIRE - Landsing Pacific Fund (ASE:LPF), a self-administered San Francisco Bay Area-based real estate investment trust (REIT), Wednesday reported first-quarter financial results.

The Fund reported funds from operations (net income before depreciation and amortization, payments from master leases and non-recurring costs) of $1,176,000, or 19 cents per share, on revenues of $3,848,000 (63 cents per share) for the quarter ended March 31, 1990.

Because equity real estate investments generate non-cash deductions of depreciation and amortization, management believes net income (loss) figures reported by the Fund are not the best indicator of performance.

Net (loss) for the three months ended March 31, 1990 were ($115,000), or (2 cents) per share, after charges of $1,032,000 in non-cash depreciation and amortization, the exclusion of $246,000 in Master Lease payments and $13,000 in non-recurring costs.

Net income results for the three months ended March 31, 1989, was $297,000 (5 cents per share). Management believes cash flow from operations is far more indicative of financial performance and cash available for distribution.

The directors of Landsing Pacific Fund believe the company's shares are

trading at a discount to their underlying value. Because of this the directors approved a stock repurchase program in October 1989 to purchase up to 300,000 of its outstanding shares on the open market. To date the Fund has purchased 69,500 of its shares and will continue to implement this policy.

Landsing Pacific Fund presently has 29 property investments with an estimated value of $145 million. Approximately 66 percent of the Fund's assets are located on the Pacific West Coast, primarily in the San Francisco Bay Area.

The Fund will be holding its annual shareholders' meeting on May 11 at 9 a.m. in the Stanford Park Hotel located in Menlo Park, Calif.

MINNEAPOLIS (MAY 2) BUSINESS WIRE - The Frank Lloyd Wright-influenced luxury resort near Madison, Wis., The Spring Green, has retained Colony Hotels & Resorts to manage the property, currently undergoing a planned $40 million expansion program.

The contract between Colony and The Spring Green owners, Euroactividade, a European corporation specializing in upscale luxury resorts, includes franchising the property under the Radisson banner as The Spring Green - a Radisson Resort.

Robert Graves, managing director and general manager at The Spring Green, said, ''Radisson and Colony's exemplary records of high quality resort management make them the perfect addition to our operation.''

The property features the Mobil Three Star and AAA Three Diamond-rated ''The Spring Green Restaurant,'' the only restaurant in the world designed by famed architect Frank Lloyd Wright; an 18-hole Robert Trent Jones Sr.-designed golf course ranked by Golf Digest as one of the 75 best public courses in the country; and a ski area offering both downhill and cross-country skiing.

The Spring Green will become a year-round resort in August 1990 with the completion of a ski lodge, 80 one-bedroom condominiums with kitchenettes, visitor center, golf and tennis shop, four tennis courts, indoor and outdoor swimming pools, two restaurants and a health center complete with racquetball courts, weight rooms, aerobics room, steam room, saunas, Jacuzzis and massage facilities.

Future plans include the addition of another nine holes of golf (opening in spring 1991), 200 two-bedroom, two-bath condominiums and 80 single-family villas.

Minneapolis-based Colony Hotels & Resorts, a subsidiary of Radisson Hotels International, is part of the Carlson Companies, a $6.2 billion, multi-faceted, privately held corporation. Carlson's primary operations are in the hospitality, travel, incentive and marketing industries.

WOODLAND HILLS, CA (MAY 2) BUSINESS WIRE - Zenith National Insurance Corp. (ZNT) reported operating income (unaudited) before ''fresh start'' tax benefit and capital gains/losses of $7.5 million or $.38 per share for the three months ended March 31, compared with $12.1 million or $.57 per share in the first quarter of 1989, a decrease of 38 percent.

The 1990 results reflect a net loss after taxes associated with reinsurance of storm damage in Europe estimated to be $1.7 million or $.08 per share.

Net income was $6.9 million or $.35 per share, including capital losses after taxes of $800,000 or $.04 per share, compared to $12.5 million or $.59 per share during the first quarter of 1989.

CAMBRIDGE, MA AND WHITE PLAINS, NY (MAY 2) BUSINESS WIRE - The Association of Small Business Development Centers (ASBDC) announced Wednesday the launch of a unique educational partnership with Lotus Development Corp. and IBM that will counsel small business owners on the use of technology in the management of their companies.

''Small Businesses have traditionally been the backbone of our economy, but they have often been slow to adopt technology,'' said Robert Bernier, president of the association.

''Training programs like the ASBDC/Lotus/IBM Learning Centers, that give small businesses the opportunity to learn how to make effective use of technology, will help small businesses to continue making a vital economic contribution to this country.''

Under the ASBDC/Lotus/IBM project announced today, 50 Small Business Development Center sites in seven states will each house a Learning Center in which small business owners and entrepreneurs can discover the benefits of personal computers and software, and learn about the technological tools that can help run a business more effectively.

The seven states participating in the first phase of the program are Pennsylvania, Massachusetts, North Carolina, Florida, Michigan, Washington and Texas.

Each center will provide SBDC clients with an interactive, ''hands-on'' orientation station of primary applications for small business such as accounting, word processing, database and spreadsheet.

In addition, all centers will include a station for practice sessions with complete versions of applications from Lotus, IBM and Great American Software.

The idea for the Learning Centers began as a cooperative agreement between the ASBDC asnd Lotus in 1988. They developed and tested a seminar which integrated Lotus spreadsheet software with small business finance - the first of its kind to offer computerized financial management.

In 1989, the ASBDC and Lotus began exploring ways to expand the benefits of this concept and approached IBM about integrating hardware into the learning centers.

This concept was appealing to IBM not only as a way to acquaint small businesses with IBM's PS/2 (a) personal computing line, but also as a vehicle to provide the kind of low-pressure environment for learning about computers that small businesses had been asking for.

The ASBDC represents a national network of 671 small business assistance centers located mostly on college campuses and is dedicated to providing training, counseling and information services to small businesses.

Lotus Development Corp., headquartered in Cambridge, is a provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of application software for work stations, minicomputers and mainframes. (a) Personal System/2 and PS/2 are registered trademarks of IBM Corp.

ROCKY HILL, CT (MAY 2) BUSINESS WIRE - Ames Department Stores Inc. announced Wednesday that on May 1 the U.S. Bankruptcy Court for the Southern District of New York authorized Ames to draw down $25 million of Debtor In Possession financing from Chemical Bank.

The money is to be released immediately for Ames' use.

Bankruptcy Court Judge Howard C. Buschman III also ruled that there would be a hearing on May 8 at 3:00 p.m., at which time he would consider Ames' reequest to release additional interim financing.

In additiion, Judge Buschman approved the interim appointment to Stephen L. Pistner as chief executive officer. A final hearing on the financing and Pistner's appointment is scheduled for May 15.

Ames, which filed for protection under Chapter 11 of the U.S. Bankruptcy Code on April 25, operates more than 600 stores in 20 states and has 55,000 employees.

The company, which has an annual sales base of well over $4 billion, sought court protection to restructure its business and finances.

AUSTIN, TX (MAY 2) BUSINESS WIRE - HealthVest (ASE:HVT) Wednesday announced that it has completed the documentation requirements set forth in the previously announced standstill agreement with its four lender groups.

As a result, the Trust anticipates that the standstill agreement will continue in force until its expiration on Dec. 14, 1990.

Management of the Trust believe this nine-month agreement provides HealthVest with time to consider and evaluate ideas that can help resolve its operating difficulties and address long-term needs for restructuring.

For the past several months, a considerable amount of management's attention has been diverted from operating issues in order to resolve problems with the Trust's lenders. With the completion of this agreement management may now focus its energies on the steps needed to stabilize and improve the Trust's performance over the longer term.

Under the standstill, HealthVest's lender groups have agreed to refrain from foreclosing on any mortgaged property until expiration of the agreement, so long as the Trust remains in compliance with its provisions. The lenders have been granted mortgage interests in those properties that were previously pledged as collateral.

The Trust's carrying value of collateral properties subject to the standstill agreement is approximately $270 million as of Dec. 31, 1989, versus total indebtedness of $252 million. HealthVest's invested assets total approximately $317 million as of that date. All amounts are net of previously announced writedowns to be recorded by the Trust.

HealthVest is a self-administered Real Estate Investment Trust (REIT) that invests in income-producing health care-related properties including psychiatric, general health and rehabilitation hospitals, skilled nursing facilities, retirement centers, medical office buildings, medically oriented fitness centers, and facilities offering other related health care products and services.

UPPER SADDLE RIVER, NJ (MAY 2) BUSINESS WIRE - Western Union Corp. and US Sprint Communications Co. announced Wednesday that they have

interconnected their electronic mail systems, allowing customers of both companies to exchange messages.

The new interconnection has been made between Western Union 400 service and the SprintMail electronic mail service via the international X.400 standards.

Western Union 400 service is fully integrated with the company's EasyLink public messaging service, which gives users worldwide delivery capability via fax, telex and electronic mail, as well as access to more than 900 online databases.

''This interconnection is another significant milestone in the industry-wide movement to enable all E-mail customers to exchange messages facilitating communcation between public and private networks, no matter what services are being used,'' said Steven Graham, vice president-marketing for Western Union's Business Services unit.

Western Union previously announced X.400 interconnections with AT&T, General Electric Information Services and the IBM Information Network. The company also has led the movement to promote the development of interconnected messaging directories based on the X.500 international standards.

Western Union Corp. provides a broad range of messaging, financial and other services, both domestically and internationally, to meet the specific needs of business customers and individual consumers.

The company is a leading provider of public electronic mail services, which enable its business customers to reach more than seven million electronic mail, fax and telex users worldwide.

U.S. Sprint's SprintMail electronic messaging services is a comprehensive offering, providing easy access for its subscribers, with delivery to other SprintMail subscribers, to subscribers on inerconnected systems and services, and to virtually any telex or facsimile device in the world.

US Sprint is a unit of United Telecommunications Inc., a diversified telecommunications company headquartered in Kansas City, Missouri.

FORT WORTH, TX (MAY 2) BUSINESS WIRE - Wolverine Exploration Co. (NASDAQ:WEXCC) announced the signing of a letter of intent with Amoco Production Co. whereby, subject to the parties entering into a final definitive agreement, Wolverine will have the exclusive right to participate in Amoco's Houston Region 1990 exploratory drilling program slated for the Texas and Louisiana Gulf Coast onshore and the offshore outer continental shelf waters.

Wolverine's interest will be held 63 percent by Wolverine, 30 percent by Natural Gas Partners L.P., and seven percent by ENSCO Resources Co. Wolverine and its partners have committed a minimum of $8.7 million to this 1990 drilling program, which will go toward the drilling of wildcat wells on Amoco prospects.

Wolverine and its partners will have an option to continue the program on similar terms into 1991, which is anticipated to be up to a $20 million commitment.

Under the proposed structure, Wolverine and its partners will share equally with Amoco in the cost of the first wildcat well on a prospect in order for Wolverine and its partners to earn a 25 percent of Amoco's interest in the production and the prospect area of mutual interest.

Wolverine Chairman Bill Smith says, ''This exploration joint venture with Amoco represents another example of Wolverine's continuing corporate strategy to access the prospect inventories and the leading edge technology of selected oil companies' domestic exploration programs under what we consider to be attractive terms.''

NEW YORK (MAY 2) BUSINESS WIRE - Airship International Ltd. (NASDAQ: BLMP) announced Wednesday it has entered into a three year agreement to operate the world's largest airship certified for day and night flight.

Airship International Ltd. will operate its new airship as an aerial advertising/public relations vehicle and as an aerial camera platform for Anheuser-Busch Companies Inc.

According to Louis J. Pearlman, chairman and president of Airship International Ltd., "the company expects to receive, in addition to the operating fee, royalties from the sale of blimp related premium items sold by Anheuser-Busch."

The airship is 194 feet in length, approximately 2/3 the size of a football field. This airship joins its sister airship, which Airship International Ltd. operates for The Metropolitan Life Insurance Co. These airships were built by Airship Industries, USA (NASDAQ: AIRSY) and Airship Industries, U.K.

FRAMINGHAM, MA (MAY 2) BUSINESS WIRE - Perini Investment Properties Inc., (AMEX: PNV) reports net cash flow at $925,000 for the quarter ended March 31, 1990 versus $1,798,000 for the same period in 1989. Net cash flow per share for the current quarter was 24 cents versus 46 cents in the prior year period.

Cash flow from operations actually increased $956,000 over the first quarter of 1989, from $1,339,000 to $2,295,000 in the current quarter despite a soft real estate market in many of our geographic areas. Net cash flow for the 1989 period was enhanced by the cash flow from the sale of PIP's remaining interest in the Alcoa Building in San Francisco.

Net current value per share at March 31, 1990 was $24.34 compared to $26.09 reported for the first quarter 1989. The reduction in current value per share reflects the year end 1989 reduction in appraised value of certain properties as discussed in the 1989 annual report.

#90122b0725 05/02/1990 ~Business Wire

NEW YORK (MAY 2) BUSINESS WIRE - Inspiration Resources Corp.(ticker symbol: IRC) Wednesday reported a 1990 first quarter net loss of $11.7 million, or 18 cents per share, on revenues of $268.2 million, compared with a 1989 first quarter net loss of $0.3 million, or 0 cents per share, on revenues of $293.8 million.

At the corporation's annual meeting held in New York today, IRC Chairman Reuben F. Richards said that the impact of improved results at IRC's coal operations was offset by lower base metals prices at IRC's Canadian mining subsidiary and lower fertilizer prices and volumes at Terra International Inc. (Terra), IRC's agribusiness subsidiary.

He noted that due to early purchases of fertilizers during last year's spring planting season, Terra recorded in the 1989 first quarter some of the profit it usually earns in the second quarter.

During the 1990 first quarter, Terra reported an operating loss of $6.2 million on revenues of $163.6 million, compared with a 1989 first quarter

operating loss of $0.8 million on revenues of $166.4 million.

The 1990 first quarter loss was primarily due to lower wholesale fertilizer prices and volumes. Sales of ammonia and nitrogen solutions manufactured by Terra declined 14 percent from the year earlier period. Terra customarily records an operating loss in the first quarter due to the reduced seasonal demand for its products.

IRC's base metals operations, consisting of Canada-based Hudson Bay Mining and Smelting Co. Ltd., (HBMS) and metals trading operations, reported 1990 first quarter operating income of $1.2 million on revenues of 81.0 million compared with 1989 first quarter operating income of $12.6 million on revenues of $106.9 million.

The impact of increased copper and nickel production was more than offset by significantly lower base metal prices. Average London Metal Exchange prices for zinc declined 24 percent in the 1990 first quarter from the year ago period. New York Comex prices for copper declined 22 percent, and nickel prices declined 56 percent from the year earlier period.

IRC's coal subsidiary reported 1990 first quarter operating income of $0.8 million on revenues of $20.7 million, compared with a 1989 first quarter operating loss fo $2.4 million on revenues of $16.2 million.

Improved productivity at company-owned mines and increased selling prices contributed to the improved results. The quarterly profit was Inspiration Coals' first since the 1987 fourth quarter.

IRC's leasing subsidiary reported 1990 first quarter operating income of $2 million on revenues of $2.8 million, compared with operating income of $2.6 million on revenues of $3.9 million in the same period last year. The reduced 1990 first quarter earnings were due to the expiration of certain leases and termination of a major lease in December 1989.

IRC's 1990 first quarter results also included a $2.6 million equity loss from the 50 percent interest in a gold affiliated, compared with a $2.1 million equity loss in the 1989 first quarter. The loss was due primarily to the seasonal absence of production at an offshore Alaska gold mining project as well as ongoing exploration and maintenance at the property.

Inspiration Resources Corp., which had 1989 revenues of $1.4 billion, is a diversified natural resources company that provides products and services for agriculture, mines base and precious metals and coal, produces construction materials, and leases equipment.

NEW YORK (MAY 2) BUSINESS WIRE - Andersen Consulting Wednesday extended its full life cycle application development environment -- FOUNDATION -- with nine new products, as part of its commitment to provide clients with real-world, heterogeneous software solutions.

The announcement was made in an international video news conference linking nearly 200 participants in New York City and Paris.

''Application developers face a new set of user demands and expectations '' said Andersen Consulting's managing partner, George T. Shaheen. ''They want solutions from organizations who provide premier software products, have proven technical leadership, and demonstrate the proven ability to help users manage change. They look for companies who can offer open, flexible environments and provide industry-specific experience and expertise.''

Shaheen, James Fischer, managing partner-technology services, and Glover T. Ferguson, product executive for FOUNDATION, discussed how Andersen Consulting and FOUNDATION meet these user requirements by offering the broadest spectrum of application development solutions available today.

In addition to the new product announcements, Ferguson said the firm is in the process of extending its FOUNDATION family with products for the UNIX environment, further demonstrating Andersen Consulting's support of open solutions.

Ferguson described another high priority activity as ''the application of artificial intelligence to the task of re-engineering older applications into new, more responsive solutions.'' Also, software was described and demonstrated which begins to provide assistance to the huge backlog of maintenance activities.

The firm continues to develop designware, which consists of industry-specific software designs implemented with upper CASE tools. Designware combines the high productivity of a packaged solution with the flexibility and competitive advantage of a custom effort. It also builds on Andersen Consulting's industry expertise and saves users valuable development time and money by providing pre-defined design objects in the repository.

Andersen Consulting's first designware product, CUSTOMER/1, for the utility industry, was released in April 1989. Projects in development include INVEST/1(TM), for investment portfolio management, and WORK/1(TM), for work order management.

Andersen Consulting has helped organizations apply technology for competitive advantage since 1954 when it installed the first computer application for commercial use. The organization helps clients use information in all phases of their management activities -- strategic, industry, operations and financial.

Andersen Consulting's worldwide client base has access to more than 18,000 highly trained professionals serving clients through 157 offices in 45 countries. Andersen Consulting is part of the Arthur Andersen Worldwide Organization.

HOUSTON (MAY 2) BUSINESS WIRE - DI Industries Inc. (ASE:DRL) (''the company'') announced Wednesday the unaudited results of operations for the three months and for the fiscal year ended March 31.

Consolidated revenues increased 102 percent to $10,651,000 for the current quarter as compared to $5,262,000 a year ago. The company recorded a net income of $336,000 for the quarter compared to a loss of $920,000 for the same quarter a year ago. Cash flow for the current quarter was a positive $990,000 as compared to a negative cash flow of $236,000 a year ago.

The company reported a net income per share of 1 cent for the current quarter as compared to a net loss per share of (4 cents) a year ago. Consolidated revenues increased 41 percent to $32,489,000 for the current

year as compared to $23,061,000 a year ago. The company recorded a net loss of $951,000 for the current year as compared to a loss of $2,635,000 for the prior year (down 64 percent).

Cash flow for the current year was a positive $1,459,000 as compared to a negative $236,000 for a year ago. The company reported a net loss for the current year of (3 cents) per share as compared to a net loss per share of (13 cents) a year ago.

Max M. Dillard, president, reports that this is the firm's best quarter since September 1982 and that the two southern divisions have experienced increased rig activity in recent months. The firm is strong, having $16 million in cash at the end of the quarter and is currently in the acquisition mode following its recent stock offering.

The results for the 1990 periods reflect the acquisition by the company in July 1989 of the drilling rig operations of The Penn Central Corp.

DI Industries Inc., headquartered in Houston, is engaged primarily in the business of providing onshore contract drilling and well workover services to firms in the oil and gas industry, commercial drilling and oil and gas exploration, development and production.

#90122b0753 05/02/1990 ~Business Wire

HOUSTON (MAY 2) BUSINESS WIRE - Daniel Industries Inc. (NYSE:DAN) Wednesday announced a 73 percent increase in earnings for the second quarter ended March 31, 1990, compared to the same period a year ago.

The company's revenues remained constant for the second quarter ($41,529,000) and first six months ($80,359,000) when compared to the same period last year. Net profit of $1,771,000, or 17 cents per share, was recorded for the second quarter of fiscal 1990, compared to a net profit of $1,022,000, or 10 cents per share, for the same period last year.

Daniel experienced a net profit of $3,427,000, or 33 cents per share, for the first half of 1990, a 47 percent increase compared to last year's results.

The reported increases in earnings for the second quarter and first six months of fiscal 1990 were a result of strong demand for flow metering products, fasteners, valves and enhanced oil recovery products, offsetting a decrease in orders for large metering systems. The company's backlog was $43,152,000 at March 31, 1990. Working capital was $60,669,000, and the

current ratio was 3.2 to 1.0.

Daniel Industries Inc. is a major international supplier of fluid measurement products and systems principally for oil and natural gas producers, transporters and refiners. The company also manufacturers and sells alloy stud bolts and gaskets, pipeline valves, gas lift equipment, flanges and steam generation packages.

DFW AIRPORT, TX (MAY 2) BUSINESS WIRE - American Airlines will operate daily nonstop service between the Vail and Beaver Creek Resort in Colorado and American's major connecting hubs at Chicago and Dallas/Fort Worth during the 1990-91 ski season, the airline announced Wednesday.

The service will begin on Dec. 15, and run through April 6, 1991. It will consist of one roundtrip flight a day between Vail's Eagle County Airport and both Chicago and Dallas/Fort Worth. American will serve the routes with twin-engine, 194-seat Boeing 757s, among the newest aircraft in the carrier's fleet.

Through the Chicago and Dallas/Fort Worth gateways, American will provide convenient, single-airline access to Vail and Beaver Creek Resort for more than 120 other cities in the United States, Canada, and Europe.

These include New York; Boston; Philadelphia; Washington; Nashville, Tenn.; Raleigh/Durham, N.C.; Houston; New Orleans; and Toronto; and, in Europe, such places as Paris, Frankfurt, Zurich, Brussels, and Stockholm. American will modify and improve facilities at Eagle County Airport to accommodate its daily operations, which also require FAA approval.

"We are delighted to be adding the Vail and Beaver Creek Resort to our route system," said Melvin E. Olsen, American's vice president-capacity planning. "Vail is one of the world's truly great ski areas, and American believes that through the Chicago and Dallas/Fort Worth hubs, we can help Vail develop exciting new markets with a service quality that matches Vail's ski trails and facilities."

Kent Myers, vice president of marketing for Vail Associates Inc., said, "Vail and Beaver Creek Resort will now be able to offer another quality service to our winter guests with the addition of American Airlines service to Eagle. We're extremely proud of the fact that American Airlines chose us to be the inaugural Colorado city served by their new 757 jets."
Here are American's schedules:

VAIL-CHICAGO
Leave Vail noon Arrive Chicgo 3:16 p.m.
Leave Chicago 9 a.m. Arrive Vail 10:50 a.m.

VAIL-DALLAS/FORT WORTH
Leave Vail 1:40 p.m. Arrive DFW 4:26 p.m.
Leave DFW 11:15 a.m. Arrive Vail 12:23 p.m.

#90122b0766 05/02/1990 ~Business Wire
PROVIDENCE, RI (MAY 2) BUSINESS WIRE - More than 100 school children Wednesday witnessed the premiere of Fleet National Bank's "Ten Minutes on Drugs," a film that could save them from a life on drugs.

Children from Fleet's Adopt-A-School, the Alternate Learning Project, joined teachers, parents, health educators, state and local officials, and educational and religious leaders at Showcase Cinemas in Warwick to witness the latest "Fleet Youth Initiative" project designed to educate and prevent young people from using drugs and alcohol.

To create the documentary, Fleet spent months working with teenage recovering addicts, state officials, health educators, a drug counselor, psychiatric social worker, and parents whose child was an addict. The film features actual testimonies from Rhode Island teenage drug addicts and prevention advice for parents.

Recent surveys of students in Grades 7 to 12 indicate that substance abuse is the most significant health threat facing youth in the state. Fifty-nine percent of Rhode Island high school seniors surveyed have used an illegal drug, and 57 percent of teenagers who drink began using alcohol before grade nine.

"The problem is serious right here in our own backyard," said Terrence Murray, chairman and president of Fleet/Norstar Financial Group. "This year, substance abuse will cost our state an estimated $26 million. That's why prevention through education is so important. And while it's easy to talk about the problem, we recognized a need to do something about it. If our substance abuse film helps save even one child from a life on drugs, it will have been worth it."

"Ten Minutes on Drugs" is a public service project of Fleet/Norstar Financial Group, funded by the Fleet Charitable Trust. In the coming months, Fleet/Norstar's eight subsidiaries throughout New England and New York will be distributing the film with localized messages to schools,

libraries, corporations, and the general public through branches in their local areas.

"While drug abuse is a new issue for us, being involved in kids' lives is something we've been doing for years," said Robert J. Higgins, president of Fleet National Bank.

"Our Fleet Youth Initiative is an exciting combination of activities, such as Fleet Child Safety Day, The Fleet Schoolboy Hockey Championships, and new issue-oriented projects like the documentary 'Ten Minutes on Drugs.' Our hope is that the film will get right to the hearts of kids and parents in the state and make them aware of how damaging a life on drugs can be."

STAMFORD, CT (MAY 2) BUSINESS WIRE - General Housewares Corp. (NYSE:GHW), announced Wednesday that its board of directors approved the following changes, all of which will become effective July, 1, 1990.

John H. Muller Jr., founder, chairman and chief executive officer, will relinquish the CEO title while remaining chairman of the board. Paul A. Saxton, currently president and chief operating officer of the company, will become chief executive officer, succeeding Muller.

Saxton joined General Housewares in 1987 as executive vice president and president of its Cookware Group, and was named president and chief operating officer of the company in 1989 as well as president of its combined Cookware/Cutlery business unit. Prior to joining GHW, he was V.P., Sales and Marketing for the Sunbeam Appliance Co. He has an M.A. degree form Ohio University and a B.A. degree form Wabash College in Indiana. He and his wife reside in Terre Haute, Ind.

Philip H. Dallow, vice president - finance, treasurer and chief financial officer of the company, has resigned and will be succeeded by Robert L. Gray.

Gray comes to General Housewares from Helene Curtis, where he was treasurer for the last three years. Prior to that, he was an investment officer with The Travelers Insurance Cos. Gray has an M.B.A. degree from Temple University, an M.S. degree from Shippensburg State College and a B.S. degree from Juniata College. He, his wife and three children plan to relocate to Terre Haute, Ind., from Lake Forest, Ill.

In conjunction with these changes, the company will relocate its corporate

offices from Stamford, Conn., to Terre Haute, Ind., the headquarters of its Chicago Cutlery Housewares Group.

In making the annoucement, John H. Muller, Jr., stated: ''Having founded the company and been its CEO for 23 years, I feel it is an appropriate time for the board to appoint a new CEO. With the completion of acquisitions, divestitures and consolidations over the last several years, the company is very strong, both operationally and financially. Paul Sexton has proven to be an outstanding executive with the skills required to take full advantage of the company's considerable potential and I look forward to assisting him in every way that I can.''

Paul A. Saxton stated: ''Jack Muller has done something most retiring CEO's are unable to do: he has restructured the company and positioned it for a bright future. It's been a privilege to have worked for him, and I look forward to his counsel for years to come. I'm confident that General Housewares has exceptional prospects, both in the short and long terms.''

General Housewares Corp. is a leading manufacturer and marketer of cookware and cutlery products.

HOUSTON (MAY 2) BUSINESS WIRE - American General Corp. (NYSE:AGC) Wednesday announced that its board of directors has decided to offer the company for sale in its entirety.

Contacts with prospective buyers will begin immediately. American General will be represented by a team of investment bankers, led by The First Boston Corp.

The board of directors also increased the quarterly dividend on the company's common shares from $.395 to $.80 in order to give American General shareholders an additional return while they wait for the sale process to be completed. The first dividend at the new rate will be payable June 1, 1990, to holders of record on May 16, 1990. This increase will move the indicated annual dividend rate to $3.20 from the present $1.58 per share.

In commenting on the action by the board of directors, Harold S. Hook, the company's chairman and chief executive officer, said: ''This has been a difficult decision, but we believe that it is in the best interests of all shareholders, and also provides for the protection of our policyholders and our employees. The board determined that the company was vulnerable to possible acquisition at a discount price, and, therefore, decided to offer the entire company for sale at this time in order to realize the maximum value for all shareholders.

''We believe the full value of the company greatly exceeds the value as

reflected in the public market price for the company's stock -- and that the company's full value is substantially in excess of the $50 per share referred to in the proposal made by Torchmark Corp. in March.''

Hook added, ''In light of the size and complexity of the company's operations, it may be several months before we begin the process of detailed negotiations. We believe that a sale of the company as a whole will generate the highest price. However, if the sale of the company as a whole proves not to be feasible, we are prepared to sell operating subsidiaries separately.''

American General is an insurance and financial services organization with assets of $32 billion and total equity of $4.4 billion. Headquartered in Houston, the company has subsidiaries that operate in 50 states and Canada. The company groups its operating subsidiaries into three business segments: Insurance-Home Service: Insurance-Special Markets; and Finance/Real Estate. American General common stock is listed on the New York, Pacific, London, and Swiss stock exchanges.

NEW YORK (MAY 2) BUSINESS WIRE - Inspiration Resources Corp. (NYSE:IRC) Chairman Reuben F. Richards Wednesday said that the Corporation's agribusiness subsidiary, Terra International Inc. (Terra), expects to post record second quarter earnings primarily resulting from the impact of increased plantings of corn during the U.S. spring planting season.

In the 1989 second quarter, Terra reported operating income of $42.9 million on revenues of $500.2 million.

At the Corporation's annual meeting held here Wednesday, Richards also said that IRC plans to expand its presence in construction materials through further acquisitions and increase production of zinc and copper at its base metals operation, Canada-based Hudson Bay Mining and Smelting Co. Ltd. (HBMS), by about ten percent.

In 1989, production for the company's own account totaled about 103 million pounds of zinc, 69 million pounds of copper and four million pounds of nickel.

Richards noted that HBMS expects to reach an agreement shortly on the financing of a project to reduce sulfur dioxide emissions at its Manitoba metallurgical plant.

Richards said that IRC plans to build through acquisition a construction materials business that will contribute from 20 to 30 percent of its annual pre-tax earnings.

IRC established a foothold in the construction materials business last month when it acquired Oregon-based LTM, Inc. and Rogue Aggregates Inc.

IRC's 50 percent-owned gold operation, WestGold, expects to produce about 55,000 ounces of gold this year, Richards said.

Although WestGold plans to increase production at its offshore placer project at Nome, Alaska, its expects to post an equity loss for the year, primarily because of increased exploration expenditures.

Inspiration Resources Corp., which had 1989 revenues of $1.4 billion, is a diversified natural resources company that provides products and services to agriculture, mines base and precious metals and coal, produces construction materials, and leases equipment.

HARTFORD, CT (MAY 2) BUSINESS WIRE - Aetna's personal financial security division Wednesday announced the creation of a single California field office to manage its personal lines operations in the state.

''We've taken this action to develop a more efficient, flexible operation in California,'' said Christopher J. Burns, vice president of field operations. ''We believe that by creating a new centralized office, we can better control our internal expenses and make our business more financially viable in the state. Customers and agents can expect the same level of service while we carry out this transition.''

Located in Rancho Cordova, the new office will house administration, underwriting, marketing and general operations for the division's business in California and the Pacific Northwest, effective October 1. It will be staffed by personnel currently working in two locations at Woodland Hills and Rancho Cordova, It is anticipated that the company's claim staffing levels and operation in California will be unaffected by the change.

''During the next few months, we will evaluate our staffing needs and determine how this move will affect our employment levels,'' said Burns. ''We anticipate that some positions will be eliminated as the result of moving to a single office, but at this time we cannot project how many jobs will be affected or who the individuals might be.''

He added, ''Aetna's policy is to help any affected workers identify employment opportunities in other parts of the company. We will certainly be sensitive to those needs in completing the creation of the new office.''

Aetna currently employs 425 people in its personal property/casualty and individual life operations in California, of which 215 work in claims functions.

BELLPORT, NY (MAY 2) BUSINESS WIRE - Biopharmaceutics Inc. (AMEX:BPH) announced results for the second quarter and six months ended March 31.

Net sales from continuing operations decreased 27 percent to $1,634,711 for the second quarter ended March 31, compared with $2,229,463 in the prior year's second quarter.

The net loss in the quarter was $143,808, or 2 cents per share compared with net income of $34,720, or 1 cent per share, in the prior year.

For the six months ended March 31, net sales from continuing operations decreased 21 percent to $3,420,732 from $4,316,634 in the prior year.

The loss for the current six months was $220,329 compared to net income of $67,733 in the prior year. The net loss per share was 3 cents vs. earnings of 1 cent last year.

The sales decline for the current six month period can be attributed to a 50 percent decline in sales to the company's largest customer and the ongoing effects of the generic industry scandals on the purchases of company products by generic drug wholesalers.

The loss of sales volume had a siginficant effect on the company's gross profit and gross margin that could only be partially offset by lower selling expenses and decreased general and administrative overhead.

Commenting on the results, Edward Fine, company president said, ''We are concerned and disappointed by the sales decline but expect to recover a significant portion of the decreased sales to our largest customer, introduce certain prescription items that do not require ANDA filings, and add new customers in the coming months. There are also indications that the FDA will be returning to a more normal approval timetable over the next three to six months.''

Biopharmaceutics Inc. is a manufacturer of generic over-the-counter and prescription drugs.

LOS ANGELES (MAY 2) BUSINESS WIRE - United Airlines inaugurates a new international route Wednesday when it launches scheduled service between Los Angeles and Seoul, with continuing service to Taipei, three times a week.

Also starting Wednesday, United's daily Tokyo - Seoul flight will offer continuing service to Taipei and Singapore.

United began expanded Pacific and intra-Asia flying yesterday with the inauguration of San Francisco-Taipei-Bangkok service four times weekly. United also increased its Newark-Tokyo non-stop flight from four times weekly to daily service.

''These new flights are part of our aggressive expansion in Asian markets, both within Asia and between Asia and the U.S., which we announced last December,'' said Stephen M. Wolf, chairman and president. ''That added capacity will help us meet rapidly increasing demand.''

From Los Angeles, United will operate one round trip non-stop flight to Seoul three days per week with Boeing 747-SP aircraft. The westbound flight will originate in Los Angeles at 12:00 noon on Sunday, Wednesday and Friday, and arrive in Seoul at 5:20 p.m. the next day.

The westbound flight will continue to Taiwan, departing Seoul at 6:55 p.m. and arriving in Taipei at 8:20 p.m. The eastbound flight will originate in Taipei at 9:50 a.m. on Sunday, Wednesday and Friday, arrive in Seoul at 1:10 p.m., depart Seoul at 2:40 p.m. and arrive in Los Angeles at 9:45 a.m. the same day.

The new Los Angeles-Seoul flight with convenient connections to other Asian destinations strengthens United's service from Los Angeles to the Far East. United also offers daily non-stop flights to Tokyo and Sydney/Melbourne from the Los Angeles gateway. International seats from Los Angeles, on a weekly basis, will increase 75 percent this summer over summer 1988 levels.

By August, with the addition of other U.S.-Asia flights and the build-up of Seoul and Taipei as mini-hubs, United's U.S.-Asia capacity will increase by 83 percent and its intra-Asia capacity will rise by 105 percent compared to 1989 levels.

NEW YORK (MAY 2) BUSINESS WIRE - Respected banker Thomas DeRogatis has been named president and chief operating officer of Bonwit Teller.

The appointment was announced by Frank Doroff, Bonwit Teller's chairman and chief executive officer.

DeRogatis was formerly head of Chase Manhattan Corp's Municipal Securities Inc. Well known and respected in the banking industry, DeRogatis will be responsible for the financial management and operations of the Bonwit Teller chain.

Prior to joining Chase Manhattan as head executive for the company's municipal trading and marketing operation, DeRogatis, 42, was president and chief executive officer of a publicly owned investment bank. He also served as New York City's Deputy Comptroller for Finance.

DeRogatis is a graduate of Middlebury College, and received his M.B.A. degree from The Wharton School of The University of Pennyslvania.

Bonwit Teller and the company's initial stores in Boston and Buffalo were part of the successful purchase agreement submitted by an affiliate of The Pyramid Companies of Syracuse and approved April 4, 1990 by a U.S. Bankruptcy Court.

Bonwit Teller had been offered for sale as part of bankruptcy proceedings of the chain's former owner, L.J. Hooker Corp.

Doroff, who was appointed chairman and chief executive officer April 17, 1990, has indicatd he will revitalize and expand Bonwit Teller, using the Chain's Boston and Buffalo stores as a base. Doroff also said a major new Bonwit Teller flagship store will be established in New York's Fifth Avenue retail district.

Bonwit Teller history can be traced back nearly a century to the fine women's apparel stores operated by Paul J. Bonwit in New York City.

In 1898, Bonwit entered into a partnership with Edmund D. Teller and opened the first Bonwit Teller store on 23rd Street between Fifth and Sixth Avenues in Manhattan.

When Paul Bonwit retired in 1934, Bonwit Teller was sold, and in the succeeding decades was owned by some of the industry's largest corporations.

NEW YORK (MAY 2) BUSINESS WIRE - Teresa Pineda, one of the retail industry's leading merchandise executives, has been appointed general merchandise manager for Bonwit Teller.

The appointment was announced by Frank Doroff, Bonwit Teller's chairman and chief executive officer.

Formerly a vice president at Federated/Allied Merchandising Services, Pineda has over 16 years experience in retail merchandising. As a Bonwit Teller general merchandise manager and a member of the chain's four-person executive team, Pineda will oversee a significant portion of the chain's merchandising operations.

Pineda joined Federated/Allied Merchandising Services in Jan. 1989 as vice president for men's private label lines for all Federated and Allied Divisions. Most recently she was vice president in charge of juniors and children's wear merchandise.

Pineda began to build her reputation in the retail industry at Bullock's in Los Angeles. During a 15-year period with that department store she held a variety of positions, including serving as the store's divisional merchandise manager of better and contemporary sportswear.

Bonwit Teller and the company's initial stores in Boston and Buffalo were part of the successful purchase agreement submitted by an affiliate of The Pyramid Companies of Syracuse and approved April 4, 1990 by a U.S. Bankrupcy Court. Bonwit Teller had been offered for sale as part of bankruptcy proceedings of the chain's former owner, L.J. Hooker Corp.

Bonwit Teller history can be traced back nearly a century to the fine women's apparel stores operated by Paul J. Bonwit in New York City. In 1898, Bonwit entered in to a partnership with Edmund D. Teller and opened the first Bonwit Teller store on 23rd Street between Fifth and Sixth avenues in Manhattan. APPLETON, WI (MAY 2) BUSINESS WIRE - Preston H. Wilbourne, chief executive officer of Air Wis Services, and Donald W. Ringsby, president of Aspen Airways, jointly announced the acquisition by Air Wis of all of the stock of Aspen from its shareholders.

The transaction, which was concluded Wednesday effective as of Apr. 30, was for a combination of cash and five-year convertible notes. The parent company expects to operate Aspen Airways as a distinctly separate subsidiary.

Both Air Wisconsin, previously the only subsidiary of Air Wis Services, and Aspen Airways operate as ''United Express'' carriers, under arrangements with United Airlines. Aspen Airways, which has its headquarters at Denver, provides year-round services between Aspen, Colorado and Denver, and seasonal service between Aspen and Chicago, Los Angeles and Dallas. It formerly served as a regional carrier connecting Denver with several smaller western cities, but disposed of those operations in February, 1990.

Air Wisconsin provides scheduled service between 28 primarily medium-sized cities in 12 states and hubs at Chicago O'Hare and Washington Dulles airports.

#90122b0870 05/02/1990 ~Business Wire

LEXINGTON, MA (MAY 2) BUSINESS WIRE - Unitrode Corp. (NYSE:UTR), a manufacturer of electronic components and subsystems, Wednesday announced that its board of directors has adopted a shareholder rights plan under which preferred stock purchase rights will be declared as a dividend at the rate of one right for each Unitrode common share held as of the close of business on May 14, 1990.

The rights plan is designed to deter coercive takeover tactics and to prevent an acquiror from gaining control of Unitrode without offering a fair price to all of Unitrode's stockholders. The rights will expire on May 13, 2000.

Each right entitles the holder, upon the occurrence of certain events, to buy one one-hundredth of a share of a new series of Unitrode preferred stock at an excercise price of $30.

If any person or group becomes the beneficial owner of 20 percent or more of the common stock or, under certain circumstances, the board of directors determines a 10 percent or more shareholder to be an adverse person, each right not owned by such person or related parties will become exercisable and entitle its holder to purchase at the right's exercise price, common stock having a value of twice the right's exercise price.

In addition, if Unitrode is involved in a merger or other business combination with another company, holders of rights may, in certain circumstances, purchase shares of the common stock of the acquiring company having a value of twice the exercise price of the right. Unitrode will generally be entitled to redeem the rights at 1 cent per right at any time until the rights become exercisable.

In addition, Unitrode has elected to be subject to Maryland's business combination statute and not to be subject to Maryland's control share acquisition statute.

A letter being sent to Unitrode stockholders from the board of directors states ''We consider these actions to be the best means available to protect the full value of your investment in the face of abusive or coercive takeover tactics. These actions are not intended to prevent an acquisition of the company on terms that are fair and favorable to all shareholders.

They are designed to deter unilateral actions by stock accumulators or hostile acquirors which the board determines are not in the best interests of the company and its shareholders.''

Details of the shareholder rights plan are outlined in the summary of rights which will be mailed to all shareholders shortly after the record date.

Unitrode is a manufacturer of superior quality electronic components and subsystems, including discrete semiconductors, power management integrated circuits, switching power supplies, and data conversion products. Its products are sold throughout the world for a variety of defense/aerospace, industrial, computer/telecommunications, data processing and consumer applications.

#90122b0874 05/02/1990 ~Business Wire

SYDNEY, AUSTRALIA (MAY 2) BUSINESS WIRE - In yet another confirmation of the slowing Australian economy, the Westpac-Melbourne Institute Index of Consumer Sentiment fell 11.2 points in April to its lowest level, in seasonally adjusted terms, in the 17 year history of the survey, according to Westpac Banking Corp. (NYSE:WBK) economists.

In wiping out the tentative improvement which had been evident in the Index in early part of 1990, the April reading of 73.3 fell two points below the previous lowest level of 75.4 recorded in last year's June survey.

The current picture is marginally worse than in June last year, with all questions showing pessimistic balances of opinion.

In particular, Australian consumers are quite pessimistic about their personal finances. The survey shows there has now been a complete turnaround in the balance of opinion as to the future of those finances. Pessimists now outweigh optimists by six percent, compared with just a month ago, when there was 11 percent balance favoring optimists.

Australian consumers are also concerned about the future of the economy, and more respondents now feel it is a bad time rather than a good time to purchase major household items. The responses to both survey questions about consumers' views on the future of the economy are very similar: up to 55 percent expect bad times ahead.

Commenting on the results of the servey, Westpac's Chief Economist Bob Graham said that ''While consumer sentiment reflects the slowdown in domestic demand, it should be remembered that the current, slowdown has been policy-induced against the background of a generally sound economy.''

Westpac Banking Corp. is an international financial services group headquartered in Australia, ranking among the top 100 banks worldwide in terms of assets and the top 50 banks in profitability. In its home markets of Australia, New Zealand, Papua New Guinea and the South West Pacific, Westpac offers a full range of banking and financial services. Specialized services are provided through Westpac Group's offices in Asia, the United States, and Europe. Westpac's operations now extend offshore to 29 countries.

#90122b0878 05/02/1990 ~Business Wire

CLEVELAND, OH (MAY 2) BUSINESS WIRE - National City Corporation today announced that Richard E. Beeman has been elected senior vice president with strategic responsibility for the Corporation's $40 billion asset Trust business. Mr. Beeman has been executive vice president of National City Bank since 1984 and led the development of NCC Funds, the Corporation's $2 billion family of mutual funds. National City's member banks in Ohio, Kentucky, Indiana and Florida generate annual Trust revenues of approximately $100 million.

Mr. Beeman was appointed Chairman of National City's Trust Business Board in 1989 and of National City Trust, Florida in 1988. He joined National City in 1977, serving as vice president and European Representative based in London. Mr. Beeman headed National City Bank's international division from 1981 to '84. Prior to joining National City, Mr. Beeman was with Barclays Bank International, Ltd.

A graduate of Yale University and the University of Pennsylvania Law School, Mr. Beeman is an active member of the Council on Foreign Relations (New York) and serves as trustee of various civic and cultural organizations in Cleveland. He is treasurer of Cleveland's Yale Alumni Association; vice president of Cleveland's Council on World Affairs; a member of the United Way Entrepreneurs Club; president of the Town Hall of Cleveland; and secretary of the Elizabeth Severance Prentiss Foundation. Mr. Beeman and his wife, Patricia, reside in Gates Mills and have two children. Profile of National City Corporation

National City Corporation is a $23 billion bank holding company headquartered in Cleveland, Ohio. The Corporation's principal banking units include National City Bank, Cleveland; BancOhio National Bank, Columbus; and First National Bank of Louisville.

Other member banks include National City Bank, Akron; First National Bank, Dayton; GEM Savings Association, Dayton; CommerceNational Bank, Lexington; and Ohio Citizens Bank, Toledo. National City also has 10 community banks serving towns throughout Ohio, Kentucky and southern Indiana.

National City's subsidiaries and divisions offer a wide range of financial services, such as credit card, retail payment and airline ticket processing, trust and investment management, leasing, merchant and mortgage banking, venture capital, small business and community investment and credit life insurance. These units include Franklinton Financial Services, National Processing Company, First Kentucky Trust Company, National City Trust Company, NCC Merchant Banking, National City Mortgage Company, W. Lyman Case & Company, National City Community Development Corporation, and National City Life Insurance Company.

ATLANTA (MAY 2) BUSINESS WIRE - Patrick H. Thomas, chairman, president and chief executive officer of First Financial Managment Corp. (NYSE:FFM), announced Wednesday that FFMC's board of directors has authorized the purchase of up to $90 million of FFMC's common stock.

Shares may be purchased in open market transactions on the New York Stock Exchange or in directly negotiated transactions.

Shares purchased by the company will be held as treasury shares for issuance under FFMC's employee benefit plans and incentive plans, or upon conversion of its 7 percent convertible subordinated debentures or exercise of its outstanding warrants to purchase shares of common stock, or for other corporate purposes.

FFMC is an information services company which offers a broad range of data processing and related services to a large and diverse customer base. FFMC is one of the major suppliers of financial data processing services to banks, thrifts, credit unions and mortgage servicers, a leader in data

imaging, micrographics, electronic data base services, and health and pharmaceutical claims processing, and one of the largest merchant credit card processors in the country.

FFMC also owns Georgia Federal Bank FSB, the largest thrift institution based in Georgia; First Family Financial Services, a major regional consumer finance company; and MicroBilt, a leading producer of custom data communications and information processing systems.

In addition, FFMC is a member of 41 ATM interchange systems across the United States. Its common stock is currently traded on the NYSE under the symbol FFM. Its debentures are quoted through NASDAQ under the symbol FFMCG.

#90122b0886 05/02/1990 ~Business Wire

AUSTIN, TX (MAY 2) BUSINESS WIRE - Healthcare International Inc. (ASE PSE:HII) Wednesday announced results for the third fiscal quarter and year-to-date period ended March 31, 1990.

Net revenues for the quarter totaled $75.7 million compared with $83.2 million in the same period last year. The company reported a net loss for the quarter of $11.9 million, or $1.55 per share compared with net income in the same period last year of $215,000, or 1 cent per share.

The company's lower net revenues for the period reflected in part the recent sales of certain facilities and a corresponding reduction in revenues compared with the same period last year. Revenues for the third quarter of fiscal 1990, excluding the results from facilities sold, totaled $74.4 million compared with $79.7 million in the third quarter last year.

The net loss for the period reflected unusual items totaling $5.9 million, or 76 cents per share, related to the company's ongoing restructuring plan. Specifically, the unusual items included a gain of $9.4 million on the January 1990 sale of a facility, which was more than offset by adjustments to the carrying values of certain assets which have been sold or upon which sales or disposition agreements are pending, the write-off of canceled projects, and other adjustments.

Excluding unusual items, the company's operating loss for the quarter was $5.8 million, which represented a 34 percent improvement over the second quarter of the current fiscal year and a 47 percent improvement over the first quarter.

Net revenues for the nine-month period ended March 31, 1990, were $236.5 million compared with $234.2 million in the same period last year. Net revenues, excluding results from facilities sold during this fiscal year, totaled $221.3 million vs. $225.1 million in the comparable period of fiscal 1989. The net loss for the year to date was $34.0 million, or $4.50 per share, and included unusual items totaling $9.3 million, or $1.21 per share.

In the year-earlier period, the company posted losses of $17.8 million, or $2.43 per share, which included $11.0 million, or $1.47 per share, in unusual items and $768,000, or 10 cents per share, in extraordinary items.

#90122b0889 05/02/1990 ~Business Wire

BOSTON (MAY 2) BUSINESS WIRE - Lifetime Corporation (NYSE:LFT) reported Wednesday net income of $3.5 million for the first quarter of 1990 or $0.42 per share, a 150% increase over net income in the first quarter of 1989 of $1.4 million or $0.21 per share. Revenues for the first quarter of 1990 were $160.7 million, 53% a increase over revenues of $105.2 million for the first quarter of 1989.

Anthony H. Reeves, President and Chief Executive Officer of Lifetime said, ''The overall 53% revenue growth reflects an increasingly diverse product mix resulting from acquisitions in different business sectors in the latter half of 1989. Home health care revenue, which grew 31% in 1990, now accounts for only 61% of our total revenues versus 71% a year ago. The institutional staffing sector declined to 14% of revenues from 25%. Paramedical testing revenues contributed $13 million to revenue growth in 1990 and now comprise 10% of total revenue. Temporary office personnel revenues of $24 million in 1990 represent 15% of total revenues.

Income from operations of $10.2 million represents 6.4% of revenues, a strong improvement over the 1989 first quarter operating income of $5.9 million, or 5.6%.

''The acquisitions made in the latter half of 1989 have made a positive impact in our bottom line results and operating income increases have been achieved despite increases in higher overhead cost which result from growth in higher gross margin home health care services,'' Mr. Reeves said.

''Having integrated several significant home health care businesses into our current structure, we are beginning to fully realize the economies of scales we projected. We continue to explore acquisition opportunities to

complement our current services,'' continued Reeves.

''Our temporary office business is growing significantly, despite relatively soft economic conditions, due to our strong management team,'' added Reeves.

Kimberly Quality care is the nation's leading provider of home health care personnel and supplemental staff to health care institutions through its network of more than 350 offices across the country and an active pool of approximately 54,000 caregivers. ASB Meditest, with over 100 locations and approximately 6,000 examiners, is one of the largest paramedical testing organizations in the United States. Office Angels, headquartered in England, is a fast-growing provider of temporary and permanent office personnel, through its 36 offices and a pool of approximately 3,300 temporary office personnel.

PERTH, Australia (MAY 2) - British publisher Robert Maxwell said Wednesday he had bought 14.9 percent of The Bell Group Ltd. from Bell managing director David Aspinall.

Mr. Aspinall, also an executive of Bond Corporation Holdings Ltd. of which Bell is a subsidiary, sold the shares while authorities investigated whether he had breached the companies code by buying a 16.6 percent Bell stake on Friday.

Mr. Maxwell said in a statement to the Australian Stock Exchange he had bought 48.59 million shares in Bell, which owns The West Australian newspaper, for one cent each.

Australia's corporate watchdog, the National Companies and Securities Commission (NCSC), said it was investigating Mr. Aspinall's purchase on Friday.

"We were certainly interested in it before. We are very interested in it now," said Charles Williams, the NCSC's deputy chairman.

Newspapers reported that Mr. Aspinall had received legal advice that he breached the takeover code when he bought Bell shares.

Authorities were checking whether his purchase boosted Bond Corp's substantial shareholding in Bell by more than the amount allowed under Australia's companies code.

The Western Australian State Government Insurance Commission (SGIC) on Friday dumped its entire 19.6 percent Bell stake on the market, forcing down the price to as low as 0.5 Australian cents.

The SGIC apparently needed to sell the shares to pursue an indemnity action against Bond Corp.

#90122d0980 05/02/1990 ~French/German News Agency

CANBERRA (MAY 2) - The government is injecting 100 million Australian dollars (75 million U.S.) into the ailing public satellite company Aussat to give it a chance to compete amid proposed deregulation of Australia's telecommunications industry.

Transport and Communications Minister Kim Beazley said in a statement Tuesday his department was considering the future of Aussat as well as the government-owned domestic agency Telecom and overseas carrier OTC Limited.

He said the review, due to be completed June 30, would consider possible mergers as well as "future requirements for satellite services in

Australia and the possibility of greater competition between the carriers both domestically and internationally."

Aussat, established in 1981, has been forced to borrow heavily for operations and is burdened with a staggering 22:1 debt-equity ratio.

It ran up a 400 million dollar (299 million U.S.) bill for its first three satellites, but regulations confined it to operating private switched networks, just 10 percent of the market here.

Aussat now faces a 440 million dollar (329 million U.S.) outlay for the launch of its second generation of satellites in 1991-92.

Mr. Beazley said the cabinet's decision Tuesday to provide 100 million Australian dollars - short of reported proposals to grant a 400 million dollar bailout - was a one-off deal.

"Although the company announced its first after tax operating profit in 1988-89, it has become apparent that market predictions upon which decisions for Aussat's long-term future were based are unlikely to be realised," he said.

The cabinet made it clear Aussat's future depended on its ability to survive in a deregulated telecommunications market.

The review was a new sign of Canberra's determination to end Telecom's domestic monopoly.

"If, as a result of the review, a decision is made not to merge Aussat with Telecom or OTC, then the government will examine in what way the existing regulatory regime can be modified to ensure that Aussat is able to compete effectively," Mr. Beazley said.

TOKYO (MAY 2) - The Export-Import Bank of Japan Wednesday announced the signing of a loan agreement to extend up to nine billion yen (57 million dollars) to the Honduras-based Banco Centroamericano de Integracion Economica.

The loan will be used to promote economic development of Central America through financing projects undertaken by the bank's five member countries,

Guatemala, El Salvador, Honduras, Nicaragua and Costa Rica, the announcement said.

The proceeds of the loan will be utilized for the purchase of Japanese

goods and services required for the development projects in the member countries, it said.

HONG KONG (MAY 2) - Most Pacific Rim stock markets shrugged off the first-quarter plunge in the value of Japanese equities, largely because of strong conditions locally, regional fund managers say.

Gavin Graham, senior fund manager at the Hong Kong subsidiary of the Thornton Group, said Wednesday that smaller regional markets did not follow Tokyo's lead in the first quarter as a "reflection of increasing maturity."

He said the first-quarter plunge in Tokyo's Nikkei Average was "our second or third major move of this size to have occurred in two or three years."

"People are more accustomed to volatility," he said. "They don't head for the door when the market falls in the morning."

Japan's Nikkei Average fell 23 percent in the first quarter of the year, which ended March 31.

According to Thornton's recently released first-quarter report, "smaller Asian markets have shrugged off Japan's woes, focussing instead on the strong local economies."

The report said that while Hong Kong was experiencing slow growth at present, low price-per-earnings ratios on the local stock market offered good value. And Hong Kong people did not pass up the bargains, pushing the Hang Seng Index up 5.6 per cent in the first quarter.

"Indonesia was the star performer of the first quarter, partly because of an increase in current prices," the report said.

Baring Securities (Hong Kong) Ltd. agreed. It called Indonesia's 52 per cent rally in the first quarter "spectacular," but warned that stocks were now trading at an average "high PE (price-earnings) multiple of 31 times."

But as for fears that Japan's crash might adversely affect Pacific Rim markets, Baring said in its first-quarter report, released in mid-April, that "this region is more influenced by Wall Street than by Japan."

#90122d1470 05/02/1990 ~French/German News Agency

WELLINGTON (MAY 2) - Australia's Westpac Banking Corp. said here Wednesday that they had called in the receivers for New Zealand's only

privately owned television network, TV3.

In a statement to the Stock Exchange, Westpac said Keith Raymond Smith of Spicer Oppenheim (Auckland) has accepted the appointment as receiver of TV3 effective immediately.

The Auckland Star newspaper reported that Westpac was the principal debenture holder and was owed at least 4.2 million New Zealand dollars (2.4 million U.S.).

Earlier in the day TV3, partly owned by NBC of the United States, announced that as Westpac had withdrawn banking services, they had no choice but to ask for the receiver to be put in.

The short-lived station went on the air late last year in head-to-head competition against two state-owned TV channels.

Major shareholders include NBC, which holds 15 percent, National Mutual, which has 16 percent, and AMP, 5.7 percent.

TV3 has been beset by money shortages and the defection of top executives in its short history.

TV3 has suffered poor ratings since a public float of shares last December. TV3 shares were issued at 250 cents (142 U.S. cents) but traded early Wednesday before the receivership news at 60 cents (34 U.S. cents).

TV3 was this week reported to have started paying out on overdue accounts.

Some creditors had been waiting up to three months for payment, but began this week receiving cheques drawn on a Westpac account in Auckland overtyped "TV3 Network Services Ltd."

TV3 said earlier Wednesday they would continue to operate.

CANBERRA (MAY 2) - Australia's inflation rate has surged to an annual 8.6 percent, its highest level for nearly three years, the Bureau of Statistics reported Wednesday.

The bureau said the Consumer Price Index rise for the year ending March 31 was the highest since the year to June 30, 1987, and was well above the 7.8 per cent for the 12 months to last December 31.

The CPI jumped 1.7 percent in the March quarter, with the largest rises for petrol and health costs. But lower food costs due to the recent flooding

kept the figure below the 1.9 percent rise during the last three months of 1989.

Financial markets interpreted the CPI as a warning that interest rates would stay high and boosted the Australian dollar to 75.30 U.S. cents from Tuesday's close of 74.60.

Phil O'Sullivan, chief economist for Barclays de Zoete Wedd Australia Ltd., predicted the Reserve Bank would postpone further cuts in monetary policy.

"If they eased policy again they will kick start the economy, blow out the current account and the dollar will collapse," he said.

Canberra's tight monetary policy has been eased three times this year as the economy slowed.

#90122d1810 05/02/1990 ~French/German News Agency

Munich (MAY 2) - The West German carmaker Bayerische Motoren Werke (Bmw) said Wednesday that business so far in 1990 had remained strong, with the firm's world group turnover rising 4.2 percent to 9.24 billion marks (5.5 billion dollars) in the first four months.

The company said its production in the first four months reached 191,749 cars, up 5.5 percent on the same period last year.

The figures indicate a continuation of the strong growth achieved last year, in which Bmw's world group turnover rose eight percent to 26.5 billion marks, producing a 558 million mark surplus, up 23 percent from 1988.

But Bmw noted that sales were starting to level off after last year's 5.5 percent rise to a record 523,000 cars. In the first four months, worldwide sales slipped one percent to 185,858 cars.

ROME (MAY 2) - Italy's inflation rate stood at 0.4 percent in April on a month on month basis, taking the annualised inflation rate down to 5.8 percent from 6.1 percent in March, the national statistics institute said Wednesday.

Year on year inflation stood at 6.7 percent in April last year.

Electricity and fuel prices rose 12.8 percent in April over the same month last year, but only 0.8 percent over the March level.

Food prices were up 0.5 percent over the March level, and clothing up 0.7 percent.

-30- 696

#90122d2060 05/02/1990 ~French/German News Agency

MUNICH, West Germany (MAY 2) - West German airline German Wings, which has been trying for a year to break Lufthansa's virtual monopoly on domestic routes, said Wednesday it was suspending all flights and filing for bankruptcy.

The move came after Wings' failed to persuade foreign companies with which it was holding talks to inject much-needed capital.

German Wings has been operating for a year, but has not been able to turn a profit.

Unconfirmed reports said that it had lost 60 million Deutsche marks (35 million dollars) between its launching in April and the end of December.

In a bid to compete with Lufthansa, German Wings was offering food and services at the upper end of the business class style at economy class prices,

in contrast to Lufthansa's only remaining domestic competitor, Aero Lloyd, which concentrates on price undercutting.

The West German press has reported in recent weeks that German Wings was holding talks with SAS of Scandinavia and British Airways.

But efforts to bring in foreign capital were complicated by West German aviation law, which says that any West German company in which a foreign group holds a more than 49 percent stake forfeits its rights on domestic routes.

German Wings capital is held 45 percent by brothers Franz and Frieder Burda and 40 percent by Peter and Christian Kimmel, with the rest in the hands of a risk capital fund involving several Bavarian banks.

The company does not have significant assets, as its six aircraft were acquired on a credit leasing arrangement.

It has rights to fly to Munich, Frankfurt, Cologne, Dusseldorf, Hamburg and Paris.

-30- 1840

#90122d2290 05/02/1990 ~French/German News Agency

EDINBURGH (MAY 2) - The Royal Bank of Scotland said Wednesday taxable profit rose 1.5 percent in the first half of the current financial year to 173.6 million pounds (289 million dollars).

The result was above analysts' predictions of profit of between 165 and 170 million pounds for the six months to March, although it included exceptional profit of 10.8 million pounds on the sale of Third World debt, and Royal Bank shares were up 11 pence at 170 pence in mid-morning trading in London.

Earnings per share were down 6.7 percent to 13.9 pence from 14.9, and interim dividend was set at 2.8 pence, up from 2.4 pence.

The bank said that "sharply higher levels of provisions for bad debts" during the six months had wiped out most of an 11 per cent increase in revenue.

The Bank is one of the most exposed in Britain to leveraged buyout loans, and said Wednesday its loans in this sector totalled some 295 million pounds (491 million dollars).

Bank chairman Sir Michael Herries said that "trading conditions overall are likely to remain difficult" in the coming months, but said that the bank should see a good performance in the second half as long as there was no further deterioration in the economy.

#90122d2320 05/02/1990 ~French/German News Agency

CANBERRA (MAY 2) - The top importer of heroin into Australia has been arrested in an international drug bust in Thailand, Justice Minister Michael Tate said here Wednesday.

He said the arrest Tuesday of Prasart Yooyen, believed responsible for bringing in hundreds of kilograms (pounds) of heroin, would "shatter and demoralise"" the Australian drug network.

He said he expected arrests to follow in Australia.

Authorities in Bangkok said Mr. Prasart and Sura Kerdthong, both Thais aged 48, were arrested with about 33 kilogrammes (73 pounds) of heroin base after a raid on a house in Nonthaburi province, 20 kilometers (12 miles) north of the Thai capital before dawn Tuesday.

The arrests followed a joint operation involving Thailand's narcotics squad, the United States Drug Enforcement Administration and the Australian Federal Police.

#90122d2380 05/02/1990 ~French/German News Agency

WASHINGTON (MAY 2) - Successful negotiations between the United States and the European Economic Community on liberalizing world agricultural trade within GATT are within reach, French Agriculture Minister Henri Nallet has said.

Mr. Nallet, on a 24-hour visit to Washington, told a news conference Tuesday that the moment was right to negotiate a multilateral accord on agriculture because world supply and demand were better balanced now.

"I have found among my interlocutors, both in the Bush administration and Congress, a much more open spirit than during the mid-course inter-ministerial meeting of GATT in Montreal in December 1988," he said.

That General Agreement on Tariffs and Trade meeting ended in a setback because of the failure of the United States and the Europeans to reach an agreement on the issue of agricultural exports subsidies, which the United States is trying to eliminate totally.

In the course of his visit to Washington, Mr. Nallet met with U.S. Trade Representative Carla Hills, Agriculture Secretary Clayton Yeutter, members of Congress and the president of the Farm Bureau, the principal U.S. farmers' organization.

From those meetings, Mr. Nalle said, "I have drawn the feeling that the conditions for dialogue and negotaitions on agricultural trade are fulfilled by Brussels and Washington."

He warned that "there is still much to do ... but that can been straightened out between now and December if we continue in this spirit."

On the thorny but key question of subsidies, Mr. Nallet said the EEC proposed that "everything be put on the table ... all the aid and instruments of support of agriculture of each of the great producing countries and to globally negotiate a reduction."

But he asserted, "It is not realistic, as the United States has asked, to try to totally eliminate these supports because of the very nature of agricultural activity."

An agreement should be reached on a method of evaluating what part of the value of production is aid, he said. He suggested that a recent study by the Organization of Economic Cooperation and Development (OECD) could serve as the basis for such a system.

The OECD study concluded that subsidies and government aid for agricultural exports by the principal exporting countries ranges from 27 to 50 percent, including around 42 percent for the United States and the equivalent for the EEC.

Mr. Nallet warned that if the United States and the Europeans cannot reach an agreement on agriculture before the end of the round of GATT next December, a transatlantic agricultural trade war could flare up, something everyone wants to avoid.

#90122d2470 05/02/1990 ~French/German News Agency

LONDON (MAY 2) - An Iranian student arrested under the Prevention of Terrorism Act has been deported from Britain on grounds of national security, the British Home Office said Wednesday.

Government officials declined to comment on speculation that the student was suspected of plotting against Satanic Verses author Salman Rushdie, who is still in hiding after being condemned to death by the late Ayatollah Khomeini.

The student was not named by the British authorities, but the Iranian news agency Irna named him as Manouchehr Fadavi Ardestani, a graduate mechanical engineering student from Manchester.

He was the 10th Iranian to be expelled from Britain this year. Irna commented: ''The British Government once again demonstrated its hostility against the Islamic revolution by expelling another Iranian Moslem student.

''Ironically, London has repeatedly asked the Islamic Republic of Iran to help secure release of British hostages in Lebanon.''

#90122d2480 05/02/1990 ~French/German News Agency

BERLIN (MAY 2) - The East German government said Wednesday it had reached broad agreement with Bonn over a treaty for monetary, economic and social union between the two states to take effect July 2.

The Deutsche mark would replace the Ost mark at the rate of one for one.

"On the major points, the two sides have reached an understanding," government spokesman Matthias Gehler told a press conference.

Under the agreement wages and revenue, including rents, would be paid in Deutsche marks in East Germany from July 2 on the basis of one Deutsche mark to the Ost mark, Mr. Gehler said.

Pensions would also be converted into Deutsche marks on a one for one basis and the pension system would be adapted to the West German system, implying that most East German pensioners would receive more Deutsche marks than the Ost mark payments they have had hitherto, he added.

As far as savings were concerned, adults living permanently in East Germany would be able to exchange their bank and cash savings at the one for one rate at up to 4,000 marks (2,350 dollars).

A one for one conversion of savings of children aged up to 14 would have an upper limit of 2,000 marks (1,175 dollars) and those of people aged over 60 an upper limit of 6,000 marks (3,500 dollars).

Above these levels, savings would be exchanged at the rate of one Deutsche mark to two Ost marks, Mr. Gehler said.

#90122d2530 05/02/1990 ~French/German News Agency

BELGRADE (MAY 2) - A human rights group in Yugoslavia said Wednesday that thousands of political dissidents have been illegally imprisoned in psychiatric hospitals and called for an inquiry.

In a letter to the the Yugoslav Federal Parliament and the Ministry of Work, Health and Social Policy, the president of the Yugoslavian Movement for the Defense of Human rights, Janez Rugelj, says that since the end of World War ii thousands of Yugoslavs have been persecuted for their opposition to the communist regime and imprisoned on false psychiatric grounds.

The group said that a parliamentary commission should be established to look into cases of abuse within the psychiatric profession and the first move of the proposed commission should be to order the closing of psychiatric prison-hospitals.

Psychiatric abuses were denounced in the country in 1986 by the first Committee for the Defense of Free Opinion and Expression, created in 1984. The Committee asked then for a parliamentary inquiry into the arbitrary internment of about 40 political dissidents in psychiatric hospitals.

At that time the Committee had proposed reform of certain articles of the penal code that would have ended such abuses, but no concrete action was taken.

#90122d2550 05/02/1990 ~French/German News Agency

SUVA (MAY 2) - Fiji ordered the closure Wednesday of a South Pacific regional news service, capping a six-month row triggered by calls for greater freedom of information here.

The Pacific Islands News Service (PACNEWS) and PACBROAD, the Pacific Broadcasting Training and Development Project, were told to wind up their operations in Suva by May 18.

Both are run by the Pacific Island Broadcasting Association (PIBA) and are funded mainly by the Friederich Ebert Stiftung (FES) foundation of West Germany.

Two West Germans involved with the projects, broadcaster Hendrik Bussiek, 45, and engineer Hendrik Kettner, 42, were ordered expelled from Fiji.

PACNEWS, which has been operating for nearly three years, collated and distributed news broadcast by the radio stations of the various island states. Foreign news agencies also used it as a source of news from far-flung locations.

Fiji Foreign Affairs Secretary Robin Yarrow said the FES had exceeded its terms of reference by expanding its broacasting training facilities into a fully fledged news service.

PIBA and the Pacific Islands News Association (PINA) have been under attack here since their annual conference in Honiara last October called for greater freedom of information and access for journalists in Fiji and Papua New Guinea.

Mr. Bussiek told a news conference that their expulsion followed months of tensions with the Fiji administration installed after two military coups in 1987.

"Over past few months we never really knew whether we would be here the next day or not," he said.

Mr. Bussiek said Radio Australia and Radio New Zealand had offered temporary shelter for PACBROAD and PACNEWS. But he said that in the long term, the projects would be shifted to either Tonga or Papua New Guinea. Vanuatu, the Solomon Islands and Western Samoa, were also keen, he said.

FES is the second West German organization to depart from Fiji in the aftermath of the 1987 military coups. Two years ago the Hanns Siedel Foundation left Fiji's National Video Centre after a row with Suva.

#90122d2630 05/02/1990 ~French/German News Agency

MANILA (MAY 2) - President Corazon Aquino needs an extension of her emergency powers because rebel troops continue to plot against her five months after a bloody coup attempt, Defense Secretary Fidel Ramos said here Wednesday.

The powers, mainly designed to avert an economic crisis after December's coup bid, will expire June 8 unless extended by congress. Some cabinet members have suggested that an extension may not be needed.

"While the military situation has improved, the destabilizing moves by the anti-government forces, specially those who may want to use force and terrorism, also continue," Mr. Ramos told journalists after a cabinet meeting.

He said the fact that the suspected mastermind of the coup, dismissed army colonel Gregorio Honasan, remained at large was "one factor," but added that "there should really be no unusual apprehension nor cause for panic."

Mrs. Aquino has used the powers to impose selective price controls, order a nationwide inventory of firearms and temporarily put private airstrips in government control in order to prevent rebel troops from using them.

#90122d2670 05/02/1990 ~French/German News Agency

ZURICH (MAY 2) - Swiss group Nestle, the world's leading agro-food group, had a very good year in 1989, with net profit up 17.2 percent at 2.41 billion Swiss francs (1.45 billion dollars), the company said here Wednesday.

Turnover was up 21.6 percent at 48.036 billion francs (32.6 billion dollars) and dividend per share rose 14.3 percent to 200 francs (136 dollars).

Reto Domeniconi, right hand man to Nestle chief Helmut Maucher, said that the good results were due to real internal growth of four percent, external growth at six percent and revenue from increased prices and favourable exchange rates.

But he warned that the first quarter of this year had not been "particularly brilliant", with consolidated turnover up only 2.4 percent over the same period last year at 11.3 billion francs (7.7 billion dollars).

This was partly due to current poor conditions on the Latin American market, particularly Brazil where a draconian austerity plan has just come into force.

Nestle announced earlier this week that it was abandoning plans to raise capital by issuing one new share for each 20 existing shares, because of the current poor performance of the Zurich stock market.

Mr. Maucher said that the company was expecting significant growth this year, but "Nestle for the moment has no major acquisition in the works."

"Our strategy consists in filling in blank spaces on the map (Pakistan, Egypt, China), and Nestle is also looking towards eastern Europe."

"Eastern Europe is not a priority for us, but it is clear that it will be a Nestle market."

TOKYO (MAY 2) - Japanese investors sold a record amount of foreign securities in March, depressing overall purchases in the first quarter to their lowest level in six years, the Finance Ministry said Wednesday.

The ministry said in a preliminary report that net sales of foreign securities came to 2.03 billion dollars in March. That compared with net purchases of 5.95 billion dollars in February and marked the first time that sales have exceeded purchases since March last year.

The heavy selling came as investors took profits on foreign securities to cover losses in the domestic stock market before companies closed their books at the end of the fiscal year on March 31, a ministry official said.

Net sales of foreign stocks came to 257 million dollars, the highest level since January last year, while sales of foreign bonds issued abroad swelled to 1.75 billion dollars, the biggest sell-off since March. Sales of foreign bonds issued in Japan meanwhile came to 28 million dollars.

The monthly figures reduced net Japanese purchases of foreign securities in the March quarter to 5.05 billion dollars. That compares with 37.94 billion dollars in the December quarter and was the lowest quarterly figure since the first three months of 1984 when net purchases fell to 3.87 billion dollars.

Foreign investors were net sellers of Japanese securities in March with sales of stocks and bonds totalling 2.64 billion dollars. That compared with purchases of 4.15 billion dollars in February and marked the biggest sell-off since November 1987 following the global stockmarket crash in October.

The ministry's report said that net sales of Japanese stocks amounted to 6.95 billion dollars during the month. The figure was partly offset by net

foreign purchases of Japanese bonds which totalled 840 million dollars in the domestic market and 3.48 billion dollars abroad.

#90122d2780 05/02/1990 ~French/German News Agency

PARIS (MAY 2) - French police forcibly evicted on Wednesday about 30 ''squatter'' families with 60 children from two apartment houses in Paris.

The squatters, mostly from African countries, had occupied the empty buildings in the winter of 1986 after many of them were made homeless by firebomb attacks on dwellings for foreigners.

A committee of homeless in Paris called a demonstration to protest against the evictions.

Some 185 buildings in Paris are occupied by mostly foreign squatters. Many of them would be prepared to pay rent, but the French capital has a grave shortage of cheap dwellings.

For every council flat, there are ten low-income families seeking a place to live.

For fear of squatters, apartment owners are having empty flats guarded 24 hours a day.

#90122d2870 05/02/1990 ~French/German News Agency

TOKYO (MAY 2) - Japan is ripe for a cocaine invasion as the drug becomes more fashionable, taking over from traditional stimulants used by addicts for decades.

"Young Japanese are going to love cocaine," said Tsuneo Kondo, the head of a private drug rehabilitation centre in Tokyo, the first of its kind to open in Japan.

His concerns are shared by the police who have made record cocaine seizures of more than 28 kilogrammes (62 pounds) in the first three months of the year, nearly double seizures for the whole of last year, which was already a record year.

But overall Japanese authorities are satisfied with the steps taken since the end of World War II.

"Compulsory education, which is very well organised in Japan, has been particularly effective in developing the will and the moral fibre to reject drugs," deputy parliamentary minister Ichiji Ishii told an international

conference on drugs in London in April.

Japan, he added, had created "a strong moral prejudice against drugs through legislation which imposes severe penalties for traffickers."

His optimism is not shared by Mr. Kondo, 48, himself a former addict, who is currently treating about 20 young people and has dealt with more than 100 since his centre opened in 1986.

"Traditions are fading in Japan ... and young people are living in reinforced concrete flats where they are not even allowed to keep pets," he said.

Mr. Kondo said he was a victim of Japan's highly competitive society. In senior management of a ferry boat company and earning 600,000 yen (3,850 dollars) a month at the age of 32, he suddenly felt his position slipping when the owner's son returned from studying in the United States.

"He was young and handsome and had done well in his studies. I felt passed over and felt I had no chance against him."

On the advice of a truck driver, he turned to amphetamines, a drug suited to the hectic pace of Japanese life and one that has been increasingly used over the last 20 years.

Stimulants were widely used by Japan's factory workers during World War II and its kamikaze (suicide) pilots, explains Mr. Kondo.

After it lost the war, Japan was swept by a craze for Hilopon, a stimulant used by demobilised soldiers, prostitutes and taxi drivers, and a sharp increase in the heroin trade.

Each year some 20,000 people are arrested in Japan for trafficking in or using drugs, particularly amphetamines, which are imported from South Korea and Taiwan, although police estimate the actual number of addicts at between 200,000 and 600,000.

Among those arrested are truck drivers, taxi drivers, bar hostesses, massage parlour workers and barmen, especially those on night shifts.

But the drug is also being used by a growing number of housewives, young students and artists.

The latter group are most likely to turn to cocaine, as evidenced by the arrest in January of well-known Japanese actor Shintaro Katsu in Hawaii for possession of 1.75 grammes (0.06 ounces) of cocaine and 9.75 grammes (0.3 ounces) of marijuana.

The case was widely published in the press and scandalised the Japanese public.

It showed that Japan has a growing number of nonconformists, notably young people who travel and do not have the same moral distaste for drugs that their elders have, said Kyohei Onuma, a psychiatrist who for years has treated youngsters for drug abuse.

For their part the police know that much depends on the attitude of the local yakuza criminal syndicates who already control most of the trafficking in stimulants.

Up to now they have largely stayed away from the lucrative cocaine market, but with the interest shown in Japan by Colombian drug dealers, several of whom have been arrested in Japan in recent months, the situation could rapidly change, police say.

PARIS (MAY 2) - Former senior officials of the United Banking Corporation a Lebanese bank put into receivership a year ago, are to appear before the Paris commercial tribunal on Thursday, it was announced here Wednesday.

The official receiver has filed an action under which the tribunal could order that the bank's debts should be met in part or in full by its former officials.

The lawyer for the bank's depositors, Abou Zeid, said that the bank had about 150 million francs (26 million dollars) in its coffers, but that total deposits were of almost a billion francs (175 million dollars), which would mean that depositors would only be able to recover about 15 per cent of their cash.

#90122d2950 05/02/1990 ~French/German News Agency
Gaza (MAY 2) - A masked 23-year-old Palestinian was shot dead by Israeli troops Wednesday in the occupied Gaza Strip after ignoring their order to halt for inspection.

Elsewhere in the Gaza Strip, curfews imposed on the Jabaliye refugee camp and the Sheikh Radwan area after last Thursday's disturbances were lifted and schools reopened.

In the occupied West Bank, a former village mayor suspected of collaboration with the israeli authorities died of wounds incurred during a weekend ambush.

The Israeli human rights group B'tselem issued its statistics for April showing that 9 Palestinians were killed by troops and 8 by fellow Palestinians who accused them of collaboration.

In the Gaza shooting, defence sources said an army patrol spotted two masked men painting intifada slogans on the walls of the Khan Yunis refugee camp's main mosque.

One of the men, Abdel Latif Mustapha Saka, attempted to escape and was shot dead, while the other gave himself up to the soldiers. The slogans the men painted called for a general strike Thursday in line with the recent directive issued by the Islamic fundamentalist movement Hammas.

Standing army orders permit troops to open fire on any masked residents of the occupied territories who refuse commands to stop for inspection.

TOKYO (MAY 2) - Japan will seek to upgrade its role within the International Monetary Fund (IMF) and to ease tensions over rising interest rates at the group's meeting next week in Washington, monetary officials here say.

An accord over increasing Japan's contributions to the IMF is the main item on Tokyo's agenda.

An agreement to make Japan the second largest IMF shareholder - and thus contributor - after the United States would allow it to play a role equal to its heightened economic clout.

"We put utmost importance that the ranking should reflect the relative size of our economy," a top finance ministry official said.

Japan currently ranks fifth in the IMF after the United States, Britain, West Germany and France.

Bolstered by U.S. support on the issue, Japan is hopeful that "our dream will be realized" this time after being "disappointed" four times already, the official said.

"But nothing is yet solved and prospects are too unclear" over the possibility of an accord, the official was quick to add.

Standing in the way of Tokyo, sources here say, are mainly Britain and France, which are loath to see themselves lose face by being relegated to fourth or fifth place, with a loss of commensurate voting power on the

bank's board.

If Japan is able to achieve its goal, West Germany would be pushed back to third place.

Japan's case will be argued by Makoto Utsumi, vice minister of finance in charge of international affairs, and Bank of Japan governor Yasushi Mieno, as Finance Minister Ryutaro Hashimoto is currently in India for the annual Asian Development Bank meeting and is to return here Monday when parliament resumes work.

BUDAPEST (MAY 2) - The Hungarian parliament elected opposition figure Arpad Goencz as interim president Wednesday at the inaugural sitting of the first freely-elected legislature in 43 years.

Mr. Goencz, 68, a founder of the opposition Alliance of Free Democrats, was sentenced to life imprisonment for participating in the 1956 uprising against communist rule.

The Democratic Forum, which holds the most seats in the first freely-elected parliament since 1947, and the powerful opposition Alliance agreed that Mr. Goencz was the best symbol of "national unity".

They proposed him as parliamentary speaker and consequently interim national president until presidential elections were held, when he would be their candidate. He was elected parliamentary president with 339 votes, with 31 votes against and nine blank voting papers.

They agreed that a representative of the Democratic Forum, Gyorgy Szabad, would be elected deputy speaker of parliament over which he would preside during the interim period. Subsequently he would become speaker of the assembly which is to write a new constitution.

They also agreed to propose an amendment to the constitution for the national president to be elected by parliament and not by universal suffrage as had been foreseen. If this were approved, the presidential elections would be held before the end of the summer session.

Mr. Goencz is seen as a symbol of opposition to Communism. He is a founder of the committee for historical justice concerning the events of 1956.

In 1958 he was sentenced to life in prison in a political trial for participating in the popular uprising against the Moscow-led Communist administration in 1956. The rebellion was crushed by Soviet tanks. He served six years of his sentence.

BUCHAREST (MAY 2) - Less than three weeks before the first election of the post-Ceausescu era, Romania's provisional government seems set on turning a deaf ear to allegations that it is behaving like a communist dictatorship.

Dumitru Dinca, one of the government's most vocal critics, on Wednesday accused it of contempt for some 30 people who have joined him in a hunger strike he began on Sunday to press for a postponement of the election.

Sitting beneath a balcony at Bucharest University and separated from the crowd by nothing more than a piece of cord strung between two sticks, Mr. Dinca said he hoped the International Red Cross would intervene because "the Romanian government is ignoring us."

Up to 2,000 people gathered for the 11th day running on University Square, "a communist-free zone" that has become the centre of opposition to President Ion Iliescu and the National Salvation Front which has ruled Romania since the overthrow of Nicolae Ceausescu in December.

The hunger strikers said they would not eat until former communist party officials were barred from standing for election, the television freed from government control and demonstrators arrested earlier had been released.

Sources reached by telephone meanwhile said that anti-government feeling was spreading to other parts of the country.

More than 1,000 people were said to be occupying Opera Square in Timisoara, the city in western Romania where the December revolution began, while several hundred demonstrators were in a square in the Black Sea port of Constanta where protests started Sunday.

Organisers of a demonstration by "intellectuals and workers" in Brasov, central Romania, said they began occupying the main square there Tuesday.

Seven people went on hunger striker in Piatra Neamt, in the northeast, on Wednesday.

The sources said that all these demonstrators backed the National Alliance for the Timisoara Proclamation, a coalition of about 100 groups set up on Saturday.

The alliance, which includes six opposition parties, claimed to have more than 3.7 million signatures backing its call that the May 20 presidential election be postponed.

Radu Campeanu, presidential candidate of the centre-right National Liberal Party, endorsed the call after he returned late Tuesday from a visit to the United States, saying that "a government which wins elections through violence will be recognised by no-one."

#90122d3660 05/02/1990 ~French/German News Agency

BAGHDAD (MAY 2) - PLO leader Yasser Arafat is to travel to Damascus in the next few days in a bid to close a long-standing rift between Syria and Iraq, Arab diplomatic sources said here Wednesday.

The chairman of the Palestine Liberation Organization will also try to persuade Syrian President Hafez al-Assad to attend an emergency Arab summit, which Iraq has agreed to host, on Soviet Jewish emigration to Israel.

The PLO chief himself has been at odds with President Assad since 1983, when they fell out over Mr. Arafat's leadership of the Palestinian movement.

Mr. Arafat the same year was expelled from Damascus, although he was allowed to return after the funeral in the Syrian capital in 1988 of his second-in-command, Abu Jihad. He met briefly with President Assad during the visit.

Mr. Assad and Iraqi President Saddam Hussein have been sworn enemies since 1980, when diplomatic relations between the two countries were severed afer Syria made clear its support for Iran in the Gukf War.

But amid gathering momentum toward an emergency summit, Iraq and Syria have agreed to halt hostile media attacks on each other, the Arab diplomats said.

They said the decision was taken following a request from Mr. Arafat.

For first time in at least several years Iraqi newspapers on Wednesday refrained from hostile commentary on Syria or its role in Lebanon.

The Iraqi press has routinely blasted the Syrian government, accusing it of having committed "treason" against the Arab cause.

On Monday Iraqi Culture and Information Minister Latif Nassif Jassem said his government "rejects all cooperation with the Syrian regime" and described Mr. Assad as "suspect."

#90122d3740 05/02/1990 ~French/German News Agency
LONDON (MAY 2) - The informal forward market in Brent crude oil drilled from the North Sea off Britain has become embroiled in an international wrangle over its accountability to U.S. trade rules.

The crisis over the market, which has become an important benchmark for oil prices worldwide, has led its European users to cease trading with U.S. companies, while U.S. oil major Exxon has withdrawn from trading on the advice of its lawyers.

On Monday the British government's Department of Trade and Industry (DTI) asked the U.S. Commodity Futures Trading Commission (CFTC) for an urgent meeting on a recent U.S. court ruling, which it said could allow U.S. control of the currently self-regulated market to an "objectionable" extent.

The court ruling opened the way for a small U.S. trading company, Transnor, to prosecute two major international oil companies under U.S. law for alleged manipulation of the market in 1986.

The decision calls into question the extent to which U.S. trading rules can be applied to the self-regulating and informal market which is currently overseen by a British code of conduct.

Oil analysts here say the crisis has drastically affected trading volume by making operators afraid to deal through fear that their contracts could be illegal andor void.

#90122d3780 05/02/1990 ~French/German News Agency
ISLAMABAD (MAY 2) - Prime Minister Benazir Bhutto announced Wednesday after mediation by Japan that she was ready to meet her Indian counterpart Vishwanath Pratap Singh to resolve the Kashmir issue on the basis of a plebiscite in the strife-torn region.

"I am prepared to meet Indian Prime Minister Mr. V.P. Singh any time to resolve the Kashmir issue through a dialogue," she told a joint press conference also addressed by visiting Japanese Prime Minister Toshiki Kaifu.

Categorically denying New Delhi's allegations that Pakistan has been "arming and training" Kashmiri militants, Ms. Bhutto also proposed "a neutral mechanism" to verify charges and counter-charges.

Ms. Bhutto said the summit could help end tension in the northern Indian state, torn by a bloody Moslem campaign for secession from New Delhi.

Mr. Kaifu had conveyed Mr. Singh's offer to take "two steps" if Pakistan took "one step" to reduce the tension, she said, adding that she appreciated this and was "ready to reciprocate."

Pakistan would be willing to negotiate "in the spirit" of the 1972 Simla Agreement, which ended the third Indo-Pakistan war, and on the basis of the United Nations resolution calling for a plebiscite in the Moslem-majority state, she said.

Replying to a question, Mr. Kaifu said he was ready to play an active role in promoting peace between Pakistan and India.

He expressed concern over the "worsening of tension" in South Asia and said "should there be any role for Japan to help promote peace, we would be ready to take upon us that role actively."

Ms. Bhutto said she has made concrete proposals in this regard, including a "redeployment of troops to peacetime positions" and a "neutral mechanism" to verify allegations and counter-allegations from both sides.

Mr. Kaifu arrived here Wednesday for a 24-hour stay after visiting India and Bangladesh.

#90122d3820 05/02/1990 ~French/German News Agency

BERLIN (MAY 2) - Mongolia's official press Wednesday accused new opposition movements of leading the country to ruin and called for retaliatory action, the East German news agency ADN said in a dispatch from Ulan-Bator.

"The time has come for these lawless people to bear the consequences of their acts," the Mongolian heavy industry minister said in a letter published by the communist party daily Unen.

Opposition calls for the communist leadership to resign must cease, the letter said.

Pro-democracy groups have demanded that parliament be dissolved and replaced by a temporary body pending free elections, scheduled for late July.

The minister accused the opposition of breaking the law and disrupting public order. He said their goal was to ruin the economy and "strike fear into the hearts of mothers and elderly people".

The news agency Monzane linked the emergence of opposition groups to a

three-per-cent rise in crime during the first quarter of this year and a significant decline in production.

#90122d3960 05/02/1990 ~French/German News Agency

BRUSSELS (MAY 2) - The European Economic Community's Commission on Wednesday announced it would seek special powers to block airlines that use predatory practices in prices or route schedules against smaller competitors.

"The Commission's proposals reflect the aim of creating a liberalised single market in air transport in which competition is maintained and the consumer benefits," the EEC executive said.

"This is especially important where a small airline is trying to establish itself in the market, or a newcomer is offering new competition on a particular route by new schedules or lower prices."

The Commission named four types of "predatory practices" that it would seek to curb when barriers to trade in civil aviation are eased in 1993:

- scheduling new flights "without good reason" in order to hurt the profitability of a new rival. This could be the case with a major carrier that suddenly lays on an 8:45 a.m. and 9:15 flight when a competitor has just introduced a new 9:00 service, the Commission said

- charging fares "appreciably below" a rival's own costs

- offering financial perks to travel agents that make it impossible for other airlines to compete

- granting "loyalty benefits" to passengers that "artificially" maintain loyalty to a specific airline

The Commission said it would seek the right to take "rapid action" to stamp out anti-competition practices within three weeks of receiving a complaint.

At present, such intervention takes at least three months, a period that could cause a vulnerable airline to go bankrupt, Commission sources said.

But any action would be conducted reasonably, the Commission said. The executive would examine each complaint on a case-by-case basis and inform the accused airline in writing, giving it the right to reply.

#90122d3970 05/02/1990 ~French/German News Agency

BONN (MAY 2) - The details of the 12-point agreement on German monetary union announced Wednesday, which will be included in a treaty on economic, social and monetary union to take effect July 1:

- The conversion of currency will be carried on on July 2 once the treaty takes effect.

- Salaries, grants, rents and pensions along with other periodical payments will be converted at a rate of one for one

- The East German pension system will be adapted to the West German system. This will mean that most pensions in Deutsche marks will be higher than those in Ost marks. In individual cases where the pension will be lower than that previously paid in Ost marks, this is the Deutsche mark figure to be used.

- Resultant social problems for holders of small pensions and students will be compensated by measures to be taken by East Germany. East Germany will resolve this as part of its own financial responsibility and respecting its global financial constraints.

- Other debts and liquidity will be converted at the rate of two (Ost marks) for one (Deutsche mark).

- Permanent residents of East Germany can exchange the following amounts per head in cash and bank accounts at the rate of one for one: children up to 14 years old 2,000 marks, people aged 15 to 59 4,000 marks, people over 60 6,000 marks.

Sums over these levels will be exchanged at the rate of two to one, in line with article 9 (which provides for the possibility of a time limit).

Savers who had exchanged at two for one might have the possibility later of acquiring a holding in state enterprises.

#90122d4020 05/02/1990 ~French/German News Agency

LONDON (MAY 2) - British industrial group Williams Holdings on Wednesday announced the sale of its paints operation Crown Berger to Sweden's Nobel Industries for at least 205 million pounds (336.5 million dollars) cash.

Nobel Industries is to make a further payment of up to 35 million pounds (57.5 million dollars) at some future date depending on the operation's performance.

Shares in Williams Holdings climbed 10 pence to 251 pence after the news, which analysts said constituted a very good deal for Williams since the

maximum 240 million price paid is around 100 million pounds (164 million dollars) above current asset valuation.

The operation was created from acquisitions made by Williams holdings in deals during 1987 and 1988.

Williams, which made 116 million pounds (190 million dollars) profit in 1988 from a turnover of 826 million (1.35 billion dollars), said it wanted to concentrate on other of its busineses, but it is nevertheless maintaining its Polycell domestic decorating products business and various other Crown Berger businesses.

#90122d4040 05/02/1990 ~French/German News Agency

WASHINGTON (MAY 2) - The Agriculture Department has authorized China to buy an additional two million metric tons of U.S. wheat at subsidized prices, Undersecretary Richard Crowder announced Wednesday.

Last February 8, the United States allocated one million tons of wheat to China under its Export Enhancement Program (EEP), designed to help private U.S. exporters meet foreign competition in selected overseas markets.

Since the EEP began in 1985, China has purchased 15.2 million tons of U.S. wheat, of which some eight million tons were bought in 1988-89.

For the 1990-91 marketing year that begins next June, China has placed orders for one million tons of wheat, the Agriculture Department said.

The Soviet Union is the biggest purchaser of U.S. wheat under the EEP program, having purchased nearly 21 million tons since the program began.

#90122d4110 05/02/1990 ~French/German News Agency

WASHINGTON (MAY 2) - West Germany will not become a nuclear-free zone now or in the future, Bonn Defense Minister Gerhard Stoltenberg said after talks here Wednesday.

He said Bonn was sticking to the principles of military integration and backed stronger armed forces integration.

'When that is the case, then it is not conceivable that we ... declare the territory of West Germany as a nuclear-free zone,' he said after talks with U.S. counterpart, Richard Cheney, Secretary of State James Baker and National Security Adviser Brent Scowcroft.

Defence Ministers of the North Atlantic Treaty Organisation (Nato) are due

to meet May 9 and 10 in Calgary, Canada and May 22 in Brussels to discuss the alliance's defence strategy in the light of political changes in former communist countries of eastern Europe.

U.S. press reports have said Washington will suggest to the Soviet Union that talks be speeded up on the scrapping of land-based tactical nuclear weapons in Europe, nuclear artillery and the short-range Lance missile.

It is thought likely that the land-based systems on German soil will make way for air-to-ground missiles equipped with nuclear warheads, the reports said.

Stoltenberg said there was agreement that a 'component nuclear weapons system' would continue to be needed.

In a speech the previous evening, Stoltenberg said he believed nuclear forces would have less of a deterrence role, serving instead to 'ensure and stabilise a contractually agreed system of mutual security in Europe'.

#90122d4220 05/02/1990 ~French/German News Agency

New Delhi (MAY 2) - Fundamentalist Hindus across India protested Wednesday and set up road blocks in the holy city Varanasi on the Ganges river after police arrested a Hindu high priest in a dispute over building a temple at the site of India's oldest mosque.

Swami Swarupanand, one of the four highest-ranking Hindu clergy and considered a holy man, was arrested Tuesday with 11 supporters for seeking to lay the temple foundation stone in Ayodhya, in Uttar Pradesh state.

Hindu organisations threatened to call a general strike Monday if Swami Swarupanand is not released by Sunday. Another effort to lay the temple's first stone is planned for May 7.

The swami and his fundamentalist backers want to tear down the Ayodhya mosque and replace it with a 24-million-dollar temple honouring the god Ram, an incarnation of the Hindu creator of the world, Vishnu.

Clashes erupted between Moslems and Hindus in several cities last October over the issue, with at least 25 people killed in Bhagalpur, Bihar state.

Critics fear more violence if the temple plan is allowed to further strain the tense relations between the two religious communities in India.

#90122d4290 05/02/1990 ~French/German News Agency

SINGAPORE (MAY 2) - The ship planning to broadcast pro-democracy programs to China will change course and head for Hong Kong instead of Taiwan after failing to obtain berthing permission, a project organiser said here Wednesday.

Organisers of the "Boat for China" project had not received any response from Taiwan about whether the Goddess of Democracy could berth there, organizer Christophe Nick told a news conference here late Wednesday.

He also said Wednesday that the ship was harassed by Chinese commercial vessels as it neared Singapore.

"For one and a half months we have been requesting permission from the Taiwan government to berth there and we have not had any reply so far," he said.

Mr. Nick said he would now contact Hong Kong port authorities to obtain permission for the boat to berth in the British colony.

"We are hopeful that Hong Kong will give us permission," said Mr. Nick, a journalist with the French magazine Actuel, one of 19 publications, including two from Taiwan, supporting the project.

Asked what the ship would do if Hong Kong refused permission, Mr. Nick said, "We will first wait for their answer."

There was no immediate comment from Taiwan on the issue, but an official there said Monday that the ruling Kuomintang (KMT) was trying to decide whether to permit the ship to call on Taiwan's ports for provisions and technical supplies.

On threats by the Chinese government that it would try to prevent the ship from broadcasting programs to China, Mr. Nick said the crew and other journalists on board were not afraid of it.

Mr. Nick said the purpose of the mission was to tell the people in China what happened during the crackdown on pro-democracy demonstrators in Beijing last June 4.

"The whole world knew what the Chinese government and the Chinese army did,

but not the Chinese people. We want to relay radio messages to the Chinese people to keep them informed," he said.

Damascus (MAY 2) - Syrian President Hafez Assad held talks in private here Wednesday with his Egyptian counterpart, Hosny Mubarak, and scheduled a second round later in the day at which delegations from the two sides will also be present.

The two foreign ministers, Egypt's Esmat Abdel-Meguid and Syria's Faruk al-Sharaa, held a separate meeting.

Abdel-Meguid said Mubarak's two-day visit was ''historic'' and constituted ''an important step towards Arab solidarity''.

He added: ''We expect good results not only for Egypt and Syria, but also for the entire Arab nation, and for the sake of peace and stability in the area.''

Mubarak's visit is the first by an Egyptian head of state to Damascus in 13 years.

Efforts to resolve the Middle East conflict, the current situation in the region and inter-Arab relations are the main points on the agenda of talks between both leaders.

Assad gave the Egyptian president a warm welcome at the airport, kissing him on the cheeks. The arrival ceremony, with cheering crowds, was broadcast live by Syrian radio. More dpa bw 021833 mai 90

KABUL (MAY 2) - Mujahedeen resistance fighters have intensified shelling of the strategic Afghan city of Khost about 25 kilometers (16 miles) from the Pakistani border, an official spokesman said here Wednesday.

Government spokesman Humayun Mokammal said rebels egan to step up pressure on Khost April 27. Government troops responded with heavy air and artillery bombardments, killing or wounding 98 of the attackers.

"There had been sporadic attacks around Khost before, but after the 27th they intensified their attacks," Mr. Mukammal said. He put government casualties at one killed and 10 wounded.

Two civilians died in the attacks over the past week and government troops knocked out a rebel tank, he added.

Government military resupply aircraft have been unable to land in Khost in daylight hours for months because of pinpoint shelling on the airport, but were still landing at night, Mr. Mukammal confirmed.

Mujahedeen groups have blocked land routes to the city.

Fighting also continued in the Paghman region, some 12 miles (20 kilometers) northwest of the Afghan capital Kabul, and in the Pakistan border provinces of Nangahar and Kandahar, Mr. Mukammal said, but gave no casualty figures.

He said government troops, after three weeks of fighting, are "close to achieving their objective" of dislodging the mujahedeen from the Paghman mountains, from where they been shelling Kabul.

No rockets have fallen on the capital for the past three days.

BONN (MAY 2) - Tens of thousands of metalworkers went on strike in factories across West Germany Wednesday to back demands for a shorter work

week and an 8.5 percent pay rise, the powerful metalworkers' union said.

Strikes of between one and three hours were focussed in Baden-Wuerttemberg in the southwest, Rhine and North Westphalia in the northwest and at Thyssen's plant at Emden in the north.

In Baden-Wuerttemberg, the 8,000 metalworkers at the Audi and Kolbenschmidt plants stopped work for about an hour and attended a meeting called by the IG Metall union.

A Kolbenschmidt spokesman said most metalworkers on the morning shift took part in the strike.

At least nine companies took part in the strike in Stuttgart, IG Metall said, and 300 workers at Mercedes Benz in Mettingen also downed tools.

In Rhine and North Westphalia, where there are one million metalworkers in 150 factories, more than 30,000 stopped work for several hours, the union said.

The union has been staging strikes in selected areas since Monday and has warned it will call an all-out work stoppage if it fails to obtain assurances "in black and white" by next Tuesday that its demands will be met.

HARARE (MAY 2) - President Robert Mugabe gave notice Wednesday of a constitutional amendment allowing the government to acquire land from mainly white commercial farmers for resettlement of landless blacks, but made no mention of his avowed aim of creating a one-party state.

Mr. Mugabe was opening Zimbabwe's third parliament, which for the first time has the power to change the declaration of rights effectively entrenched in the British-brokered constitution accepted at independence 10 years ago.

The declaration covers issues such as private property and the multi-party system, and amendments can now be made with a two-thirds majority in parliament instead of the unanimous vote required previously.

This will be easy for Mr. Mugabe. Following general elections in March, his ZANU (Zimbabwe African National Union) and government appointees hold 146 parliamentary seats out of 150.

The president, in power for the past 10 years, has made no secret of his resentment of the entrenched clauses, and has referred in particular to his

desire for land reform and the establishment of a one-party state.

In his address to parliament, he said that among constitutional changes planned was the removal of the "restrictive provisions ... as they relate to property rights and, in particular, those concerning land.

"Necessary amendments will be introduced to enable government to distribute land more equitably and speedily than has been possible hitherto."

Until now, the government could only acquire land for resettlement on a willing-buyer, willing-seller basis.

Some 4,000 commercial farmers, most of whom are white, own nearly 30 per cent of the land, while the majority of the population of 10 million live in overcrowded communal areas.

#90122d4950 05/02/1990 ~French/German News Agency

PARIS (MAY 2) - The board of the Banque Internationale pour l'Afrique Occidentale (BIAO) failed to agree Wednesday on the fate of its Paris headquarters and of its healthy subsidiaries, informed sources said.

Majority shareholder Banque Nationale de Paris (BNP) decided earlier this month to pull out of three loss-making subsidiaries in Senegal, Ivory Coast and Cameroon.

But it has said it is ready to take over the group's healthy subsidiaries, on condition that it can merge them with its own operations in countries such as Togo, Gabon and Burkina Faso.

The states concerned are opposed to the idea, wanting to maintain an independent network, and the BIAO board decided Wednesday to postpone a decision until June 15, when an extraordinary general meeting is to be held.

BNP holds a 51 percent stake in the BIAO, with Union de Banques Suisse holding 20 percent, Banco do Brazil 20 percent and Compagnie Interafricaine d'Investissment, which represents African interests, nine percent.

French Cooperation Minister Jacques Pelletier told parliament Wednesday that BNP wanted to replace the BIAO "given that it is the same thing now. The BNP, which is more solid, would help strengthen the position of French banks in Africa."

The BNP was offering to buy out the other shareholders, he added.

But the African states say they have an alternative buyer, and press

reports have mentioned Standard Bank of South Africa and Meridian Bank of Britain.

BNP has said it doubts that such a solution would work out, and financial sources said the French central bank would not be happy if South African interests moved in.

Mr. Pelletier, asked about this possibility, said Wednesday that "hitherto neither the BIAO nor the BNP has even received a request for information. In these conditions, I cannot give an opinion on a hypothetical operation. At the moment, I consider that the only option on the table is that of the BNP."

WASHINGTON (MAY 2) - Lawmakers from 42 nations Wednesday urged their governments to enforce a 50 percent reduction in global-warming pollutants between now and the year 2010.

The Interparliamentary Conference on the Global Environment also urged the establishment of a "global Marshall plan" to help developing nations tackle their environmental problems.

The original Marshall plan, set up by the United States, helped restore the economies of war-ravaged Western Europe after World War II.

The three-day conference was attended by 200 legislators from the United States, the Soviet Union, Japan, Europe and many developing countries.

Recognizing that the conference could only make recommendations to the national parliaments represented at it, Pakistani legislator Attiya Inayatullah said, "I hope that this is going to be the beginning, the beginning in which we can have a global survival dialogue."

WASHINGTON (MAY 2) - A human rights group, alleging indiscriminate killings of unarmed civilians, rape and looting by the Liberian Army, Wednesday called on the U.S. Government to end all assistance except humanitarian aid to the African state.

The group, Africa Watch, in a report "Liberia: Flight from Terror," said: "The Liberian Army used brutal counterinsurgency tactics in response to an attack by a small group of rebels in December 1989.

"Africa Watch received direct testimonies from Liberian civilians who fled

brutal attacks by the Liberian Army, which indiscriminately killed unarmed civilians, raped women and burned and looted villages."

There were also atrocities committed by the rebels, said Africa Watch.

According to the report: "The rebel forces killed several members of the Krahn ethnic group, of which (President Samuel) Doe is a member. They also targeted soldiers and local government officials, and killed at least seven Mandingo men suspected of informing the government about rebel activities.

Quoting what it called independent sources, Africa Watch said there were indications that "at least 500 civilians have died in the massacres ... over 160,000 people fled the violence into neighboring Guinea and Ivory Coast."

Citing figures from the United Nations Disaster Relief Organization, the report said a further 135,000 people were displaced within the Nima region or had fled to the capital, Monrovia, "leaving large areas of the country deserted and the population depleted."

The report said the latest atrocities, started with a coup attempt by former senior government official Charles Taylor in December, were reminiscent of the events of 1985 "when hundreds of ....soldiers and civilians were killed by government soldiers after an aborted coup attempt by a former member of the government."

"The 1985 massacres and the present conflict are part of a 10-year reign of terror by General Samuel Kanyon Doe ...

"During the past decade, Doe consolidated his power by executing six of his former colleagues, forcing several into exile and demoting others.

"In addition to extra-judicial killings, Doe's years in power have been characterized by a wide range of abuses, including torure, arbitrary arrests, detention without trial, supression of the press and constraints on freedom of association," the report said.

It called on the U.S. Government to end all military assistance to the Liberian Government "until it has ended the indiscriminate killing of civilians and has made substantial progress in improving human rights."

Africa Watch also urged Washington to "suspend all U.S. assistance to Liberia, except humanitarian assistance" until the human rights situation there is greatly improved.

#90122d5090 05/02/1990 ~French/German News Agency

STRASBOURG, France (MAY 2) - South African anti-apartheid leader Nelson Mandela will address the European Parliament next month, the Socialist group of European deputies announced here Wednesday.

Mr. Mandela will visit the Strasbourg-based assembly in its monthly plenary session, set for June 11 to 15, the parliament's majority group said. The date for the visit has yet to be fixed.

Traditionally, only foreign heads of state are allowed to address the full assembly of parliament.

Mr. Mandela will be speaking as winner of the parliament's Andrei Sakharov prize, awarded to defenders of human rights and values.

The prize was awarded to Mr. Mandela last December, when he was still in prison. His grandson went to Strasbourg to accept the award in his name.

Parliamentary President Enrique Baron Crespo invited Mr. Baron to visit the forum when the African National Congress (ANC) deputy president was released on February 11.

The European Parliament gathers 518 deputies, elected from the 12 member states. The parliament has the power to propose amendments to draft EEC laws; the right to dismiss the EEC's executive Commission; and can veto the EEC budget and treaties with third countries.

#90122d5160 05/02/1990 ~French/German News Agency

CAIRO (MAY 2) - A dissident Moslem extremist group, Al-Jihad al-Jadid (new holy war), clashed with police south of here Monday, newspapers said Wednesday, after earlier reports that another faction had been involved.

Police fought a three-hour gunbattle with Islamic militants entrenched in the village of Kahk, some 100 kilometers (60 miles) south of Cairo.

Press reports Wednesday said the clash left 14 militants dead and 13 wounded. Seven police officers were also hurt.

Initial accounts said the fighters belonged to the fundamentalist Takfir wal Higra, which had been active in the 1970s.

But newspapers on Wednesday said the group involved was Al-Jihad al-Jadid, which broke away from another formation, Gamma al-Islamiyya.

Al-Jihad al-Jadid, according to the newspaper Al-Musawar, was led by a 40-year-old engineer, Shawki al-Sheikh, who attracted the support of 1,000 adherents who want to establish an Islamic state in Egypt.

He was killed April 25 in a clash with police.

WASHINGTON (MAY 2) - The United States Wednesday sharply condemned Salvador's leading rebel alliance for launching a new wave of attacks despite having agreed to enter peace talks with the government later this month.

"We condemn the outrageous violence by the FMLN," said State Department spokesman Richard Boucher, referring to the Spanish initials for the leftist Farabundo Marti National Liberation Front.

"The FMLN has demonstrated that it can destroy the Salvadoran economy and kill Salvadoran citizens," he said. 'Now is the time for the guerrillas to show that they can work with the government of El Salvador to negotiate an end to the war."

Overnight attacks by the rebels in San Salvador and around the country left at least 13 soldiers or police dead and seven wounded, the military said.

Peace talks are due to begin later this month under U.N. mediation between the rightist government of President Alfredo Cristiani and the FMLN.

Mr. Boucher assailed the rebels for trying to "talk peace while waging war."

"Last night's actions are inconsistent with the guerrillas' professed desire for peace through negotiations and with their professed desire or intent to end all attacks against civilians," he said.

Washington, which is providing El Salvador with 85 million dollars in military aid and more than 200 million dollars in economic aid this year, has strongly pressed the Cristiani Government to engage in negotiations with the rebels.

DHAKA (MAY 2) - Bangladesh President Hussain Muhammad Ershad Wednesday dismissed three cabinet ministers and three state ministers amid widespread charges of corruption and economic mismanagement against his eight-year-old government.

He also removed Prime Minister Kazi Zafar Ahmed from the influential information ministry and reshuffled portfolios of six other ministers.

An official announcement said Religious Affairs Minister Nazimuddin al Azad, Fisheries Minister Sunil Gupta and Jute Minister Mahbubur Rahman had been removed from the cabinet. All three were accused by opposition groups of corruption.

Ershad also appointed four new ministers and five state ministers. The new ministers are retired Major-General Shamsul Huq (commerce), Justice Habibul Islam Bhuiyan (law), Tajul Islam Chowdhury (land) and Mizanur Rahman Shelley (information).

Commerce Minister Abdus Sattar has been moved to fisheries and Food Minister Sardar Amzad Hussain to agriculture in a major reshuffle which saw several junior ministers given new portfolios.

Those unaffected by the changes include Foreign Minister Anisul Islam Mahmud and Finance and Planning Minister Abdul Munim. Ershad retained the powerful defence ministry.

#90122d5300 05/02/1990 ~French/German News Agency

WASHINGTON (MAY 2) - U.S. State Department legal adviser Abraham Sofaer is in The Hague for talks with Iranian officials over financial disputes stemming from 1979, officials said Wednesday.

Sofaer, who led negotiations last year that culminated in the release of some of the Iranian assets frozen in the United States during the 1979 Iranian revolution, flew to the Dutch capital Tuesday, they said.

Although the meeting was previously scheduled, it came only days after the release of U.S. hostage Frank Reed, raising speculation that the release of more Iranian assets might be imminent.

State Department spokesman Richard Boucher declined to say whether that was the goal of Sofaer's trip. But he acknowledged recent indirect contacts between Washington and Teheran.

In messages relayed by the Swiss Embassy, President George Bush thanked Iran for its role in freeing the two U.S. hostages and urged the Iranian leadership to release the remaining captives.

John Kelly, assistant secretary of state for Near East and South Asian affairs, has left for Algeria, apparently for talks on a range of Middle East affairs.

Few details on Kelly's trip were available, sparking further questions as to whether he may have gone to seek Algerian mediation. Algeria has played

a mediating role between Teheran and Washington before.

#90122d5340 05/02/1990 ~French/German News Agency
GUATEMALA CITY (MAY 2) - Hundreds of Guatemalan youths are being plucked out of slums and forced to join the army, a human rights official charged Wednesday.

"The recruitment of these people by the army is a flagrant human rights violation," Ramiro de Leon told reporters.

He said parents had complained to him of their sons being arrested by armed men in civilian clothes and taken to army installations where they were drafted.

Nearly 1,000 youths have met this fate in the past few weeks, Mr. de Leon said.

An army public relations officer, Colonel Luis Isaacs, admitted Wednesday that some 900 young men had been drafted recently, but said it was all done legally.

Military conscription "is required by the constitution and most Guatemalans have forgotten that it is their duty," Col. Isaacs said.

He denied that recruiting officers had resorted to violence, as some parents had complained.

Other military officials, who asked not to be identified, said the draft was often carried out by civilians acting as "military commissioners" who are allowed to carry weapons.

Whereas the draft used to be done exclusively in the countryside, one official said, now it targets jobless young men in Guatemala City slums.

"They have no future and we are convinced they will be better off in the army, where they get a profession, a salary and other benefits," the official said.

#90122d5460 05/02/1990 ~French/German News Agency
WASHINGTON (MAY 2) - The United States called Wednesday for a return to calm and the pursuit of newly-announced political reforms in Zaire after fighting between government forces and opposition militants that reportedly left two persons dead and several injured.

"We deeply regret this violence," said State Department spokesman Richard Boucher.

"We hope that calm will return to Zaire so that the extensive political reforms announced by President Mobutu (Sese Seko) on April 25 can be implemented fully," he said.

He said the U.S. Embassy in Kinshasa was looking into press reports of injuries and deaths in the clashes that occurred Monday during a rally of the newly-legalized Union for Democracy and Social Progress Party.

The Zairean Government, a close U.S. ally in Africa, has denied that anyone was killed in the incident.

Marshal Mobutu announced last week that he was ending one-party rule in Zaire and would permit multi-party elections.

Mr. Boucher was unwilling to comment on whether Monday's police action against the opposition activists cast doubt on the sincerity of Marshal Mobutu's pledge of greater democracy.

"I think the most important thing right now is that calm does return to Zaire so that those reforms can be implemented fully," he said.

#90122d5470 05/02/1990 ~French/German News Agency

NEW YORK (MAY 2) - The Soviet Union called on the United Nations Wednesday to make its specialised agencies available for help in overcoming the aftermath of the Chernobyl disaster of four years ago.

Guennadi Oudovenko, U.N. delegate from the Ukraine but speaking with official Moscow backing, said the Soviet government was seeking a U.N.-coordinated programme of international cooperation.

Oudovenko said the Food and Agriculture Organisation, for instance, could help suggest action for radio-actively contaminated forests, and the World Health Organisation could help in the treatment of radiation victims.

Yuri Shcharbak, Chairman of the ''Green World'' environmental organisation and a parliamentarian from Ukraine, the Soviet republic where the stricken Chernobyl nuclear power plant is located, told a press conference some 300 people had died in the 26 April 1986 tragedy, and not 31 as officially admitted by the Moscow government.

The financial costs of the disaster, he said, were some 15 times more than the 16 billion roubles made available last week for reparations by the Supreme Soviet.

MANAMA (MAY 2) - The French bank Societe Generale, one of the most important Offshore Banking Units (OBU) in Bahrain, will halt its operations here from July 1, the bank's general manager said Wednesday.

Patrick Wintrebert told Agence France-Presse that the bank would maintain its presence in the Gulf only with a regional representation office in Manama. He declined to give reasons for the move.

Societe Generale is seen as an important market-maker on the Saudi riyal market. Total assets for 1989 were more than one billion dollars -- 800 million dollars in interbank lendings and 200 million dollars in loans and deposits.

Only around 60 OBUs remain in Bahrain, compared to 75 in 1983. Several British banks left recently, including Westminster Bank, Lloyds and Barclays.

#90122d5640 05/02/1990 ~French/German News Agency
SAN FRANCISCO, CALIFORNIA (MAY 2) - The current round of global trade liberalization negotiations has reached a critical stage, U.S. Trade Representative Carla Hills said Wednesday.

In California for an informal meeting of trade ministers of the so-called Quad Group (the United States, Japan, Canada and the European Economic Community), Mrs. Hills said: "Nineteen ninety is a pivotal year for the world economy. Down one path lie open markets, expanded trade, economic growth and prosperity. Down the other lie closed markets, nations turning inward and gravely diminished prosperity for all."

Prior to the start of the three-day Quad talks, Mrs. Hills complained to a conference of business journalists about the media coverage of the trade talks, under way in Geneva under the framework of the General Agreement on Tariffs and Trade (GATT).

While trade agreements reached over the past 30 years had allowed unprecedented world economic growth and improved living conditions around the world, Mrs. Hills noted "surveys show that trade stories in the general interest media are rarer than a Chrysler (automobile) in Tokyo."

She said the three major commercial television networks in the United States had spoken of trade matters only 123 times in 1989. Having dealt with 14,400 different subjects, trade amounted to a proportion of just 0.1

per cent of the television news coverage.

And what little coverage there was, she complained, highlighted U.S.-Japanese friction and the U.S. trade deficit.

Trade, she lamented, was "covered like a war" even though "we are in the peace process."

The current round of GATT talks, Mrs. Hill maintained, would create the conditions for a new expansion in world trade which would provide the engine for world economic growth in the 21st century.

#90122d5650 05/02/1990 ~French/German News Agency

TAIPEI (MAY 2) - Some 60 student protesters began a sit-in in front of Chiang Kai-Shek Memorial Hall late Wednesday to protest the appointment earlier in the day of military strong man Hau Pei-Tsun as Taiwan's next premier.

The students, from six different universities around the island, are demanding that the ruling party reject Hau, the former general chief of staff and the current minister of national defence.

''When the military gets involved in politics, there can be no hope for democracy,'' proclaimed one long banner strung along a wall of the memorial park.

Student leaders said they would march to the legislative Yuan (parliament) to present their objections to legislators who will meet before the end of the month to decide whether to confirm President Lee Tenghui's choice of premier.

More students from around the island are expected to arrive in Taipei throughout Thursday, and political analysts say the students could influence events if their numbers grow significantly.

''If the students can get widespread support they will be able to force the legislators to vote against Hau,'' said Yang Tai-Shuenn, professor of political science at National Chengchi University. ''The next few days will be very important.''

As many as 6,000 student demonstrators held a sit-in in the square in front of Chiang Kai-Shek Memorial Hall in late March for six days.

The students won a promise from newly-elected president Lee Tenghui to speed up the pace of political reforms. Since then, however, students have expressed dissatisfaction with the president's performance.

LIMA (MAY 2) - Presidential candidate Alberto Fujimori has ended his 22-day silence, mildly rebuking the outgoing government of President Alan Garcia but again refusing to spell out his government program.

Mr. Fujimori stunned Peru by catapulting from obscurity to second place in the April 8 first-round election behind novelist Mario Vargas Llosa by saying little and portraying himself as apolitical in a country weary of politics.

But after recent polls began to show his silence was hurting him, he called reporters to his home Tuesday.

"I disagree with Aprismo," he said, referring to the ruling American Popular Revolutionary Alliance party.

"I say that the government has made mistakes," said the 51-year-old presidential candidate for the newly-formed Change '90. To those who might disagree, he said, "Look at the economic crisis we are in."

Questioned about his ties with the Garcia government, Mr. Fujimori said his actions while dean of the Agrarian University were "patriotic and in a technical area, and not politics, as a defender of the environment."

Mr. Fujimori, who had been criticized for failing to detail his program as he went into the first round of balloting last month, again declined to unveil his agenda but assured, "It has been ready for a year."

When reporters insisted, he said, "I have the right to reveal it at the most opportune moment."

As Mr. Fujimori was meeting with reporters in his home, Mr. Vargas Llosa,

candidate for the liberal Democratic Freedom, known as FREDEMO, was campaigning through small towns in Peru.

Mr. Vargas Llosa, 54, has showed a decidely different style in recent weeks.

WASHINGTON (MAY 2) - President George Bush has refused to block a bid by a state-run Indian company to take over a British computer software firm, the White House said Wednesday.

CMC Ltd., a company owned by the government of India, is planning to take over the British firm UniSoft Group Ltd. which has a subsidiary in the United States.

The White House said Mr. Bush had based his decision not to intervene on an investigation by the Committee on Foreign Investment in the United States (CFIUS), which is chaired by Treasury Secretary Nicholas Brady.

According to a White House statement: "CFIUS conducted a thorough investigation of various national security issues relating to India's acquisition of UniSoft Corporation, the U.S. subsidiary.

"UniSoft develops, markets, distributes, and customizes software operating systems."

Last week, India was the only country named by the U.S. Government for possible retaliatory action for discrimination against foreign investors.

#90122d6060 05/02/1990 ~French/German News Agency

BUCHAREST (MAY 2) AFP - Mother Teresa, the Albanian-born nun who won a Nobel peace prize for her work to help starving children in Calcutta, arrived in Bucharest on Wednesday saying she wanted to do similar work for the young and poor here.

"I have come with an appeal for love and charity. I hope that we will be able to help children and the poor as we have done elsewhere in the world " she said on arrival.

Mother Teresa, who at 79 recently retired from full-time work at her Calcutta missions, said she would be discussing her schedule here with her host Monsignor Iohan Robu, the Archbishop of Bucharest.

In addition to problems of poverty and the disruption caused by last year's anti-communist revolution, many Romanian children have contracted AIDS from being given contaminated medicines.

#90122d6500 05/02/1990 ~French/German News Agency

MILLY-LA-FORET, FRANCE, (MAY 3) - A forest fire caused by unseasonally dry and hot conditions destroyed 30 hectares (75 acres) of forest in the greater Paris region on Wednesday, firefighting officials said here.

One firefighter was taken to hospital after being overcome by smoke.

The fire, which was brought under control by more than 100 firefighters called out from 21 stations, ravaged woods near Milly-la-Foret, located some 65 kilometres (40 miles) south of Paris.

The picturesque woodland is not far from the huge Fontainebleau forest, which is a major tourist attraction.

Eyewitnesses said that the flames were at one point leaping 15 metres (50 feet) into the air.

#90122d6540 05/02/1990 ~French/German News Agency

PARIS, (MAY 2) - The exiled leader of Zaire's main opposition movement, Marcel Lihau, ruled out Wednesday any possible role in a transition government currently being formed under plans to introduce a multi-party system.

Mr. Lihau, president of the Union for Democracy and Social Progress (UDPS), told a press conference here that the UDPS would not consider a government role after the killing of two people at an opposition demonstration in Kinshasa.

"We're calling on all opposition forces to do the same," he said. The UDPS won tacit recognition last week from Zairean President Mobutu Sese Seko when the head of state announced the introduction of multi-party politics with three parties allowed.

Mr. Lihau said many witnesses confirmed that at least two people had been killed on Monday at an opposition meeting in the Zairean capital, a report denied on Tuesday by the governor of Kinshasa.

Earlier Wednesday, Zaire expelled the Agence France-Presse correspondent in Kinshasa, Jean-Claude Fiol, and protested to the French authorities over the reports of the deaths.

Mr. Lihau cited a New York Times report that government forces had killed at least two people, adding that "sources in the U.S. Congress contacted by our representatives said they had received the same information from the State Department."

"All the confirmations say the same thing," he said.

Mr. Lihau added that he hoped the leadership in the West African country would provide "certain guarantees for the people" before opening "round-table talks."

He wanted the dissolution of a "special presidential division including

African mercenaries" and stated that there were Chadians and troops from the Central African Republic among these.

Mr. Lihau also charged that about 100 "white mercenaries" had left Nice, the southern French town where Marshal Mobutu has a villa, on Easter Saturday after the announcement of an opposition demonstration in Kinshasa.

He did not give any details of their nationalities.

The UDPS president also called on Belgium, the former colonial power in Zaire, France and above all the United States -- "which has run Zaire since (independence in) 1960" -- and on African nations to name people to monitor a national conference called for Tuesday by nine opposition movements, including his own, in a statement from Brussels.

#90122e0002 05/02/1990 ~Latin America New Agency

PANAMA CITY (MAY 2) EFE - Unidentified thieves have stolen the ashes of former Panamanian dictator Omar Torrijos who ruled the country between 1968 until his death in 1981, relatives have reported.

Moises Torrijos, a brother of the former general, said the ashes were stolen late Tuesday when the thieves entered a church in the Panamanian capital just before it closed.

"This profanity has filled us with amazement, with stupor. I can't see any political or economic motive, but then lately many strange things are happening in Panama," said Moises Torrijos.

He said a witness reported seeing two people acting suspiciously in the church. Burned pieces of paper were found in the area where the ashes had been placed.

Until February, Torrijos' ashes had remained in an area controlled jointly by U.S.-Panamanian troops but the general's family opted to remove them in the uncertainty ensuing last December's U.S. invasion which ousted former military strongman Gen. Manuel Antonio Noriega.

Torrijos took power after deposing a conservative civilian government in 1968. During his rule he carried out extensive democratic reforms and steered the country on an independent foreign policy supporting leftist governments in Cuba and Nicaragua.

One of his most significant achievements was a treaty signed with former U.S. president Jimmy Carter in 1977 which calls for the removal of all U.S. troops from Panama and the handing over of control of the Canal by 2000.

Torrijos died in a plane crash in July 1981.

Meanwhile, government spokespersons Tuesday denied radio reports of an attempted coup, fueled by the deployment of security forces around the presidential palace earlier in the day.

They said the troops were acting under orders of a government official who had received as yet unconfirmed reports that a number of prisoners had escaped from El Renacer jail outside the capital which holds many former officers of the ousted Noriega regime.

#90122e0003 05/02/1990 ~Latin America New Agency

Managua (MAY 2) EFE - Successive devaluations and spiraling inflation have turned Managua's streets into a thriving trading sector packed with hawkish dealers armed with pocket calculators, sacks of Nicaraguan cordobas and hungry to buy dollars.

For the tourist or visiting executive, a stroll through the capital's streets under the incessant barrage of the dealers' cries and the sight of literally millions of cordobas changing hands makes statistics showing Nicaragua as Latin America's poorest country difficult to appreciate.

For the inexperienced, the ordeal can be a nightmare, and often a costly one.

A dollar which fetched cordobas 150,000 Wednesday, on the following Tuesday would have netted 200,000.

From dawn, the dealers, or +coyotes+ as they are commonly known, are out on the streets mounting their carton offices, keeping an eye out for possible clients and an ear to the ground to catch the latest currency fluctuation.

Price changes from day to day regularly spark off heated shouting matches between clients - whose calculations are usually based on the previous day's rates - and coyotes aiming to minimize losses and already planning on the following day's transactions.

Hopes that President Violeta Chamorro's week-old government would herald in a more stable system have rapidly dwindled following Central Bank chief Francisco Mayorga's prediction of yet another +inflation explosion+.

Under the former leftist Sandinista government, inflation figures came to have as many zeros in their tails as the average cordoba bill in circulation.

In 1988, prices rocketed by 33,000 percent, the highest ever in Latin America. Monthly devaluations and price controls brought the rate down to 1,400 last year while Mayorga estimates the 1990 figure to settle around 12,000 percent.

BARCELONA, SPAIN (MAY 2) EFE - Radical Soviet Deputy Boris Yeltsin Wednesday was recovering satisfactorily from back surgery he underwent earlier this week in the northeastern Spanish city of Barcelona, doctors reported.

A hospital spokesman said the Soviet deputy was back on his feet and would be released within two days.

Yeltsin was rushed to hospital Monday to undergo urgent surgery to remove a spinal disc hernia.

He had arived in Barcelona to take part in a television debate on political and economic reforms in the Soviet Union.

BEIRUT (MAY 2) EFE - A senior leader of the Lebanese Shiite Moslem extremist group Hezbollah made veiled threats Wednesday against the Spanish government which is holding seven members of the group in connection with explosives smuggled into Spain.

"We don't have enemies in Spain, but the arrest of these militants could incite animosities and different kinds of reactions," the Hezbollah leader said in an interview with EFE.

Hezbollah, which means "Party of God" in Arabic, is an Iranian-backed Shiite Moslem group which is believed to be holding most of the 17 Western hostages in Lebanon.

The Hezbollah suspects under arrest in Spain were members of a gang arrested in November for allegedly smuggling 220 kg of explosives, 258 detonators and 2 grenades hidden inside cans of jam.

Spanish police have said the seven Hezbollah members were planning a series of attacks throughout Europe.

The Hezbollah leader, who identified himself only as Abu Ahmad, said the explosives were to be used against France and Britain as well as against

U.S. and Israeli interests outside Spain.

He called on Spanish officials to "study well" the cases of the seven Hezbollah, and warned against awakening anti-Spanish sentiments among Islamic militants.

"Spain is just a station. Spanish interests are not the objective...on the other hand, there are countries that Spain trusts who have acted against us and who have committed terrorist acts against our militants," Abu Ahmad said.

He referred especially to France, where a Moslem extremist is in jail for the 1980 assasination attempt in France on Shapur Bakhtiar, the Shah of Iran's last prime minister.

Two people were shot dead during the attempt.

Meanwhile, an official at the Spanish embassy in Beirut told EFE that the situation in Lebanon for Spanish citizens "was not easy."

"Moslems usually warn before they take action. We're really scared...We would prefer to be shelled than to face Hezbollah threats," the official said.

SAN SALVADOR (MAY 2) EFE - At least 20 people were killed or wounded in attacks by leftist Salvadoran rebels on the capital and other parts of the country, officials said Wednesday, just days before peace talks were due to start with the government.

The presidential residence was among targets in the three-hour offensive on San Salvador, which began at 9 p.m. Tuesday (0300 GMT Wednesday), with much of the city plunged into darkness by attacks on electricity lines, the Army said.

Rebels of the leftist Farabundo Marti National Liberation Front (FMLN) are negotiating the agenda for peace talks with the government of rightist President Alfredo Cristiani, which were expected to be held this week.

A previous round of talks broke down October 1989 after suspected Army-linked rightists killed 10 labor unionists, prompting a rebel offensive on San Salvador.

In the new offensive, four soldiers, including two officers, died in an attack on the northern San Salvador suburb of Escalon, while six others were wounded, an Armed Forces spokesman said.

In San Miguel, the country's third-biggest city, a policeman was killed in a guerrilla attack early Wednesday, while a civil defense worker was wounded by rebels in the western department of Morazan, the spokesman added.

Meanwhile, the Red Cross said eight young people were killed in two guerrilla attacks in the southeast of the country.

Some 75,000 people have been killed in El Salvador's decade-old civil war.

#90122e0009 05/02/1990 ~Latin America New Agency

SAN SEBASTIAN, SPAIN (MAY 2) EFE - Three muggers were in a Spanish jail Wednesday rueing their attempt to snatch the handbag of a British teacher who jumped on their getaway car for a wild ride which ended 2 km later in a smash-up and their arrests, authorities said.

Authorities said Christine Young, 28, was walking down the street Monday in San Sebastian, 350 km north of Madrid, when a man grapped her handbag.

Young, from Nottingham, gave chase to the mugger who was accompanied by another man and a young woman, but the trio jumped into an automobile.

The victim then hopped up on the car's bonnet, hanging on desperately to the windscreen wipers as they sped through the city streets. One of the muggers reached out of the window and tried to stab her with a screwdriver she told police.

Young's raincoat blew up against the windscreen, blocking the driver's view and after two kilometers, the car crashed into a traffic light.

The dazed muggers were arrested.

Buenos Aires (MAY 2) EFE - Argentine Economy Minister Antonio Erman Gonzalez flies to Washington at the weekend to negotiate with the IMF the unblocking of a $240 million tranche of a standby loan agreed last September, officials said Wednesday.

The officials said Erman Gonzalez would outline President Carlos Menem's economic program to a meeting of the interim development committee of the IMF Monday, in order to secure the release of the agreed credit.

Last September, two months after President Menem came to power, Argentina

obtained a standby credit of $1.4 billion from the IMF, but it was blocked because the country failed to comply with the agreed economic goals.

Economy Ministry officials said they were counting on the IMF approving an Argentine letter of intent and sending the money "before the end of May".

They said they were also awaiting the arrival of a further $150 million from the World Bank that is destined to be spent on reforming foreign trade.

A government report to Congress said it was "fundamental for the economic program to obtain the pay-out of dlrs 1.5 billion in credits in the second half of 1990".

This was necessary because in 1989 and the first months of 1990 the net settlement with the international credit organizations had been +strongly disfavorable to the country, forcing further fiscal exertions+.

Argentina has a foreign debt of some $64 billion, according to official calculations, and has not paid interest on loans for two years. These delays resulted in the financial organizations cutting aid to the country.

The Economy Ministry has expressed optimism that government efforts to drastically cut public sector spending and the stability achieved in the markets since March will enable Argentina to meet the new guidelines to be set with the IMF.

#90122e0012 05/02/1990 ~Latin America New Agency

MEXICO CITY (MAY 2) EFE - As Mexico's 85 million Roman Catholics Wednesday awaited the visit of Pope John Paul II, there was speculation that the 7-day tour could lead to renewed diplomatic ties between the Vatican and Mexico, broken off more than 120 years ago.

The pontiff's visit begins Sunday.

Observers said Mexican officials' recent move to name a Vatican representative and resume official contacts suggests that a meeting Monday between the Pope and Mexican President Carlos Salinas de Gortari would center on renewed diplomatic ties.

But government and Church officials have denied that the two leaders would discuss the subject.

Diplomatic relations were broken in 1867 when Mexico accused the Church of amassing hugh wealth at the expense of the country's poor.

In 1917 Mexico repudiated the Church as a legal institution, and included strong anti-clerical laws in its constitution of the same year.

But Mexicans, who call their country "the most Catholic in the world," are preparing a huge welcoming, and some 20 million people are expected to attend Papal masses, while another 60 million will be watching on television.

More than 90 per cent of Mexicans are Roman Catholics.

Some 30,000 security agents are to be on crowd-control duty, while another 3,000 will be assigned for the Pope's personal protection.

Minutes after his arrival, the Holy Father is to hold a mass at the Basilica of Guadalupe where he is to beatify the Indian Juan Diego, who, according to the Church, was visited by the Virgen of Guadalupe in 1531.

While in Mexico, the Pope is also to beatify three children who were killed for defying their pagan religion in favor of the Catholic Church's conversion campaign in the 16th century.

John Paul made his first visit to Mexico in January, 1979, three months after becoming Pope.

The trip will be his 47th outside Italy.

On his second visit to Mexico, the Pope will visit the cities of Veracruz, Aguascalientes, San Juan de Lagos, Durango, Chihuahua, Monterrey, Tuxtla Gutierrez, Villahermosa and Zacatecas.

A spokesman for Mexico's "Aeromexico" airlines said the company would provide the pontiff with four commercial aircraft during his tour.

GUATEMALA CITY (MAY 2) EFE - More than 4,000 people have been murdered and over 1,200 have disappeared or been kidnapped since President Vinicio Cerezo took office in January 1986, a Guatemalan human rights group claimed Wednesday.

Nineth de Garcia, leader of the Mutual Support Group (GAM) human rights organization, said these figures came on top of the 100,000 murders that had taken place under the previous military rulers.

Cerezo was the first democratically-elected president to take office following almost three decades of military-dominated governments.

De Garcia said that many of the recent victims were peasants and workers but they also included 1,000 university students or academics, 700 teachers, 60 journalists, 400 leading members of the ruling Christian Democratic party, 14 priests and more than 500 lay preachers.

When Cerezo came to power he had admitted there had been "obvious and systematic violations of human rights" she said.

Since then the murders and attacks against popular organizations had continued, without the cases being investigated, De Garcia charged.

The leader of GAM, which brings together the families of missing people, said she believed there would be an increase in the number of killings of popular leaders, trade unionists, teachers and students in the coming months, particularly in the interior.

On Tuesday, peasant leader Jose Maria Ixcayat was riddled with bullets and killed, according to the leader of the Ethnic Council Amilcar Mendez.

Mendez said that heavily-armed men broke into Ixcayat's house in the northwestern department of Solala and shot him dead.

LIMA, (MAY 2) - The cost of living in Peru rose 37.5 per cent during April, the biggest monthly hike in prices since the beginning of the year, the National Statistics Institute (INE) reported Wednesday.

Accumulated inflation over the first four months of 1990 reached 208.7 per cent, while inflation during the 12-month period since April 1989 was 1,903 per cent, according to INE chief Felix Murillo.

Medicines suffered the biggest jump in prices, rising 91.4 per cent, while water, light, telephone and transport tariffs rose 43 per cent.

Inflation in 1989 was 2,775 per cent, double the 1988 figure of 1,772 per cent.

According to former president Fernando Belaunde Terry, inflation during the five years of President Alan Garcia's center-left government will reach 1.3 million per cent by the time his term is up on July 28.

#90122e0019 05/02/1990 ~Latin America New Agency

BRASILIA (MAY 2) EFE - Brazilian police Wednesday used 170 kg of dynamite to destroy the first of 110 clandestine landing strips on Amazonian Indian

lands, as part of a government plan to keep out gold prospectors whose presence is threatening an endangered tribe.

Police said they blew up the Baiano Formiga landing strip, one of the largest illegal strips, located in the extreme western part of the state of Rorarima, in northwestern Brazil.

Some 40,000 miners have encroached on the Yanomami Indian lands, polluting the rivers with mercury used in gold refining and bringing diseases.

In January, the government of then-president Jose Sarney announced the expulsion of miners from Yanomami lands and began hauling the prospectors out aboard Air Force planes.

The operation lasted 80 days during which some 250 police and Air Force members logged some 3,000 flight hours.

President Fernando Collor de Mello, who took office last month, decided to destroy the airstrips, which were also suspected of being used by Colombian cocaine smugglers.

At the Baiano Formiga airstrip police recently seized cocaine aboard a plane they said belonged to Colombian drug traffickers.

The estimated 15,000 Yanomami, the last major Stone Age tribe of the Amazon, live in the Brazilian states of Roraima and Amazonas and in neighboring Venezuela.

The area, about the size of Cuba or Greece, is the largest indigenous reserve left in the world.

Since 1987, when the miners began moving to Yanomami territory, some 15 percent of the tribe has died from the new diseases and malnutrition resulting from the loss of fish and game.

The dozen largest landing strips are to be destroyed by May 18, officials said.

#90122e0020 05/02/1990 ~Latin America New Agency

LIMA (MAY 2) EFE - Suspected Maoist "Shining Path" rebels used knives and stones to kill three Peruvian peasants who refused to tell the guerrillas the whereabouts of police and murdered a kidnapped student, police said Wednesday.

They said the peasants were killed Tuesday night in the town of Sacsamarca in the Huancavelica province, 650 km southeast of the capital.

On Friday, suspected rebels kidnapped students Horacio Alfaro Salazar and Glicerio Vilca Rojas, classmates at the University of Huamanga in the Ayacucho province, killing Alfaro and seriously wounding Vilca, police said.

Alfaro's body was dumped Saturday at the university.

Ayacucho, 576 km southeast of Lima, is home to the Shining Path.

The rebel group has killed some 19,000 people and has caused more than dlrs 17 billion in damage -- an amount equal to 85 percent of Peru's foreign debt, since it took up arms in 1980.

A Senate commission set up to study violence in Peru, estimates that in April 500 people were killed by the Shining Path.

#90122e0021 05/02/1990 ~Latin America New Agency

MANAGUA (MAY 2) EFE - Nicaragua's new administration pressed U.S. President George Bush Wednesday for a quick release of the dlrs 300 million in aid approved a day ago by the U.S. Senate as part of a larger federal funding bill.

But Bush has said he will veto the entire bill, which also includes dlrs 420 million for Panama, if Congress does not remove an amendment allowing public funding of abortions in the U.S. capital.

The Senate approved the dlrs 2.3 billion package of foreign and domestic spending Tuesday. A joint Senate-House committee must agree on the bill and its amendments before it reaches Bush's desk.

Agustin Jarquin, a member of Nicaragua's ruling UNO coalition, said Bush must "release the money as soon as possible so that it arrives in time to support (the country's) financial transactions which are in a very precarious state."

Jarquin said the money was "insufficient" but that at least "it will allow us to help farmers during the present sowing season and that is fundamental."

Since President Violeta Chamorro's U.S.-backed administration took office last Wednesday her economic advisers have complained that the previous left-wing Sandinista government drained the country's liquid foreign reserves to dlrs 3 million and deliberately set inflation on the rise.

UNO Deputy Ivan Salvador Madriz said Nicaragua needed the aid

"immediately" to salvage its "prostrate economy."

"Economic assistance is vital for Nicaragua to be able to achieve stability and democracy," the deputy said.

However White House spokesman Marlin Fitzwater said Tuesday Bush's decision to veto a bill including the abortion amendment was "irreversable."

WASHINGTON (MAY 2) XINHUA - STEROID USE BY AMERICAN TEENS IS INCREASING AS THE DRUG CATCHES ON AMONG NON-ATHLETES, ACCORDING TO A SPORTS MEDICINE SURVEY RELEASED TUESDAY.

THE SURVEY FINDS USE AMONG HIGH SCHOOL STUDENTS RANGES FROM SIX TO 19 PERCENT.

DR. CONRAD ANDRINGA, WHO CONDUCTED THE SURVEY WITH A TEAM, TOLD THE AMERICAN ACADEMY OF PEDIATRICS MEETING IN SEATTLE THAT "PARTICULARLY DISTURBING IS THAT TWO-THIRDS SAY THEY STARTED USING STEROIDS BEFORE 16 WHEN MANY ARE STILL GROWING".

ABOUT ONE IN THREE STEROID-TAKERS IS A NON-ATHLETE. BOYS OUTNUMBER GIRLS FOUR TO ONE. BUT SURVEYS SUGGEST GROWING USE AMONG GIRLS.

SYNTHETIC SEX HORMONE CAN BUILD MUSCLE SIZE AND STRENGTH -- THE LURE FOR YOUNG ATHLETES.

"NOW GIRLS SAY THEY'RE DOING IT TO CUT THEIR BODY FAT AND INCREASE LEAN MUSCLE," SAID ANDRINGA.

STEROIDS CAN CAUSE LIVER CANCER, TESTICULAR SHRINKING, RISES IN CHOLESTEROL AND BLOOD PRESSURE AS WELL AS STUNTED GROWTH.

USE IS GROWING RAPIDLY IN AFFLUENT AREAS. ANOTHER SURVEY OF 1,010 ATHLETE STEROID USERS WAS FOUR TIMES HIGHER AT UPPER MIDDLE-CLASS HIGH SCHOOLS THAN AT POORER SCHOOLS.

#90122k0109 05/02/1990 ~Japanese News Agency

TOKYO (MAY 2) KYODO - VICE FOREIGN MINISTER TAKAKAZU KURIYAMA HAS CALLED FOR A NEW FOREIGN POLICY THAT REFLECTS JAPAN'S STATUS IN THE INTERNATIONAL COMMUNITY.

IN AN ARTICLE IN THE LATEST EDITION OF GAIKO FORUM ENTITLED "THE TURBULENT 1990S AND NEW DEVELOPMENTS IN JAPAN'S FOREIGN POLICY," KURIYAMA POINTED THE NEED FOR JAPAN TO BREAK WITH THE DIPLOMATIC STYLE OF A SMALL COUNTRY AND EMBARK ON DIPLOMACY MORE CHARACTERISTIC OF A MAJOR COUNTRY.

KURIYAMA SAID JAPAN SHOULD BE A MAJOR COUNTRY WITHOUT BOASTING OF BEING A BIG POWER AND CONTRIBUTE TO THE FORMATION OF A NEW INTERNATIONAL ORDER UTILIZING ITS ECONOMIC POWER.

A NEW INTERNATIONAL ORDER IS YET TO BE ESTABLISHED FOLLOWING THE END OF THE COLD WAR AND UNCERTAINTY AND INSTABILITY EXIST AT A TIME OF A TRANSITION, HE SAID.

QUOTING BRITISH PRIME MINISTER MARGARET THATCHER'S REMARKS THAT THE WORLD IS RUNNING ON THIN ICE, KURIYAMA WARNED OF THE DANGERS OF BEING INFLUENCED BY A MOOD OF RELAXATION IN TENSIONS.

HE SAID THE WORLD SHOULD COME TO TERMS WITH THE ESTABLISHMENT OF A NEW GLOBAL ORDER IN THE AFTERMATH OF THE COLD WAR AND ESTABLISH A NEW INTERNATIONAL TRADE SYSTEM ABLE TO WITHSTAND PROTECTIONISM AND NATIONALISM.

KURIYAMA SAID COOPERATION AMONG JAPAN, THE UNITED STATES AND EUROPE IS THE KEY TO WORLD PEACE AND PROSPERITY.

HE SAID ANXIETIES AND FEARS HELD BY OTHER NATIONS TOWARD JAPAN COULD BE ELIMINATED IF JAPAN ITSELF REALIZED IT IS ONE OF THE FACTORS CAUSING THE PRESENT CHANGES.

KURIYAMA ALSO PROPOSED THAT JAPAN SHOULD CHANGE ITS PASSIVE FOREIGN POLICY TO A MORE ACTIVE ONE.

#90122p0042 05/02/1990 ~PR Newswire

TROY, MI (MAY 2) PR NEWSWIRE - The continued downturn in the automotive industry contributed to a 10-percent decline in sales for Voplex Corporation (AMEX: VOT) in the first quarter of 1990 resulting in a loss of $359,285, or $0.13 per share, compared with a loss of $183,736, or $0.07 per share in the first three months of 1989.

Sales in the quarter totaled $16,831,090, compared to $18,772,798 a year ago.

Another factor affecting lower sales was a parts inventory buildup by the company prior to the expiration of a union contract at its largest automotive facility in Lapeer, Mich. An agreement was reached by Voplex and the union on a new three-year contract and, by the end of the quarter, the parts inventory had been reduced to a normal level.

The board of directors declared a regular quarterly dividend of $0.10 per share, payable on May 31, 1990, to shareholders of record on May 3, 1990.

Voplex is a Troy-based company that designs, engineers and manufactures

interior trim components, modules and systems for the automotive industry as well as supplying blow-molded products for the packaging industry.

BENTON HARBOR, MI (MAY 2) PR NEWSWIRE - Whirlpool Corporation (NYSE: WHR) today announced the formation of Whirlpool Overseas Corporation as a wholly owned subsidiary of Whirlpool to conduct marketing and industrial activities outside of North America and Europe. The announcement was made jointly by Jan Prising, president, chief executive officer and senior managing director of Whirlpool International B.V. (WIBV) and Lawrence J. Kremer, senior vice president, global technology and operations for Whirlpool.

According to Prising, the formation of Whirlpool Overseas Corporation combines existing personnel and operations of the Whirlpool U.S. export sales and marketing group in Benton Harbor and the overseas business group in Comerio, Italy. The overseas business group was acquired in a joint venture with N.V. Philips of The Netherlands in 1989 and is now part of WIBV. Additionally, the four wholly owned sales companies in Taiwan, Hong Kong, Thailand, and Australia acquired as part of the Whirlpool Philips joint venture become part of Whirlpool Overseas Corporation.

Whirlpool Overseas Corporation will report to Kremer and be headquartered in Benton Harbor. Directors for the board of the new corporation are expected to be announced soon. The principal brands marketed by the overseas group are KitchenAid, Whirlpool, Roper, Ignis, Bauknecht and appliances that carry the dual brands Philips and Whirlpool.

Reporting to Kremer will be Roger E. Merriam, vice president, overseas sales and marketing, and Bob W. Wright, vice president, overseas industrial operations. Merriam will be responsible for all sales and

marketing activities including physical distribution, product development, customer service and the management of the overseas sales companies. Whirlpool Overseas Corporation will continue to operate through existing independent distributors, dealers and wholly owned sales companies.

Wright will be responsible for developing and executing a global industrial strategy to include such activities as technology sale or transfer, kit and component sales, joint venture manufacturing operations and affiliate project management and relations.

Whirlpool Corporation is the world's leading manufacturer and marketer of major home appliances. Headquartered in Benton Harbor, the company manufactures in 10 countries and markets products under nine major brand names in more than 45 countries.

CONTACT: Carol Sizer, 616-926-3231, or Bruce K. Berger, 616-926-3315, both of Whirlpool.

#90122p0053 05/02/1990 ~PR Newswire

CALHOUN, GA (MAY 2) PR NEWSWIRE - Crown Crafts Inc. (AMEX: CRW) today announced unaudited financial results for its fourth quarter and full fiscal year ended April 1.

Net sales in the fourth quarter of $25,386,000 were up 2 percent from last year's $24,947,000. As previously announced, deferrals of large orders by major customers and efforts by many retailers to lower their inventories had an adverse effect on fourth quarter volume and profitability. Net earnings for the fiscal 1990 fourth quarter, when compared with the same period last year, were down 14 percent to $1,486,000 from $1,722,000. On a per-share basis, the quarter's earnings were $0.22 compared to fiscal 1989's fourth quarter earnings of $0.25, adjusted for a two-for-one stock split distributed in January 1990.

For the full year, net sales increased 12 percent, to $102,121,000 from fiscal 1989's $91,395,000. Net income for fiscal 1990 was $6,644,000, or $0.96 per share, while last year's net income was $6,377,000, or $0.94 per share (adjusted for the split). The levels of net sales, net earnings and earnings per share established new records for the fourth consecutive year.

Michael H. Bernstein, president and chief executive officer, stated: "The diversity in our customer base and mix of business positioned Crown Crafts to achieve its best year ever in fiscal 1990, in spite of the problems we faced during the year. Fiscal 1991 will be an excellent year; however, we anticipate first quarter results will show the smallest financial growth because we believe it will take another two to three months before retail inventories achieve satisfactory levels.

"Customer response is enthusiastic for a number of new, innovative products that we recently introduced. Orders for quilted products and accessories, as well as our jacquard woven bedspreads and cotton throws remain firm. As previously announced, I expect the company to register a 25 percent improvement in sales and earnings in fiscal 1991 over the past year."

Crown Crafts Inc., located in Calhoun, Ga., manufactures and distributes bed covering products and related fashion accessories.

CONTACT: Paul A. Criscillis Jr., vice president and chief financial officer of Crown Crafts, 404-629-7941.

WEST CHESTER, PA (MAY 2) PR NEWSWIRE - Commodore International Limited (NYSE: CBU) today reported earnings of $0.2 million or $0.01 per share on sales of $213.2 million for the third fiscal quarter ended March 31, 1990. This compares with earnings of $12.4 million or $0.38 per share on sales of $210.2 million in the year-ago quarter.

For the nine months ended March 31, 1990, Commodore reported earnings of $5.0 million or $0.16 per share on sales of $689.2 million. In the prior-year period, Commodore earned $60.2 million or $1.88 per share on sales of $759.4 million.

During the quarter, revenues increased compared to the prior year due to growth in both Amiga and PC sales, which more than offset a decline in revenue from the C64 group. Sales of Commodore's professional products - the Amiga 2000 series and the MS-DOS AT- compatible computers - increased substantially. Geographically, sales were strong in most European markets which helped to offset softness in other regions.

Compared to the prior-year quarter, operating profit declined, primarily due to a significant increase in operating expenses, reflecting substantial marketing investments in growing European markets, and increased efforts worldwide to further penetrate the professional market sectors.

Irving Gould, chairman and chief executive officer, stated: "We are encouraged to see that continuing growth in demand for our Amiga and MS-DOS computers is now more than offsetting the softness in our older C64 line."

Gould noted: "The Amiga computers, which accounted for almost 55 percent of Commodore's sales this quarter, will soon be complemented at the

high-end through the launch of the highly acclaimed Amiga 3000, a computer that is well-positioned for the emerging multimedia marketplace."

HOLLYWOOD, FL (MAY 2) PR NEWSWIRE - HEICO Corporation (AMEX: HEI) today announced that its board of directors has authorized the additional purchase of up to 200,000 shares of the company's stock.

In February 1990, the company initiated a stock buyback of up to 150,000 shares of which, to date, it has purchased approximately 140,000 shares.

The additional shares bring the total authorized buyback to a maximum of 350,000 shares, out of a total of 3.2 million shares outstanding. The shares will be purchased in the open market, from time to time, depending on market conditions and will be funded by current cash balances.

The stock buyback plan was approved in light of the board's continuing belief that the current share price does not accurately reflect the Company's inherent value.

HEICO is engaged in the manufacture of aviation and defense products through Jet Avion Corporation of Hollywood, Fla. and LPI Corporation of Ft. Lauderdale, Fla.

MARANELLO, ITALY (MAY 2) PR NEWSWIRE - Ferrari s.p.a., the manufacturer of Ferrari automobiles, announced today that the U.S. District Court in Tennessee has permanently enjoined a local kit-car manufacturer from selling replicas of two Ferrari models, the Daytona Spyder and the Testarossa, because they illegally infringe upon Ferrari's trademark rights in the designs and appearances of its cars. Ferrari's legal victory follows a trial in Greeneville, Tenn. in mid- April.

Ferrari sued the kit-car maker, Carl Roberts, when he began advertising his Ferrari replicas, which consist of molded fiberglass bodies mounted on Chevrolet Corvette and Pontiac Fiero chassis and are virtually identical in appearance to genuine Ferraris. U.S. District Judge Thomas G. Hull

found that the public strongly associates the shapes of Ferrari's cars with Ferrari and therefore those shapes constitute Ferrari's trademarks.

The court also found that Roberts' replicas, which he called the "Miami Spyder" and the "Miami Coupe," closely copied the appearances of Ferrari's automobiles and that, by designing his replicas to look like Ferraris, Roberts intended to misappropriate the image and reputation of genuine Ferraris.

Judge Hull therefore prohibited Roberts and anyone associated with him from manufacturing, selling or advertising any replicas of the Daytona Spyder or the Testarossa in any manner whatsoever.

This is the second federal court decision upholding Ferrari's trademark rights in the distinctive designs of its automobiles and prohibiting the manufacture and sale of Ferrari replicas, according to Jonathan I. Blackman of New York's Cleary, Gottlieb, Steen & Hamilton, attorneys for Ferrari. Last year, the U.S. District Court in San Diego made a similar ruling against a California-based seller of Daytona Spyder replicas. Ferrari has brought numerous other suits against replicas of its automobiles, each of which resulted in the replica makers agreeing to cease production of their cars.

The Daytona Spyder and the Testarossa are among the most distinctive and celebrated automobiles that Ferrari has ever produced. Ferrari built approximately 100 Daytona Spyders in the early 1970s. Genuine Daytona Spyders have recently been auctioned in the United States for prices exceeding $1 million. Ferrari introduced the Testarossa in 1984 and it is one of Ferrari's most popular current models.

LEXINGTON, MA (MAY 2) PR NEWSWIRE - Interneuron Pharmaceuticals, Inc. (NASDAQ: IPICU) announced today that the company has entered into an agreement with the NutraSweet Company of Deerfield, Ill., a subsidiary of Monsanto Company (NYSE: MTC), granting NutraSweet a nine- month option to license from Interneuron the right to develop, produce and market any salt substitute or salt enhancer products which may be developed by Interneuron.

For the term of the option, Interneuron intends to conduct research and development activities in an attempt to discover and determine the feasibility of developing a salt substitute or salt enhancer. The terms of any license are subject to negotiation.

Interneuron President and CEO Charles J. Casamento, stated, "We are

pleased to enter into an agreement with the NutraSweet Company, which has already successfully introduced major consumer goods to the market."

Founded in October 1988, Interneuron is a development stage company organized to research, develop, and commercialize innovative pharmaceutical compounds or products. The company's efforts will focus primarily on investigating compounds which mimic or affect neutrotransmitters or neurohormones to determine whether may treat disturbances of sleep, appetite, memory or mood, or certain neurologic or psychiatric disorders such as obesity, depression, spasticity or Alzheimer's disease.

NORWELL, MA (MAY 2) PR NEWSWIRE - Two bills introduced by Rep. Henry Waxman, (D. Calif.,) will strengthen the Orphan Drug Act and end the government-sponsored exclusivity given to blockbuster drugs, says Serono Laboratories President Thomas G. Wiggans, a supporter of the amendments.

"The bills introduced by Rep. Waxman will return the Orphan Drug Act to its true Congressional intent to develop pharmaceuticals for rare diseases that wouldn't have been developed without incentives," Wiggans says. "The proposals will create a level playing field by opening up markets and by keeping out drugs that make windfall profits from the law's protections."

Both bills received the "enthusiastic" support of the National Organization of Rare Disorders, the nation's largest consumer group interested in orphan drugs. If approved by Congress, the first of Rep. Waxman's bills would amend the Orphan Drug Act so that products developed simultaneously would be able to compete freely in the market with FDA approval. The second would eliminate the seven-year market exclusivity for those orphan drugs whose patient population grows beyond the current 200,000-patient limit.

Serono Laboratories, Inc. manufactures Saizen(R), a bioengineered human growth hormone sold worldwide, but currently blocked from sale in the U.S. by the Orphan Drug Act.

Serono Laboratories, Inc. is headquartered in Norwell, Mass., with a Saizen(R) biotechnology manufacturing facility in Randolph, Mass. Serono Laboratories is part of The Ares-Serono Group, a worldwide developer and marketer of pharmaceutical and diagnostic products.

DALLAS (MAY 2) PR NEWSWIRE - Halliburton Company (NYSE: HAL) today reported that its 1990 first quarter net income was $36.2 million or 34 cents per share, compared to $13.7 million or 13 cents per share in the first quarter of 1989. The company's improved earnings are attributable to higher operating results of its oil field services and engineering and construction services business groups.

The oil field services group reported revenues of $652.6 million in the first quarter of 1990. The group's revenues increased 20 percent compared to last year's first quarter, while worldwide drilling activity increased only 5 percent compared to the 1989 first quarter. Operating income of the group reached $50.8 million, more than five times the $9.5 million recorded in the first quarter of 1989. The increased profitability primarily resulted from a combination of higher revenues and improved capacity utilization in the United States.

The engineering and construction services group also experienced increased revenues and operating income in the first quarter of 1990, compared to a year earlier. Revenues increased 52 percent to $847.0 million and operating income increased 2.7 fold to $14.2 million. The improved financial results were largely attributable to increased profitability of the group's forest products, marine and maintenance business units.

The insurance services group's operating income declined to $6.3 million in the first quarter of 1990. Operating income was impacted by lower underwriting results. During the first quarter of 1989, the group benefitted from $1.8 million of operating income from the company's life insurance company subsidiary which was sold in June 1989.

Thomas H. Cruikshank, chairman of the board and chief executive officer of Halliburton Company, said, "The company's oil field and engineering and construction business groups performed in line with our expectations during the first quarter. Based upon indicated plans of our oil field services customers and a strong backlog of contracts for the engineering and construction group, we expect further financial improvements as 1990 develops."

Halliburton Company is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and marine engineering and construction services, and property and casualty insurance services.

WALTHAM, MA (MAY 2) PR NEWSWIRE - Thermo Instrument Systems Inc. (AMEX: THI) today reported revenues of $48,959,000 for the first quarter ended March 31, 1990, up 19 percent from $41,178,000 for the comparable period in 1989. Net income rose 30 percent to $4,116,000, compared with $3,168,000 a year ago. Earnings per share increased to 17 cents from 16 cents with average shares outstanding increasing to 24,141,000 from 19,670,000.

"Our quarterly results show that we've continued to achieve sales and earnings growth that has outpaced the industry as a whole," said Arvin H. Smith, president and chief executive officer of Thermo Instrument Systems. "We're also pleased with the progress that has been made toward our goal of restoring the level of profitability of our environmental laboratory and consulting services business."

Thermo Instrument Systems develops, manufactures, and markets analytical instruments used to detect and monitor air pollution, radioactivity, complex chemical compounds, and toxic metals and other elements in a broad range of liquids and solids. The company also provides environmental science and engineering services, laboratory- based testing, and nuclear health physics services. Thermo Instrument Systems is a public subsidiary of Thermo Electron Corporation.

THERMO INSTRUMENT SYSTEMS INC.

#90122p0081 05/02/1990 ~PR Newswire

BALTIMORE, MD (MAY 2) PR NEWSWIRE - In his message to shareholders, Jack Moseley, chairman of the board, president and chief executive officer of USF&G Corporation (NYSE: FG), reviewed the operating results of the first quarter of 1990.

He also discussed the workers' compensation line of insurance, one that is of great concern for the company. The text of his message follows.

"As we conclude the first quarter of 1990, I have a great deal of news to share with you."

"USF&G Corporation had consolidated net income for the first quarter of 1990 of $51 million, or 56 cents per share, compared with net income of $31 million, or 33 cents per share, for the same period in 1989. The increase in net income for the quarter was due primarily to realized capital gains in the 1990 period, compared with realized capital losses in the same 1989 quarter. Reduced premium income due to the continuing soft underwriting cycle, along with increased catastrophe losses of $18 million were more than offset by a $52 million increase in realized gains and improved results from both the life insurance and financial services operations.

"Operating income, which excludes realized capital gains and losses, for the first quarter of 1990 was $35 million, or 37 cents per share, compared with $63 million, or 72 cents per share, for the 1989 period.

"Consolidated revenues for the 1990 first quarter totaled $1.1 billion. Consolidated net investment income reached $237 million for the 1990 first quarter, an increase of 9 percent.

"As of March 31, 1990, assets were $13.9 billion, and shareholders' equity totaled $1.9 billion, or $20.77 per share.

"I remain convinced that our bold move to begin raising prices last year will lead to improved profitability as the soft property/casualty market inevitably turns. While progress in obtaining higher prices is slow, we believe it is better to seek modest increases now rather than more dramatic increases later."

PURCHASE, NY (MAY 2) PR NEWSWIRE - The board of directors of PepsiCo, Inc. (NYSE: PEP) today approved a 20 percent increase in the corporation's quarterly dividend, raising it to 30 cents per share from 25 cents.

Announcing the increase at today's annual meeting of shareholders, PepsiCo Chairman and Chief Executive Officer Wayne Calloway said: "This 20 percent increase in our dividend reflects the continuing strength of our operations and the confidence we have in achieving yet another year of record earnings in 1990."

PepsiCo's dividend has grown by an average of 20 percent over the past three years, and represents a dividend payout of approximately one-third of prior year's earnings.

Calloway noted: "PepsiCo stock mirrors the basic strength of our business and has proven to be an excellent investment, long-term as well as short-term. Over the five years ending December 1989, the combination of reinvested dividends and increases in our stock price has provided PepsiCo shareholders a return of 38 percent compounded annually. That's the highest return of any Fortune 50 company during that period."

PepsiCo's dividend is payable June 30, 1990 to shareholders of record on June 8, 1990. Today's action marks the eighteenth consecutive year of increased dividend payouts.

#90122p0084 05/02/1990 ~PR Newswire

ROCHESTER, NY (MAY 2) PR NEWSWIRE - Two 50 Series convenience copiers from Xerox Corporation (NYSE: XRX) can now be equipped with accessories that enable them to be used for public access copying.

A vending accessory that attaches to either the Xerox 5028 or 5018 copier enables operation by coins, bills, or magnetic cards that have been programmed with set monetary values. As the card is inserted into the

machine, its value is displayed. Copy charges are deducted automatically from the card as copies are made.

Since publicly available copiers tend to be heavily used, both the 5028 and 5018 also can be equipped with a high-capacity paper-supply accessory, eliminating the need for frequent restocking of the copier. The paper feeder holds up to 2,600 sheets of 8-1/2 by 11-inch paper, bringing the total paper-holding capacity of either copier to 3,100 sheets. The feeder is attached to the side of the copier and requires no additional floor space.

"Our surveys have shown that retail, walk-up copying services are in heavy demand," said Paul V. Cahn, vice president, reprographics customer marketing, for the U.S. Marketing Group of Xerox. "These accessories will make two of our newest low-volume 50 Series copiers, which have advanced capabilities, available to the general public for the first time."

Like the 5028 and 5018 copiers themselves, the vend unit and high-capacity paper feeder are backed by a three-year warranty based on the copier's installation date.

The Xerox 5028 and 5018 basic, coin-only vending accessory is priced at $1,750 including installation. The bill acceptor, priced at $810, and the magnetic card reader, priced at $550, are available as optional accessories. They can be installed with the vend station, or added later.

The Xerox high-capacity paper feeder carries a list price of $980, installation included. Both accessories are currently available nationwide through the Xerox direct sales force.

For customer information, contact Larry Jones, Xerox Corporation, Xerox Square 05B, Rochester, N.Y., or call 800-832-6979.

HAMPTON, NH (MAY 2) PR NEWSWIRE - Wheelabrator Technologies Inc. (NYSE: WTI) achieved first quarter net income, earnings per share and revenues, reflecting continued expansion of capacity by the nation's leading developer and operator of waste-to-energy facilities.

Net income increased 14 percent to $15.0 million, or 38 cents per share, compared with net income of $13.1 million, or 34 cents per share, in the first quarter of 1989. Revenues were $478.5 million, up 40 percent from $342.3 million in the corresponding period of last year, reflecting the timing of payments on various contracts.

Paul M. Montrone, chairman and chief executive officer, said the improved results were primarily attributable to the opening of new waste-to-energy and cogeneration facilities.

Wheelabrator operates 11 waste-to-energy facilities, has three more under construction and many similar projects in development. The company also designs and builds water and wastewater treatment facilities and air-pollution control systems.

#90122p0091 05/02/1990 ~PR Newswire

NEW YORK (MAY 2) PR NEWSWIRE - Ply Gem Industries, Inc. (AMEX: PGI) today announced its first quarter results. Revenues advanced to $121,335,000 from $117,616,000 in 1989 on a pro forma basis had we acquired SNE Enterprises Jan. 1, 1989. The net loss was $1,716,000 or $.16 per share compared to a first quarter 1989 pro forma loss of $1,904,000 or $.17 per share.

"As previously disclosed, Ply Gem's anticipated first quarter loss reflects the acquisition of SNE Enterprises last March and the rapid expansion of our exterior building product lines. SNE normally posts a large first quarter loss, reflecting the highly seasonal nature of its window and door product lines. Today, our exterior building product lines alone account for roughly 45 percent of Ply Gem sales and more than 65 percent of our operating profits. Add to this our other home improvement product lines and it is quite apparent that an increasingly higher percentage of our sales and earnings will occur during the busy spring and summer remodeling periods.

Ply Gem's financial condition remains strong, with stockholders' equity of $106 million, working capital of $130 million and our current ratio is a solid 3.3 to one. Long term debt declined to $114 million from $127 million a year ago. The assumption and subsequent reduction of debt has long been a successful component of our long term growth strategy. Through careful management of our balance sheet and with no acquisitions planned for the near future, we intend to continue to accelerate our debt repayment schedule in 1990," said Jeffrey S. Silverman, chairman.

Ply Gem also announced today that its board of directors has authorized the purchase of up to 500,000 shares of Ply Gem stock. "By taking advantage of the excellent investment opportunity represented by the current market price of our stock, we reaffirm our commitment to improving

stockholder returns and our confidence in Ply Gem's future.

We feel strongly that our current growth strategies, a dedicated work force and excellent market position in the home improvement industry will result in attractive growth opportunities in the coming decade. Based on changing demographics and the aging stock of American homes, industry experts predict strong growth throughout the decade for the home improvement industry. It is our intention to dominate key market segments of this $100 plus billion industry and to enhance our corporate profitability.

#90122p0092 05/02/1990 ~PR Newswire

MURRAY HILL, NJ (MAY 2) PR NEWSWIRE - Airco Gases is introducing an advanced telemetry system to expand service to customers. The new system, called Tel-Tank (R), is believed to be the first use of remote telemetry devices to promote interactive, two-way communications between an industrial gas supplier and its customers.

Tel-Tank (R) is the second generation of telemetry at the company. Three years ago, Airco, the U.S. gases business of The BOC Group, set up its first telemetry system. That system monitors the adequacy of supply at customer gas storage tanks and helps Airco effectively schedule deliveries.

In its basic form, telemetry involves the telephone linkage of equipment at a customer's storage site with computers at Airco. At the customer's facility, there is a sensor, to measure the level of gas in a customer's tank, and a microprocessor device -- or box -- which accepts data from the sensor. The information is transmitted to Airco's mainframe computer and is then relayed to the company's National Scheduling Center at Bethlehem, Pa. The process serves two key purposes, keeping Airco informed about the level of gas supplies at customer operations and updating use-pattern statistics that are incorporated into computerized scheduling delivery models.

Airco will soon install specially designed telemetry units at numerous customer operations. The units will be used in conjunction with proprietary, menu-driven software developed by Airco, which can be run on customers' personal computers.

The Tel-Tank (R) system will utilize the telemetry microprocessor as a dedicated message storage and relaying center. Airco anticipates that the new devices will be particularly valuable for businesses with fluctuating gas demand. For instance, a customer who intends to run an extra shift or boost his production rate could relay that information to Airco via

Tel-Tank (R). That would alert Airco that the customer might require a gas shipment earlier than expected. By the same token, if a customer intended to close a plant for a vacation period, that information could be sent to Airco, which would then know that a shipment may not be needed as early as anticipated.

Airco is a leader in industrial gas production and technology. Primary gas products include liquid and gaseous nitrogen, oxygen, argon and carbon dioxide, helium, hydrogen, medical gases and a variety of rare and special gases.

PARAMUS, NJ (MAY 2) PR NEWSWIRE - Toys "R" Us, Inc., today reported that its sales for the first quarter, which period ended April 29, 1990, rose 22.9 percent to $943.6 million compared to $767.7 million for the first quarter last year.

In announcing these sales increases, Charles Lasarus, chairman and chief executive officer, stated, "The company's gains reflect our continuing success in increasing the sales productivity at our stores -- indeed, for the first quarter we had a comparable U.S. toy store sales gain of 9.8 percent. Our sales performance reflects strong sales in video game products as well as non-electronic toys."

Lazarus further said, "We are also pleased that our Kids "R" Us children's clothing stores had double digit store for store increases, and our international toy stores had strong sales in all countries during the first quarter."

Toys "R" Us, Inc., is the world's largest toy specialty retailing chain operating 404 toy stores in the United States, 74 international toy stores and 154 Kids "R" Us children's clothing stores (including 17 stores opened this year).

STAMFORD, CT (MAY 2) PR NEWSWIRE - General Re Corporation (NYSE: GRN) reports net income excluding realized capital gains or losses for the quarter ended March 31, 1990 of $1.50 per share, an increase of 4.9 percent from the comparable results in the first quarter of 1989 of $1.43

per share. After-tax realized capital gains were $.14 per share and "fresh start" benefits were $.03 per share in the first quarter of 1990 which compares with $.26 per share and $.04 per share, respectively, in the first quarter of 1989. Net income for 1990's first quarter was $1.64 per share compared with $1.69 per share in the first quarter of 1989.

The combined underwriting/expense ratio for the domestic property/casualty companies for the first quarter of 1990 was 99.0 percent compared with 98.9 percent for the same quarter in 1989, 98.8 percent for the fourth quarter of 1989, and 99.6 percent for the year 1989.

Worldwide net premium volume for the first quarter of 1990 was $531.8 million, an increase of $58.6 million or 12.4 percent over the $473.2 million in the first quarter of 1989. Domestic property/casualty written premium was $478.1 million, an increase of 13.5 percent compared with the $421.2 million reported in the first quarter of 1989 and a decrease of 1.2 percent from the $483.8 million in the fourth quarter of 1989.

Revenues for the first quarter of 1990 were $733.6 million, compared with $736.1 million for the comparable period in 1989. Worldwide net investment income, after taxes, for the first quarter of 1990 amounted to $141.5 million, an increase of 6.0% over $133.5 million for the same period last year. On a per share basis, net investment income after taxes was $1.59, or 9.7 percent over the comparable figure in 1989's first quarter.

Shareholders' equity at March 31, 1990, amounted to $3,006.4 million. As of March 31, 1990, the corporation had 88,165,967 shares of common stock outstanding compared to 89,950,364 at December 31, 1989.

NEW YORK (MAY 2) PR NEWSWIRE - Ascom Communications, Inc., a leading Swiss telecommunications firm, and Bloomingdale's will sponsor a free call for shoppers on Ascom's Swisstel and VoicePrint phones to Mom any place in the United States from Friday, May 11, to Sunday, May 13, it was announced by Markus Niederhauser, Ascom's marketing manager.

"Two lines will be hooked up in the 59th Street flagship store for shoppers in Bloomingdale's sixth floor Main Course to use our futuristic VoicePrint telephones and ultra modern Swisstel telephones," said Niederhauser. "Consumers are not required to purchase a phone to call their mothers free. During this three-day event, an Ascom representative will be present to demonstrate VoicePrint so people can see how easy it is to use."

The VoicePrint telephone can remember up to 50 phone numbers by name and automatically dials them at the sound of the user's voice. The VoicePrint 100 model, which is available in white, includes a speed dial memory for an additional 100 numbers, call-logging that keeps a record of the date, time and length of the last 100 calls placed, a two-way speaker phone feature, redialing and a built-in alarm clock. The VoicePrint 200, which is available in black, includes all of the Model 100 features, plus incoming call screening, pager-forwarding and call answering.

Ultra light, ultra thin and ultra modern in design, Swisstel phones deliver a consistently clear sound in easy-to-use one-piece and two- piece models. Both models are available in a variety of colors and graphics.

To tie in with the Ascom/Bloomingdale's three-day event, WHLI Radio (1100 AM) will schedule a "Calling All Mothers" promotion starting Monday, May 7 through Friday, May 11. Each day there will be three contests with three different prize giveaways: one $10 long-distance gift certificate to call Mom and a dozen roses; tickets to a dinner theater for two for Mom and guest; and one Swisstel one-piece designer phone. The grand prize, a top-of-the-line VoicePrint telephone, will be given away on Mother's day,

May 13. When listeners hear the song "Momma" sung by Connie Francis, they call in to win. All callers for the week who did not win a prize are eligible for the Grand Prize drawing on Mother's day. The winner of the VoicePrint 200 will be announced on Mother's day.

All phones given away during the WHLI promotion are available at all Bloomingdale's stores.

Ascom Communications, Inc., was formed in 1987 in a merger between Switzerland's major telecommunications companies.

WASHINGTON (MAY 2) PR NEWSWIRE - An executive with AMEX Life Assurance today urged insurance companies to increase consumer protection standards in the sale of private long term care insurance to the elderly.

Providing one of the key testimonies on the subject of long term care coverage before a hearing of the Oversight & Investigations Subcommittee of the House Energy and Commerce Committee, Ronald D. Hagen, vice president of marketing and government relations for AMEX Life, said that the future of long term care insurance depends on industrywide prevention of unfair claims practices and misrepresentation of insurance products.

"Unethical guidelines for benefit eligibility and misrepresentation of policy coverage are concerns the industry must address to ensure that all legitimate claims are paid and that every consumer receives the level of coverage which he or she has purchased," said Hagen.

He continued, "While the enforcement of existing state laws provides adequate remedies against abusive claims payment practices, industry regulators and insurance companies must take additional steps to further standardize these processes to increase responsible practices among all companies."

The hearing, which was directed by Representative John Dingell (D-Mich.), chairman of the Subcommittee, was held to examine the role of private long term care insurance.

Among other things, the hearing explored some of the concerns that have been raised recently over the affordability of long term care insurance and cases of unethical practices among some insurance companies and sales agents.

Addressing these issues, Hagen pointed to AMEX Life's exemplary claims history. According to Hagen, an independent audit of the company's claims records recently conducted by Ernst & Young indicated that for the last three years the company had paid benefits on close to 98 percent of claims which met the policy deductible period. (The 2 percent of denied requests were for such reasons as failure to meet the three-day prior hospital requirement, which is no longer a prerequisite for benefits.)

AMEX Life Assurance Co., is a division of American Express Travel Related Services Co., a family of travel, financial, insurance, data processing and communication businesses and a wholly owned subsidiary of American Express Co.

NEW ORLEANS (MAY 2) PR NEWSWIRE - Entergy Corp. (NYSE: ETR) completed first quarter 1990 with lower consolidated net income and earnings per share compared to the same period last year, due primarily to the recording of a nonrecurring gain in the first quarter of 1989.

Consolidated net income was $88.7 million, compared to $97.0 million for 1989's first quarter, a decrease of 8.6 percent. Earnings per share, based on a 1.0 percent reduction in average number of shares outstanding, were 44 cents, down slightly from 47 cents a year ago. The average number of shares outstanding dropped from 204,581,092 to 202,595,080 due to a common stock repurchase program started by the company last November.

The board of directors voted on March 30 to declare a 25 cents per share dividend, payable June 1 to stockholders of record as of May 11, and to extend the stock buyback program authorizing the expenditure of up to an overall total of $112.5 million through June 30. As of March 31, the company had repurchased and retired nearly 3.3 million shares of its common stock at a total cost of approximately $71 million.

MORRIS TOWNSHIP, NJ (MAY 2) PR NEWSWIRE - Bellcore researchers have unveiled a highly sophisticated speech synthesizer that converts computerized text, especially names, into well-pronounced speech.

The prototype software system, ORATOR(TM), produces speech that is significantly more intelligible than existing speech synthesis systems, according to Bellcore laboratory tests.

The ORATOR speech synthesizer is part of the "Access to the Future" demonstration at TEXPO 90 in Anaheim, Calif., that begins today.

The experimental system was developed to provide applications for use in local exchange telecommunications services -- such as automated operator announcements or directory assistance -- where accurate, intelligible name pronunciation is extremely important. ORATOR software could also prove viable in other user-friendly, voice-directed applications.

According to Marian Macchi, another ORATOR software project member, there are only 40 phonemes in the English language. By comparison, there are nearly 1,000 demisyllables stored in the ORATOR speech synthesizer's demisyllable inventory.

Bellcore's ORATOR software synthesizes text by analyzing words and figuring out how to pronounce them; determining the sequence of demisyllables required to pronounce those words; looking up each half-syllable in its demisyllable "sound" dictionary; taking sounds from the dictionary's inventory and reconstructing the sounds so they can be "spoken."

Other possible telecommunications applications of this voice synthesis technology might include providing a personalized verbal announcement in an electronic mail system, or the customer name and address corresponding to a listed telephone number.

ORATOR software will be made available for licensing later this year. Bellcore provides research and other technical support to the telephone companies of Ameritech, Bell Atlantic, BellSouth, NYNEX, Pacific Telesis, Southwestern Bell Corp. and U S West, as well as Cincinnati Bell Telephone

Company and the Southern New England Telephone Company.

HARTFORD, CT (MAY 2) PR NEWSWIRE - Northeast Savings, F.A. (NYSE: NSB) today announced unaudited results for the fiscal year ended March 31, 1990 at $2.2 million income before extraordinary items compared with a $16.2 million loss before extraordinary items for the prior year.

For the current fiscal year, the company's net loss after extraordinary items was $107.1 million resulting in a primary and fully diluted net loss per common share of $20.27 after preferred dividend requirements. For the fiscal year ended March 31, 1989, Northeast Savings reported a net loss of $12.9 million or $3.83 primary and fully diluted net loss per common share after preferred dividends.

Consistent with the company's strategic plan, total assets declined to $5 billion at March 31, 1990, from $5.4 billion at Dec. 31, 1989, and $7.9 billion at this time last year. This downsizing of the company's asset size is in line with Northeast's capital plan to meet the new thrift capital requirements. The capital plan, which was submitted to the Office of Thrift Supervision (OTS) on Jan. 8, 1990, was accepted and approved by the OTS on March 9, 1990. The capital plan details the company's plans for achieving capital compliance within the time frame specified by the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA). The approval of Northeast's plan on March 9, 1990, was among the first received by any thrift institution nationwide.

Northeast's continued goal to reduce its sensitivity to interest rate fluctuations is evidenced by its one-year gap, which was a positive .20 percent of interest-earning assets over interest-bearing liabilities at March 31, 1990, compared to a negative 13.07 percent at March 31, 1989.

One of the largest thrifts based in New England, Northeast Savings operates retail branches in Connecticut, New York and Massachusetts, and mortgage offices in California, southern Connecticut and Long Island.

CONTACT: George P. Rutland, chairman of the board, president and CEO, 203-280-1100, or Kirk W. Walters, senior executive vice president president and CFO, 203-280-1183, both of Northeast Savings.

FORT WORTH, TX (MAY 2) PR NEWSWIRE - Wolverine Exploration Company (NASDAQ: WEXCC) announced the signing of a letter of intent with Amoco Production Company whereby, subject to the parties entering into a final definitive agreement, Wolverine will have the exclusive right to participate in Amoco's Houston Region 1990 exploratory drilling program slated for the Texas and Louisiana Gulf Coast onshore and the offshore outer continental shelf waters. Wolverine's interest will be held 63 percent by Wolverine, 30 percent by Natural Gas Partners, L.P., and seven percent by ENSCO Resources Company.

Wolverine and its partners have committed a minimum of $8.7 million to this 1990 drilling program, which will go toward the drilling of wildcat wells on Amoco prospects. Wolverine and its partners will have an option to continue the program on similar terms into 1991, which is anticipated to be up to a $20 million commitment.

Under the proposed structure, Wolverine and its partners will share equally with Amoco in the cost of the first wildcat well on a prospect in order for Wolverine and its partners to earn a 25 percent of Amoco's interest in the production and the prospect area of mutual interest.

Wolverine Chairman Bill Smith says, "This exploration joint venture with Amoco represents another example of Wolverine's continuing corporate strategy to access the prospect inventories and the leading edge technology of selected oil companies' domestic exploration programs under what we consider to be attractive terms."

NEW YORK (MAY 2) PR NEWSWIRE - E.M. Warburg Pincus & Co., Inc. today announced that Dr. Harold Brown, a distinguished scientist and educator and former Secretary of Defense, will be joining the firm as a senior managing director and advisor and a partner in its parent, Warburg Pincus and Co.

E.M. Warburg Pincus & Co., Inc. is a specialized financial services organization, owned and managed by its officers through a partnership, that provides a broad range of venture banking and investment counseling services to individuals, family groups, pension and profit sharing plans, endowment funds, foundations and insurance companies. It has offices in New York, London and Los Angeles.

Lionel I. Pincus, chairman of the board of E.M. Warburg Pincus & Co., Inc. said "We are fortunate to be able to add Harold's wide-ranging government,

scientific and business expertise to the economic, financial and business planning talents of our professional staff in venture banking. We have benefited in the past from his counsel as a chairman of our technical advisory board, and we welcome his deeper involvement with us."

Brown served as Secretary of Defense of the United States from Jan. 1, 1977 to Jan. 20, 1981. From February 1969 until January 1977 Brown was president of the California Institute of Technology in Pasadena, Calif. Earlier, he had been director of defense research and engineering (1961-1965) and Secretary of the Air Force (1965-1969).

Since July 1984 Brown has been chairman of the Foreign Policy Institute at the School of Advanced International Studies of Johns Hopkins University, having been a Distinguished Visiting Professor at the school since February 1981. Brown serves as a consultant to various corporations and is a member of the board of directors of, among others, IBM, CBS and Cummins Engine Co., Inc.

Born in New York City on Sept. 19, 1927, Brown attended New York City public schools. He graduated from Columbia University with an AB degree in 1945, received an AM degree in 1946, and his Ph.D. in Physics in 1949. He has received 11 honorary degrees.

Among his many honors, Brown was awarded the Presidential Medal of Freedom on January 16, 1981.

Brown is the author of Thinking About National Security; Defense and Foreign Policy in a Dangerous World, published by Westview press 1983; he edited The Strategic Defensive Initiative: Shield or Snare? (Westview press, 1987) and is the author of numerous monographs.

#90122p0159 05/02/1990 ~PR Newswire

MONTREAL (MAY 2) PR NEWSWIRE - Dorel Industries Inc. of Montreal today reported a fifth consecutive quarter of record sales and earnings for the period ending March 31, 1990. It was also announced during the company's third annual meeting that the firm is closing its 2 year old Taiwan facility.

Consolidated sales for the first quarter of fiscal 1990 amounted to $42,953,497 as compared with $35,792,185 during the same period last year. Consolidated net earnings were $1,597,555 or $0.18 per share, compared to $1,286,016 or $0.15 per share.

The results were made public by Martin Schwartz, Dorel executive

vice-president. He underlined the dramatic turn-around at Dorel's newest property, Charleswood Corporation of St. Louis, Missouri. The ready-to-assemble furniture manufacturer, which had a history of losses prior to its acquisition by Dorel on Jan. 2, 1990, posted a modest gain in its very first quarter under Dorel management.

"Considerable changes have been made, which is symbolic of the on-going hands on approach we at Dorel apply to all business units. In three short months we consolidated operations, reduced overly high and expensive staffing levels, basically lowering unrealistic production costs throughout."

During his annual meeting address, Dorel Chairman and President Leo Schwartz revealed that the company's Taiwan stroller plant has been closed and is for sale.

Schwartz also addressed the company's debt load, which he admitted has "raised some eyebrows within the investment community."

"This, I must assure you, is a major pre-occupation of ours. We have set as a very firm objective the task of reducing this ratio by year end. We will achieve this by maintaining our drive for bottom-line efficiency and profits, and by re-investing these profits in the company to increase equity and hence reduce long term debt."

Dorel Industries is one of North America's leading full line manufacturers and distributors of children's furniture and accessories. As well, it ranks among the top producers of ready-to-assemble (RTA) and metal folding furniture.

DETROIT (MAY 2) PR NEWSWIRE - Consolidated net income of General Motors Acceptance Corporation for the first quarter of 1990, which includes the results of GMAC's financing, insurance and mortgage operations, totaled $336 million, compared with $356 million for the same period a year earlier, John R. Edman, chairman, announced today.

Net income from financing operations totaled $301 million for the quarter, compared with $312 million earned in 1989. Finance income in 1989 included a gain of $51 million from the sale of GMAC's 51-percent interest in Isuzu Motors Finance Company, Japan, to Isuzu Motors, Ltd. The rates of depreciation for automobiles on operating leases were revised in the first quarter of 1990 by Opel Bank, GMAC's subsidiary in the Federal Republic of Germany to give effect to residual values of these automobiles. This

change had the effect of increasing income by $48 million for the first quarter of 1990.

Net income from insurance operations totaled $35 million for the first quarter, compared with $44 million earned in the 1989 period. The decrease in 1990 earnings was due to lower underwriting income.

GMAC's average cost of borrowings in the United States declined to 8.60 percent, compared with 9.00 percent last year. GMAC's short-term borrowing costs declined to 8.18 percent, compared with 9.17 percent in the corresponding 1989 period, while the average cost of medium- and long-term debt increased 23 basis points to 9.03 percent during the 1990 first quarter.

GMAC financed or leased 526,000 new cars and trucks in the United States in the first quarter of 1990, down slightly from the prior-year level. Outside the United States, 147,000 new vehicles were financed during the same period, up slightly from a year ago. Retail installment and lease financing contracts purchased worldwide totaled $11.1 billion, compared with $10.8 billion in the 1989 first quarter.

Total earning assets of $100.4 billion at March 31 were up $1.8 billion from the prior-year level. Total finance receivables outstanding at the end of the first quarter of 1990 were $90.3 billion, compared with $85.0 billion outstanding at the same time last year. Retail and lease receivables outstanding totaled $74.4 billion at the quarter end, $4.4 billion higher than a year ago.

BOSTON (MAY 2) PR NEWSWIRE - Bank of New England Corporation (NYSE: NEB) announced today the appointment of John C. Martin as executive vice president in charge of technology and operations, and head of the bank's corporate information systems group, BNE Information Services Company. He will oversee deposit operations, loan operations, money and wire transfer operations in Malden, Mass., and East Hartford, Conn., as well as data processing operations corporate-wide.

Martin comes to BNEC from Bank of Boston, where he has served in various information systems management positions since 1963. Most recently, he was director of the bank's information services unit, Eagle Information Technologies. As director, Martin was responsible for corporate data center mangement, systems development for the New England Group, all check processing operations, commercial loan operations, and money and wire transfer operations.

Martin is a director of New England Automated Clearing House, where he also serves as treasurer, and is a member of the Contingency Planning Steering Group of the Federal Reserve Bank of Boston.

"Jack is a highly regarded technology professional whose background includes 20-plus years of managing information systems and data processing functions," said Lawrence K. Fish, BNEC chairman. "He will play a key role in the company as we pursue our strategic plan for recovery. I am very pleased to be adding Jack to our management team."

Other recent additions to BNEC's senior management include Steven Wheeler, executive vice president and head of the newly established "collecting bank," R.T. "Tim" McNamar, BNEC vice chairman, and James Dorsey, vice president of corporate communications, as well as the promotion of Richard Stover to executive vice president of controlled loan.

"I'm looking forward to working with the existing management teams in our operations and technology groups to reduce costs while improving service to our internal and external customers throughout New England," Martin said. "Through the effective use of technology, we can deliver superior service within a rational cost structure, which is essential to the company's recovery."

Bank of New England Corporation is a Boston-based interstate bank holding company with assets of $25 billion and banking offices in four New England

states. Its common stock is listed on the New York Stock Exchange and is traded under the symbol NEB.

SIOUX CITY, IA (MAY 2) PR NEWSWIRE - Midwest Energy Co. (NYSE: MWE) has reported 1990 first quarter earnings of $10,728,000, or 50 cents per share on revenues of $172,383,000. During the like period in 1989, Midwest Energy reported earnings of $16,969,000, or 79 cents per share, on revenues of $187,241,000.

Gary J. Harward, senior vice president and chief financial officer, attributed the earnings decrease to lower natural gas sales by the company's utility subsidiary, Iowa Public Service Co.

"During the first three months of 1990, temperatures in our utility service area were 19 percent warmer than the same period last year," Harward said. "This mild weather resulted in a 23-percent drop in natural gas sales and a slight drop in retail electric sales, when compared to the first quarter of 1989."

For the 12-month period ended March 31, 1990, Midwest Energy reported earnings of $42,932,000, or $1.99 per share, on revenues of $557,671,000. During the like period in 1989, Midwest Energy reported earnings of $40,013,000, or $1.85 per share, on revenues of $566,214,000.

Harward said 12-month earnings reflect the July 1989 sale of Midwest Energy's Minnesota, Wisconsin and Florida propane operations and Florida natural gas operations.

Midwest Energy is a holding company with major interests in electric and natural gas utility operations and additional investments in diversified businesses. The Company's utility operations provide electricity to 156,000 customers in 228 Iowa and five South Dakota communities and natural gas to 347,000 customers in 208 Iowa, 38 Minnesota, eight South Dakota and three Nebraska communities.

In March, Midwest Energy and Iowa Resources Inc. signed a definitive agreement to merge into Midwest Resources Inc., a newly created holding company. The merger is subject to approval by the shareholders of Midwest Energy and Iowa Resources and certain federal and state regulatory agencies.

Midwest Energy's common stock is listed on the New York Stock Exchange and the Midwest Stock Exchange under the symbol MWE.

SHAKOPEE, MN (MAY 2) PR NEWSWIRE - With colorful Japanese fish streamers flying beside a packed tent of state and local dignitaries, overseas visitors and company employees, Tsumura International Inc.'s FMG division officially broke ground here today for a 253,000-square- foot facility that will house its manufacturing, R&D and distribution operations.

Based in North Bergen, N.J., and with annual sales of approximately $120 million, Tsumura International is a wholly owned subsidiary of Tokyo-based Tsumura & Co., Japan's market leader in the fields of bath additives and prescription herbal medicines. The FMG division, which was acquired in 1989, is a leading manufacturer of up-scale personal care products, prestige home fragrances and luxury bath and medical hygiene products.

Commenting on the company's decision to stay and expand in Minnesota, Tsumura International President Howard Hirsch remarked: "By investing in the new facility here in Shakopee, we are demonstrating that we take our commitment to this area seriously and that we are here for the long term." According to Hirsch, the Shakopee location was selected because it offered a combination of advantages, including a warm welcome from city officials and suitable land with sufficient space for future expansion. Another important consideration in choosing the location, he added, was that it be nearby the existing Chaska facility in order to retain the present labor force and minimize inconvenience to employees.

Shakopee Mayor Gary Laurent commented on the far-reaching effects of the TII investment for the local economy: "More than just an increase in tax base and a large number of jobs are the multiple ripple effects started by

the addition of such a company. Virtually all of our local support and service businesses will have an opportunity to benefit."

Tedd Thomas, president of the FMG division, noted that the new factory will allow the company to combine six of its current facilities in one location, and will feature updated research labs as well as state-of-the-art materials handling, production and distribution systems. "The Shakopee facility will be an efficient and environmentally sound operation that will enable us to further enhance the quality and value of our products," he said. According to Thomas, employment at the new plant is expected to initially be comparable to FMG's current work force, about 200 full-time employees plus another 100-150 seasonal workers. However, he noted, the new facility will be able to accommodate up to 500.

Construction of the Shakopee plant is expected to be completed by the end of the year, with operations start-up slated for January 1991.

LOS ANGELES (MAY 2) PR NEWSWIRE - Starting May 2, USAir will be the first major airline to fly all Stage III aircraft out of California airports, according to Lawrence M. Pickett, assistant vice president corporate communications - western region.

"Jet aircraft classified as Stage III are the most technically advanced in terms of noise abatement. We are pleased that in California we are flying the quietest jets in operation today," noted PIckett. From those airports, USAir is flying jets in the Boeing 737 family as well as the British Aerospace 146 and Boeing 767 aircraft.

The Boeing 737 is a twin engine jet which can hold between 125 and 150 passengers. In recent years, USAir has invested heavily in the expansion of its Stage III fleet for domestic operations both intrastate and interstate.

Following the merger with Pacific Southwest Airlines, USAir acquired 20 BAe 146's, a four engine jet which carries approximately 85 passengers. This aircraft has been used for the company's intrastate schedules.

The Boeing 767 is a wide body, twin engine jet which seats over 200 passengers. USAir has been using this late model aircraft for cross country routes and flights to Europe.

To meet its worldwide schedule of 3,000 jet flights per day, more than any other free world carrier, USAir operates a fleet of approximately 440

jets. The average of the company's aircraft is about 8.9 years, making USAir's one of the youngest fleets in the system.

"Presently, USAir has approximately 100 new jets on order and options on another 150. All of the new aircraft in the fleet expansion and modernization program meet Stage III requirements.

USAir currently operates its jet fleet over a route network that includes 36 states, two Canadian provinces, Great Britain, Puerto Rico, the Bahamas and Bermuda. The company will begin service between Pittsburgh and Frankfurt, West Germany on June 15.

NEW YORK (MAY 2) PR NEWSWIRE - Macy's today announced it has sent the following update to its investors:

Because it will be mid-June before you receive our audited 10-Q filing for the quarter ending April 28, we decided to share with you an update on our progress.

We have informed you in previous investor letters of several near- term objectives:

1) To enter the spring season with conservative stock levels that are fresh and fashion right.

2) To operate within a disciplined and tight expense plan.
3) To have fewer major store-wide promotional events.

The successful pursuit of this game plan has allowed us to exceed EBIT-D levels of last year while reducing our quarterly loss in an anticipated non-buoyant retail climate. Sales in the quarter were essentially flat, reflecting reduced promotional activity.

Significantly, merchandise receipts during this quarter were $250 million below last year, a major step toward achieving our fall objective of inventory usage at 1988 turnover levels. One of the major benefits of this policy will be a reduction in seasonal working capital needs.

Approximately four years ago when we did our LBO we incurred the heavy debt that was necessary to buy the company. From the beginning, we fixed the cost of our debt and have had interest rate caps on nearly 100 percent of our long-term obligations. More recently, we executed a successful securitization of accounts receivable. We focused on savings through

consolidation of division functions, shortage reduction programs and systems improvements which will serve us well in the years ahead.

In recent weeks we have toured our Florida stores, several California stores, and a number of the Northeastern and Southern stores. We also have spent considerable time in our two flagship stores, Herald Square in New York and Union Square in San Francisco, which represent 10 percent of our total business. We can report to you that the morale of our associates is outstanding; the stores are full of fresh, current merchandise and new fashion ideas.

We think it important to remind you that in the last four years we have opened three specialty store divisions, spent $150-$175 million per year in capital improvements, acquired Bullock's and I. Magnin, and most importantly, reorganized our $7 billion business to enhance our franchise.

The current financial markets give us impetus to vigorously explore additional ways to reduce our debt, lower interest expense and give us additional flexibility in running the business. Be assured, we are working diligently to achieve substantial improvement in this area.

We will send the 10-Q to you as soon as the results are audited and ready to file with the SEC.

PEORIA, IL (MAY 2) PR NEWSWIRE - In a series of transactions last month, RLI Corp. (NYSE: RLI) concluded commutations with all Insurance Exchange of the Americas' syndicates in rehabilitation. The commutation agreements approved by the Circuit Court for Leon County, Fla., provided that substantially all of the trust fund principal amounts be paid to RLI rather than the receiver for the syndicates. Funds exceeding $6 million have been received by RLI.

In a separate transaction, RLI has agreed to sell its interest in Syndicate One, Inc., a former member syndicate of the Insurance Exchange of the Americas, AM/EX, which operated as a broker to the exchange, and First Street Management Company, and underwriting management company. The Department of Insurance of the State of Florida has approved the sale, which is expected to close within days.

SAN JUAN, PUERTO RICO (MAY 2) PR NEWSWIRE - At the annual meeting of Puerto Rican Cement Company, Inc. (NYSE: PRN), Carlos J. Suarez, chairman of the board and chief executive officer, reported first quarter consolidated net income of $3,602,000, or $1.86 per share, vs. $3,910,000, or $2.00 per share, for the comparable quarter in 1989 (common shares outstanding: 1,935,900 in 1990; 1,958,400 in 1989). Net sales for the quarter increased to $20,180,000 compared with $19,043,000 last year. Revenues from realty operations were $7,800 for the quarter, compared with $384,000 for the corresponding period last year.

An 11.6 percent rise in cement consumption in Puerto Rico (to 8.1 million bags) had a positive effect on the company's cement sales in the quarter, which rose by 5 percent to 4,623,094 bags. The company holds a 57 percent share of the cement market in Puerto Rico.

The company reported higher cost of sales to 64 percent of net sales, compared to 60 percent for the same period last year. Suarez attributed the increase to higher coal and power costs and to the use of two smaller, less efficient kilns at the company's Ponce cement plant to supplement clinker production while construction work is underway for the dry process conversion.

During the meeting, shareholders elected five class III directors for a term of three years. They are: Antonio Luis Ferre, vice chairman of the board; Alberto M. Paracchini, vice chairman of the board, and chairman and chief executive officer of BanPonce Corporation; Wallace Gonzalez Oliver, president of Las Americas Trust Company; Emilio J. Venegas, president of Sanson Corporation; and, Jose J. Suarez, executive vice

president in charge of operations for the company.

Puerto Rican Cement Company, Inc. produces cement and related products, including Portland grey cement and hydrated lime and multiwall paper bags, and engages in realty operations.

HOUSTON (MAY 2) PR NEWSWIRE - Daniel Industries, Inc. (NYSE: DAN) today announced a 73 percent increase in earnings for the second quarter ended March 31, 1990, compared to the same period a year ago.

The company's revenues remained constant for the second quarter ($41,529,000) and first six months ($80,359,000) when compared to the same period last year. Net profit of $1,771,000, or $.17 per share, was recorded for the second quarter of fiscal 1990, compared to a net profit of $1,022,000, or $.10 per share, for the same period last year. Daniel experienced a net profit of $3,427,000, or $.33 per share, for the first half of 1990, a 47 percent increase compared to last year's results.

The reported increases in earnings for the second quarter and first six months of fiscal 1990 were a result of strong demand for flow metering products, fasteners, valves and enhanced oil recovery products, offsetting a decrease in orders for large metering systems.

The company's backlog was $43,152,000 at March 31, 1990. Working capital was $60,669,000, and the current ratio was 3.2 to 1.

Daniel Industries, Inc. is a major international supplier of fluid measurement products and systems principally for oil and natural gas producers, transporters and refiners. The company also manufacturers and sells alloy stud bolts and gaskets, pipeline valves, gas lift equipment, flanges and steam generation packages.

CONTACT: W.A. Griffin III, chief financial officer of Daniel Industries, 713-467-6000

HOUSTON (MAY 2) PR NEWSWIRE - DI Industries, Inc., (AMEX: DRL) ("the company") announced today the unaudited results of operations for the three months and for the fiscal year ended March 31, 1990. Consolidated revenues increased 102 percent to $10,651,000 for the current quarter as

compared to $5,262,000 a year ago. The company recorded a net income of $336,000 for the quarter compared to a loss of $920,000 for the same quarter a year ago. Cash flow for the current quarter was a positive $990,000 as compared to a negative cash flow of $236,000 a year ago. The company reported a net income per share of $.01 for the current quarter as compared to a net loss per share of $(.04) a year ago.

Consolidated revenues increased 41 percent to $32,489,000 for the current year as compared to $23,061,000 a year ago. The company recorded a net loss of $951,000 for the current year as compared to a loss of $2,635,000 for the prior year (down 64 percent). Cash flow for the current year was a positive $1,459,000 as compared to a negative $236,000 for a year ago. The company reported a net loss for the current year of $(.03) per share as compared to a net loss per share of $(.13) a year ago.

Max M. Dillard, president, reports that this is the firm's best quarter since September 1982 and that the two southern divisions have experienced increased rig activity in recent months. The firm is strong, having $16 million in cash at the end of the quarter and is currently in the acquisition mode following its recent stock offering.

The results for the 1990 periods reflect the acquisition by the company in July 1989 of the drilling rig operations of The Penn Central Corporation.

DI Industries, Inc., headquartered in Houston, is engaged primarily in the business of providing onshore contract drilling and well workover services to firms in the oil and gas industry, commercial drilling and oil and gas exploration, development and production.

PALATINE, IL (MAY 2) PR NEWSWIRE - Square D Company (NYSE: SQD) has adopted a matrix structured sales organization, focusing on worldwide markets for the company's industrial control and electrical distribution products, systems and services, it was announced today by Jerre L. Stead, Square D chairman, president and chief executive officer.

"The organizational change reinforces Square D's objective of having one sales team that is both coordinated and targeted, an organization equipped to make the most of the professional expertise in sales, marketing and product application for which we have become known," said Stead.

"The change enables the Square D sales force to be even more responsive to specific needs of our customers and distributors," Stead pointed out, "because it places decision-making responsibility closer to those we

serve. It also links our sales force more closely with our businesses."

Stead said that, as part of the change, Clive N. Thompson, formerly corporate vice president, sales and service, has been named vice president of the distribution equipment business headquartered at Lexington, Ky., succeeding Carl E. Ashley. Thompson's previous position will not be filled.

Ashley has been appointed division manager, low voltage business, and Lyle C. Kovar director of manufacturing for the power equipment business, managed by Vice President Jodie K. Glore at Smyrna, Tenn.

Stead said that William H. Snyder, vice president-construction sales, now will report on a matrix basis to both Thompson and Glore and that Kris A. Bierbaum, vice president-industrial sales, will report on a matrix basis to Richard M. Armbrust, vice president of the automation products business, and John C. Garrett, vice president of the control products business.

Stead said that, while Snyder and Bierbaum focus on different market sectors, they have shared responsibility for the total sales force.

Stead said the technical services division, directed by Vice President Dennis R. Pickrel, now will report to Robert R. Carpenter, corporate vice president, support operations. The distributor marketing group, headed by Vice President Edward P. Mazzetta, will report on a matrix basis to Glore for the electrical distribution segment and Garrett for the industrial control segment, in effect matrixing all four business units.

Square D is a worldwide leader in industrial control and electrical distribution products, systems and services and had 1989 from continuing operations of $1.63 billion.

PITTSBURGH (MAY 2) PR NEWSWIRE - Suzette E. Miller has been appointed to the position of market representative in Florida for the Steel Can Recycling Institute (SCRI), it was announced today.

This is SCRI's third regional appointment, with the previous two assigned in Pennsylvania and Texas, and surrounding regions.

Miller has over 12 years of experience in the recycling field, having most recently served as plant manager for Reynolds Aluminum Recycling Co. in Pensacola, Fla. Previously, she had worked for Champion International in Pensacola, and for Container Corporation of America in Alabama.

According to Gregory Crawford, SCRI director of recycling, "Suzette's in-depth experience in the 'nuts and bolts' aspects of recycling will strongly facilitate her ability to build the infrastructure and to assist community leaders and recyclers in their efforts to effectively implement steel can recycling. Her career experience has helped her develop remarkable marketing and customer relations skills, as well as a comprehensive knowledge of the Florida and southeastern markets.

"These markets are very important to us. The state of Florida, in particular, continues to develop its environmental programs, and we want to ensure a strong steel can recycling infrastructure throughout the state to help fulfill its solid waste reduction goals."

Miller is currently completing requirements for a B.S. degree in industrial organizational psychology, and has earned an honors associate degree in business/management. Her educational goals complement her extensive managerial and marketing experience.

The Steel Can Recycling Institute is an industry association with the mission of promoting and sustaining steel can recycling. It is the primary information and technical resource for legislators, municipalities, recyclers, businesses and other entities interested in steel can recycling.

Miller may be reached at 904-479-7208. Her office address is Steel Can Recycling Institute, 4900 Bayou Blvd., Suite 110C, Pensacola, Fla. 32503.

#90122p0225 05/02/1990 ~PR Newswire
ALBUQUERQUE, NM (MAY 1) PR NEWSWIRE - Public Service Co. of New Mexico (PNM) (NYSE: PNM) today reported a loss applicable to common stock of $7.2 million, or 17 cents per share, for the first quarter 1990 as compared to

net earnings applicable to common stock of $27.2 million or 65 cents per share for the comparable quarter last year. The loss includes an after-tax write-off of $19.4 million or 46 cents per share resulting from the recently announced New Mexico Public Service Commission (NMPSC) decision on the company's electric rate case.

The write-off, which the company referred to in its April 12, 1990 news release, was taken following the NMPSC's decision on the company's electric rate case. The write-off resulted primarily from the NMPSC's treatment of prior year's tax benefits from debt retirement and hedge loss transactions as well as the treatment of amortization periods for gains resulting from the sale leaseback transactions on Palo Verde Units 1 and 2 in previous years.

Earnings applicable to common stock from continuing operations for the 12 months ended March 31, 1990, were $37.7 million or 90 cents per share compared to a loss of $20.2 million or 48 cents per share for the like period last year which included one-time charges of $2.88 per share.

Operating revenues for the current quarter decreased $11.8 million to $254.4 million from $266.2 million in the comparable quarter last year. The reduction was due primarily to the Dec. 31, 1989, expiration of the company's long-term power sale to Southwestern Public Service Co. which contributed $27.2 million to operating revenues in the first quarter last year.

Electric retail revenues increased $2.5 million for the quarter and $10.5 million for the 12-month period from the comparable period last year. Retail electric sales continued their above-average growth increasing 3.4 percent for the quarter and 4.7 percent for the 12-month period on new customer growth of 2.1 percent.

#90122p0227 05/02/1990 ~PR Newswire

CHARLOTTE, NC (MAY 2) PR NEWSWIRE - Piedmont Natural Gas Company's (NYSE: PNY) North Carolina year-round natural gas customers are now being billed based on summer rates that are 10.76 percent lower than they were one year ago in May of 1989. The company attributed the decrease in rates over the past year to the company's continuing success in locating and contracting for lower-priced natural gas from a number of new supply sources.

Since 1984, Piedmont's customers in North Carolina have seen their rates decrease dramatically from $0.57949 to the present $0.41452, or 28 percent. For the average, year-round North Carolina customer on the

company's equal payment plan, that translates into a monthly bill decrease of $10.36 from $49.74 per month in 1984 to the current $39.39 per month, which represents a $124.26 annual savings.

"During the 1980's, we revolutionized the manner in which we purchase long-term and short-term gas supplies. We now buy gas from an ever increasing number of suppliers who compete for our business," commented Piedmont's Chairman and President John H. Maxheim. "Our ability to know where to buy gas and how best to contract for its purchase and transportation have given us a competitive edge that we utilize for our customers."

"The natural gas business is in many ways completely different from what it was ten to fifteen years ago. About the only thing that hasn't changed throughout that period of time is that natural gas has consistently remained the consumer's most economical form of energy by a comfortable margin," said Maxheim.

Piedmont Natural Gas Company, Inc. is an energy and services company primarily engaged in the transportation and sale of natural gas to over 390,000 residential, commercial and industrial customers in North Carolina South Carolina and Tennessee. The Company and its non-utility subsidiaries are also engaged in acquiring, marketing and arranging for the transportation of natural gas to large volume purchasers, in retailing residential and commercial gas appliances and in the sale of propane to over 25,500 customer in the Company's three state area.

LONDON (MAY 2) PR NEWSWIRE - Ontario-based glassmaker, Libbey St. Clair and its U.K. subsidiary, Ravenhead Co. Ltd., have been purchased in a package worth C$134 million. The acquisition was made by Carlo A. Simoni and John F. Rand, private investors based in the United States, together with management. Bankers Trust Company acted as arranger and advisor.

Libbey St. Clair was jointly owned by Owens Illinois Incorporated and Stone Container Corporation. Both companies will retain investments in the newly recapitalized group.

Libbey St. Clair, the country's oldest manufacturer of machine-made glass tableware, is the market leader in Canada. Its principal market is the food service market.

Ravenhead was acquired by Libbey St. Clair in 1987. It is the leading

maker of glass tableware in the United Kingdom. The principal markets served by Ravenhead are the licensed victualer and retail markets.

"This cross-border transaction combined the more classical management buyout, management buy-in and corporate divestment concepts into an innovative form of company recapitalization," said Carlo Simoni. "Bankers Trust played an essential part in bringing the deal to fruition."

NEW YORK (MAY 2) PR NEWSWIRE - The American Stock Exchange announced that Interchange Financial Services Corporation of Saddle Brook, N.J., began trading 1,727,100 common shares today. Interchange Financial Services is the bank holding company for Interchange State Bank and Clover Leaf Mortgage Co., Inc., both of which operate in Bergen County, N.J. The company previously traded in the NASDAQ National Market System under the symbol ISBJ.

Trading under ticker symbol ISB, the common stock opened on 100 shares at 9-1/8.

Interchange Financial Services operates through its Interchange State Bank subsidiary, a state-chartered bank with assets of $246.5 million as of Dec. 31, 1989. The bank provides a range of banking services for individual customers, as well as professional, commercial and industrial businesses in Bergen County.

Interchange State Bank offers commercial banking services including checking, savings and time deposits; and installment, personal, student, home equity and mortgage loans, through its main and branch office in Saddle Brook and nine branch offices in the surrounding areas of Elmwood Park, Franklin Lakes, Garfield, Lodi, Paramus, Rochelle Park and Washington Township.

The company's Clover Leaf Mortgage subsidiary, also of Saddle Brook, acquires and services first and secondary mortgage loans.

Interchange Financial Services reported net income of $3,060,000, or $1.54 per share, on net interest income of $11,399,000 for the fiscal year ended Dec. 31, 1989, compared with net income of $2,901,000, or $1.44 per share, on net interest income of $10,119,000 for the prior year.

WASHINGTON (MAY 2) PR NEWSWIRE - The National Employer of the Year Award in the large-company category was given to Du Pont today by the President's Committee on Employment of People with Disabilities.

The company was cited for its efforts to employ, accommodate and promote people with disabilities, and for building awareness among other employers about the contribution of employees with disabilities.

Vice Chairman Elwood P. Blanchard Jr. accepted the award for Du Pont. It was one of five national employer awards presented by the president's committee.

Over the past 30 years, Du Pont has conducted periodic surveys in which supervisors compared the performance of employees with disabilities to their co-workers without disabilities. The latest study, completed early this year, found:

-- In safety, 97 percent of employees with disabilities rated average or above.

-- In job duties, 90 percent rated average or above.
-- In attendance, 86 percent rated average or above.

"Hiring people with disabilities is not only the right thing to do, it's also good business," said Blanchard. "It will be even more important in the future. U.S. industry will have to look beyond traditional sources of labor to meet the need for skilled, dedicated workers, in the increasingly tough global competition for business, and in the face of changing demographics."

Some 3,000 of Du Pont's 100,000 U.S. employees have disabilities.

BOISE, ID (MAY 2) PR NEWSWIRE - Morrison Knudsen Corp. (NYSE: MRN) today announced receipt of a $12.4-million contract from the U.S. Navy for construction of a specialized hospital support facility on Adak Island in the Aleutian Islands of Alaska.

The facility, which will enclose approximately 70,000 square feet, will be located on the Adak Navy Base on the island.

The building will be outfitted to expand with the attachment of the Navy's

mobile, containerized medical units. The detachable units come ready to use in the field -- equipped as operating rooms, sick bays, x-ray centers, emergency rooms, and for other medical purposes.

With an 80-hour set-up time, the support facility will be fully operational as a field hospital.

Work is scheduled to begin early this summer, with completion expected in November 1991.

This new contract award returns Morrison Knudsen to Adak Island, where it helped build the Navy base just prior to World War II, then constructed a seawall in the early 1980s. Adak Island, one of the westernmost of the Aleutian Islands in the Bering Sea, is more than 1,400 air miles from Anchorage.

ERIE, PA (MAY 2) PR NEWSWIRE - Zurn Industries Inc. (NYSE: ZRN), a leading designer and manufacturer of environmental waste-to-energy systems and water control products and systems, announced today that Cogeneration Partners of America (Cherry Hill, N.J.), as managers for Pedricktown Cogeneration Limited Partnership, has given them notice to proceed with the installation of a 120-megawatt combined cycle power plant located in Pedricktown, N.J.

The new plant will utilize the waste heat from gas turbine exhaust to produce steam for power generation and industrial use.

The turnkey contract, valued at approximately $70 million, calls for Zurn National Energy Production Corp. (NEPCO) to engineer, procure components and construct the cogeneration plant. Included in the contract is a multi-pressure heat recovery steam generator designed and produced by Zurn Energy Division, Erie, Pa. Electricity from the new plant will be sold to Atlantic Electric Co. while process steam and electricity will be used by a nearby manufacturing facility.

Zurn/NEPCO expects to mobilize onsite immediately. With the start-up of the Pedricktown project, Zurn/NEPCO will have 357 megawatts of combined cycle power generation capacity under construction. Start-up of the new cogeneration plant is scheduled to begin in October 1991, with commercial operation in February 1992.

The plant will be operated and maintained by Operating Energy Corp. (O.E.C.), a NEPCO subsidiary, under a separate contract with Pedricktown

Cogeneration Limited Partnership.

In announcing the new contract, Zurn Chairman George Schofield observed that this will be the largest combined cycle power plant project Zurn/NEPCO has undertaken to date. "Projects such as this one, designed and constructed for both electric utilities and independent power producers, will be a significant source of growth for Zurn Industries in the near future," Schofield said.

SAN DIMAS, CA (MAY 2) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) today announced that its board of directors approved a $5.5 million private placement of convertible preferred stock and warrants to certain of the company's key stockholders.

Under the terms of the agreement in principle, Warburg, Pincus Capital Partners and Humana Inc. ("the Investor Group") will purchase $5.5 million of newly issued Vestar voting preferred stock, convertible into common stock at $4.00 per share with a 10 percent per annum cumulative dividend payable in shares of common stock valued at the greater of $4.00 per share or market. The company will also issue the Investor Group warrants to purchase approximately 1,294,000 shares of Vestar common stock at $4.25 per share.

Roger J. Crossley, M.D., president and chief executive officer, said, "We believe that this private placement underscores the confidence in Vestar held by our key stockholders and should provide the company with sufficient equity to complete the development and commercialization of AmBisome, an antifungal agent and Vestar's first commercial product.

"Since our recent application for regulatory approval to market AmBisome (now in six European countries), we have been gratified by physician acceptance of this new anti-fungal agent. Certain European countries allow physician purchase requests prior to marketing approval ("special license sales") and those special license sales exceeded $370,000 in the 1990 first quarter as compared to $99,000 in the 1989 fourth quarter when commercial shipments of AmBisome commenced."

Vestar Inc. is a pharmaceutical company focused on the development of therapeutic and diagnostic agents for cancer, AIDS and related diseases. AmBisome is the trade name for the intravenous liposomal formulation of amphotericin B, a broad-spectrum, anti- infective agent used to treat potentially fatal systemic fungal infections that often occur in heavily-treated cancer, post- organ/bone marrow transplant and AIDS

patients. In clinical trials, AmBisome has virtually eliminated the acute and chronic toxicity associated with conventional amphotericin B, even at 3-4 times higher doses, demonstrated by its 80 percent clinical response rate in patients who had already failed conventional therapy, or in whom it was contraindicated.

WASHINGTON (MAY 2) PRNEWSWIRE - Six community-based non-profit organizations were honored today by the Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) for their work in developing quality, affordable housing across the nation.

The company's Foundation awarded a $25,000 grant to each of the six groups. Produced during a 12-month eligibility period, the projects were evaluated by an independent advisory committee as the best examples of low-income housing. The foundation received 119 award applications from 33 states and the District and Columbia.

"Our objective is to call national attention to the outstanding work of public-private partnerships in creating affordable housing wherever it's needed, said David O. Maxwell, chairman and chief executive officer of Fannie Mae. "We hope the awards will influence others to seek opportunities to expand the availability of affordable housing and achieve the excellence represented in the projects of our awardees."

Announcing this year's awardees, Maxwell noted that many of the projects "provided counseling and educational services to improve the quality of life of residents, and lessen their risk of slipping back into deficient or unaffordable housing."

The following organizations were selected as this year's Awards of Excellence grantees:

East Brooklyn Congregations -- Brooklyn, N.Y.
Mission Service Project -- Mission, Texas.
Washington Inner City Self Help (WISH) -- Washington, D.C.
Impact Seven, Inc. -- Turtle Lake, Wis.
Catholic Charities of San Francisco, Calif.
REACH Community Development, Inc. -- Portland, Ore.

Maxwell said that Fannie Mae looks forward to sponsoring a third round of the Awards of Excellence Program. Award applications will be available in July, and must be submitted to the Foundation by Oct. 1.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned corporation, and the nation's largest investor in home mortgages.

NORTHBROOK, IL (MAY 2) PR NEWSWIRE - Woodhead Industries, Inc. (NASDAQ/NMS: WDHD) announced that it has settled the claims brought against it and a former subsidiary by Research-Cottrell, Inc. with the payment of $450,000 to Research-Cottrell. The after-tax cost of the settlement will be approximately $.09 per share and will be charged against earnings in the company's fiscal third quarter.

The claims were part of a case styled Briskheat Corp., Yarway Corp., and Keystone International Holdings Corp., (and Woodhead Industries, Inc., Intervenor Plaintiff) v. Research-Cottrell, Inc. v. Briscoe Manufacturing Company which was filed in an Ohio federal district court in January 1989. Research-Cottrell had alleged damages of up to eight million dollars for allegedly defective hopper heaters manufactured by Woodhead's former subsidiary.

DENVER (MAY 2) PR NEWSWIRE - Metropolitan Life Insurance Company today announced that it will soon begin administering a new managed care health plan for the approximately 65,000 active employees, and claims processing services for 35,000 retirees of U S West. The agreement represents one of the largest new sales ever made by MetLife.

MetLife will administer medical, dental and vision care services for U S West. The health plan combines state-of-the-art techniques for provider selection, negotiation and contracting in developing its provider networks together with the use of primary care physicians to assist employees in obtaining quality health care.

The plan also allows employees and their families free choice of physicians or hospitals at the time health services are needed. Employees who utilize the MetLife Network of health care providers will receive higher levels of benefits than if they choose to go outside the network.

MetLife Executive Vice President John D. Moynahan Jr. commented, "Managed

health care is becoming increasingly attractive to corporate America; we are confident that it will play a key role for U S West in helping to manage rising health care costs."

U S West Senior Vice President and Chief Human Resources Officer Tom Bouchard added, "We are extremely pleased to have MetLife as the carrier for the U S West health care plan. We selected MetLife because of the quality of service they will be able to provide to U S West employees, the quality of their managed care networks and their ability to assist U S West in controlling our rising health care costs. We believe this will be an excellent partnership."

MetLife is one of the country's largest and strongest insurance and managed health care companies. Approximately 12 million employees and their dependents are covered under its health care programs.

MINNEAPOLIS (MAY 2) PR NEWSWIRE - At Control Data's (NYSE: CDA) annual meeting today in Minneapolis, President and Chief Executive Officer Lawrence Perlman told stockholders that he is comfortable with financial analysts' 1990 earnings estimates in the range of $1 to to $1.25 per share and that he does not intend that 1990 "be a one-shot good year followed by yet more years of disappointment."

"As we move forward, the goal is to achieve 10 percent return on revenue and to have a return on invested capital in the 20 percent range," Perlman said. "While 1990 will fall well short of this goal, it is the first step in a process of getting there over the next few years."

In telling stockholders that his mission is to be "an agent of change" at Control Data, Perlman said, "Today and in the future, building shareholder value is the primary objective of each manager at Control Data."

Perlman pointed out that the number of new faces throughout both the operating and staff management functions is visible evidence of the changes taking place at Control Data.

Control Data's employees and Perlman's desire to make Control Data an employee-centered company in the future figured significantly in his remarks.

"I can only begin to touch on the value I place on (Control Data's employees)," said Perlman. "Their loyalty and commitment, their perseverance through the toughest of times, is the reason we are here

today, even able to talk about tomorrow...There are thousands of heroes who have enabled this Company to survive.

"I want the Control Data of the future to be an exceptional place to work by fostering an environment of openness and candor where every employee can be heard, where managers enable rather than control, where pay is based on performance, where benefits are designed to meet the needs of a changing workforce, and where personal development and fultillment for each person who works at Control Data is a day-to-day fact of life.

At the meeting, the 10 nominated directors were re-elected, a long-term incentive plan for Control Data managers was approved, and a stockholder proposal to terminate business relationships with South Africa was rejected.

Control Data is a provider of data solutions that integrate hardware, software and services to meet customers' complex data collection, processing and communications needs. Its businesses include the Arbitron Company, Automated Wagering, Business Management Services, Computer Products, Data Services, Empros Systems International, Government Systems and Micrognosis.

OMAHA, NE (MAY 2) PR NEWSWIRE - Scott W. Rahn has been named to the new position of corporate vice president, internal development, for ConAgra Inc. (NYSE: CAG), reporting directly to ConAgra president and chief operating officer Philip B. Fletcher.

"One of the most important objectives of ConAgra in the 1990s is to enhance the value of our products to the consumer and as a consequence earn an improved margin. This promotion is directly related to this objective," said Fletcher. "Scott Rahn's mission is to accelerate the internal development of new consumer branded products and, in particular, value-added products related to our meat, poultry and seafood businesses. Scott is a fine business builder, and we believe he is the best-qualified executive to lead our efforts to capitalize on these opportunities."

Prior to joining ConAgra in 1982, Rahn held progressively more responsible marketing and general management positions with General Mills Inc., Rawlings Sporting Goods and The Sunmark Cos. He joined ConAgra as vice president, marketing for Banquet Foods. He was promoted to executive vice president and general manager, Banquet Foods in 1984 and to president ConAgra Frozen Foods in 1987. James R. Tindall, president and chief operating officer, ConAgra Prepared Food Cos., will assume the presidency

of ConAgra Frozen Foods, in addition to his other responsibilities.

HARTFORD, CT (MAY 2) PR NEWSWIRE - The CIGNA Employee Benefits Companies announced today a regional, customer-focused structure that merges its operations with those of EQUICOR, the group insurance and managed health care company that CIGNA acquired in late March.

"In the month since we completed the acquisition, we have made significant progress in redefining the structure of our organization, which is now substantially larger," said G. Robert O'Brien, president of the CIGNA Employee Benefits Companies. "On a combined basis, CIGNA's and EQUICOR's employee group life and health insurance, prepaid health care and disability businesses had 1989 premium and premium equivalents of approximately $14 billion."

"The primary objective of the new regional structure is to make us more responsive to our customers' needs in a rapidly changing health care environment. As the new structure is put in place over the next two months, our principal focus is to deliver the high level of service our clients have come to expect from us."

The new operating structure includes:

-- three operating regions -- Western, Central and Eastern -- that will be responsible for the sales, underwriting and medical delivery networks and be accountable for business results. The attached map describes the regional structure;

-- a National Accounts unit that will sell to, service and underwrite the company's largest customers and have accountability for business results; and

-- a Health Management Services unit that will be responsible for the development of health care policy. It also will be responsible for the management of Intracorp, CIGNA's employee rehabilitation and medical cost control services subsidiary; EQUICOR's Corporate Healthcare Management, which provides products and services similar to Intracorp; MCC, a subsidiary that provides managed mental health and substance abuse programs; and CIGNA Dental Health.

#90122p0289 05/02/1990 ~PR Newswire

ATLANTA (MAY 2) PR NEWSWIRE - Citing higher costs for producing and delivering electricity, a less-than-satisfactory rate decision in Georgia, and mild winter temperatures that slowed the growth of energy sales, Southern Company President Edward L. Addison said today that the company's financial performance in the first quarter of this year had fallen below the levels achieved for the first three months of 1989.

The Southern Company (NYSE: SO) is the parent firm of five electric utilities: Alabama Power, Georgia Power, Gulf Power, Mississippi Power and Savannah Electric. The Southern Company's stock is one of the 20 most widely held corporate stocks in America.

Addison announced that earnings for the first quarter of this year totaled $113 million or 36 cents per share -- down $84 million or 26 cents per share from the corresponding period in 1989.

For the 12 months ending March 31, net income reached $762 million or $2.42 per share -- a decrease of $125 million or 41 cents per share from the comparable 12 months a year ago.

Addison noted that the Georgia Public Service Commission issued a key decision last fall related to Georgia Power's investment in unit 2 of Plant Vogtle. Georgia Power had asked for a rate increase of $413 million. The commission recognized a need for $218 million of additional revenues to be recovered over a phase-in period. The order calls for a first-year increase in base rates of $75 million. But the impact of this increase on customer bills is being offset by $68 million of fuel cost reductions and other one-time credits. The remainder of the increase -- some $143 million -- is to be recovered within 10 years as other costs associated with Plant Vogtle decline.

Georgia Power has appealed an earlier commission decision disallowing a portion of the construction costs for Vogtle unit 1. If that decision is not overturned by the courts, The Southern Company will have to take an additional charge against earnings -- now estimated at some $200 million after taxes for both Vogtle units. A ruling by the Georgia Court of Appeals is expected soon.

BALTIMORE (MAY 2) PR NEWSWIRE - MNC Financial Inc. (NYSE: MNC) announced today the private placement of US $74 million of Subordinated Libor Notes

due 2000.

The Notes carry a 10-year final maturity and are callable at year seven. The transaction was arranged through Goldman Sachs & Co., and was sold to a group of Japanese investors.

The Notes are priced at a spread above six month libor; after the effects of an earlier hedging transaction and an interest rate swap, the borrowing carries an effective fixed interest rate of 9-3/8 percent.

The debt is intended to qualify as Tier 2 capital for regulatory purposes.

MNC Financial is a diversified financial services company which delivers a broad range of commercial and consumer banking products in the Baltimore/Washington common market and in the mid-Atlantic states. In addition, MNC is the largest national marketer of endorsed affinity group credit cards, a pioneer in asset securitization and sales, and a leader in national consumer finance products. MNC manages one of the largest and most profitable trust entities in the region.

#90122p0296 05/02/1990 ~PR Newswire

MIAMI, (MAY 2) PR NEWSWIRE - Atlantis Group, Inc. (AMEX: AGH), today reported its operating results for the first quarter ended March 31, 1990.

First quarter 1990 revenues of $50.3 million were eight percent behind the $54.8 million recorded for the first quarter of 1989. However, operating income of $4 million approximated the first quarter 1989 operating income of $4.1 million.

Benefiting from $294,000 of after-tax gains on the repurchase of subordinated notes, the loss from continuing operations narrowed to $465,000, or $.07 per share, compared with a loss of $817,000, or $.12 per share, for the first quarter of 1989. The net loss for the 1990 first quarter was $420,000, or $.06 per share, compared with a loss of $233,000, or $.04 per share, in the year-ago quarter.

Commenting on the results, Earl W. Powell, chairman and chief executive officer, stated: "The first quarter is historically our weakest, but after a strong fourth quarter to close 1989, we looked forward to 1990 with anticipation. However, just as the plastic resin markets appeared to be stabalizing, after a year of frequent and sharp price declines, resin suppliers raised prices. Our attempts to pass on these increases to our customers were met with resistance, particularly in the stretch film market, and our margins suffered. Although most analysts believe these

increases represent a temporary situation and that prices will begin to gradually decline later this year, it will be difficult to make up the ground lost during the first quarter.

"While we are not happy with our operating results, we are pleased that our companies have done a good job controlling costs and maintaining historical operating profit percentages in the face of reduced sales, a soft economy and the continued turmoil in our major supply markets."

Western Pioneer Insurance Company, Atlantis Group's insurance subsidiary reported as discontinued operations, posted first quarter 1990 net income of $45,000, or $.01 per share, compared with $584,000, or $.08 per share, in 1989.

Powell added: "Although Western Pioneer continues to be adversely affected by the increased number of assigned risk policies it is required to service, the related loss experience appears to have stabilized and we expect an improvement in Western Pioneer's operating results."

Atlantis, headquartered in Miami, is a diversified plastics and contract furniture manufacturing company.

DALLAS (MAY 2) PR NEWSWIRE - A teaming agreement to produce a version of the IA 63 PAMPA to meet the needs of the U.S. Air Force and Navy Joint Primary Aircraft Training System program was announced today by officials of LTV Aircraft Products Group and Fabrica Militar de Aviones -- the Military Factory of Aircraft -- at Cordoba, Argentina.

The IA 63 is a single-engined, high-wing jet trainer with a tandem two-seat cockpit powered by a Garrett TFE 731-2-2 turbofan engine.

"The purpose of the teaming agreement is to produce a version of the IA 63 PAMPA -- missionized to meet the requirements of the Air Force and Navy's JPATS program," said LTV Aircraft Products President Gordon Williams. "We looked at all the potential candidates for the primary trainer mission and feel that the PAMPA is the best," Williams added. "We are looking forward to working with FMA to provide the Air Force and Navy the finest training aircraft available."

General Jose A. Julia, of the Argentine Air Force signed the teaming agreement in Buenos Aires, Argentina on behalf of FMA.

Brig. Gen. Alberto Lindow, director of FMA, said, "The aircraft's proven design makes it a cost effective and dependable primary trainer suitable for military pilot training."

The LTV/FMA team will begin a flight demonstration program this year with the formal flight evaluation of a fully missionized aircraft and procurement package expected in 1994.

Williams said this agreement with FMA to produce a missionized PAMPA for JPATS is another example of the company's efforts in derivative programs. "Reduced defense spending levels demand this type of solution. The military still has a need to train pilots, but the most cost-effective way of doing that is with a proven system -- one that avoids expensive new development," said Williams.

LTV Aircraft Products manufactures aircraft subassemblies and components for military and commercial use and also modernizes and remanufactures aircraft. It is a principal operating group of The LTV Corp., a Dallas-based diversified manufacturing company also involved in steel, energy products, missiles and electronics.

CHICAGO (MAY 2) PR NEWSWIRE - Heller Financial Inc. reported record first quarter net income, Norman P. Blake Jr., chairman and chief executive officer, announced today.

First quarter 1990 net income of $17.8 million represents a 12 percent increase from net income of $15.9 million in the first quarter of 1989. "The company's improved profitability reflects higher net interest income resulting from a 22 percent increase in average funds employed," said Blake. "This strong earnings growth took place despite the company's increase in its allowance for losses to 2.7 percent of total loans at the end of the first quarter from 2.5 percent at year-end 1989."

The company's receivables increased 3 percent from year-end 1989 to $7 billion at the end of the first quarter. At the end of the 1990 first quarter, non-performing assets increased to 7.1 percent of total loans from 5.3 percent at year-end 1989.

Heller Financial Inc. is the domestic operating company of Heller International Corp., the worldwide commercial financial services organization which is a wholly owned subsidiary of The Fuji Bank, Limited, one of the world's largest banks. Heller International's operating

companies, Heller Financial Inc. and Heller Overseas Corp. maintain 46 offices worldwide. LANSING, MI (MAY 2) PR NEWSWIRE - Oldsmobile Division of General Motors has announced an increased consumer rebate to $2,500 for 1990 Toronado models and a new consumer rebate of $1,000 on Cutlass Ciera models under its "New Generation Sell-A-Bration III" program. This consumer incentive program starts Thursday, May 3, 1990, and continues through Aug. 2.

In lieu of the consumer rebates on Toronados and Cutlass Cieras, consumers may take advantage of a special 7.9 percent GMAC finance rate for contracts up to 48 months and 10.9 percent for 49- through 60-month contracts. Oldsmobile also is continuing to provide dealers cash back on most of its other car lines.

"Our Toronado model year sales are up 46 percent over a year ago, and we're very pleased with the positive consumer reaction to the new exterior and interior design," said David E. Lahti, general sales and service manager for Oldsmobile. "To build on this sales momentum, this increased consumer incentive will make our luxury sport coupe one of the best values in this very competitive and growing market segment."

Like all other 1990 Oldsmobiles, both Cutlass Ciera and Toronado are covered under the exclusive Oldsmobile Edge Customer Satisfaction program which includes 24-hour roadside assistance service at no additional charge.

CHICAGO (MAY 2) PR NEWSWIRE - EAC Industries, Inc. (AMEX: EAC) today announced a loss from continuing operations of $11,049,000, or $5.61 per share, on sales of $37,415,000. This compares to a profit from continuing operations of $15,000, or 0 cents per share, on sales of $37,531,000 for the year ended Jan. 31, 1989. Both earnings figures have been adjusted to reflect the company's decision to switch from the LIFO method of inventory valuation to the FIFO method as of year end.

EAC lost $1,189,000 from discontinued operations for the fiscal year ended Jan. 31, 1990, as compared to a loss of $1,255,000 for the prior year. On a per share basis the loss from discontinued operations amounts to 60 cents per share for 1990, as compared to 63 cents per share for 1989.

The total loss for the year was $12,238,000, as compared to a loss for the prior year of $1,240,000. The total loss amounts to $6.21 per share for the current year, as compared to a 63 cents per share loss for the prior year.

For the fourth quarter ended Jan. 31, 1990, the company lost $10,018,000 from continuing operations, or $5.08 per share, as compared to a $425,000 loss for the comparable quarter of the prior year, or 22 cents per share. For the fourth quarter the company also lost $417,000 from discontinued operations, as compared to $2,657,000 for the prior year. On a per-share basis the loss from discontinued operations was 21 cents per share for the current fourth quarter, as compared to $1.35 per share for the quarter ended Jan. 31, 1989. The total loss for the fourth quarter of 1990 was $10,435,000, or $5.29 per share, as compared to $3,082,000, or $1.57 per share for the prior year's quarter.

Goorden Products Corporation, the company's other operating subsidiary, continued to perform well, generating operating profits of approximately $760,000 for the most recent fiscal year, as compared to an operating profit of $629,000 for the prior year. Sales were $6,253,000 for the most recent year, as compared to sales of $5,729,000 for the prior year.

The company's financial condition is poor and reflects substantial deterioration from Jan. 31, 1989. The company had a working capital deficit of $14,010,000 at Jan. 31, 1990. In addition, the company is currently in litigation over several matters. As a result of these matters, the fact that the company's efforts at refinancing (including a sale of Ideal) have to date been unsuccessful, and the uncertainty of the company's future prospects, the company's auditors disclaimed an opinion on the company's financial statements. Unless there is a debt restructuring in the near future, the company will be required to seek protection for Ideal under Chapter 11 of the Bankruptcy Code. It is the company's present intention not to seek such protection either for itself of Goorden, although actions by creditors may cause EAC or Goorden to seek such protection.

EAC is a holding company serving the hardware and point-of-purchase advertising markets through its subsidiary companies.

CLEVELAND (MAY 2) PR NEWSWIRE - Newly elected today to the Board of Directors of the M. A. Hanna Company (NYSE/MSE: MAH) at the company's annual meeting of stockholders were Hanna President and Chief Operating Officer Douglas J. McGregor; Jack L. Cockwell, executive vice president and chief operating officer of Brascan Limited; and Paul M. Marshall, vice chairman of Brascan.

McGregor has been president and chief operating officer of Hanna since 1989. He joined the company as senior vice president in 1988 and was promoted to executive vice president that same year.

Cockwell and Marshall were nominated pursuant to a stand-still agreement between Hanna and Brascan Limited, which owns 27.8 percent of Hanna's outstanding common stock.

Shareholders also re-elected the following directors to one-year terms: B. Charles Ames, chairman and chief executive officer, The Uniroyal Goodrich Tire Company; Robert F. Anderson, retired chairman and chief executive officer, M. A. Hanna; James E. Courtney, vice chairman, M. A. Hanna; Wayne R. Embry, executive vice president and general manager, The Cleveland Cavaliers; J. Trevor Eyton, president and chief executive officer, Brascan Limited; R. L. Ireland, III, partner, Brown Brothers Harriman & Co.; George D. Kirkham, senior vice president, Prescott, Ball & Turben, Inc.; Richard W. Pogue, managing partner, Jones, Day, Reavis & Pogue; and Martin D. Walker, chairman and chief executive officer of M. A.

Hanna.

Retiring from Hanna's board were Richard J. Jacob, retired chairman and chief executive officer of Day International Corporation, which was acquired by Hanna in 1987; Edward G. Battle, president and chief executive officer, Norcen Energy Resources Limited; Conrad M. Black, chairman and chief executive officer of Argus Corporation Limited and Hollinger Inc.; and Alfred Powis, chairman and chief executive officer of Noranda Inc.

The Board was reduced from 13 members to 12.

M. A. Hanna Company is a leading international formulated polymers company with interests in natural resources.

MCLEAN, VA (MAY 2) PR NEWSWIRE - The National, America's new sports-only daily newspaper, is using a GTE Spacenet satellite telecommunications service to extend its deadlines further in order to give sports-hungry Americans the latest-breaking sports scores.

In one of the first applications of its kind, the newspaper's copy and graphics stay in digital form until the information for the three regional versions is sent via satellite to five regional printing plants.

"GTE Spacenet has been instrumental in the start-up of The National. They presented us with a clear and informative proposal on how The National could produce the best quality product," said Tim Lasker, assistant publisher.

The National's GTE-installed network currently consists of very small aperture terminals (VSATs) located at its New York headquarters and at printing plants in Los Angeles, Chicago, Long Island, N.Y., East Brunswick N.J., and New Haven, Conn.; a dedicated data line; and, use of a GTE Spacenet hub.

The system uses telecommunications and computer technology. Here's how it works: a National reporter writes his/her story into a word-processing package. The article is then input into a page-makeup system that integrates the text with scanned-in photos. That information becomes a computer file that is sent over the data line to a VSAT or satellite "dish" on a roof, and is then transmitted via satellite to the newspaper's printing sites. A printer then turns the file into film, then printing plates, which go to the presses. This process shortens The National's pre-press time, allowing it to extend deadlines.

The National chose GTE Spacenet's network because of its knowledge of the prepress and printing industry, according to Lasker. Dow Jones uses a GTE Spacenet service to provide transmission of facsimile pages of The Wall Street Journal from composing plants to printing plants. Also, GTE Spacenet coordinated the transmission of photographs to newspapers across the U.S. for Atex, a Kodak division, from the site of the 1988 Summer Olympic Games, in Seoul, South Korea.

GTE Spacenet, one of GTE's six operating groups, is a world leader in satellite communications with over two decades of experience in the provision of telecommunications services and systems to businesses, news organizations and government agencies across the U.S. and around the globe. The company specializes in the implementation, operation, maintenance and management of private networks for domestic and international data, video and voice applications. GTE Spacenet's list of customers includes Techtron, Applied Graphics Technology (AGT), K mart, Reuters, Cargill, Caterpillar, the U.S. Army, Chevron, Amoco, ABC, CBS, CNN and Gannett.

PHOENIX, AZ (MAY 2) PRNEWSWIRE - Attached is the text of the remarks given by Douglas C. Yearley, Chairman of the Board and Chief Executive Officer, at the Phelps Dodge Corporation (NYSE: PD) Annual Meeting of Shareholders held in Phoenix, Arizona on May 2, 1990.

Remarks by Douglas C. Yearley, Chairman and Chief Executive Officer:

When I addressed this meeting a year ago, I reported to you that 1988 was an outstanding year for our company in virtually every area of our business, with net earnings of $420 million which were the highest ever recorded by Phelps Dodge. I further reported that our company should enjoy another good year in 1989.

I am pleased to report that 1989 was an extraordinary year for our company. Net income for the year was $267 million, or $7.46 per common share, the second best earnings achievement by the company in its 156-year history. Included in this amount, however, was an after-tax charge to earnings of $237 million, or $6.62 per common share, in the 1989 fourth quarter to write down and reserve for certain non-producing assets. If the charge had not been taken, we would have reported net income of $504 million, or $14.08 per share, easily surpassing 1988's record of $420 million. The 1989 fourth quarter charge related primarily to our domestic copper mining operations and stemmed from our continuing efforts to assess all of our operations relative to internationally competitive quality and cost criteria.

In 1989, we also returned to our shareholders $459 million in dividends, including a $10 per share extraordinary dividend declared in September. These dividends were paid almost entirely out of cash on hand and cash flow generated during the year, and are a testament to the progress the company has made since 1984.

Each of our two operating divisions, Phelps Dodge Mining Company and Phelps Dodge Industries, made significant contributions to our overall company performance in 1989.

Finally, on behalf of all the company's shareholders, I would like to acknowledge Edward L. Palmer, and express to him our thanks and appreciation. Mr. Palmer retired today in accordance with the Board's retirement policy with 23 years of service.

LOS ANGELES (MAY 2) PR NEWSWIRE - Unocal Corporation (NYSE: UCL) said today that a wholly owned subsidiary of Union Exploration Partners, Ltd. (UXP), entered into an agreement to purchase 100 percent of the stock of Prairie Holding Company, a crude oil and natural gas exploration and production subsidiary of Placer Dome Inc.

The transaction is valued at approximately $336 million, including a cash payment for the stock of Prairie Holding Company of $252 million, and the assumption of $84 million in liabilities and debt obligations of the

seller.

The sale is subject to obtaining normal consents and waivers, including expiration of the Hart-Scott-Rodino Act waiting period. It should be completed by the end of July.

"Prairie offers an unusually attractive combination of reserves and exploration potential. In addition, it fits well with UXP's existing operations in Texas and Louisiana," said Richard J. Stegemeier, Unocal chairman, president and chief executive officer.

"Our acquisition of Prairie adds more than 20,000 net acres of promising exploratory lands in the Smackover, Miocene, Yegua and Haynesville trends in east Texas and Louisiana. In addition, it has varying interests in three gas processing plants."

Net daily production from Prairie's productive acreage is 36 million cubic feet of natural gas, 4,100 barrels of hydrocarbon liquids and 106 long tons of sulfur.

UXP is a Texas oil and gas master limited partnership. Unocal and its wholly owned operating subsidiary, Union Oil Company of California, hold approximately 95 percent of UXP's outstanding units.

PHILADELPHIA (MAY 2) PR NEWSWIRE - AT&T (NYSE: T) today announced that the CIGNA (NYSE: CI) companies have awarded AT&T a contract to provide a citywide communications system for its world headquarters at One Liberty Place and other Philadelphia operations to be consolidated at Two Liberty Place.

CIGNA is purchasing AT&T's DEFINITY(R) Communications System to link all its Philadelphia operations with locations in Voorhees, N.J., and Windsor and Bloomfield, Conn.

Mike Natan, senior vice president of CIGNA Systems, cited CIGNA's desire to become a low-cost provider among the reasons for choosing AT&T. "We are as committed to driving down costs in our business as we are to offering our customers the highest quality service. AT&T's competitive price and proven record of quality product performance influenced our decision," he said.

AT&T already provides a wide range of systems and services to CIGNA's family of insurance, health care and financial services subsidiaries. In

a contract worth more than $100 million over five years, CIGNA selected AT&T to provide worldwide communications services to more than 900 CIGNA company locations last December.

"We're delighted that CIGNA companies have again selected AT&T," said George Foyo, AT&T sales vice president. "This is another example of our ability to deliver to an industry leader like CIGNA the highest quality, most cost effective communications resources."

The award followed a competitive bidding process conducted by CIGNA.

#90122p0364 05/02/1990 ~PR Newswire

CALGARY, ALBERTA, (MAY 2) PR NEWSWIRE - Prairie Oil Royalties Company, Ltd. (Toronto: POY) announced today that net earnings for the first quarter of 1990 were $1.8 million, or 23 cents per share, up 62 percent from $1.1 million or 14 cents per share in the first quarter a year ago. Cash generated from operations, at $5.3 million, was up 49 percent.

Sales and other revenues totalled $6.6 million compared to $4.4 million for the corresponding period in 1989, an increase of 48 percent.

Major factors contributing to these significant improvements in financial performance were sharply higher production rates, for both oil and gas, and a 22 percent increase in the average price received by the company for its crude oil and natural gas liquids.

Production of crude oil and natural gas liquids averaged 3,224 barrels per day, an increase of 26 percent. Production of natural gas averaged 12.4 million cubic feet per day, 29 percent higher than the 9.6 million cubic feet per day achieved in the first quarter a year ago.

The production gains resulted from property acquisitions and a major gas conservation scheme, which were completed during the summer of 1989, as well as the addition of new production from exploration and development successes principally at Enchant in Southern Alberta.

#90122p0368 05/02/1990 ~PR Newswire

NEW BRITAIN, CT (MAY 2) PR NEWSWIRE - Bridgeport Hydraulic Company (BHC) said today it will seek an increase in water service rates to supplement

the inadequate 7.75 percent increase that went into effect June 1, 1989.

The water company, which serves a population of some 380,000 in 17 Connecticut communities, said it will ask the Connecticut Department of Public Utility Control (DPUC) to permit it to raise rates by an estimated 22 percent to generate additional annual revenues approximating $9.9 million, according to BHC Executive Vice President and Chief Operating Officer James S. McInerney, Jr.

BHC today notified the DPUC and the local government CEOs of the towns it serves of its intent to apply in 30 to 60 days for new rates that it anticipates would go into effect in November, he said.

McInerney noted that BHC's last rate increase represented less than half of the amount requested, "yet," he said, "this has been the only rate relief afforded BHC since Sept. 1986 -- and that increase was based on our cost of doing business during the 12 months ended Dec. 31, 1985." Inflation during the same period, as measured by the Consumer Price Index, rose 17 percent, he observed.

"Mindful of our water service responsibilities, we have continued to invest in our public water supply infrastructure despite our recognizing the painful inadequacy of rate relief awarded in 1989," he said. "Thus it should surprise no one that, in spite of rigorous cost containment efforts our operating expenses have continued to rise.

"It is quite evident," McInerney said, "that last year's 7.75 percent increase simply is insufficient to permit BHC to keep pace with the gradual but steady effects of inflation.

"We also are not earning a return on our recent investment in new, vital water system improvements and, accordingly, our earnings have continued to erode," he added.

He noted that over the next decade BHC also faces what for it will be an unprecedented, $190 million program of water system improvements, much of them mandated by federal water quality regulations.

The largest water company in Connecticut, BHC, with its Stamford Water Company subsidiary, which maintains separate rates, is the principal subsidiary of The Hydraulic Company (NYSE: THC).

SPOKANE, WA (MAY 2) PR NEWSWIRE - Pegasus Gold Inc. (AMEX, Toronto: PGU)

said, in response to the recent press release of Pioneer Metals Corp. (Toronto: PSM), that the company and their attorneys see no merit in Pioneer's counter claim. In addition, Pegasus will continue its default actions against Pioneer in British Columbia, Canada and Idaho, including its action to pursue the foreclosure of Pegasus' mortgage on the Stibnite Gold Mine. Pending an Oct. 1 expedited trial in Idaho that was requested by Pegasus, the company is seeking an appointment of a Receiver for the Stibnite Gold Mine. A hearing on this issue is scheduled for June 7 in Idaho.

Pegasus Gold Inc. is a major North American gold producer that currently produces over 340,000 ounces of gold annually from six mines in the western United States. The company also produces significant quantities of silver, lead and zinc. Pegasus Gold common shares are traded on the American Stock Exchange and the Toronto Stock Exchange under the symbol PGU. Options on the company's common shares are traded on the Chicago Board Options Exchange and the Montreal Stock Exchange.

TUCSON, AZ (MAY 2) PR NEWSWIRE -- Delta Air Lines (NYSE: DAL) will add a fourth flight between Tucson and Los Angeles on June 1 tailored for the business traveler.

"Delta's new schedule to Los Angeles will allow the business traveler to depart Tucson early in the morning and conduct a full day's business

almost anywhere in the West Coast corridor before returning that afternoon " said Steve Tipsword, Delta's district marketing manager. The new flight departs Los Angeles at 5:50 p.m., arriving in Tucson at 7:18 p.m. A new 7:40 p.m. departure from Tucson to Los Angeles also will be added.

All Delta's Los Angeles flights will make convenient connections to Delta flights along the West Coast corridor, including new hourly service between Los Angeles and San Francisco.

"Our June 1 expansion of service demonstrates Delta's year-round commitment to Tucson. While other airlines are making seasonal reductions in their schedules here, Delta continues to increase service," Tipsword noted. "This is another indication of Delta's confidence in Tucson as both a resort community and viable business center.

"Delta is the only airline to offer Tucson nonstop service to three major hubs, as well as convenient service both east and west," he added. Delta's June 1 schedule will feature 10 flights daily with nonstop service to Los Angeles, Dallas/Fort Worth, Salt Lake City and Phoenix.

FAIRFAX, VA (MAY 2) PR NEWSWIRE - Francesco Galesi, chairman of The Galesi Group and owner of DataAmerica, a data interexchange carrier with an emphasis on public packet-switching data network capabilities, announced today that a consortium of prominent telecommunications companies is investing in DataAmerica.

This investment is in recognition of the potential for high quality, wide area transmission of data currently being experienced in the United States and abroad. Further details of the consortium investments were not disclosed.

Partners in this new consortium are: Williams Telecommunications Group (WilTel), one of the nation's leading telecommunications carriers for long distance companies and the private networks of large corporations and institutions, with revenues of approximately $350 million; Advanced Telecommunications Corp. (NASDAQ: ATEL), a major regional long distance carrier, with revenues of approximately $320 million; and Telesphere Communications Inc. (AMEX: TSP), a full service national long distance company and industry leader in 900 information services, with revenues of approximately $220 million.

DataAmerica offers a full range of value-added network and transport services. With an all digital fiber based network, DataAmerica provides a

high quality, intelligent network platform that supports a wide array of data communication services to meet the most sophisticated customer requirements and applications.

These include international packet-switched access; permanent circuit service; interconnection of the nationwide Bell and independent telco packet networks; access to information providers; access to Information Gateways; high speed international service; and the provisioning of customer premises equipment, backed by 24-hour, seven-days-a-week customer service.

The company uses Northern Telecom DPN-100 packet switches; WilTel national fiber optic network; Advanced Telecommunications regional network; and Telesphere access network services.

Commenting on the equity commitment of these prominent investors, Galesi stated, "While maintaining majority ownership in DataAmerica, we believe by establishing these relationships with WilTel, ATC, and Telesphere, DataAmerica is positioned to become a world-class provider of data communication services. Our combined abilities permit us to provide an expanded service portfolio of high quality datacomm services and technologies to a much broader customer base."

#90122p0433 05/02/1990 ~PR Newswire
HIGHLAND PARK, MI (MAY 2) PR NEWSWIRE - Following is a statement by Chrysler in response to comments by the Washington County, Pa., coroner:

While we haven't seen a full text of what the coroner had to say today, we have heard enough to know that he is ill-informed, acting irresponsibly and attempting to generate publicity for himself at the expense of the family whose child was killed in this accident and Chrysler Corporation. The vehicle did not cause this accident and cannot be blamed for the tragedy that occurred.

This unfortunate accident occurred when Mrs. George lost control of her Plymouth Voyager and crossed into the opposing lane where she collided with an oncoming Honda driven by Donald Flamm. The two vehicles were traveling at approximately 45 miles per hour before the accident and the resulting collision was very violent in nature. The driver of the Honda was killed from the impact. Mrs. George's young son, Noah, was found outside the vehicle after the accident and died of exposure.

During the accident, due to the tremendous forces involved, the rear of the seat in which Noah is said to have been sitting was bent rearward less

than six inches. The forces on the seat during the collision were over twice the level a seat is required to withstand by the National Highway Traffic Safety Administration (NHTSA) standard that governs seat back strength.

The type of construction in the rear seat of the Voyager is common in the automotive industry and is found in the seats of many domestic and imported vehicles. The Voyager seat was tested to meet and exceed the federal standards which specifically address seat back strength. In fact it also exceeds the requirements of the standards for seat backs in Canada, Europe and Japan.

As proof of the quality of the design of the rear seat, we have determined that, since the minivan was introduced six years ago and even though there are over two million Chrysler minivans on the road today, we have never had a single lawsuit or customer complaint claiming that bending of the rear seat back caused an injury. In addition, in checking our warranty records for these vehicles, we have found that there were no claims submitted in any of the applicable categories ("broken," "damaged" or "weak") for seat back performance.

We have carefully reviewed the transcript of the hearing at which the Coroner's Jury made its finding of negligence. There was absolutely no evidence submitted upon which the Jury could reasonably and responsibly have entered this verdict with regard to this rear seat. Chrysler was not notified that a hearing was to take place, was not a party to these proceedings and was not invited to attend or present evidence at the hearing.

Not a single one of the witnesses appearing at the hearing offered an opinion that the seat was defective. In fact, Trooper Kolson, who investigated the accident, specifically declined to offer such an opinion.

The Jury was given no evidence regarding the forces to which the seat was subjected and was given no understanding of the construction of the seat. They were only shown the seat with the upholstery still intact and therefore could only see the fabric covering and the springs but could not even examine the underlying structure of the seat.

It appears quite clear that the Jury's opinion was influenced primarily by gratuitous comments made by the Coroner during the proceedings that the seat "was poorly constructed", "bound to fail with any type of an impact" and "unsafe" -- opinions which were totally unsupported by any evidence and which are untrue.

It is truly a tragedy that Noah George was killed. Unfortunately some accidents are so violent that some people will be injured or killed, no matter what precautions are taken. But there is no evidence to show that

any problem with the rear seat of the minivan caused Noah George's death.

Comments made today by the Coroner are simply a case of him grandstanding for his own political self-interest.

STAMFORD, CT (MAY 2) PR NEWSWIRE - Rayonier Forest Resources Company, the managing general partner of Rayonier Timberlands, L.P. (NYSE: LOG), announced today that the partnership is soliciting offers in connection with the possible sale of approximately 13,500 acres of timberland located within the Quinault Indian Reservation in the state of Washington. A prospectus was issued April 24.

The parcels are scattered and their sale would make management of the partnership's Northwest timberland base more efficient. Management indicated that about 7 percent of the Northwest timber planned for harvest during the 10 remaining years of the partnership's initial term is included.

HOUSTON (MAY 2) PR NEWSWIRE - The U.S. Court of Appeals for the Fifth Circuit has ruled in favor of Texas Air Corp. (TAC) in a suit by a group of pilots seeking millions of dollars in damages under a 1982 "Side Letter" between TAC and the Air Line Pilots Association (ALPA).

The pilots sought to hold Texas Air liable for the wage reductions that resulted when Continental's collective bargaining agreements were rejected in its 1983 bankruptcy. These back pay damage claims could have totaled in excess of $50 million.

The pilots claim that the 1982 Side Letter was an agreement by TAC to guarantee Continental's obligations under the collective bargaining agreement with ALPA.

The 5th circuit held that "The Side Letter is a contract between TAC and ALPA. The pilots were not parties to the Side Letter and were not granted any right to enforce its terms. Indeed, the Side Letter gives ALPA the exclusive authority to enforce its terms and to settle disputes arising under the Side Letter...

"We hold that ALPA had authority to bind the pilots to the settlement because the Side Letter itself gave ALPA exclusive authority to settle disputes..."

The court also ruled that "Nothing in the settlement or in the bankruptcy court and district court orders relating to the settlement preserves any individual claims..."

The court also said "ALPA had the authority to settle all claims arising out of that dispute, including claims, such as those under the Side Letter..."

In 1985, following Continental's bankruptcy and a strike by Continental pilots, ALPA and Continental agreed to resolve the strike and settle all related litigation and bankruptcy claims, including ALPA's agreement to withdraw any claims it might have under the Side Letter agreement with TAC.

Various pilots later sought to assert individual claims arising from the Side Letter in a class action suit. Their claims, in essence, ignored the settlement between Continental and ALPA.

Two similar cases are pending in Texas and Colorado state courts. Texas Air plans to seek dismissal of these cases based upon the 5th circuit decision.

CHICAGO (MAY 2) PR NEWSWIRE - At the 1990 Whitman Corp. (NYSE: WH) annual meeting today, shareholders elected the following members of the board of directors: Bruce S. Chelberg, Richard G. Cline, James W. Cozad, Pierre S. du Pont IV, Archie R. Dykes, Helen Galland, C. Jackson Grayson Jr., Walter H. Helmerich III, Donald P. Jacobs, Harold R. Logan, Miles L. Marsh and Harry A. Merlo.

Shareholders also ratified the selection of KPMG Peat Marwick as independent public accountants.

At a meeting of the board of directors before the annual meeting, the board increased the quarterly common dividend to 26.5 cents a share. The new annual rate will be $1.06 a share.

In his message to shareholders, James W. Cozad, chairman and chief executive officer, explained the 1990 corporate goals:

1) Produce a return to shareholders that exceeds the average returns of

the stock market.

2) Lower corporate debt to gain the flexibility to make carefully selected acquisitions and investments in food and soft drinks.

3) Improve the margins in all of the operating companies.
4) Provide an average annual return to shareholders of 12 to 15 percent including dividends over time.

In a special presentation at the annual meeting, four employees received the Chairman's Award for outstanding performance in 1989. They are Mariano Bryand, production manager of the Midas plant in Bedford Park, Midas International Corp.; Tom Ellinwood, marketing manager for Van de Kamp's Seafood, Pet Incorporated; Wynn Topley, corporate manager of distribution systems, Pepsi-Cola General Bottlers; and Karl Zimmel, manager of claims and administration in the corporate risk management department, Whitman Corp.

Whitman Corp. is a North American food and soft-drink company.

HOUSTON (MAY 2) PR NEWSWIRE - AIM Management Group Inc. (AIM) announced today that it has completed the sale of approximately 22 percent of the outstanding voting stock in AIM to a U.S. subsidiary of Nationale-Nederlanden N.V. (N.N.), one of the leading insurance groups in the world. In addition, N.N. will purchase all of a new issue of convertible preferred stock from AIM.

AIM Management Group Inc. headquartered in Houston, through its principal subsidiaries is engaged primarily in the business of providing investment management services. AIM serves as investment manager or administrator to over 25 institutional and retail mutual fund portfolios as well as to numerous corporate and individual separate accounts.

Nationale-Nederlanden N.V. is the largest insurance group in the Netherlands and one of the leading insurance groups in the world with operations in 21 countries. Assets at Dec. 31, 1989 were in excess of $48 billion and 1989 revenues amounted to approximately $12 billion.

N.N. operates in North America through eight life insurance companies and nine property and casualty insurance companies. In 1989 the total revenues of the North American operations were $2.7 billion, and total assets were in excess of $6.5 billion.

STRUER, DENMARK (MAY 2) PR NEWSWIRE - Bang & Olufsen A/S announced today that Philips Consumer Electronics International B.V., Eindhoven, The Netherlands, has agreed to purchase 25 percent of the total capital shares of Bang & Olufsen Holding A/S for $50 million, double the face value of the shares. The other 75 percent of the shares, valued at $75 million, will continue to be owned by Bang & Olufsen Holding A/S. Philips will not hold seats on the board of directors nor participate in the daily management on Bang & Olufsen A/S or Bang or Olufsen Holding A/S.

The Philips purchase is based on agreements with Bang & Olufsen for cooperation on technology, purchasing, components and subassemblies. The agreements on cooperation, which will be based on the 75/25 percent joint ownership, will be submitted for approval at the annual shareholders meeting of Bang & Olufsen A/S and the board of management of Philips in October 1990. The amount of the subscription reflects the mutual rights of first refusal and other restrictions on each of the parties' disposition of 25 percent of the shares of the new company.

The existing ownership of Bang & Olufsen Holding will not be affected by the Philips subscription of shares in Bang & Olufsen A/S. In addition to ownership of 75 percent of Bang & Olufsen A/S, the holding company owns 50 prcent of Bang & Olufsen Technology A/S, a subsidiary. Bang & Olufsen Technology is a joint venture with L.M. Ericsson A/S of DIAX Telecommunication A/S, a telecommunications company.

Bang & Olufsen A/S will continue current audio/video products activities and sales via its present Bang & Olufsen sales companies, agents and dealers according to current product and marketing strategies.

Philips has been a major supplier of components to Bang & Olufsen since it was founded in 1925. The new agreements are considered a consolidation of the long-standing relationship between the two companies which will provide for the transfer of information and technology between them. The cooperation will offer both companies a platform for strengthening their positions in the world markets for premium audio/video products.

Philips Consumer Electronics is Europe's largest consumer electronics company and the world's largest manufacturer of color television receivers. It invented the compact disc and the audio cassette and is a leader in video technology. Philips has approximately 60,000 employees and owns numerous production facilities worldwide. Bang & Olufsen, renowned for the designs and advanced technology of its audio/video products, had annual sales of approximately $325 million, and employes

3,300 people.

(MAY 2) UPI - President Bush Tuesday night hailed veterans of the Korean

War, which he says ''laid the foundation'' for the democratic reforms that've swept Eastern Europe and Central America. Bush was among the 600 people who attended a black-tie dinner in Washington, D-C, to raise money for construction of the Korean War Veterans Memorial on the Mall. The dinner raised about 400-thousand dollars.

Officials in Waco, Texas, say a member of Vice President Quayle's advance team is under investigation in the possible sexual assault of a college student. A vice presidential spokesman says the unidentified man has been relieved of his duties. Members of Quayle's advance team have been in Waco for several days preparing for Quayle's visit Wednesday to attend a fund-raiser for a Republican congressional candidate.

Intra-tribal confrontations between supporters and opponents of legalized casino gambling on the St. Regis Indian Reservation turned bloody Tuesday. Authorities say two Mohawk Indians were killed... one of them in a shootout... on the reservation that spans the New York-Canadian border. The deaths come one day after New York Governor Mario Cuomo appointed an aide to begin talks on the gaming issue.

A May Day concert at a park on New York's Lower East Side ended in violence. Authorities say police attempting to enforce a curfew at Tompkins Square Park sparked a melee Tuesday night that injured at least nine people, including seven officers. Last summer, the park was the site of a series of NON-violent rallies by homeless advocates that resulted in scores of arrests.

Riot police in West Berlin used water cannon and tear gas in a frustrating bid to control a mob of more than 500 youths that rampaged through the streets of a working-class district near the Berlin War. The violence Tuesday night marred an otherwise peaceful May Day that, for the first time since the end of World War Two, was celebrated jointly by Germans from East and West Berlin.

A physician addressing the American Academy of Pediatricians in Seattle Tuesday dismissed football and other team sports as a waste of resources when it comes to the health of children. Dr. Joseph Zanga says schools should stress cycling, running, walking and aerobic dancing over team sports because they help build the cardiovascular system.

#90122u0338 05/02/1990 ~United Press International
(MAY 2) UPI - Republicans are moving to contain the political damage following revelations that a member of Vice President Quayle's advance team is under investigation in the possible sexual assault of a Waco, Texas, college co-ed. NO charges have been filed. A Quayle spokesman called the incident ''most deplorable'' and said the UNidentified man has been relieved of his duties. Texas G-O-P gubernatorial candidate Clayton Williams... whose jokes about rape touched off a firestorm... issued a

statement, calling the incident ''completely and totally UNacceptable.''

The newly legalized African National Congress and the white-controlled South African government open their first formal talks Wednesday. The historic discussions... which will be held over three days... come 80 days after President de Klerk released black leader Nelson Mandela from more than a quarter-of-a-century behind bars.

The Salvadoran army is rejecting allegations by a colonel that the six Jesuit priests killed last November were murdered on orders from high up the military chain of command. Last week, a high-ranking member of El Salvador's ruling Nationalist Republican Alliance said the nine soldiers arrested in the slayings were merely ''obeying orders.''

#90122u0375 05/02/1990 ~United Press International
(MAY 2) UPI - Derek Lilliquist turned his first homers in the big leagues into a major event by becoming the only pitcher in five years to smack two home runs in a game.

Lilliquist added to the accomplishment by allowing only three hits over seven innings, guiding the Atlanta Braves to a 5-2 victory over the New York Mets.

''I felt good at the plate, what else can I say. Everything is going together for us right now,'' Lilliquist said. ''We're pitching good, the relievers are picking it up good and we're hitting the ball. That's all we can do.''

Lilliquist, 1-3, received help from recent trade Charley Kerfeld, who scattered two hits over two innings to notch his first save.

The experience was a sobering one for Mets pitcher Ron Darling, 1-3, who will be a bit more meticulous in the future.

''I should have studied that hitting chart on Lilliquist a little better, I guess,'' said Darling. ''Everyone has told me how good of a hitter he is. I went out and proved it tonight.''

Darling began the night by giving up a home run to Oddibe McDowell, his third of the year, to put Atlanta up 1-0.

Lilliquist's first major league home run increased Atlanta's lead to 2-0 in the third. The Braves made the score 3-0 in the fourth when Ernie Whitt hit a 3-2 pitch over the right field fence for his first National League home run.

In the fifth, Atlanta made it 4-0 when Lilliquist stroked a 2-1 pitch over the right-field fence for his second homer.

The previous Braves pitcher to slam two home runs was Tony Cloninger who stroked two grand slams on July 3, 1966.

In other NL games, Philadelphia beat Cincinnati 4-2, Montreal nipped Houston 2-1, St. Louis defeated San Diego 2-1, Los Angeles pounded Pittsburgh 4-1, and Chicago pummeled San Francisco 7-4.

In the AL, it was, Oakland 4, New York 2; Boston 8, Seattle 2; California 7, Baltimore 1; Toronto 4, Cleveland 3; Minnesota 9, Detroit 5; Chicago 5, Texas 1; and Milwaukee 6, Kansas City 4.

-- AROUND THE NL --

Phillies 4, Reds 2

At Cincinnati, Von Hayes and John Kruk snapped a tie with seventh inning homers off Tim Birtsas to guide Philadelphia. Hayes paced Philadelphia's 12-hit attack with three hits. Bruce Ruffin, 2-2, gave up seven hits and two earned runs in 6 1-3 innings. Ruffin gave up seven hits and two earned runs. Birtsas, 1-1, took the loss.

Expos 2, Astros 1 (13 innings)

At Montreal, Zane Smith delivered a pinch-hit double in the 13th inning to lift the Expos. Otis Nixon led off with a walk off Larry Andersen, 2-1, and advanced when Mike Fitzgerald grounded to second. Smith doubled to right center, making a winner of Drew Hall, 2-2.

Cardinals 2, Padres 1

At San Diego, Bryn Smith allowed five hits over 7 2-3 innings and Denny Walling snapped an eighth-inning tie with an RBI single to pace St. Louis. Smith, 3-2, walked one and struck out five. Ed Whitson, 2-1, took the loss the Padres' fifth in a row.

Dodgers 4, Pirates 1

At Los Angeles, Kal Daniels and Eddie Murray hit home runs in support of Tim Belcher, helping the Dodgers snap Pittsburgh's six-game winning streak. Belcher, 2-2, allowed five hits, walked one and struck out nine. Walt Terrell dropped to 0-1 as the Pirates fell to 10-2 on a road trip that ends Wednesday.

Cubs 7, Giants 4

Ryne Sandberg collected four hits including his second home run of the season, giving the Chicago Cubs a 7-4 victory over the San Francisco Giants. Shawon Dunston drove in three runs and Andre Dawson homered, making a winner of Mike Bielecki, 1-2. Bob Knepper, 0-1, just purchased from Phoenix, was touched for 10 hits in four innings.

#90122u0425 05/02/1990 ~United Press International

POTOSI, Mo. (MAY 2) UPI - A federal judge delayed the execution Wednesday of Bobby Lewis Shaw, a death row inmate condemned for fatally stabbing a guard while serving a life prison term for another murder.

Shaw, 38, had been scheduled to receive a lethal injection at 12:01 a.m. Wednesday, but U.S. District Judge Edward Fillippine agreed late Tuesday to postpone the execution to consider defense motions.

The Supreme Court earlier in the day refused to halt the execution.

Fillippine said the motion to halt the execution, filed by attorney Don Wolf, contained 12 points and he needed time to study them.

Dale Riley, assistant director of the Missouri Division of Corrections, said Shaw already had been served his last meal when he received word from officials at 7 p.m. that his execution had been called off.

Riley said Shaw had no comment about the stay except to say, ''I understand.''

Shaw has an IQ of 73. Psychiatrists testified he may have suffered brain damage when he was 9 years old and was struck on the head with a brick.

Shaw would have been the 124th inmate executed in the United States since the Supreme Court lifted its ban on capital punishment in 1976 and the third in Missouri since that state restored its death penalty in 1977.

Meanwhile in Florida, lawyers for a man condemned to die for the 1976 murder of two police officers at a south Florida highway rest stop obtained a two-day stay of execution for their client, Jessie Tafero, 43. Tafero, who was to die at 7 a.m. Wednesday, is scheduled to face the electric chair Friday.

Shaw had surprised prison officials with his special request for the traditional last meal served to a person facing execution.

''He made one of the more unusual requests we've received,'' Riley said. ''He asked for eight White Castle hamburgers with onion rings, french

fries and a 2-liter bottle of Pepsi.''

Riley said a member of the prison staff was dispatched to St. Louis to obtain the food from a White Castle restaurant in that city. The meal was served to Shaw at about 6 p.m.

Supreme Court spokeswoman Kathy Aarberg said that Shaw's application for a stay of execution was denied by the court in Washington late afternoon.

''He hasn't had any visitors, and he has not chosen any witnesses to his execution,'' Riley said.

Corrections officers had transferred Shaw from death row on Monday to an isolation cell directly across the corridor from the execution chamber at the maximum-security prison, Riley said.

The convict has been confined on death row since Dec. 1, 1980, after a jury gave him the death sentence for the fatal stabbing in 1979 of Walter Farrow, a guard at the Missouri State Penitentiary. Another prison guard was seriously injured in the attack, requiring a year to recover from wounds.

At the time Farrow was murdered, Shaw was serving a life sentence for the 1975 murder of Calvin Morris in St. Louis.

Defense attorneys have been unsuccessful in helping Shaw with appeals heard by state and federal courts for almost a decade. Many of the appeals centered on his mental condition.

Shaw was one of 10 children in a family that moved to St. Louis from Hayti Mo., when he was 10.

#90122u0448 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - A May Day concert ended in a bottle-throwing melee when police moved in to enforce a park permit curfew in a New York City park.

Twenty-two people were arrested by the time the disturbance in Tompkins Square Park was quelled at 1:30 a.m., police said.

The clash between police in riot gear and some 350 demonstrators, including homeless people who live in the Lower East Side park, began at 9 p.m. Tuesday, authorities said.

Deputy Inspector Michael Julian of the Ninth Precinct said the concert was the last of a four-night series organized by a group called Resist to

Exist. A Parks Department permit was valid only until 9 p.m.

''We waited five minutes, and advised them it was nearing 9 p.m,'' said Julian.

The inspector said people on stage then used microphones and told the crowd to resist. He said that at that point only he, a sergeant and one Park Enforcement Patrol officer were on stage, with a fourth officer standing further away.

As park officers approached, one of the concert-goers called for the police to be surrounded, Julian said.

''About 50 to 100 bottles were thrown by the crowd,'' he said. ''I got hit in the body and the legs. We called for assistance because the bottles just kept flying.''

More than 200 police officers in helmets and riot gear were brought in to disperse the crowd. Deputy Chief James McCabe, commander of Manhattan South, said, ''In excess of 22 arrests were made and there were 15 injuries, of which 14 were police officers.''

The confrontation was the first at the park since demonstrations last summer when police, the homeless and homeless advocates kept a tense vigil at Tompkins Square.

At that time, the confrontations were sparked by homeless advocates' dogged persistence to re-erect shanties in the park in violation of city safety rules. Scores of arrests were made during a series of non-violent rallies.

In December, an emergency court order allowed the homeless to build fires to guard against the cold.

Conflicts in the park drew national attention Aug. 6-7, 1988, when 450 officers, some dressed in riot gear, and hundreds of protesters clashed over a newly established curfew at the park.

It left scores injured, including 13 police officers, and prompted 120 complaints of police brutality. The curfew has since been lifted.

#90122u0454 05/02/1990 ~United Press International

(MAY 2) UPI - In Los Angeles, the Lakers were able to come back from deficits of 13 and 19 points to overtake the Rockets in the first two games of their first-round playoff series, but in Houston they found 12 points too far to go.

The Rockets held off two late Los Angeles rallies in Game 3 of their first-round playoff series and stayed alive with a 114-108 triumph over the Lakers.

Los Angeles, which lost a first-round playoff game for the first time since 1981, still leads the best-of-five series 2-1. Game 4 is set for Thursday night in Houston. Before Tuesday night's game, the Lakers had won 20 straight first-round games.

''The three games we've played so far have all been won in the final three minutes,'' said Akeem Olajuwon, who had 22 points. ''They've been real battles.''

Houston still faces a war. Only two teams, the 1956 Fort Wayne Pistons and 1987 Golden State Warriors, have battled back from a 2-0 deficit to win a first-round series.

''I can't guarantee anything, but if we play hard and under control, anything can happen,'' Olajuwon said.

Otis Thorpe scored a playoff-high 27 points and Vernon Maxwell added 26 for Houston. Sleepy Floyd scored 23 points and added a club playoff-record 18 assists as the Rockets erupted on a 15-5 run to open the fourth period and pull away.

James Worthy paced the Lakers with 26 points, Orlando Woolridge scored 18 and Magic Johnson scored 17, but was held scoreless in the final period.

''The big time was at the top of the fourth quarter,'' Johnson said. ''We allowed them to get too big a lead at the beginning. We have to come with our 48-minute team. We have to do the things we did in the first two games.''

The Lakers trailed by as many as 12 points in the first half, but were down only 92-90 entering the final quarter. Olajuwon, who sat on the bench most of the third period after picking up his fourth foul, tipped the ball in, Floyd drove for a layup and Thorpe scored twice to spark a 8-2 run to give Houston a 100-92 advantage.

Worthy hit a three-point jumper, then Maxwell countered with a three-pointer to set off a 9-2 run that gave Houston a 109-97 lead with 5:29 left.

Los Angeles closed within 111-108 on Byron Scott's three-point jumper with 46 seconds left. Floyd then hit an 18-footer and the Lakers could not inbound the ball. Floyd added a free throw with 19 seconds left to seal the win.

''It was a great game for three periods,'' Los Angeles Coach Pat Riley said. ''When Akeem went out, we had a chance, but Otis took over. At the top of the fourth quarter, that 6-0 run gave them a big push. We had a hard time getting back.''

Elsewhere in the NBA Tuesday night, Cleveland stomped Philadelpia 122-95, Milwaukee stopped the Bulls 119-112, Detroit overpowered Indiana 108-96, Portland battered Dallas 106-92 and San Antonio knocked off Denver 131-120.

Cavaliers 122, 76ers 95

At Richfield, Ohio, Craig Ehlo scored 16 points in the third quarter, helping Cleveland stave off playoff elimination. Larry Nance scored 17 points, Mark Price 15 and Brad Daugherty added 13 points, 10 rebounds and 9 assists as Cleveland cut Philadelphia's lead to 2-1 in the series. Hersey Hawkins led the Sixers with 19 points, and Charles Barkley had 17 and 11 rebounds. The margin of victory was the largest in Cavaliers playoff history.

Bucks 119, Bulls 112

At Milwaukee, Jack Sikma hit a three-point basket with 25 seconds left and Paul Pressey added two free throws with 18 seconds left, keeping the Bucks alive. Alvin Robertson led the Bucks with a playoff career-high 38 points. Michael Jordan scored a game-high 48 points but only had two points in the final 5:54. Chicago holds a 2-1 lead in the series.

Pistons 108, Pacers 96

At Indianapolis, Isiah Thomas scored 23 points and defending NBA champion Detroit advanced to the second round of the playoffs. Detroit swept the series, winning its fifth straight playoff series, four of which it won without losing a game. Bill Laimbeer had 12 points and 19 rebounds for the Pistons. Reggie Miller led Indiana with 22.

Trail Blazers 106, Mavericks 92

At Dallas, Clyde Drexler and Jerome Kersey keyed a final run in the fourth quarter, ending a Dallas comeback. Portland's three-game sweep in series marked the first time in five years the Trail Blazers have advanced past the opening round of the playoffs. Kersey led the Trail Blazers with 29 points, while Drexler and Terry Porter both had 20. Rolando Blackman scored 20 points for the Mavericks. Portland played the last three periods without starting forward Buck Williams, who was elbowed in the eye. The Blazers starting center Kevin Duckworth suffered a hand injury.

Spurs 131, Nuggets 120

At Denver, Terry Cummings scored 28 points and David Robinson and Willie Anderson added 26 each to lead San Antonio to a sweep of their series. Rod Strickland added 18 points and David Wingate scored 14 off the bench for the Spurs. Alex English led the Nuggets with 24 points and Fat Lever added 20. The Spurs shot over 57 percent from the floor and outrebounded the Nuggets 30-21 in forging a 65-53 halftime lead.

-30- 5392

#90122u0462 05/02/1990 ~United Press International

(MAY 2) UPI - A year after looking like just another frustrated prospect in 1989, Red Sox hurler Eric Hetzel has a found a new pitch and a second life in the big leagues.

Hetzel improved to 1-1 with his third straight strong start Tuesday night, leading Boston to an 8-2 thumping of Seattle and starter Randy Johnson, 2-2.

The Red Sox, who beat Seattle 11-0 in the series opener Monday, used two RBI singles from Ellis Burks and a two-run triple from Randy Kutcher to bring their run total in two games against the Mariners to 19.

Hetzel allowed four hits through seven innings, working his newfound fork ball to two-hit Seattle through six innings and keep the Mariners scoreless into the seventh.

''He had an outstanding breaking ball tonight, particularly his fork ball '' said Seattle first baseman Pete O'Brien, who went 0 for 4. ''This is a new pitch for him this year. He wasn't afraid to use it at any time, whether he was ahead or behind on the count.''

Hetzel is one of a handful of young arms with which manager Joe Morgan has been experimenting, as injuries continue to periodically hamper starters John Dopson and Mike Boddicker.

''I'm not surprised at all at the way Eric Hetzel, Greg Harris and Dana Kiecker have been pitching,'' said Kutcher. ''I've played with them down at Pawtucket (Boston's triple-A team) and I know they can pitch in the major leagues.''

Hetzel, who went 2-3 with a 6.26 ERA in 1989, lost his shutout bid when the Mariners scored their first run in 16 innings in Boston in the seventh - on Ken Griffey Jr.'s leadoff double and Edgar Martinez's two-out bloop single.

In other AL games, Oakland dumped New York 4-2, California whipped Baltimore 7-1, Toronto nipped Cleveland 4-3, Minnesota knocked off Detroit

9-5, Chicago beat Texas 5-1, and Milwaukee defeated Kansas City 6-4.

In the NL, it was, Atlanta 5, New York 2; Philadelphia 4, Cincinnati 2; Montreal 2, Houston 1; St. Louis 2, San Diego 1; Los Angeles 4, Pittsburgh 1; and Chicago 7, San Francisco 4.

Athletics 4, Yankees 2

At New York, Mike Gallego doubled home two sixth-inning runs, breaking a tie and lifting Oakland. It was the A's seventh win in its last eight appearances at Yankee Stadium. New York has lost three straight. Mike Moore, 2-1, was the starter and winner for the A's, with Andy Hawkins, 0-3 taking the loss. Dennis Eckersley notched his eighth save.

Angels 7, Orioles 1

At Baltimore, Lance Parrish homered twice and drove home four runs, leading California. Parrish, fourth on the all-time home run list for catchers with 265, homered twice in a game for the 19th time in his career and first since July 9, 1986 while with Detroit. Jim Abbott, 1-1, scattered five hits over seven innings to pick up the win. Baltimore starter Jay Tibbs, 0-2, gave up five hits and five runs in 3 2-3 innings.

Blue Jays 4, Indians 3

At Cleveland, Glenallen Hill homered, doubled and scored two runs, helping Toronto extend its domination of Cleveland. Dave Stieb, 4-1, went seven innings as Toronto beat the Indians for the fifth time in six games this season. Tom Henke went 1 2-3 innings for his second save, allowing a ninth-inning homer to Brook Jacoby. Tom Candiotti, 3-1, took the loss.

Twins 9, Tigers 5

At Detroit, Gene Larkin drove in three runs and John Candelaria pitched 3 1-3 scoreless relief innings to help Minnesota break a four-game losing streak. Candelaria, 2-0, relieved starter Kevin Tapani at the start of the fifth to protect an 8-5 lead and allowed Detroit just two singles until being relieved by Juan Berenguer.

White Sox 5, Rangers 1

At Chicago, Melido Perez flirted with a no-hitter through 5 1-3 innings and the White Sox rocked Nolan Ryan for a five-run first. Perez, 2-2, had his no-hit bid broken up by shortstop Jeff Huson, who lined a single to left with one out in the sixth. Chicago has won five straight. Ryan, 4-1, lost his bid for a career-best fifth victory to start the season. He allowed four walks, a pair of singles and a triple in the first inning. The 43-year-old right-hander settled down after that, allowing just one

more hit and striking out eight in six innings.

Brewers 6, Royals 4

At Kansas City, Mo., Greg Vaughn hit a three-run home run and Gary Sheffield added a two-run homer, powering Milwaukee. Vaughn capped a four-run first inning with his second home run of the season. Sheffield sealed the decision in the sixth inning with his first of the year, dropping Bret Saberhagen to 1-3. Ted Higuera, 3-0, allowed three runs in the second inning - the first earned runs scored on the left-hander this season. Dan Plesac, the third Milwaukee pitcher, got three outs for his third save.

#90122u0492 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - The compact car used to spirit away seven Chinese peasants from John F. Kennedy International Airport last month was found on a Chinatown street and will be dusted for fingerprints, authorities said Wednesday.

Lt. Kevin Hassett of the Port Authority police at Kennedy Airport said the maroon Nissan sedan was being held at the airport for forensics experts, who were expected to dust the car for fingerprints sometime Wednesday.

''Once the car is dusted for prints, maybe we'll find out who's involved in all this,'' Hassett said.

The owner of the auto, a Morristown, N.J., resident whose name Hassett declined to reveal, has already been interviewed ''and denies knowing anything about all this.''

The car was found Tuesday in Manhattan's Chinatown, officials said.

Meanwhile, two detectives from the Port Authority police were to travel to Athol, Mass., Wednesday to interview Mollie Aitken, president of the World Energy Foundation, the group that sponsored the peasant farmers' visit to the United States.

She has maintained the seven - part of a group of 16 Chinese nationals who were to study organic farming at a Massachusetts farm for 11 months - were kidnapped April 25 by three men who ordered them into the car at Kennedy.

Hassett said police were working on two theories of the mysterious disappearance: that the seven were kidnapped to work in ''indentured servitude'' in Chinatown businesses; or that they were part of an immigration scam, using the foundation to enter the country, then engineering their own kidnap.

''The fact that the car was found in Chinatown would seem to bolster the first theory,'' said Hassett. ''But the second theory is the way it seems to be going right now. It's the way things are leaning.''

#90122u0515 05/02/1990 ~United Press International

SAN FRANCISCO (MAY 2) UPI - A gunman who said he wanted to ''kill a pig'' went on a rush-hour shooting rampage, killing a bicyclist and wounding three other people, including two police officers, police and witnesses said.

Paul Bellazain, 48, a bus driver and former union leader, was arrested for the attack Tuesday morning after being shot in the thigh by police officers. He was in fair condition and under guard Wednesday at Kaiser Hospital.

The rampage began shortly before 9 a.m. Tuesday, when shots were fired at several moving cars on a street in the eastern part of the city, police said.

An unidentified bicyclist in his 30s was shot and killed in McClaren Park, and several other random shooting incidents were reported, said police Lt. Richard Hesselroth.

A motorist on nearby Highway 280 was shot in the arm and chest, and was hospitalized in serious condition.

Bellazain drove to the Westlake Shopping Center in Daly City, entered a chiropractor's office and laid a rifle, shotgun and revolver on the receptionist's desk, Hesselroth said.

Dr. Gene Martin, 35, the chiropractor, was ordered to summon police.

''I'm going to kill a pig, a cop, before I get shot in the head,'' receptionist Stephanie Ryan, 27, quoted Bellazain as saying.

In a shootout that followed, police Sgt. Ralph Warren was hit in the arm, and officer Gary Smith was hit four times in the hand, arm and chest. Bellazain was shot in the thigh and wrestled to the ground by Smith, police said.

Bellazain, president of the Municipal Railway Transport Workers Union Local 250-A in 1982, had been on workmen's compensation because of an injured hand.

He apparently began the morning at his home in Daly City with behavior

that alarmed his family.

Seton Medical Center spokeswoman Kathy Kohrman said one of Bellazain's daughters called a mental health crisis service run by Seton to warn that her father might hurt himself or others.

#90122u0530 05/02/1990 ~United Press International

MIAMI (MAY 2) UPI - Colombian drug smuggler Carlos Lehder has written a bitter letter to former Panamanian dictator Manuel Noriega, urging him to plead guilty and reminding him of the drug traffickers he informed on before he fell out of favor with the United States.

''Your lawyers will concoct fairy tales to get your gold,'' Lehder said in the April 18 letter. ''You should wisely confer with your old allies and formalize a declaration of guilt.''

Lehder, 40, is serving a life term plus 135 years at the federal penitentiary in Marion, Ill., for smuggling more than three tons of cocaine into the United States. He was convicted in May 1988.

Noriega, 51, is at the Metropolitan Correctional Center south of Miami awaiting trial on cocaine trafficking and money laundering charges.

Lehder scolded Noriega for earlier informing on drug dealers for the United States government while he was the de factor dictator of Panama and before he was overthrown last December by U.S. troops.

''The sorrow of the men of your race whom you turned over to the agents of the DEA, destined for prisons in the U.S.A., awaits you,'' Lehder wrote.

''I guess misery loves company,'' said Frank Rubino, Noriega's attorney. ''I guess Carlos is unhappy where he is and would like to see General Noriega with him.''

Rubino said he didn't know if his client had received a copy of the letter.

The one-page, typewritten letter with a Marion postmark was mailed to Associated Press writer Ron Word but written in Spanish and addressed to ''Ex-General Manuel Antonio Noriega.'' It arrived at the news agency's Jacksonville office Tuesday, The Miami Herald reported Wednesday.

Word, who has exchanged letters with Lehder since covering the smuggler's 7 1/2-month trial, identified Lehder's signature and customary fingerprint.

In the letter, Lehder promised not to testify against Noriega, ''because, despite your sins, we are of the same, fraternal Latin race.''

Noriega's lawyers asked the court Monday for permission to withdraw from the case because the federal government has seized the general's assets and he has no money to pay them. A decision is pending.

Noriega's trial on 12 counts of drug trafficking and money laundering is scheduled to begin next April.

(MAY 2) UPI - Around the world... around the clock... U-P-I has the latest news.

The daughter of recently freed U-S hostage Frank Reed says her father once had contact with two other Western hostages during his 44-month captivity in Lebanon. Marilyn Langston says her father thought his two fellow captives- Terry Anderson and Thomas Sutherland- had been released since the time he saw them.

The White House says it is unsure what to expect next regarding the fate of six U-S hostages remaining in Lebanon. Sources in Iran and Syria- which professed playing key roles in the release of Reed- say the two Mideast allies hope Washington responds to their efforts through some gesture of goodwill.

The Senate budget panel is set to meet this morning to try to patch together a compromise spending bill. A top committee aide says the Senate is ''very, very close'' to reaching a budget agreement. Yesterday, the House O-K'd a one-point-two-TRILLION-dollar Democratic budget. The vote fell mostly along party lines.

History will be made today in South Africa when members of the African National Congress meet for formal talks with the white-minority government. The 11-person A-N-C delegation is made up of blacks, whites, Indians and other people of color. Today's meeting with President De Klerk comes amid growing tensions in the racially divided country.

Latvia's newly formed 265-member parliament has called for talks with Moscow aimed at the withdrawal of Red Army troops from the independence-minded Baltic republic. Despite the absence of a clear two-thirds majority, leaders of the Latvian nationalist Popular Front say they have support to declare their separation from the Soviet Union.

(MAY 2) UPI - Energy Secretary Watkins says the federal government

tentatively plans to O-K the re-starting of its Savannah River Site for processing weapons-grade plutonium by late December. Watkins says a final decision will be made on the deacades-old South Carolina site after an environmental impact statement is completed.

Outgoing Costa Rican President Oscar Arias Sanchez says the most pressing problems facing developing countries are large foreign debts amid poverty on the home front. Arias made his comments yesterday, in his final state of the nation address. The Nobel laureate steps down from office next Tuesday.

Vice President Quayle has relieved a new male staff member of his duties after finding out that he's being investigated by Waco , Texas, authorities for allegedly sexually assaulting a college student. The unidentified staffer was in Waco to lay the groundwork for an upcoming visit by Quayle. Quayle and the Republican National Committee say they regret the alleged incident.

The man believed to be atop America's second largest pornographic empire has been sentenced to three years in prison for tax fraud. A federal judge in Flint, Michigan, also fined Harry Mohney 250-thousand dollars and ordered him to pay restitution in an amount to be determined in a civil proceeding.

The hit musical ''Phantom of the Opera'' is to be made into a motion picture. Warner Brothers announced yesterday that it has reached an agreement with Andrew Lloyd Webber to co-produce with him a screen version of his critically acclaimed drama. The film is scheduled to be released by Thanksgiving 1991.

BUDAPEST (MAY 2) UPI - Hungary's first freely elected parliament in 43 years held its opening session Wednesday in an emotional ceremony hailed as the ''start of a promising new age'' of Hungarian democracy.

The 386 legislators chosen in multiparty elections in March and April sang the national anthem as they took their seats in the palatial parliament building on the banks of the Danube.

''I thank providence that I was able to live long enough to see the fate of my country turning for the better,'' said Bele Varga, president of the last democratically elected parliament in 1946-47, in an opening speech.

Varga, now in his late 80s, praised the ''Russian empire'' for ending an ignominious period and allowing Hungarians to exercise their rights as a sovereign state.

He also commended the Hungarian people for their perseverance during four decades of communist rule.

Listening quietly were 24 deputies of the Hungarian Socialist Party, the reincarnation of the long-dominant Communist Party, now reduced to an insignificant minority in the parliament.

Acting President Mayas Szuros told the deputies they have a difficult task in solving Hungary's economic and environmental problems, but now at least they have the support of the people.

''This is a historic event, a turn in the power structure which designates the start of a promising new age for Hungary,'' he said.

The main tasks of the two-day inaugural session are the election of parliamentary and caucus leaders and the appointment of a commission to oversee the formation of a new government.

Also on the agenda is a bill to officially declare the failed 1956 rebellion a popular uprising. The communist regime termed it a ''counterrevolutionary'' rebellion. It was crushed by Soviet troops.

No single party won enough votes in the elections to command a majority in the parliament. But the center-right Democratic Forum, the largest party with 165 of 386 seats, is negotiating with two smaller parties to form a conservative coalition.

The liberal-social Free Democrats, the second-largest party with 92 seats, is expected to go into opposition, as is the Socialist Party.

Late Tuesday, Forum spokesman Gyorgy Csoti told a television interviewer the Forum and Free Democrats had agreed on selection of Arpad Gonczi, a Free Democrat and prominent author, as acting president until the parliament elects a new president later in the month.

#90122u0695 05/02/1990 ~United Press International

TORONTO (MAY 2) UPI - Lithuanian Prime Minister Kazimiera Prunskiene, saying her secession-minded republic has a way to bypass Moscow's economic blockade, scheduled a meeting Thursday with President Bush at the White House.

White House press secretary Marlin Fitzwater said in Washington that Bush will meet Prunskiene as ''a freely elected representative of the Lithuanian people,'' not as ''prime minister of independent Lithuania.''

The Oval Office meeting will mark the first direct contact the United States has had with Lithuania since it announced its break from the Soviet Union March 11.

Washington, seeking to get Lithuania and the Soviet Union to peacefully settle the conflict, has declined to formally recognize Lithuania's declaration of independence even though the United States has rejected the Soviet annexation of Lithuania in a secret 1940 pact with Nazi Germany.

Bush decided last week not to act against the Kremlin in response to Moscow's economic blockade of Lithuania.

Bush is scheduled to hold a summit in Washington with Soviet President Mikhail Gorbachev at the end of the month and his reluctance to jeopardize the meeting has been cited as being behind the low-key response to the embargo.

Also, U.S. officials have said the benefits to be gained from Gorbachev's long-term success in reforming the Soviet Union outweigh the immediate concerns of Lithuania.

Prunskiene was scheduled to arrive in the United States Wednesday. She returns Saturday to Lithuania.

Prunskiene said Tuesday that with political and economic restructuring, Lithuania can take advantage of its location to serve as a bridge between the West and the Soviet Union, much the way Hong Kong has done between China and the West.

''Specific cities in specific (Soviet) regions have expressed a desire to cooperate with us,'' Prunskiene told a luncheon meeting of Canadian Lithuanian businessmen and community leaders.

''The only way this (approach) can be prevented or stopped is by armed intervention, but it's doubtful any nation can solve its economic problems with armed force,'' Prunskiene said.

#90122u0749 05/02/1990 ~United Press International

(MAY 2) UPI - Indications from the Bush administration are that the hostage crisis in Lebanon will NOT be resolved soon despite the recent release of Americans Robert Polhill and Frank Reed.

The mystery factor appears to be administration doubt about Iran's motives intentions and abilities in the delicate hostage situation.

White House spokesman Marlin Fitzwater said yesterday that there's little

reason for what he called ''long-term optimism''... and added that it's up to the Iranians to make overtures as long as there are hostages.

A senior administration official says uncertainty about the precise nature of Iran's role in the hostage releases makes predictions on future releases impossible.

Bush continues to rule out any significant rewards or concessions to Iran... although he acknowledged Tehran's role in the release of Reed and Polhill.

U-S officials closely questioned Polhill and Reed during debriefing in West Germany as to the fate of the six remaining American hostages in Lebanon.

Reed's daughter says her father once saw two other U-S hostages during his more than three-and-a-half years in captivity- Terry Anderson and Thomas Sutherland. They are the longest-held of the American hostages.

Three days of talks begin in South Africa today between the white minority government and the African National Congress.

The newly legalized A-N-C is taking steps to ''eliminate tensions between black and white people'' by including blacks, whites, Indians and mixed-race ''coloreds'' in its 11-member delegation.

They will meet with reformist President de Klerk and eight other Afrikaner politicians, whose National Party rose to power in 1948 on a rigid platform of white privilege.

The agenda contains obstacles to the A-N-C's crucial participation in power-sharing negotiations that de Klerk has proposed to fashion a post-apartheid constitution.

Yesterday the A-N-C took pains to ease growing fear among many of the country's five-Million whites that they face eventual black majority rule.

Black South African leader Nelson Mandela has stressed that the multi-racial character of the A-N-C negotiating team shows the organization's desire for a non-racial democratic society.

#90122u0758 05/02/1990 ~United Press International

(MAY 2) UPI - Latvia is maintaining its course toward independence from the Soviet Union.

The Baltic republic's newly elected ''citizens' congress'' yesterday

demanded talks with Moscow to remove Red Army troops from Latvian soil.

Also, despite Moscow's warning that it will respond to moves toward independence much in the same way as it is dealing with Lithuania, Latvia's Popular Front says it's ready secede from the Soviet Union.

Front leaders say they have enough support in the Latvian parliament to push through independence legislation to join fellow Baltic republic Lithuania.

Despite economic hardships, Lithuanian nationalist leaders say they will NOT back down from their march toward freedom from Moscow.

Lithuanian Prime Minister Kazimiera Prunskiene, who is to arrive in the United States later today, says her belabored state has a way to get around Moscow-inspired shortages.

Prunskiene refused to elaborate on her plan, saving it for a meeting with President Bush tomorrow.

The White House is trying to defuse political repercussions with Moscow by declaring that Bush is meeting Prunskiene as ''a freely elected representative of the Lithuanian people,'' NOT as ''prime minister of independent Lithuania.''

A state judge in Santa Barbara, California, must decide if it's within a person's constitutional rights to decide how and when to die.

46-year-old Thomas Donaldson has filed a lawsuit in the Santa Barbara Superior Court asking that he NOT be prevented from terminating his life to have his head scientifically frozen.

Donaldson, who has a brain tumor and says he has a 40-percent chance of surviving through 1993. Given his condition, he wants his head cryonically suspended in hopes that at some future time doctors will discover a cure as well as a means of re-attaching it to a healthy body.

Up until now, the procedure has been performed after death. But Donaldson decided to get an early start since he says that controversial cases like his take years to resolve.

The cryonic suspension technique calls for the replacement of a person's bodily fluids with chemicals such as glycerol. Then the cryonic body or head is placed in a Thermos-like device and maintained at a temperature of minus 320 degrees.

To undergo such an operation, Donaldson would pay 35-thousand dollars.

#90122u0766 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The index of leading economic indicators for March advanced by a strong 0.9 percent on strength in the industrial sector after a sharp 1 percent decline in February, the government said Wednesday.

Private economists predicted an increase of about 1 percent in the barometer of future economic activity, which had been falling by a rate of 0.1 percent per month since the first quarter of 1989.

Many economists believe three consecutive monthly declines in the index signals an impending recession, but other analysts believe that rule is subject to ''false signals.''

''The sharp reversal of the February decline ... pushes down the probability of a recession to around 25 percent in the next 6-9 months,'' according to analysts at Mitsubishi Bank in New York.

The index gained a revised 0.1 percent in January, the Commerce Department said in the monthly report compiled by its Bureau of Economic Analysis.

The March gain was attributed to a strong showing in six of the 11 components that make up the index:

-Contracts and orders for plant and equipment.

-Change in sensitive materials prices.

-Manufacturers' new orders for consumer goods and materials.

-Stock prices.

-Vendor performance.

-Average weekly initial claims for state unemployment insurance.

A government spokesman said the advances in contracts and orders, sensitive materials prices and manufacturers' orders contributed to 75 percent of the monthly increase.

Three components were down:

-Building permits.

-Changes in manufacturers' unfilled orders.

-Money supply.

Two components were unchanged:

-Average workweek.

-Index of consumer expectations.

The index of leading indicators, itself, stood at 145.2 in March with 100 equal to $100 in 1982, and was up by 0.3 percent for the previous 12-month period and 0.1 percent for the six-month period, the Commerce Department said.

The composite index of coincident indicators, a monthly approximation of aggregate economic activity, increased by 0.2 percent in March to 134.2 after gaining 0.9 percent in February and falling 1 percent in January.

The composite index of lagging indicators advanced 0.8 percent in March to 120.3 after declines of 0.1 percent in February and 0.5 percent in January the department said.

The ratio of coincident and lagging indicators for March stood at 111.6, officials said.

#90122u0797 05/02/1990 ~United Press International

(MAY 2) UPI - Prices on the Tokyo Stock Exchange closed sharply higher in slow trading Wednesday, boosting the key Nikkei Average above 30,000 level for the first time in more than three weeks.

The blue-chip Nikkei Average of 225 selected issues, which rose 105.03 points Tuesday, climbed another 483.81 points to 30,173.64. The broader-based Tokyo Stock Exchange Index of all listed stocks rose 33.03 points to 2,247.81.

An estimated 480 million shares changed hands, compared with 245 million shares Tuesday. Advances widely outpaced declines 773 to 196, while 130 issues remained unchanged.

Brokers said most investors avoided trading ahead of the long four-day

holiday. Markets, banks and most major businesses will be closed from Thursday through Sunday for Golden Week which began last Saturday. Trading will resume Monday.

Dealers said a small number of buyers were able to push prices significantly higher in the thin market. Also working the in the market's favor was the strength of the Japanese yen against the U.S. dollar. The dollar eased 0.35 yen on the Tokyo Foreign Exchange, closing at 158.55 yen.

The buying centered on shares which benefit from strong domestic demand driven by a stronger yen. Many investors, however, wanted to wait for the results of U.S. unemployment figures due Friday before making a major move.

On the trading floor, textiles led the rise in all sectors. Glass, ceramic steel, machinery and railway issues all gained. Financial, shipping and shipbuilding shares made strong gains.

Some light electricals, including TDK and Sony, which made a strong showing Tuesday, lost their gains amid rumors TDK would revise its earnings outlook downward.

Elsewhere in Asia, investors snapped a four-day losing streak on the Hong Kong Stock Exchange amid strong institutional buying.

The key Hang Seng Index, which eased 4.91 points Tuesday, climbed 12.58 points to 2,957.76. Utilities gained 3.52, financials rose 15.05, industrials closed up 10.08 and properties added 29.08 points.

Volume was moderately light at 811 million shares, compared with 720 million shares Tuesday.

"Some of the institutional players thought the market mood was starting to rise and they began increasing their buying," said Albert Leun, an analyst with ChinTung Investments. "That's what got things started."

"A lot of people are still cautious, especially about what is going to happen in the U.S. market, and some profit taking pushed things down a little," Leun said.

Prices closed mixed in thin trading on the Singapore Stock Exchange. The key Straits Times Industrial Index, which fell 12.04 points Monday, eased 0.22 points to 1,458.18. The narrower All Singapore Index rose 0.27 points to 401.61.

Turnover amounted to 37.62 million shares, compared with 27.25 million shares Monday. Markets in Singapore were closed Tuesday for the May Day holiday.

Analysts said the 1,400 support level on the Straits Times Index was crucial and one commented, "If the market falls below this level, we are in unchartered territory."

With trading volume low, one dealer said, "there is a general perception that the market is not going anywhere."

United Overseas Bank led the declining issues, followed by The ASEAN Fund, Ming Court, Singapore Airlines (foreign shares) and Overseas Chinese Banking Corp.

ABN Bank led the advancing issues, followed by Development Bank of Singapore, Overseas United Enterprises, Singatronics and Singapore Land.

In Australia, stocks had their best perfomance in several weeks on the Sydney Sharemarket as the key market index climbed 1.5 percent.

The blue-chip All Ordinaries Index, which added 5.6 points Tuesday, surged 22.0 points to 1,462.6. The closely watched Gold Index gained 18.5 points to 1,449.1.

Turnover amounted to 74.4 million shares, compared with 76.1 million shares Tuesday. Advances outpaced declines 192 to 175.

Analysts said stocks rose amid gains on markets overseas and local bargain hunting. News that Australia's inflation rate climbed 8.6 percent in the fourth quarter failed to dampen investor enthusiam, they said.

Elders IXL, which has been favored recently amid worries that its leading shareholder Harlin Holdings was on the brink of liquidation, gained six cents to $1.81.

Among the blue chips, Coles Myer gained eight cents to $7.48, BTR Nylex added six cents to $2.61, Brambles climbed ten cents to $10.40 and Pacific Dunlop gained six cents to $5.64.

#90122u0829 05/02/1990 ~United Press International

KANSAS CITY, MO (MAY 2) UPI - Management at U.S. companies must become more accountable to shareholders, or investors will desert the stock market, Texas businessman T. Boone Pickens said.

"The stockholders will get fed up, and will quit investing, and will lose interest in the public market," if management is not accountable, Pickens said.

Pickens, who attempted takeovers of Boeing, Diamond Shamrock, and Newmont

Mining Co. in the late 1980s, addressed the Kansas City chapter meeting of the United Shareholders Association Tuesday night. Pickens formed the shareholders' rights association in 1986. The association's tenet is that the competitiveness of U.S. corporations depends on accountable management.

"God knows we're having tough times. We're losing market share to the Japanese and to the Germans," Pickens said. "A more competitive corporate America is a more competitive America in the global marketplace."

The shareholders' movement is an outgrowth of corporate deals during the 1980s, said Pickens, general partner of Mesa Limited Partnership. "During the restructuring of the '80s, there was a natural market response to what was happening in corporate America," he said. "Shareholders saw leadership allow companies to sell at a big discount their assets. Now they are beginning to tell corporate management someone must be accountable."

He said United Shareholders advocates - and recently persuaded ten companies, including Ford Motor Co., Westinghouse Electric, and Mellon Bank - to adopt confidential proxy voting. Confidential voting eliminates the potential for management influence in the proxy process, Pickens said.

The association also has asked the Securities and Exchange Commission to require shareholder access to the proxy, shareholder approval for adoption of entrenchment devices such as "greenmail" and "poison pills".

Pickens has taken his fight for shareholder rights to Japan, where he owns controlling interest in Koito Manufacturing, an auto parts maker allied with Toyota.

Koito posted 1988 earnings of $26 million on sales of $815 million. Pickens said he wanted to pull more profits out of the company, not take it over.

"I wasn't in Japan representing shareholders' rights," Pickens said. "I was there to make a profit. But as it unfolded, shareholders' rights became an issue."

Pickens, who owns 26 percent of Koito stock, has been denied representation on the company's board. He said Toyota, with a 19 percent share of the company, has three Koito directors.

#90122u0847 05/02/1990 ~United Press International

SAN FRANCISCO (MAY 2) UPI - A federal appeals court has reinstated antitrust and monopoly claims against Eastman Kodak Co. in a national lawsuit by indepedent servicers of duplicating equipment.

Kodak instituted a policy in 1985 of refusing to sell parts and equipment to owners of their copiers and mimeograph machines unless owners agreed not to use independent servicing firms.

Seventeen independent servicing companies from around the country sued Kodak, contending the five-year-old policy was an attempt to monopolize the market in violation of the Sherman Antitrust Act.

The 9th U.S. Circuit Court of Appeals ruled Tuesday the independent repair firms could take Kodak to trial over the issues. The court's 2-1 decision overturns a 1988 ruling by U.S. District Judge William Schwarzer dismissing the case.

Donn Pickett, attorney for Kodak, said he believes the system used by Kodak is a common business practice in the copier and business machine industry. Pickett said he could not determine whether the ruling will be appealed to the Supreme Court until he has had an opportunity to study it.

The independents, led by Image Technical Service of California, contended Kodak had freely sold replacement parts and allowed independents to repair equipment until it cut into Kodak's own servicing business. The independents charged as little as half the price of Kodak for repairs, according to the court.

Kodak began by cutting its rates in 1984 but resorted to nonsale of replacement parts to independents in 1985. The independents maintained this amounted to an illegal tying agreement in violation of antitrust law.

A tying agreement is an arrangement by one party to sell one product but only on the condition the buyer also purchase a different product, according to the court.

According to Judge Charles Wiggins, one of the evils of a tying agreement is that it creates an entry barrier for potential competitors by requiring them to enter two product markets simultaneously.

Kodak allegedly offered to sell replacement copier parts to owners only if they refused to use independent repair services or did the work themselves. Kodak maintained that it did not force owners to buy Kodak servicing in order to receive parts but only to reject independents.

Judge J. Clifford Wallace dissented from the majority, stating that while the Kodak policy may not be the least restrictive alternative, the policy was insufficient to establish liability under the Sherman Antitrust law.

The suit involved firms in New Jersey, Pennsylvania, Missouri, Illinois, Georgia, Minnesota, Colorado, New York, and California.

#90122u0917 05/02/1990 ~United Press International
(MAY 2) UPI - Police in Fort Worth, Texas, say they've recovered the bodies of two men who drowned after being swept away by high water produced by heavy thunderstorms in north Texas. Another man is missing in the same area of Fort Worth. Dozens of families in the Dallas-Fort Worth area have been evacuated from low-lying areas and numerous roads are closed because of high water.

Hospital officials in New York say a quick-thinking doctor may have saved a wounded police veteran's life by plugging a torn artery with his finger until the wound could be surgically closed. Officer Harold Ortiz, a 17-year veteran of the force... was shot in the neck and critically wounded yesterday by a man he had stopped for driving a car the wrong way on a one-way street.

Reports from Peru say self-defense patrols in the remote high Andean mountain range have uncovered two mass graves in caves containing 70 bodies. The bodies reportedly were found Monday in two mountain caves 200 miles southest of Lima. Officials are uncertain whether the corpses were victims of the left-wing Shining Path guerrillas or their opponents.

The Food and Drug Administration has approved treating chicken and other poultry with radiation to control microbes that can cause food poisoning. F-D-A officials emphasized the irradiation process does NOT pose a health threat to consumers because it does NOT make the poultry radioactive. Notice of the new treatment will be published today in the Federal Register.

A medical researcher at the University of California at San Francisco says the visions that led Joan of Arc to spark the eventual French victory in the Hundred Years' War against England probably were caused by epileptic seizures. The 19-year-old Joan... a Roman Catholic saint... was burned at the stake May 30th, 1431, for witchcraft and heresy. She claimed to have visions of angels and hear voices of saints.

#90122u0952 05/02/1990 ~United Press International

ATHENS, Greece (MAY 2) UPI - Iranian spiritual leader Ayatollah Ali Khamenei criticized the United States Wednesday and belittled those calling for direct Iranian-U.S. talks, but said Tehran would still help free Western hostages in Lebanon for humanitarian reasons.

In a speech broadcast on Tehran radio, Khamenei accused the United States of behaving arrogantly toward other countries, including the Soviet Union, and urged countries to unite against what he described as U.S. domination.

Addressing a crowd in Tehran two days after pro-Iranian Moslem fundamentalists freed American hostage Frank Reed in Lebanon, Khamenei said, ''We have already said we are willing, as far as we can, to have the hostages freed.''

But he added, this was ''not for the sake of the United States, but for humanitarian reasons.''

Sources in Tehran said Iranian officials were miffed by a State Department report including Iran in a list of countries supporting terrorism. Iran appeared angry the report was released shortly after Reed's Monday release.

The Iranian spiritual leader also criticized the U.S. military invasion of Panama and the U.S. role in Nicaragua.

He said the United States launched military attacks on small nations when it felt it could get away with it, and would have attacked Iran - ''but in the past 11 years, they could not.''

A U.S. military operation launched in 1980 to free American hostages held in Tehran ended in disaster in the Iranian desert near Tabas, he said, proving the Ayatollah Ruhollah Khomeini was right when he said, ''America cannot do a damned thing.''

A report on the speech carried on Iran's official Islamic Republic News Agency also said Khamenei criticized as either simple-minded or terrified those Iranians who argued recently for direct talks with the United States. He came down strongly on the side of hard-line clerics who oppose direct talks.

Iranian Vice President Ataollah Mohajarani said in a Tehran newspaper article last week that Iran should hold direct talks with the United States, but officials in the Iranian presidential palace said he was expressing his personal views.

Meanwhile, an Iranian Foreign Ministry spokesman reacted strongly to the State Department report saying Iran supported terrorism.

The Iranian news agency quoted the unnamed spokesman as saying the report

was meant to deceive public opinion.

''According to the ministry, to charge a country which itself has fallen victim to terrorism and has always opposed it on the ground of Islamic principles with terrorism is nothing but a move to deceive public opinion '' the report said.

''The U.S. policies towards the Third World countries, the Islamic Republic in particular, is best example of state terrorism,'' the spokesman was quoted as saying.

WASHINGTON (MAY 2) UPI - Factory orders increased 3.8 percent in March to $240.4 billion in the best showing since December 1988 on another month of strong demand for aircraft and parts, the Commerce Department said Wednesday.

The world's airlines have been scrambling to place orders for new aircraft to replace fleets of aging jetliners. It takes several years for aircraft manufacturers to produce an airplane, and an economic downturn could lead to a wave of cancellations.

The March advance in factory orders follows an increase of 1.8 percent in February and offsets a 5.5 percent plunge in January, according to the monthly report compiled by the department's Census Bureau.

Total orders for durable goods, expensive items made to last three or more years, increased 6.6 percent, while orders for non-durable goods were up 0.8 percent on strength in food and chemical products.

March orders for aircraft and parts zoomed by 63.2 percent to $14.9 billion, the Commerce Department said. Primary and fabricated metals also had strong showings in March.

Private analysts had expected an increase of between 3.5 percent and 3.9 percent in March factory orders. The overall 3.8 percent gain in March orders was the best showing since an advance of 4.7 percent in December 1988.

Not counting transportation equipment, durable goods orders were up one percent in March, the Commerce Department said. Not counting defense items orders surged by four percent for the month.

Factory shipments, meanwhile, gained 1.1 percent in March after jumping 3.4 percent in February, in the first back-to-back increases in the category since January 1989, the department said.

March inventories declined by 0.3 percent in the third decline in the last four months, another sign that businesses are keeping close tabs on the demand and manufacture of their products as the economy plods along.

Unfilled orders for March edged up 0.7 percent, with the transportation industry accounting for much of the gain, the department said. The inventory-to-shipment ratio, which tracks delivery time, stood at 1.57 in

March, the lowest figure since 1.56 in August 1989.

#90122u1018 05/02/1990 ~United Press International
(MAY 2) UPI - Severe rains in north Texas and southern Oklahoma pushed swollen creeks over their banks early Wednesday, prompting evacuation of low-lying areas, while fog shrouded New England for a second day and thunderstorms rumbled across the South.

The National Weather Service said streams and reservoirs in southern Oklahoma were in danger of flooding. Lake Texoma, a Red River resort straddling the Oklahoma-Texas border, reported damaged marinas and that waterfront homes were threatened.

The lake was expected to overflow its spillway for the first time since 1957, which could cause widespread flooding in southeastern Oklahoma, northeastern Texas and parts of Arkansas.

John Martin, the Civil Defense director for Marshall County, Okla., said, ''Unless someone turns the faucet off in the sky, we are in for a very rough time. I'd say about $100,000 for each inch of rain. It is definitely probable, without more rain, that the lake will go over the spillway.''

In the Dallas-Fort Worth area, Arlington deputy police chief Gary Shipp said an undetermined number of homes were evacuated along overflowing Johnson Creek, but that there were no reports of injuries.

''There's nobody missing that I'm aware of, no injuries that I'm aware of '' said Shipp.

In nearby Grand Prairie, two evacuation centers were opened. Most streets that cross bodies of water have been closed, said Tom Gray at the city Emergency Operations Center.

The Austin area was put under a flash flood warning after nearly 4 inches of rain inundated the area early Wednesday. Flash flood warnings were posted in several more north, east and central Texas counties.

Louisiana and Arkansas were also getting substantial amounts of rain, with some areas reporting in excess of 2 inches Wednesday.

In the West, the National Weather Service reported that coastal sections of Washington and Oregon got some drizzly rain.

California had fair skies and summery temperatures Tuesday night. Oakland rose to a record 85 Tuesday, surpassing the 84-degree mark set in 1972.

In the Midwest, Michigan and Wisconsin dropped into a spring deep freeze,

recording temperatures in the 20s and 30s early Wednesday. In Michigan's Upper Peninsula, the communities of Pellson and Gwinn sank to 26 degrees.

Missouri skies began clearing early Wednesday after the day's rain.

New England was blanketed with fog for the second straight day. Regional temperatures were higher as a high-pressure system slowly rolled in. Boston and Cape Cod had temperatures in the mid 50s. Bangor, Maine was 60 degrees and foggy.

The mid-Atlantic states were cloudy to partly cloudy overnight. Maryland and West Virginia had scattered showers and thunderstorms. Temperatures ranged from 35 in western Pennsylvania to 55 in Maryland.

Scattered thunderstorms buffeted the South. Severe thunderstorm watches were posted in northeast Mississippi, north Georgia and eastern North Carolina. The turbulence followed a hot day in many areas, with temperatures climbing to a record 90 in Atlanta. Savannah, Ga., tied its record of 94.

(MAY 2) UPI - A senior Bush administration official says the White House is unsure of what factors motivated Iran to intervene on behalf of U-S hostages in Lebanon. The official says the lack of reliable information regarding Iran's efforts prevents Washington from predicting the fate of other Western captives.

Aides to President Bush say it's NOT likely that he'll sign legislation passed yesterday by the Senate. The senators O-K'd 720-Million dollars in aid for Nicaragua and Panama but tacked on an amendment that allows Washington, D-C, to use tax money for abortions.

New York state police hope their presence in the St. Regis Indian Reservation will prevent a recurrence of violence. Yesterday, intra-tribal bloodshed between pro- and anti-gambling Mohawks left two tribe members dead.

Florida authorities say wildfires have destroyed about 75-hundred acres in and around the Everglades National Park. Firefighters are battling one large blaze and two smaller ones. The large blaze started Monday and might have been started by lightning.

First lady Barbara Bush says it's time for people to let go of their prejudices against people with AIDS. Speaking yesterday at a West Palm Beach, Florida, nursery for AIDS-infected toddlers, Bush said more people should adopt children with the AIDS virus.

The House has O-K'd legislation that would allow federal retirees to keep working on the census without losing their retirement benefits. If the Senate also approves the measure, federal retirees could work past their six-month limit to help count the population.

NEW YORK (MAY 2) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 134.10 c-lb.

Lead, common, U.S. primary producers 45.00 c-lb.; U.S. non-primary (secondary) producers 49.00-52.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $280.00-$290.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.45-$4.60 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $123.00-124.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $475.00-$476.00; dealer-approx., $468.00-$472.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $110.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $107.17 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 306.00 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 87.00-87.75 c-lb.

#90122u1050 05/02/1990 ~United Press International

TOKYO (MAY 2) UPI - Paced by growing imports, Japan's current account surplus in fiscal 1989 decreased sharply from the preceding year, marking the third straight year-to-year drop, the Finance Ministry announced Wednesday.

The ministry's preliminary data said the surplus plunged 30.8 percent to $53.50 billion, following a 8.5 percent fall in 1988 and a 10.3 percent decline in 1987. The current account covers both merchandise and service trade.

"The main factor behind the decreasing surplus was that growth of imports

exceeded that of exports, trimming the merchandise trade surplus," a ministry official said.

The trade balance shrank 26.4 percent from a year ago to $70.18 billion. Exports gained a modest 0.2 percent to $267.86 billion, while imports surged 14.9 percent to $197.68 billion, the ministry said.

In fiscal 1988, exports gained 14.5 percent to $267.36 billion, while imports jumped 23.4 percent to $172.06 billion. The invisible trade deficit decreased to $12.71 billion from $13.52 billion. Japan's overall balance of payments showed a deficit of $57.30 billion, up from $13.72 billion in the previous year, the ministry said.

In March, the last month of fiscal 1989, the current account surplus gained 29.0 percent over a year ago to $8.13 billion. The trade surplus in March grew 1.3 percent to $8.13 billion, with exports declining 1.4 percent to $25.53 billion and imports falling 2.6 percent to $17.53 billion because of very high imports levels in March 1989, the ministry said.

#90122u1074 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - The New York metropolitan area has the highest AIDS rate in the world, with nearly one of every four men between the ages 25 and 44 infected with the deadly virus, a published report said Wednesday.

The report, which will appear in the magazine Medical Tribune, was based on the federal Centers for Disease Control's survey of patients in 26 hospitals nationwide. Preliminary details of the survey were presented to a panel in Baltimore, but the full study has not been released.

In the three hospitals surveyed in the New York metropolitan area, including parts of New Jersey, the rate of patients testing positive for the AIDS virus was 8 percent.

The highest rate of AIDS infection - 24 percent - was found among men between the ages of 25 and 44, while 8.1 percent of women in the same age group tested positive for the human immunodeficiency virus, or HIV, which causes AIDS.

The rate of HIV infection in the New York City-New Jersey region ''is not only the highest in the country, it is also higher than reported in Africa '' the Medical Tribune article said.

The overall U.S. rate of HIV infection, based on the two-year anonymous survey of patients hospitalized with non-AIDS related illnesses, was 2.2

percent and the rate for adult men was 4 percent.

''There was no hospital in the nation that did not have HIV cases,'' said CDC epidemiologist Dr. Timothy Dondero.

The survey showed an increase in HIV infection nationwide, Dondero said, and contradicted other studies that showed the level of infection was decreasing, the magazine said.

The only areas to show decreases in HIV infection were the gay communities in San Francisco, Los Angeles and New York, but increases in sexually transmitted diseases among gays in those and other cities suggested a lapse in safe sex practices.

''If gay people who are infected are now relapsing in their sexual practices, that won't be reflected in current data on infection but definitely suggests we will be seeing problems down the line,'' said Dr. Paul Volberding, a professor of medicine at the University of California-San Francisco.

A recent telephone survey of 400 gay San Francisco households showed 18 percent of men had sex without a condom in the last year.

Volberding said the key to reversing the trend was to increase educational campaigns.

''What has happened to our education programs is comparable to what happened in the case of the campaign for seat belts,'' said Volberding. ''It was effective at the start and declined six months later.''

The CDC reported in February that full-fledged AIDS struck 3,837 adult women and 32,187 adult men nationwide in the last year.

#90122u1095 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The State Department confirmed Wednesday that an American citizen was kidnapped last Saturday by Colombian guerrillas in Ecuador.

The American has been identified by family members as Scott Heimdal, of Peoria, Ill.

According to Phil Covington, of the State Department's Consular Affairs bureau, the American, who worked for an Ecuadoran gold-mining company, was travelling by motorized canoe on the river Bermeja, close to the Colombian border, on the way to the town of La Punta.

A group of armed men attacked the canoe carrying Heimdal and four Ecuadoran employees of the mining company Saturday, killing one person and wounding another.

One Ecuadoran taken captive with Heimdal was later released.

Covington said the Ecuadoran military forces are searching the area for the armed men.

TOKYO (MAY 2) UPI - Japan's foreign exchange reserves fell $472 million to $73.02 billion in April for the fourth straight monthly decline, plunging to the lowest level in more than two years, the Finance Ministry said Wednesday.

The ministry does not comment on swings of the nation's reserves, which consist of convertible currencies, gold, special drawing rights at the International Monetary Fund and foreign government debt of less than one-year maturity.

Sources in the ministry, however, said active central bank intervention to sell the dollar to support the sagging yen was partly responsible for the April drop. Japan's reserves fell $6.95 billion in March, the biggest monthly drop on record.

#90122u1141 05/02/1990 ~United Press International

BUDAPEST, HUNGARY (MAY 2) UPI - The first freely elected Parliament in four decades opened its inaugural session and began to select its leaders Wednesday in a solemn ceremony hailed as the ''start of a promising new age'' of Hungarian democracy.

The 386 legislators chosen in multi-party polls in March and April sang the national anthem as they took their seats in the palatial Parliament building on the banks of the Danube.

Under an agreement announced by the two largest non-communist parties, the lawmakers were expected to elect prominent author and former political prisoner Arpad Gonczi as president of the National Assembly and acting Hungarian president.

Gonczi, who was sentenced to death following the 1956 pro-democracy uprising, is favored to be elected to the ceremonial post of president of the republic by the end of the month.

''I thank providence that I was able to live long enough to see the fate of my country turning for the better,'' said Bele Varga, president of the last democratically elected Parliament in 1946-47, in an opening speech.

Varga, now in his late 80s, praised the ''Russian empire'' for its wisdom in ending an ignominious period and allowing Hungarians to exercise their rights as a sovereign state.

He also commended the Hungarian people for their perseverance during four decades of communist rule.

Listening quietly to the speech were 24 deputies of the Hungarian Socialist Party, the reincarnation of the long-dominant Communist Party, now reduced to an insignificant minority in the Parliament.

Acting President Mayas Szuros told the deputies they face a difficult task in finding solutions to Hungary's economic and environmental crises, but said the Parliament now enjoys the support of the Hungarian people.

''This is a historic event, a turn in the power structure which designates the start of a promising new age for Hungary,'' he said.

The main tasks of the inaugural session, scheduled to last two days, were the election of parliamentary and caucus leaders and the appointment of a commission to oversee the formation of a new government.

Also on the agenda was a bill that would officially declare the failed 1956 rebellion a popular uprising. Under the former Communist rule it was termed a ''counterrevolutionary'' rebellion. The 1956 revolt was crushed by Soviet troops.

No single party won enough votes in the elections to command a majority in the Parliament. But the center-right Democratic Forum, the largest party with 165 seats, is negotiating with two smaller parties to form a conservative coalition.

The liberal Alliance of Free Democrats, second-largest with 92 seats, is expected to go into opposition, as is the Socialist Party.

Leaders of the Forum and Free Democrats - bitter rivals during the election campaign - told a news conference they have reached an agreement on the nomination of Gonczi, a Free Democrat, as National Assembly president and acting Hungarian president.

Forum leader Jozsef Antall said both parties also agreed to back a Forum member, Gyorgy Szabad, as deputy president of the legislature.

Under a complicated deal worked out between the two parties, Gonczi is

expected to be elected Hungarian president at the end of the month, at which time Szabad would be automatically promoted to National Assembly president.

''Both parties realize that in laying the foundations of Hungarian parliamentarianism there was a need for cooperation and good partnership in basic issues between the governing parties and the opposition,'' Antall said of the agreement reached late Tuesday.

Antall is highly favored to become Hungary's first democratically elected prime minister since 1947.

In a victory for the Free Democrats, the two parties also agreed to preserve a provision of the constitution that requires a two-thirds majority vote for passage of many types of legislation.

Among the kinds of bills requiring two-thirds approval are those relating to the armed forces and police, the courts, the news media and human rights issues.

HOUSTON (MAY 2) UPI - American General Corp. shareholders Wednesday defeated a proxy fight from Torchmark Corp. but American General's board of directors announced it is going to offer the entire company for sale.

"This has been a difficult decision, but we believe that it is in the best interests of all shareholders," Harold Hook, the company's chairman and chief executive officer, said in a statement.

"The board determined that the company was vulnerable to possible acquisition at a discount price, and therefore, decided to offer the entire company for sale at this time in order to realize the maximum value for all shareholders," Hook said.

"We believe the full value of the company greatly exceeds the value as reflected in the public market price for the company stock and that the company's full value is substantially in excess of the $50 per share referred to in the proposal made by Torchmark Corp. in March," the statement said.

Torchmark, an insurance company based in Birmigham, Ala., had proposed to buy American General, another insurance company headquartered in Houston, for $6.4 billion. Torchmark withdrew that offer April 2 because American General did not formally respond.

Torchmark had tried to convince shareholders to elect an independent slate of directors for American General. Proxy calculations have yet to be tabulated but American General executives said they were sure the shareholders had rejected that attempt.

The board of directors also doubled the quarterly dividend on the company's common shares to 80 cents from 39.5 cents in order to give shareholders an additional return pending the sale process. The first dividend at the new rate is payable June 1 to holders of record on May 16. The increase moved the annual dividend rate to $3.20 from the present $1.58 per share.

#90122u1189 05/02/1990 ~United Press International

WACO, TX (MAY 2) UPI - A member of Vice President Dan Quayle's advance team was relieved of his duties after it was disclosed he was being investigated in the possible sexual assault of a college student, officials said Tuesday.

Waco police and prosecutors said an investigation is underway into an allegation by a Baylor University student, 18, who claims she was sexually assaulted Sunday morning in the man's hotel room.

The unidentified man, 26, told authorities he had sex with the college freshman with her consent, said Waco police officer Lionel McGee. No charges have been filed in the case.

The man, an employee of the Republican National Committee, came ''highly recommended,'' said Leslie Goodman, a spokeswoman for the organization in Washington. The RNC said he joined the organization last week as a consultant and the Quayle advance work was his first assignment.

Members of vice president's advance team have been in Waco for several days preparing for Quayle's visit Wednesday to attend a fund-raiser for state Rep. Hugh Shine, R-Waco, the Republican candidate in the 11th Congressional District.

The man's name was withheld by the police, the vice president's office and the RNC.

''This is a most deplorable incident,'' David Beckwith, the vice president's press secretary, said in a statement. ''We extend our sympathy to the young lady, her friends and her family.

''The individual involved has been relieved of his duties. We are asking the local authorities to show no favoritism and to deal with this according to their standard procedures,'' said Beckwith.

Republican gubernatorial candidate Clayton Williams, who will appear with Quayle in Dallas on Thursday, said the Waco incident was ''completely and totally unacceptable.''

''In the last few weeks, I've had the opportunity to personally see the tragedy and pain inflicted by the horrible crime of rape,'' said Williams, who was criticized in his campaign for comparing rape to bad weather and saying women should just ''relax and enjoy it'' if it is inevitable.

Mona Palmer, a Williams spokeswoman, said, ''In the last month Clayton has met with strong womens leaders across the state and has had very direct conversations with women whose lifes have been personally touched by the tragedy of rape.''

Williams said, ''My heart aches for this young woman, for her family - for what they've gone through and the pain that lies ahead.''

Police reports indicated the advance man had been passing himself off as a Secret Service agent and the woman told police that as he assaulted her he promised her free passes to the White House.

McGee said the woman told authorities she and two friends met three advance men on the Baylor campus Saturday evening. The group went to nightclubs in Austin before returning to Waco early Sunday.

The woman told police she had not been drinking on the trip to Austin but that the advance man had. She told police she became separated from one of her friends when they returned to Waco.

At about 4 a.m. she became concerned about her friend and knocked on the man's door looking for her. McGee said the woman told authorities when she tried to leave, the man sexually assaulted her and she escaped when he went to the bathroom.

McGee said the woman said she waited more than 16 hours to report the crime because she was scared. The officer said the woman had bruises and cuts when she made her statement Sunday night.

#90122u1206 05/02/1990 ~United Press International
GENEVA (MAY 2) UPI - OPEC oil ministers began emergency bargaining Wednesday on whether the 13-member cartel should voluntarily curb excess oil production as a way to strengthen seriously depressed world prices.

Ministers adjourned a meeting earlier in the day after only 45 minutes when the Iranian oil minister, Gholamreza Aghazadeh, failed to show, but he was optimistic about an agreement when he arrived for a second, evening meeting.

''I have had many consultations with other ministers,'' Aghazadeh told reporters as he entered the conference hotel. ''My feeling is that the atmosphere is very positive.''

Algerian oil minister and OPEC President Sadek Boussena said the cartel wants to reduce production by 1 million-1.5 million barrels a day in May and June to meet the official ceiling of 22 million barrels, hoping reduced supplies will dry up the oil glut and drive prices higher.

The quotas for the second half of the year will be set at a meeting in late June.

Widespread violation of individual quotas - especially by the Persian Gulf states of Kuwait, United Arab Emirates and Saudi Arabia - has sent the average OPEC crude oil price plunging to $15.50 per barrel.

That is sharply below the $18 ''reference'' price set by the 13-member Organization of Petroleum Exporting Countries for the first half of 1990 and based on a ''basket'' of seven different qualities.

''We are all agreed that actual production must be brought down,'' a UAE

delegate told reporters.

Bargaining over who should cut production and by how much took place in a conference room on the sealed-off top 18th floor of the closely guarded Intercontinental Hotel.

Combined OPEC production is about 23.5 million barrels a day, or 1.5 million barrels above the official ceiling. OPEC pumps more than a third of the world's oil and attempts to control world prices by limiting production.

But Kuwait and the United Arab Emirates, with excess production capacity, have flagrantly violated their assigned quotas. Saudi Arabia has raised its daily production by about 600,000 barrels over its 5.4 million-barrel quota to maintain its 24.5 percent share of cartel production.

The OPEC target ''reference'' price of $18 a barrel - based on the value of seven poor to top quality crudes - plunged as a result of the increased production, to as low as $15. It currently is at $15.50 a barrel.

Top members of various delegations said they were ''reasonably confident'' that production quota violators would agree to stop cheating, at least temporarily.

Officially, the emergency session involved the eight-member Market Monitoring Committee, which is comprised of the ministers of Algeria, Indonesia, Iran, Iraq, Kuwait, Nigeria, Saudi Arabia and Venezuela.

Ministers of the other five members - Ecuador, Libya, Qatar, United Arab Emirates and Gabon - also were in Geneva so that the meeting could be turned into the full ministerial council required to make important decisions.

OPEC officials said they thought the emergency session would last two days although some delegates said haggling over who should cut, and by how much, could take several days.

#90122u1209 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - A painting by a Spanish-born Mexican woman who died in 1963 set a new world auction record for a work by a Latin American artist.

''Toward the Tower,'' a surrealist work by Remedios Varo, who died in 1963 at the age of 62, was sold at Christie's auction house Tuesday for $825,000, breaking the record for a Latin American artist. The previous record of $715,000 was set by Fernando Botero's ''Protestant Family,''

purchased at Christie's last November by entertainer Andy Williams.

The Varo oil, painted in 1961 and possibly a religious satire, depicts a Roman Catholic nun on a bicycle leading a group of hypnotized novices out of a beehive-like convent. It was consigned to sale by an anonymous Mexico City art collector and purchased by an unidentified bidder.

The second highest price in the sale was $660,000 for an untitled surrealist convas by the Chilean artist, Matta, purchased by an unidentified European dealer. Another European dealer paid $605,000 for abstract Cuban artist Wilfredo Lam's ''Green Tomorrow.''

#90122u1222 05/02/1990 ~United Press International

(MAY 2) UPI - Oil prices surged in early trading Wednesday on market anticipation that a Geneva meeting of OPEC oil ministers will curb overproduction that recently caused rates to sag.

But U.S. crude failed to penetrate a key resistance level at $19.10 a barrel and is not expected to move above this point until the 13-nation Organization of Petroleum Exporting Countries, which began an emergency meeting in Geneva Wednesday, actually agrees on cutbacks.

The benchmark West Texas Intermediate crude for June delivery was up 24 cents to $19.05 a barrel in morning trading on the New York Mercantile Exchange, after briefly touching the $19.10 level. It opened at $18.95 a barrel.

On the U.S. Gulf Coast cash market, prompt delivery WTI rose 35 cents to $19.05 a barrel. On the European spot market, Britain's widely traded North Sea Brent was up 20 cents to $16.70 a barrel. The UAE's Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - was trading at $14.95 a barrel, a 22 cent gain.

Mary Haskins of Paine Webber Inc. in New York said prices were rising because of the expectations of production cuts brought about by statements being made in Geneva by OPEC oil ministers.

She said a key feature of the early Merc trading was the market's inability to move up through the $19.10 a-barrel barrier. "I don't think we'll be able to penetrate that level until we get something specific from OPEC," the trader said.

Iranian oil minister Gholamreza Aghazadeh told reporters in Geneva that he believed on the basis of "many consultations" by telephone beforehand that there would be agreement on curtailing excess production.

OPEC pumps more than a third of the world's crude oil and attempts to support higher world prices by limiting its output. But Kuwait and the United Arab Emirates, with excess capacity, have flagrantly violated their assigned quotas, creating a world glut in crude.

As a result, Saudi Arabia has raised its daily output by about 600,000 barrels over its 5.4 million-barrel quota in order to maintain a 24.5 percent share of the cartel's output.

Their overproduction has resulted in current cartel output of more than one million barrels over the 22 million-barrel daily limit and has played a major role in the recent plunge in oil prices, which saw crude lose 14 percent of its value in the early part of April.

Unleaded gasoline for June delivery contract was up 22 cents on the Merc to 61.25 cents a gallon. On the New York Harbor spot market, prompt delivery gasoline was being quoted at 61.25 cents a gallon, a gain of 45 cents.

Heating oil for June delivery climbed 0.53 cents to 53.50 cents a gallon on the Merc, while product for prompt delivery was up 0.25 cent to 58.75 cents a gallon on the New York Harbor cash market.

VUNG TAU, VIETNAM (MAY 2) UPI - Vietnam's communist regime touts its promising South China Sea port as an attractive resort and potential boom town, but there is no future in the city for 18-year-old Mai Si Ni, a black Amerasian.

On Tuesday, Buddha's birthday, the young man who looks not at all Vietnamese was working as a laborer for the equivalent of just over $1 a day.

Life in Vung Tau has been hard for Mai, whose Vietnamese mother has told him his father was a military police officer in the U.S. Army.

''In school, many of the children didn't like me because I don't look like them,'' he said.

The other youngsters called Mai ''my den,'' which means black American.

Mai said his only close friend is the only other black Amerasian he knows of in Vung Tau, 80 miles southeast of Ho Chi Minh City on the South China Sea.

Mai, who like practically all other Amerasians in Vietnam hopes to go to the United States, was repairing a road leading up to a posh villa once used by Emperor Bao Dao, as well as the French and Americans.

The guide at the villa was Le The Phuong, who said she spoke excellent Russian and practically no English.

''I am going to study English because I hope the Americans will come back '' she said.

A lot of Americans who would like to do business in Vietnam cannot, because the U.S. economic embargo against Vietnam is still in effect 15 years after the end of the war.

The embargo, slapped on North Vietnam in 1964 and extended to cover unified communist Vietnam after the south fell on April 30, 1975, prohibits American companies and citizens from carrying out any commercial transactions in this country.

So the United States has missed out on extensive gas and oil exploration off the coast of Vung Tau. Although American firms discovered Vietnam's offshore oil in the waning days of the war, that bonanza now probably will

go to companies from France, Britain, the Netherlands, Sweden, Belgium, Canada and India.

American companies also have lost out on Vietnam's tourism. One of them went out of business after being charged last year with violating the ''trading with the enemy act'' for organizing tours to Vietnam.

Vung Tau boasts one of Vietnam's most beautiful beaches, but on Buddha's birthday, only a few Russian family groups were enjoying it.

One of the few other foreign tourists in town was Paul Mayer, an Austrian restaurateur on an offbeat vacation from his home in the Philippines.

''It's boring here,'' Mayer said. ''Now that I've seen a Vietnam resort, thank God I don't have to see another one.''

Vung Tau remains a lovely place for many Vietnamese as an oil exploration port and resort holding the promise of prosperity to a poverty-ridden nation.

But Vung Tau is hell for a black Amerasian youngster with a moral claim on a better life in the United States.

-30- 3099

#90122u1275 05/02/1990 ~United Press International

PHILADELPHIA (MAY 2) UPI - Hundreds of Temple University students tried Wednesday to ''bring the campus to its knees'' by blocking streets in protest of the school's reaction to a campus brawl the students said was racially motivated.

Between 500 and 600 student-members of Concerned Black Students began sitting in the middle of four streets leading to the campus at 10 a.m., the deadline they set for the university to meet their demands.

''We said at 10 o'clock we would bring the campus on its knees,'' student leader Eddie Glaude said to the protesters. ''This requires discipline and it requires heart.''

The students demanded a meeting with Temple President Peter Liacouras to press their demands. School officials said they were trying to arrange the meeting.

Liacouras announced Tuesday that five campus police officers and 10 students would be disciplined following a brawl last Thursday in which black students said they were beaten by white campus police.

The incident began when several windows and a door at the predominately

white Phi Kappa Psi fraternity were broken. Fraternity members began chasing a group of black students they believed to be the vandals.

A brawl broke out and university police took eight students into custody. Eleven others were injured.

The black students said the officers used undue force and treated the blacks differently than the whites.

Liacouras said Tuesday school officials interviewed 78 persons in their investigation and found ''plenty of provocation and ... plenty of blame to be spread around.''

Liacouras said the students involved face penalties ranging to expulsion and the officers face sanctions ranging to termination.

He also suspended the fraternity until the investigation was completed and said a private criminal complaint would be lodged against one officer. University police also will receive additional training in cultural sensitivity, conflict resolution and crowd control, school officials said.

But the students were not satisfied and said Liacouras should have consulted them about the proper disciplinary action to take against the officers and students.

Student leader Eric Davis demanded the firing of campus security chief Charles Bush, even though Bush was not one of the five officers charged with violating work rules.

The student also demanded a formal public apology from the university, reassessment of campus police training and mandatory classes on interracial relations.

#90122u1309 05/02/1990 ~United Press International

COLUMBIA, SC (MAY 2) UPI - Soul singer James Brown's plan to make his first concert appearance since leaving prison for a work release job was torpedoed Wednesday by state corrections officials, who had not been advised about the planned charity gig.

Corrections Department spokesman Francis Archibald said officials were more than a little surprised Wednesday to see news reports detailing Brown's May 16 concert date in Charleston.

''That performance was not approved by us and will not be approved,'' Archibald said. ''This looks like a commercial endeavor on the part of Mr. Brown and some of his associates ... and does not fall within the scope of his job.''

Brown, 56, took his new job as an outreach counselor with the Aiken and Barnwell counties Community Action Commission last month after serving nearly 16 months in prison for trying to run down police officers during a September 1988 car chase that criss-crossed the Georgia-South Carolina border.

Archibald said the commission, which works with the homeless and poor, was advised previously that concert appearances would not be permitted while Brown remained in the work release program.

''We're going to inform them once again that this type of activity is not authorized and cannot be authorized at the present phase of Brown's incarceration,'' he said.

Commission officials were not immediately available for comment.

Tickets for the Charleston concert were to go on sale Wednesday at $20 apiece - proceeds were to go to the Community Action Commission - but the decision by the Corrections Department changed that.

''We are going to try to work something out where he can do the concert in Aiken,'' said Skip Kelly, an associate producer with On the Potomac Productions of Washington, D.C., which is developing a television special on Brown's life. ''We're exploring all our options at this point.''

Film of the Charleston concert was to be used in the retrospective, which

is to include footage from Brown's days as a prison inmate. On the Potomac hoped to air the program this summer and planned to beam the concert live by satellite to Europe.

Promoters said artists already signed up for the Charleston show, billed as ''James Brown and Friends,'' included Gladys Knight, Little Richard, Heavy D and the Boyzz and Jermaine Jackson.

The incident that landed Brown in prison began Sept. 22, 1988, when he burst into an Augusta, Ga., office building he owned and began waving a shotgun at people attending an insurance seminar. Police said Brown apparently was angry that someone had used his private bathroom.

The ''Godfather of Soul'' then drove into South Carolina, where he tried to run over officers who stopped his pickup truck. The officers shot out its tires but Brown was able to drive back into Georgia on the wheel rims before he was arrested.

Brown, known for such hits as ''Please, Please, Please,'' ''It's a Man's World,'' ''Papa's Got a Brand New Bag'' and his 1987 Grammy winner ''Living in America,'' has denied having a drug problem. But he tested positive for PCP, also known as ''angel dust,'' after the incident and pleaded no contest to possession of the same substance following an earlier run-in with authorities in Aiken County.

Before his imprisonment, Brown was well known to authorities in both Georgia and South Carolina. Officers were called to Brown's Beech Island, S.C., home twice in response to reports of violent confrontations between the singer and his wife.

Brown, who is serving concurrent sentences from the two states, will not be eligible for parole in South Carolina until May 1991 and in Georgia until March 1992.

South Carolina prison officials, however, said his work release restrictions could be eased in a matter of months, allowing him to possibly live at home while continuing to work for the Community Action Commission.

Brown spends his nights and weekends at the minimum-security Lower Savannah Work Center in Aiken.

WASHINGTON (MAY 2) UPI - The United States offered China the opportunity to buy up to 2 million metric tons of wheat at subsidized prices Wednesday the third offer of cut-rate prices in five months.

China, one of the world's largest wheat producers, also is one of the two largest wheat importers. Efforts to boost domestic production have been outstripped by population growth and increased popularity of wheat products.

The wheat was offered through the Export Enhancement Program, the major U.S. export subsidy program. Under it, traders are given bonus amounts of surplus grain if they lower their prices to make a sale to a targeted country. Sales are made at world prices.

Beijing has purchased 5.7 million tons of U.S. wheat for delivery this marketing year, which ends May 31. It already has ordered 1 million tons of wheat in the new marketing year.

Agriculture Department analysts have estimated China will buy 13.5 million tons of foreign-grown wheat this marketing year, meaning a U.S. market share of 42 percent. The United States supplied half of China's imports in the 1988-1989 marketing year.

U.S. officials discouraged subsidized sales for several weeks following China's bloody crackdown on pro-democracy demonstrators in June. However, there were no restrictions on agricultural trade.

On Dec. 7, after China used up an existing EEP offer, the Agriculture Department offered an additional 1 million tons. In February, another 1 million-ton offer was made.

There are are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds.

#90122u1340 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - The family of the black teenager killed in an allegedly racially motivated attack in Brooklyn appealed for calm

Wednesday as the murder trial of two suspects in the slaying neared an end.

But Moses Stewart, father of slain teenager Yusuf Hawkins, criticized the ''open racism'' of witnesses to the killing in the Bensonhurst neighborhood who, he said, never came forward to testify in the case.

''These are people who show no concern for human life,'' he said at a news conference at Harlem's historic Apollo Theater. Bensonhurst, he said, ''is full of a lot of people who are not sympathetic for the black community, for the black people.''

Hawkins, 16, was shot and killed after being chased by a group of white youths who allegedly whipped themselves into a frenzy over rumors that blacks were coming to the mostly white neighborhood. Hawkins had come to the neighborhood with three friends to look at a used car.

The Aug. 23 killing inflamed racial tensions citywide and sparked a series of protests, some of them violent.

Stewart, accompanied by the Rev. Al Sharpton, issued a plea for an ''intelligent and strategic'' response from the black community when the verdict is announced, possibly as soon as next week.

Sharpton, a black civil rights activist who has often acted as an adviser to the East New York family, said he expected non-violent demonstrations after the verdict is announced.

''Despite what the verdict comes next week, we don't want Yusuf Hawkins' name tainted with aimless violence,'' he said.

During deliberations in the 1987 trial of four youths charged in the Howard Beach racial killing, black activists, including Sharpton, staged a massive demonstration that brought service on subway lines to a halt and stalled rush-hour traffic.

Closing arguments were expected to be heard next Tuesday in the trial of the first two defendants in the case: Keith Mondello, 19, the accused ringleader of the attack, and Joseph Fama, also 19, the alleged triggerman.

Fama and Mondello are both charged with second-degree murder and a variety of other charges stemming from the attack on Hawkins last Aug. 23. Six other young men from Bensonhurst will be tried later.

Sharpton said he could not predict the result of the trial, but did not have high hopes for a guilty verdict, saying the prosecution was ''limping towards the finish line.''

''Our feeling is it was not the prosecution alone that was responsible for

the weakness of the case, but also the people of Bensonhurst,'' he said.

He denigrated two important prosecution witnesses, Frank Tighe and Gina Feliciano, as ''a psychotic and a drug addict.''

Tighe, the only witness who testified he saw Fama shoot Hawkins, admitted on the stand that he once had hallucinations that helicopters and submarines were controlling him.

#90122u1350 05/02/1990 ~United Press International

BUENOS AIRES, ARGENTINA (MAY 2) UPI - Argentine police were to hand over accused Nazi war criminal Jose Franz Leo Schwammberger to West German officials Wednesday afternoon at an international airport, a West German Embassy spokesman said.

Schwammberger, 78, accused of murdering hundreds of concentration camp prisoners with his bare hands, was to leave with a team of security officials and Stuttgart prosecutor Christian Holscherl on an afternoon Lufthansa flight from Ezeiza airport to Frankfurt, Germany.

''Schwammberger is the first war criminal extradited from Argentina to West Germany,'' the Embassy spokesman said. ''It was a long, complicated case.''

Schwammberger was arrested in a rural area of Argentina on Nov. 13, 1987, on a warrant from the Stuttgart federal court.

Argentina does not have an extradition agreement with West Germany but prosecutors argued that Schwammberger illegally obtained Argentine citizenship by hiding his arrest record.

They argued that, because of the technicality, he was not an Argentine and could be deported.

Schwammberger's lawyers, who said he is innocent of the charges, asked an Argentine appeals court and the Supreme Court to reject extradition but both the courts ruled against him.

Schwammberger is believed to have fled to Argentina in 1948 after escaping from an Allied detention camp, where he is believed to have signed a confession admitting that he murdered 35 prisoners at the Przemysl concentration camp in Poland and kept their belongings.

The Wiesenthal Center in Los Angeles, Calif., which documents the holocaust, listed Schwammberger as one of the world's 10 most wanted Nazi war criminals and financed the travel of witnesses to Argentina to testify

against him.

He is accused of murdering and torturing hundreds of prisoners when he was commander of the Przemysl and Mielec concentration camps in Poland.

West Germany also asked in 1985 for the extradition of accused war criminal Walter Kutschmann, who was arrested in a Buenos Aires suburb in 1985. But he died before judicial proceedings could be completed.

Schwammberger was reportedly suffering from heart and nerve ailments but the West German Embassy spokesman said he was ''perfectly fit to travel.''

(MAY 2) UPI - The government says the index of leading economic indicators surged ahead in March by nearly one full percentage point. Federal economists say the turnaround from declines in January and February was largely due to strength in the industrial sector. The March reversal may placate some economists who believe three consecutive monthly declines in the index forebodes a recession. Analysts at New York's Mitsubishi Bank say March's gain reduces the probability of a recession to about 25 percent in the next six to nine months.

The wife of newly freed U-S hostage Frank Reed says her husband is beside himself with anger because of the length of time he was held against his will and because other captives have NOT been freed. Fahimeh Reed says her husband thought he was among the last hostages to be released. She also says that during his 44-month captivity, Reed at times was held with five or six other hostages.

The U-S ambassador to Japan says the Bush administration must maintain constant pressure on Tokyo to make significant progress against the U-S trade imbalance with Japan. Michael Armacost says the two sides have made ''great headway'' in reducing Japanese trade barriers. But he warns that the United States must NOT become complacent with the recent positive developments with Tokyo. Last week, President Bush decided NOT to list Japan as a U-S trade foe.

Lawyers for former Panamanian dictator Manuel Noriega say they are NOT sure if their client received a copy of a letter sent to him by jailed Colombian drug smuggler Carlos Lehder . Lehder wrote and urged Noriega to plead guilty. He also reminded him of the Latin American drug traffickers he turned in to the U-S government as Panama's chief executive. Lehder is serving a life term plus 135 years at the federal jail in Marion, Illinois.

(MAY 2) UPI - Nearly three-dozen AIDS activists were arrested yesterday when they forced their way into immigration offices in Los Angeles and San Francisco. The demonstrators- members of the group Stop AIDS Now Or Else- say they briefly occupied I-N-S offices in both cities to protest laws that bar foreigners with the AIDS virus from U-S travel. Authorities released those arrested after issuing them citations for disorderly conduct.

A former Reagan administration official says Ronald Reagan never used the Iranian hostage crisis for personal political gains. Richard Allen yesterday denied charges that Reagan-Bush campaign officials promised weapons to Iranian representatives if they'd stall the release of 52 U-S hostages until after the 1980 presidential election. Allen referred to claims made by a self-professed secret agent being tried for perjury in Portland, Oregon.

Senior members of various OPEC delegations at an emergency meeting in Geneva say they're confident that the cartel's larger member-states will voluntarily stop overstepping production quotas. Currently, OPEC exceeds its daily production quota of 22-Million barrels a day by some one-and-a-half-Million barrels. The quota cheating has produced a glut on the international market and lowered the price of low-grade crude to 15 dollars 50 cents a gallon.

Several leading American film directors have joined together to form an organization designed to preserve old movies. George Lucas, Steven Spielberg and Martin Scorsese say they hope to raise 30-Million dollars for The Film Foundation. The group plans to used funds to restore old movies. Scorsese says that half of the U-S movies made prior to 1950 have deteriorated beyond repair because they were made with nitrate cellulose.

#90122u1377 05/02/1990 ~United Press International
DAMASCUS, SYRIA (MAY 2) UPI - Egyptian President Hosni Mubarak arrived Wednesday on the first visit to Syria by an Egyptian leader in 12 years, and immediately held a lengthy private meeting with Syrian President Hafez Assad.

Syrian political sources said that, during his discussions with Assad, Mubarak would bring up the question of Syrian rapprochement with Iraq.

They said if Mubarak could manage to persuade Assad to attend an Arab summit which Palestine Liberation Organization chief Yasser Arafat has proposed for mid-May in Baghdad, it would mark a new chapter in troubled Syrian-Iraq relations.

Diplomats pointed out, however, that even Mubarak has not confirmed whether he will attend the Baghdad summit, saying he will have to carefully study the agenda first.

Assad and the entire Syrian Cabinet stood on the airport tarmac to welcome Mubarak and his delegation. The ceremony was broadcast live on state-run Syrian television, an indication of the importance Syria was attaching to the visit.

Arafat has called for the emergency summit to discuss pan-Arab action on the migration of Soviet Jews to Israel and the occupied territories. Arab states have expressed fears that the migration may reduce chances of winning the creation of a Palestinian state in the territories.

But Egyptian Foreign Minister Esmat Abdel-Meguid conceded to reporters after Mubarak's first round of talks with Assad that the two leaders still had to iron out difficulties that he did not specify.

''We are all for Arab solidarity ... but we are certainly aware of the difficulties,'' Abdel-Meguid said.

Syrian Foreign Minister Farouk El Shara said, meanwhile, that the issue of the Israeli-annexed Golan heights would have to be settled as part of any comprehensive Arab-Israeli peace settlement.

Mubarak's arrival in the Syrian capital symbolized an end to the sometimes bitter feud between the Syria and Egypt over Cairo's Mideast policies, which led the late Egyptian leader Anwar Sadat to sign a peace treaty with Israel in 1979.

It also came at a time when the Soviet Union has signaled it is no longer able to bankroll Syria's avowed aim of strategic parity with Israel, as well as the return of radical Arab states such as Syria and Libya to the mainstream Arab fold.

Mubarak arrived in Damascus at Assad's invitation three days after the Syrian leader returned from important talks in Moscow with Soviet leader Mikhail Gorbachev.

Assad, whose country is formally still at war with Israel, restored diplomatic ties with Egypt last December, and last met Mubarak in Libya last month at a meeting hosted by Libyan leader Muammar Gadhafi. The Syrian leader, in an apparent change in policy, also indicated last month that he was prepared to hold talks with the Jewish state over the Golan Heights.

Egypt has represented the PLO in efforts over the past nine months to convene the first-ever Israeli-Palestinian dialogue, but Israeli caretaker

Prime Minister Yitzhak Shamir this week rejected the U.S.-sponsored peace plan.

Arafat, during talks earlier this week with Mubarak in Cairo, called on the Egyptian leader to launch a diplomatic and economic boycott of Israel over the migration issue. But Mubarak apparently decided against such a policy for the moment.

#90122u1379 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - A dentist who recently devoted her career to treating AIDS patients was sentenced Wednesday to up to four years in prison for burglarizing apartments to support her drug habit.

''I feel terrible for the people I have hurt in the past and hopeful for those I can help in the future,'' Marsha Cohen, 35, told Judge Joan Sudolnik at state Supreme Court in Manhattan.

Cohen, who has undergone drug and alcohol rehabilition, told the judge she was sorry she broke into three apartments and stole credits cards from another person.

''It's only through recovery that I came to grips with the horror of what I did to others,'' Cohen said.

But Sudolnik called Cohen's crimes ''violent felonies'' and sentenced her to a mandatory minimum of 18 months to four years in prison for the three burglary convictions.

Sudolnik also sentenced her to one to three years for two possession of stolen property charges. All sentences will be served concurrently.

''Even if people do not feel safe on the streets, they ought to feel safe in their own homes,'' Sudolnik said.

Cohen, who has spent 23 months in jail, could serve only six months in prison before she is released on a work release program.

Defense attorney Peter Neufeld, in pleaing for leniency, said any time behind bars is a waste for the dentist who treats AIDS patients, many of whom have been turned away by other doctors.

Cohen began treating AIDS patients and other Medicaid patients after her third arrest in 1988. She treats about 20 people each day, about a third of them HIV-positive, Neufeld said.

But the prosecutor said Cohen had the chance to avoid the mandatory prison

term by pleading guilty to a lesser charge in a plea bargain. Instead, she chose to go to trial and was convicted by a jury, said Assistant Manhattan District Attorney Donna Henken.

#90122u1404 05/02/1990 ~United Press International

CAPE CANAVERAL, FL (MAY 2) UPI - An unspecified ''medical condition'' threatening to bar a scientist from the shuttle Columbia's May 17 launch is a minor complaint that appears to be clearing up, the astronomer's father said Wednesday.

''We think it's going to be OK but we won't know for sure for a few more days,'' said Rodney Durrance, whose son, Samuel, is scheduled to blast off aboard Columbia. ''We were concerned that Sam might not get a chance to fly. You bet we were. But that's all I can tell you.''

Columbia and a seven-member crew are tentatively scheduled to take off at 12:45 a.m. May 17 to carry a suite of telescopes into orbit to study ultraviolet and X-ray radiation from deep space that is blocked by Earth's atmosphere.

At the controls will be commander Vance Brand, 59, and co-pilot Guy Gardner, 42. Their crewmates are John ''Mike'' Lounge, 43, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 38, and Samuel Durrance, 46.

Last week, shuttle program chief Robert Crippen announced that Durrance had developed an unspecified ''medical condition'' that could bar him from the mission.

Durrance's backup, astronomer Kenneth Nordsieck, replaced his colleague Saturday during a critical dress-rehearsal countdown at the launch pad, fueling speculation Durrance would be bumped from the flight after more than six years of training.

But Durrance's father said Wednesday his son's condition, whatever it is, had improved.

''The situation was minor, it's cleared up,'' Rodney Durrance said by telephone from his home in Lakeland, Fla. He would not say what was bothering his son.

At a morning news conference to outline the goals of the mission, flight director Gary Coen would not speculate on whether Durrance would be cleared to fly, saying only that ''the medical folks are evaluating his status daily'' and ''they are optimistic.''

Sources have said NASA managers expect to make a decision by the end of the week, before a formal ''flight readiness review'' begins Monday at the Kennedy Space Center.

Parise and Durrance are the first non-astronauts assigned to a shuttle flight since New Hampshire schoolteacher Christa McAuliffe and satellite engineer Gregory Jarvis blasted off on the ill-fated shuttle Challenger's final voyage Jan. 28, 1986.

The only time an astronaut was bumped from a flight so close to launch came in 1970 when Ken Mattingly was taken off the crew of the Apollo 13 moon mission because he was exposed to German measles.

Columbia's seven-member crew is scheduled to work in two shifts around the clock throughout the upcoming mission to operate a battery of telescopes in the shuttle's cargo bay that were built to study ultraviolet and X-ray radiation.

The mission officially is scheduled to last nine days, although Cohen said the flight would be extended to 10 days if the shuttle has enough electrical power.

Data from Columbia's flight will complement that from the Hubble Space Telescope launched last week by Discovery, which is designed to study the universe in visible light.

Other NASA satellites scheduled for launch this decade include large gamma ray, X-ray and infrared telescopes in a major American effort to explore the universe across a variety of wavelengths.

#90122u1423 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - R.H. Macy & Co. said Wednesday it reduced its loss for the third-quarter ended Apr. 28 from a year earlier, when the department store chain posted a $64 million deficit.

In a letter to investors, Macy's said audited third-quarter results would not be available until mid-June, but indicated sales in the quarter were essentially flat at $1.5 billion, reflecting reduced promotional activities.

Macy's said it expected its performance in the fourth-quarter to mirror the preceding quarter, even though it plans fewer storewide promotional events in the final period.

Macy's, which operates three specialty store units in addition to its four regional Macy's divisions, was taken private four years ago in a $3.5

billion management-led leveraged buyout.

#90122u1430 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The American Society of Mechanical Engineers Wednesday said it is introducing a program to help stem the flow of counterfeit and substandard screws, bolts, washers and other fasteners entering the U.S. market.

The Fastener Accreditation Program should help fastener users to determine if they should order products from certain manufacturers, suppliers and distributors, the ASME said.

Under the program, a fastener manufacturer, distributor or supplier to gain accreditation must submit to an on-site review of its quality assurance manual and successfully demonstrate implementation of the manual to an ASME survey team.

If after review the survey team determines that the company has provided evidence that a quality control system has been applied to the construction of fastener products, the ASME will loan the organization a certificate of accreditation.

The accreditation will be for three years, during which the ASME monitors the company and checks for alleged violations. Following the three year-term, the company would be reevaluated.

The association said that millions of counterfeit fasteners have cracked, sheared or otherwise failed in helicopters, trucks, bridges, nuclear power plants, coal mines, and tanks and other equipment.

Several deaths, numerous accidents, heavy damage to equipment, and costly repairs have been traced to substandard fasteners, many of which are manufactured outside the United States, the ASME said.

#90122u1443 05/02/1990 ~United Press International

WIESBADEN, WEST GERMANY (MAY 2) UPI - American Frank Reed said Wednesday he was held with four other Western hostages - including two Americans - at times during his 44 months in captivity in Lebanon and was ''very, very angry'' to learn they remained in captivity.

''For God's sake, it's nearly the sixth year for these men,'' he said in an apparent reference to Americans Terry Anderson and Thomas Sutherland, both kidnapped in 1985.

Iran, meanwhile, said it would keep working to free Western hostages in Lebanon held mostly by pro-Iranian Moslem groups, despite a recent State Department report listing Iran among terrorist states. Sources in Iran have said it was awaiting a gesture from the Bush administration to reciprocate for the release of Reed and Robert Polhill, who was freed April 22.

Reed was released by Moslem extremists in Lebanon Monday and arrived in Wiesbaden from Syria Tuesday. He said he had spent two years with Anderson the Associated Press bureau chief in Beirut, and Sutherland, a professor at American University in Beirut.

The 57-year-old lecturer also said he spent almost three years either in the same room or building with London journalist John McCarthy and Brian Keenan, a schoolteacher with dual British-Irish citizenship.

''I can assure you John and Brian are alive and well,'' said Reed, adding he had shared the same room with the two British hostages since October.

''I tell you I am very, very angry that Anderson and Tom are not free,'' Reed told journalists during an impromptu news conference from the balcony of the U.S. military hospital in Wiesbaden. ''I am very, very angry that John and Brian are not free. These are the only people I knew.''

''I am embarrassed that I'm out before they are,'' said Reed, his beard shaved off and wearing a pale blue robe. He was flanked by his Syrian-born wife,Fahimeh, and his 9-year-old son, Tarek, on the balcony of the hospital where he is undergoing medical tests and intelligence debriefing.

Previous reports had indicated several hostages have been held in separate rooms of the same building in southern Beirut and regularly moved together. Intelligence officials believe the hostages are held by various clans of the Iranian-backed Hezbollah group.

''I have not seen Tom and Terry for a while,'' Reed said, adding he last saw Sutherland ''a year ago last February.''

Anderson, 42, is the longest held Western hostage; he was kidnapped March 16, 1985, in Beirut. Sutherland, 58, a Scottish-born American and dean of American University of Beirut's agriculture school, was seized June 9, 1985, in Beirut.

Keenan was an English teacher at the American University of Beirut when he disappeared April 11, 1986, in Beirut. McCarthy, a reporter for British Worldwide Television News agency, was kidnapped April 17, 1986, in Beirut.

The four are among the six Americans and 10 other Westerners believed to remain captive in Lebanon.

Reed, 57, contacted relatives of McCarthy and Keenan Wednesday, and officials said he was also trying to contact the families of U.S. hostages.

A U.S. official said hostages freed earlier had contacted the families of men they were held with, adding ''That often helps the families.''

Reed, an educator from Massachusetts, was kidnapped in Beirut Sept. 9, 1986 and has said he was blindfolded much of his time in captivity.

The U.S. government has thanked both Iran and Syria for their heldp in winning Reed's release Monday. He followed the same route as Polhill did just over a week earlier, being driven by Syrian officials from Beirut to Damascus and then flown to Rhein-Main.

A spokesman at the U.S. military hospital said Tuesday initial checks on Reed showed ''no major medical problems'' and he'd probably stay a few days more.

''I'd like to stay another week or two, but they want me out of here by Friday,'' Reed joked with reporters. ''It's not a very good place. I don't recommend it.'' But he quickly added, ''The folks here have been terrific.''

Earlier, his wife had told reporters Reed was angry over the amount of time he and others were held. Asked if he was upset at the Bush administration, she said, ''He's very angry at everybody who should have done something. ... He did not specify who.''

Reed himself, when questioned by reporters, said he was initially mad at the official U.S. hostage policy, but that this was no longer the case.

''I'm feeling good, a little tired ... but I'm OK,'' he said, smiling. He blew kisses as he first came on the balcony amid cheers from onlookers.

A U.S. official said Reed was in good spirits, but was still ''decompressing from his ordeal.''

Reed said there was ''so much information I missed. I feel closed in at the moment. I'm being drowned with information.''

Asked the first thing he would do back in the United States, he said, ''Hide.'' Amid laughter, he added the first thing he wanted on his return was a ''big Maine lobster, about 3 pounds.''

Reed and Polhill, 55, were the first American hostages freed since three others were released in the fall of 1986 as part of the secret Iran-Contra arms-for-hostages swap between the United States and Iran.

Iran and its allies in Lebanon have been trying to trade the remaining Western hostages for the release of 400 Shiite Moslems held by Israel, 16 Shiites convicted of terrorist bombings in Kuwait and Moslem fundamentalist cleric Sheik Abdul Karim Obeid, who was abducted by Israeli commandos in July.

Iran also wants the United States to release the $8 billion to $9 billion in Iranian assets it froze after Iranians seized hostages from the U.S. Embassy in Tehran in 1979.

Iranian spiritual leader Ayatollah Ali Khamenei Wednesday criticized the United States and belittled Iranians calling for direct Iranian-U.S. talks.

But Khameini, in a speech broadcast on Tehran radio and monitored in Athens, said, ''We have already said we are willing, as far as we can, to have the hostages freed ... not for the sake of the United States, but for humanitarian reasons.''

Sources in Tehran have said Iranian officials were miffed by a State Department report including Iran in a list of countries supporting terrorism, a list released shortly after Reed's Monday release.

In Germany, a U.S. official who asked not to be identified said most of the hostages in Beirut were held by the Iranian-backed Hezbollah group.

''Hezbollah is responsible to Iran and Syria controls the part of Lebanon from which it operates,'' he said.

He added Iran, beset by a depressed economy, wanted ''to show some goodwill'' in pressing for the hostages' release. That could lead to better relations with the United States.

Reed's wife, meanwhile, said during Reed's captivity he was often held alone, had little exercise and was bound and blindfolded.

She said his captors offered to let him read magazines or watch television for about 90 minutes a day, but Reed refused because ''those things he was given were so trivial compared to his freedom.''

Asked how Reed coped with captivity, she said he ''is a patient person, a strong-willed man. He just decided to sit and wait and not let go.''

She said when she was when she and her son were reunited with Reed Tuesday in Wiesbaden, ''None of us said a word. We were just hugging, hugging.''

''We are very happy. We are thrilled,'' she said. ''However, we also feel sad because other people are still in captivity; our joy will not be

complete until all are free.''

#90122u1463 05/02/1990 ~United Press International
WASHINGTON (MAY 2) UPI - Americans are being urged to leave the West African nation of Liberia, which is in the throes of civil war, the State Department said Wednesday.

Department spokesman Richard Boucher said U.S. Embassy workers and their dependents have been authorized to leave Liberia. So far, about 400 of the 500 Americans attached to the embassy have chosen to leave.

An unknown number of the 5,000 other Americans in Liberia, many of whom are associated with rubber plantations, have also left the country. Boucher said there is no plan to arrange a special chartered flight for further evacuation.

The departures are the result of a travel advisory issued last week by the State Department. It warned against travel to Liberia because of fighting between government troops and the forces of rebel leader Charles Taylor.

Several Westerners, including a United Press International correspondent, were captured when rebels ambushed a train in April. The captives were later released.

Liberian President Samuel Doe has alleged that Taylor's rebels are being supported and financed by Libyan President Moammar Gadhafi and by the government of the Ivory Coast.

Boucher said there are indications that Taylor is receiving outside support, but he could not confirm any Libyan involvement.

#90122u1472 05/02/1990 ~United Press International
MEXICO CITY (MAY 2) UPI - President Carlos Salinas de Gortari, who has embarked on opening the economy to foreign goods and investments, called on Mexican congress Wednesday to make constitutional reforms in order to return to a mixed banking system that was nationalized eight years ago.

After holding an emergency meeting with his cabinet, members of congress and governors of various states Wednesday morning, Salinas sent a formal request to congress. The Mexican president said the reforms would improve banking services and credit systems.

Mexican banks were nationalized in 1982 when the Latin American nation plunged into a severe economic crisis that touched off a Third World

foreign debt crisis.

Salinas, a Harvard-trained Ph.D in political economy who assumed office in December 1988, has accelerated the privatization of unprofitable state-run industries and has enhanced the process of opening the economy to foreign goods and investments.

#90122u1480 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - President Bush made a $26,250 mistake on his 1990 tax return and has mailed the Internal Revenue Service a check for $7,497 to cover unreported income from a life insurance policy, the White House said Wednesday.

According to an amended tax form dated Monday and signed by the president's tax preparer and a financial adviser, Bush initially failed to include as income a paid-up life-insurance policy he received last year.

Press secretary Marlin Fitzwater, asked if Bush was upset by the oversight smiled and said, ''The president wants to do what is right - pay that tax.''

Fitzwater told reporters: ''His total tax is now $108,000.''

The press secretary said Bush paid no penalty, but he did pay $40.77 to cover the interest earned since the April 15 IRS deadline.

According to the amended tax form, Bush, as a former executive of Zapata Corp., a Texas oil company, was entitled to receive ''deferred compensation'' on his 65th birthday last June.

Bush did so in the form of a paid-up insurance policy, which had a cash value of $26,250 and which must be considered as income.

The form stated that this ''income'' was not brought to the attention of the president and his tax preparer until after the president's initial filing on April 13.

The amended form was signed by tax preparer G. William Clapp of Bessemer Trust Co. of New York, and John Whitmore, an executive of the company and holder of Bush's power of attorney.

#90122u1491 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The Senate Agriculture Committee tentatively approved creation of programs to protect wetlands and water quality

Wednesday but delayed a fight over changing the "swampbuster" program.

Swampbuster, created in 1985, cuts off federal farm benefits to farmers who turn wetlands into cropland. Critics say the penalty is used too little while some farm-state congressmen have complained of high-handed federal action.

Pending before the committee is a proposal to make it easier to prove a violation but to allow graduated penalties. Chairman Patrick Leahy, D-Vt., said the compromise was "something we can go to the floor with and win."

The new conservation programs would operate under the umbrella of a new Conservation Stewarship Progam which would include the existing Conservation Reserve Program.

Environmental safeguards are expected to be a major issue in the drafting of a new five-year farm policy law. The committee vote Wednesay gave first-round approval to several environmental provisions.

They include a requirement for farmers to keep records of their use of restricted-use pesticides. The provisions also would extend the current requirement, called conservation compliance, for farmers to take steps to prevent erosion in order to remain eligible for farm benefits.

Most of the details were worked out in closed-door staff meetings. A spokesman for one environmental group said the proposals generally were acceptable and more favorable than had appeared likely two weeks ago.

Meanwhile, the chairman of the House Agriculture Committee appointed a task force to look for ways to reduce the cost of the House version of the farm bill. Subcommittees have approved proposals that would add $13 billion in spending.

During their meeting, Senate committee members stuck to a proposal to allow up to 50 million acres in the Conservation Stewardship Program, including the 34 million acres already in the CRP. At a minimum, 40 million acres must be enrolled by 1995.

Sen. Kit Bond, R-Mo., wanted to set the maximum at 45 million acres. He argued there would be fewer benefits despite higher costs. Putting land into long-term retirement, like the CRP, is "a signal to other countries that we intend to restrict the production of exportable crops," he said.

"We need those ten million additional (acres)," responded Sen. Wyche Fowler, D-Ga., listing goals of wetland restoration and prevention of water pollution.

On a rollcall, the committee voted 11-8 to keep the 50 million-acre

maximum. It then gave first-round approval to the conservation section of the bill, which includes creation of a Wetlands Reserve Program and a Water Quality Incentive Program.

The Wetlands Reserve would operate by buying a 30-year conservation easement from farmers with the goal of restoring or protecting 1 million acres of wetlands.

The water quality program would encourage use of farming practices that reduce the chance of contamination of water supplies. Farmers would be paid up to $3,500 a year to offset the cost of the practices and would have to take part for at least five years. The program would apply to land near wellheads or environmentally sensitive land. A committee staff worker said the incentives program would be less costly than taking land out of production.

Swampbuster has been the subject of intense negotiations that ranged from proposals to relax the program to calls for tougher enforcement. At present, farmers risk the loss of benefits if they grow a crop on a wetland.

The compromise written by the committee staff would make it a violation to drain a wetland, even if a crop is not planted. However, farmers would be allowed to drain wetlands when there would be minimal impact or if they agreed to restore an equal amount of wetlands.

HOUSTON (MAY 2) UPI - Two groups that have expressed interest in buying Sakowitz Inc. have resumed negotiations to buy the financially troubled retailer.

Talks between an investment firm and a group led by Robert T. Sakowitz resumed after a dispute between minority and majority shareholders was settled last week.

Sakowitz, president of the stores that carry his family name, was scheduled to meet with an investor group he has been talking to about making a bid for the chain, Sakowitz attorney Matt Hoffman said Tuesday.

Attorney Pat Hughes, who represents minority owners, said Baytree Investors Inc. of Des Plaines, Ill., has made an offer to buy the company, but has not yet funded the deal. He said they are negotiating with majority owners, S.I. Investments.

Sakowitz Inc. faces a May 7 deadline to firm up a deal to sell the six-store chain or possibly face liquidation under an agreement reached

last Thursday.

ST. REGIS INDIAN RESERVATION, NY (MAY 2) UPI - Hundreds of heavily armed New York and Canadian police restored order Wednesday on a Mohawk reservation where two Indians died in a gun battle sparked by a long-simmering dispute over casino gambling.

About 500 New York state police troopers sealed off the reservation to outsiders and set up checkpoints inside the 28,000-acre territory sprawled across the U.S.-Canadian border near Massena in upstate New York.

The militant Warrior Society, the self-appointed protectors of Mohawk sovereignty funded largely by reservation casino owners, clashed with gambling opponents Tuesday in an all-night gun battle.

Both sides are armed with AK-47 assault rifles and automatic weapons and have used firebombs and grenades in their raids.

Killed in Tuesday's firefight were an anti-gambling Mohawk trying to flee a house under siege and a Warrior Society soldier whose body was discovered on the battleground.

Canadian and New York police, who were deployed on the reservation late Tuesday and early Wednesday, reported Wednesday the violence had quieted.

''Most people are pleased we are on the reservation and, at this point, there is relief,'' state police Sgt. Michael Downs said. ''Law enforcement is maintaining stability.''

In Washington, State Department spokesman Richard Boucher said the United States regrets ''any violence and particularly the loss of life in the current difficulties between Mohawk people'' but was ''greatly heartened'' by the success of the joint operation by New York and Canadian police.

At the White House, press secretary Marlin Fitzwater said, ''We have no intentions of intervening. It is a matter to be resolved locally.''

New York Gov. Mario Cuomo, criticized by Indian leaders and the Canadian government for failing to act before the violence escalated, dispatched aide Henrik Dullea to the reservation to assist state police and conduct negotiations. No talks were scheduled, however.

The governor said he spoke with warriors Art Montaur and John Boots by telephone Tuesday.

''The Warrior Society appears to be particularly eager to demonstrate that they are not involved in the violence because they are being accused of it '' Cuomo said.

Cuomo defended his decision not to send in the National Guard ''because of the risk of bloodshed, because of what it might provoke.''

A New York Army National Guard official said, however, strategy was being planned in case military force was needed. Across the St. Lawrence, Canadian Armed Forces soldiers were posted at an armory near Cornwall at the edge of the reservation, a Canadian Defense Force official said.

In addition, about 100 Ontario Provincial Police were on standby at the International Bridge in Cornwall, prepared to assist Quebec Police Force investigators and the Royal Canadian Mounted Police already on the reserve to investigate the killings.

U.S. Justice Department mediator Fletcher Graves said Wednesday he planned to visit the reservation and meet tribal leaders, but did not know what his role would be.

Cuomo has not said how long the state troopers, including a contingent of sharpshooters, would remain on the reservation, which over the years has attracted thousands of gamblers from as far away as Syracuse and Toronto to play slot machines and blackjack.

While the heavy police presence calmed the tribal fighting late Tuesday and early Wednesday, Trooper R.W. McDowell said, ''The real test will be when we all leave.''

Doug George, an anti-gambling Mohawk who is editor of the reservation newspaper Akwesasne Notes, agreed, and criticized Cuomo for letting the violence escalate.

''Why weren't they here before, going back for months and years? Years of pleas to get assistance from law enfocement went unheeded,'' George said.

It was George's brother's house that was attacked by the Warrior Society Tuesday. Matthew Pyke, 22 - allegedly marked on the society's ''hit list'' - was shot and killed.

''If they leave,'' George said of the police, ''we're going to revert to terrorism.''

Attesting to his statement was the presence of armed Mohawks, some wearing combat fatigues and war paint on their faces.

Trooper Douglas Weiller manned a roadblock and, massaging his .308

single-shot high-powered rifle, said he did not fear the Mohawks' assault rifles.

#90122u1535 05/02/1990 ~United Press International

(MAY 2) UPI - The Commerce Department says the index of leading economic indicators rose a strong nine-tenths of one percent during March, based on strength in the industrial sector. Boston Company economist Allen Sinai describes it as a ''very positive report for the economy.'' But Northern Trust economist Robert Dederick says the March gain was NOT as strong as it appears and indicates a rebound from the month before. The index declined by one percent in February.

A published report says New York City has the world's highest AIDS rate, with about one in every four men between ages 25 and 44 infected with AIDS. The report was based on a U-S Centers for Disease Control study. It indicates that the rate of AIDS in New York City-New Jersey area ''is NOT only the highest in the country... it is also higher than reported in Africa.''

Relatives and officials say American Frank Reed saw at least five other Western hostages during his 44 months in captivity. Reed arrived in Wiesbaden, West Germany, after being freed in Lebanon by Moslem kidnappers. Reed told his daughter that during his captivity he saw U-S hostages Terry Anderson and Thomas Sutherland. British officials in London confirm that Reed also reported seeing hostages John McCarthy and Brian Keenan.

#90122u1554 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - Facing up to the realities of a lessened military threat, the administration announced Wednesday it will seek a reduction or elimination of controls on some high-technology Western exports to Central and Eastern Europe.

In a long-expected bow to pressure from NATO allies and American industry, the White House suggested liberalized restrictions on 43 technologies previously protected for potential military applications.

At the same time, the plan would seek more effective control - now complicated by the sheer number of goods on the COCOM list - over powerful computers and other products that could still prove a threat in Soviet hands.

"In effect, our proposals will build higher fences around fewer goods by focusing on those items that are the most sensitive in terms of our

national security," said White House press secretary Marlin Fitzwater.

"We will be able to pinpoint a streamlined list of exports that can make a major contribution to Soviet power while changing the restrictions on items such as personal computers, which are readily available throughout the world anyway," he said.

The outgrowth of extensive study and internal debate, the proposals must be ratified by the 17-member Coordination Committee for Multilateral Export Controls (COCOM), through which NATO, Japan, and Australia regulate high-tech trade with the Warsaw Pact and China.

Though the Pentagon has fought for a continued tight rein on technology the Soviet Union could use for strategic gain, Fitzwater insisted that the proposals had "the unanimous support of all security agencies."

With some European members of COCOM favoring much more dramatic changes, an administration official said "hard negotiations" could be in the offing as the U.S. proposals come under fire as insufficient.

President Bush also faced possible political heat at home for offering expanded trade to Moscow at a time when the Soviet crackdown on Lithuania has sparked conservative calls for a slowdown in economic cooperation.

Only Tuesday, the Senate warned Bush about the danger of submitting an expected U.S.-Soviet trade agreement for approval if the Soviet intimidation of Lithuania has not ended.

Bush could be caught in a crossfire between allied demands for more liberal COCOM decontrol and congressional pique for recommending any change at this time. Shrugging off that prospect, Fitzwater said, "Life is full of flak."

The U.S. proposals would affect 43 of the 120 categories of products now barred or subject to sale only after review. Most relate to computers, telecommunications, and machine tools, key technologies that East European countries like Poland and Hungary need to modernize their economies and speed their political emergence from more than four decades of communist rule.

Of those 43 categories, controls on 30, such as the latest-generation IBM personal computer and other off-the-shelf products, would be dropped. Streamlined licensing and purchase procedures would be sought for the rest.

The remaining "core list" of proscribed military technologies, which the United States wants to replace the current list - covering literally thousands of products - by the end of the year, reflects a belief that even in the face of improved superpower relations and the emergence of an

undivided Europe, the Soviet Union continues to pose a potential threat to U.S. security.

As a result, the new U.S.-proposed COCOM rules would, in some cases, permit easier sales of certain technologies, such as fiber optic and microwave communications systems, to East European countries than to the Soviet Union.

This more favorable treatment for Central and Eastern Europe, designed to foster progress toward democracy and free markets, would include firm safeguards - now under negotiation - to prevent any such exports from being passed on to the Soviets.

The current rules provide no such differentiation. Richard Barth of the National Security Council staff said "threat analyses" and assurances from Central and East European countries eager for Western technology created confidence in the proposed safeguards.

Last year, Fitzwater said, 1,782 licensed sales worth $2.6 billion were made under COCOM regulation. There are no estimates of how much that trade would increase under the proposed liberalization.

The inclusion of China in the COCOM decontrol scheme loomed as a dicey political point in view of the sharp criticism of Bush's restrained reaction last year to the brutal suppression of the pro-democracy movement last year.

In fact, however, Fitzwater asserted that export curbs on many of the items slated for possible reform already had been relaxed for China. "As a general rule," he said, "there's no change."

#90122u1560 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The Senate Budget Committee approved a $1.2 trillion plan Wednesday that cuts defense spending by $13 billion - more than President Bush or the House proposed - and trims the fiscal 1991 deficit by $43 billion.

The 14-9 mostly party line vote for the budget plan offered by committee Chairman James Sasser, D-Tenn., came one day after the House passed, on a 218-208 vote, a separate $1.2 trillion budget blueprint for the fiscal year beginning Oct. 1.

Sen. Charles Grassley, R-Iowa, was the only panel member to break party ranks, joining the 13 committee Democrats in supporting the plan. The committee's nine other Republicans opposed it.

''If the White House would leave this committee alone, we would get a lot more votes for this (budget) resolution,'' Sasser said. ''The White House would prefer that nothing at all come out of our committee.''

The administration and congressional Republicans have pushed for a budget summit between Bush and Congress, saying the budget resolutions adopted by the House and the Senate committee are meaningless unless they can be implemented.

Sen. Pete Domenici, R-N.M., said he opposed Sasser's plan because ''I do not believe this budget is going to be implemented.'' He said the defense cuts and revenue proposals are greater than Bush would accept.

Budget resolutions are non-binding spending, savings, revenue and deficit reduction plans that guide the actions of other committees. They do not go to Bush for his signature or veto, but Bush can veto bills implementing the final congressional plan.

After the vote, Sasser said it was ''unclear at this point'' if his plan would pass the full Senate, where debate is expected to begin later this month.

But he said his plan's call for a $13 billion fiscal 1991 cut in defense spending, to $293.9 billion, ''has an excellent chance of surviving on the floor and I intend to fight for it hammer and tong, tooth and nail.''

''I don't anticipate a full-fledged assault on the defense number,'' Sasser said.

The House budget plan, authored by Democrats and passed on a mostly party line vote Tuesday, calls for an $11.5 billion defense cut next year, to $295.5 - about $1.5 billion less than the Senate panel's recommended cut.

Bush proposed only a $3.2 billion Pentagon spending cut after inflation. That's about $10 billion less than the Senate plan and about $8 billion less than the House wants.

Sasser said he does not think he will have to battle Sen. Sam Nunn, D-Ga., chairman of the Senate Armed Services Committee, on the Senate floor when the budget is debated. Nunn earlier had proposed a $10 billion Pentagon cut and Sasser said Nunn had ''already expressed his displeasure'' with the budget panel's $13 billion trimming.

Sasser said he thinks he and Nunn are close enough to work out a compromise and said he would not be surprised if the full Senate votes to soften the $13 billion defense cut by a few billion dollars.

''We may lose some on the floor,'' Sasser said.

The Gramm-Rudman balanced budget law requires that the 1991 deficit be cut by $36 billion to a target of $64 billion. The House budget plan meets that target but the Sasser plan would trim the deficit by $43 billion.

That's $7 billion more than required by law but less than may actually be needed since the deficit has been rising rapidly and a cut of about $50 billion, rather than $36 billion in the Gramm-Rudman target, may be needed.

Included in the Senate budget is an $11.1 billion ''fair share'' strategy to speed up the collection of overdue federal taxes. The plan would forgive penalties but require payment of taxes due and interest.

Sasser said the proposal was modeled on successful tax amnesty programs used by some states.

The Senate committee's budget would also trim Medicare by $2 billion rather than the $5.5 billion Bush proposed. It also eliminates agriculture program cuts Bush wanted.

It incorporated the same $13.9 billion in revenues for fiscal 1991 that Bush had proposed, as does the House-passed budget.

#90122u1582 05/02/1990 ~United Press International

(MAY 2) UPI - The first freely elected Hungarian parliament in 43 years held its opening session today... an emotion-charged session that was hailed as the start of a ''promising new age.'' The president of the last freely elected parliament in 1946-47 told the 386 legislators that he was thankful that he lived long enough to see the fate of his country turn for the better.

Federal agents armed with a vacuum cleaner descended on Walter Leroy Moody's home in Rex, Georgia, again. They conducted another search yesterday for evidence in bombings that killed a federal judge and a civil rights lawyer. Agents got permission from a federal magistrate to vacuum Moody's home for gunpowder. The warrant also said the would examine the contents of Moody's vacuum.

One of the killers in the book and film ''The Onion Field'' is in police custody in Los Angeles, charged with assault for allegedly trying to slash a man with a kitchen knife. Jimmie Lee Smith and another man were sentenced to death for the kidnapping and murder of a police officer and the wounding of his partner. The crime was the subject of the book ''The Onion Field'' by Joseph Wambaugh, a former Los Angeles police officer. Smith's death sentences was commuted to life, and Smith eventually was paroled.

-30- 1446
#90122u1588 05/02/1990 ~United Press International
CAPE TOWN, SOUTH AFRICA (MAY 2) UPI - The minority white government and the African National Congress met at the negotiating table for the first time in history Wednesday and started talks intended to lead eventually to the abolition of apartheid.

With their delegations standing expressionless behind them, ANC leader Nelson Mandela and President Frederick de Klerk shook hands in the garden of a centuries-old homestead shortly before the beginning of a scheduled 18 hours of talks over three days.

Each spoke of the urgency of ''creating the right climate'' for meaningful negotiations and overcoming formidable mistrust between the white ruling party and the nation's largest black political movement founded in 1912, two years before de Klerk's National Party.

''This is the first time in 78 years that a truly serious meeting takes place between delegations of the African National Congress and the succession of white governments that have ruled our country for generations,'' Mandela said. ''This is a fact that is sobering in its implications.''

Declaring the talks a sacred exercise, Mandela said both sides would have to overcome the ''terrible tradition of a 'dialogue' between master and servant.''

He rejected any post-apartheid solution based on race or ''on any of the inhuman follies which have led our country into the destructive crisis in which it is now immersed.''

''The black masses of our country demand and expect fundamental change now and not tomorrow,'' he said. ''The people as a whole want the peace and stability which can only come about as a result of the total abolition of apartheid.''

De Klerk, who freed Mandela from 27 years imprisonment just 80 days ago and lifted a 30-year ban on the ANC in initial steps of his reform program pledged his government was ''approaching the talks with the utmost earnestness.''

''There are bound to be difficulties, but there is cautious optimism as well as faith and conviction that our problems will be solved by negotiation,'' de Klerk said as plainclothes security and uniformed police patrolled the sprawling grounds of the Groote Schuur estate. ''The government has accepted the challenge of doing everything possible to

achieve this.''

The nine-man all-white government delegation and the 11-member ANC team of blacks, whites and South Africans of Indian and mixed descent then retreated inside the historic homestead for more than seven hours of scheduled talks expected to end at 11 p.m. A working dinner was also on the agenda.

On the outskirts of Cape Town, Groote Shuur originally was constructed as a barn in 1657, just five years after the first Dutch settlers landed at the Cape. Steeped in political history, the present Cape Dutch house became the official residence of the nation's prime ministers.

As de Klerk and Mandela spoke their delegations remained standing on a grassy knoll and a set of steps behind them, mixing but exchanging few words. At one point Foreign Minister Roelof ''Pik'' Botha found himself in the unlikely position next to the white Lithuanian-born Joe Slovo, leader of the South African Communist Party. Slovo has long been regarded as public enemy No. 1 as a committed Stalinist and longtime strategist behind the ANC's limited guerilla war against white rule. Moments later Botha moved down one step.

The ANC was expected to present its preconditions for participation in power-sharing negotiations, including the lifting of a 4-year-old state of emergency, the release of all political prisoners and the return of thousands of exiles.

The government in turn is certain to raise objections to the ANC's commitment to an armed struggle and refusal to publicly declare that struggle suspended.

''Attention will be devoted to the obstacles identified by both the government and the ANC,'' de Klerk said. ''From our side, there is serious concern about the escalating spiral of violence and intimidation which has caused so much suffering and hardship.''

''It is absolutely essential that peaceful negotiations for a democratic solution must be conducted in peaceful circumstances,'' he said.

As the talks got underway, the right-wing Conservative Party staged a walkout during parliamentary debate to protest the negotiations. Conservative leader Andries Treurnicht, who has accused de Klerk of selling out the country's 5 million whites, demanded in the whites-only House of Assembly new elections to test the electorate's support for the peace effort.

The conservative legislators then marched to the offices of the president next door and delivered a petition of protest.

Among senior aides accompanying the ANC delegation was Steve Tshwete, a strategist in the ANC's military wing, Umkhonto we Sizwe, or Spear of the Nation), which has waged a guerilla war since 1961.

Tshwete was among about a dozen ANC exiles given safe passage from the movement's base in Lusaka, Zambia, to attend the talks. He said the exiles intended to remain in South Africa ''for as long as there is business to be conducted,'' raising the possibility they will stay in the country for some time after the present round of talks end.

#90122u1594 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The number of Americans who donated organs for transplants dropped for the first time last year - possibly in part due to AIDS - raising concern about the already short supply, experts said Wednesday.

Only 3,993 Americans donated their organs in 1989, down from 4,069 donors in 1988, according to the United Network for Organ Sharing in Richmond, Va. The decrease is the first since the network began keeping records in 1987.

''I am certainly concerned to see a drop in organ donation,'' said Dr. Gary Friedlaender of Yale University School of Medicine in New Haven, Conn., at a news conference.

Friedlaender and other officials noted that more people donated more than one organ in 1989 than 1988, making more organs available overall.

Friedlaender noted that the drop was slight, but said the fact that the number of donations was leveling off was still worrisome.

''The plateau is distressing, and I think we need to be reinvigorated in our efforts to educate the public,'' he said.

Rep. Floyd Spence, R-S.C., who underwent a double lung transplant in 1988, said: ''Whatever we can do to give hope to other people that there is a chance for them, that's what it's all about.''

People who want to donate organs after death should fill out a card indicating that desire, experts said. The cards are often available at hospitals. Officials also recommend informing family of their wishes. Many states also enable individuals to indicate their intentions on their driver's license.

Experts were unsure why the donation rate had leveled off, but said one

reason may be that more people are being excluded from donation to help stem the spread of the AIDS virus.

''There was some discussion ... of the possible role of AIDS in this,'' said Joel Swerdlow, a senior fellow at The Annenberg Washington Program who participated in a nationwide meeting on organ donation held last month.

The human immunodeficiency virus or HIV, which causes acquired immune deficiency syndrome, can be spread to an individual who receives an organ from someone who is infected with the deadly virus.

''There are some strict criteria for organ and tissue donation. It's our obligation to make sure that this approach is as safe and effective as possible. So that screening process is in place and rigorously upheld,'' said Friedlaender.

The news conference was called to release the results of a report issued by more than 130 experts who met last month in Rancho Mirage, Calif., to discuss organ transplants. The meeting was partially sponsored by the American Medical Association.

There were about 13,000 organ transplants performed in the United States in 1988, but more than 20,000 remaining patients - mostly kidney patients - were left on waiting lists because too few organs were available, the report said.

The report recommends:

-Encouraging more people to sign up to donate organs after their deaths.

-Increasing education of the public and health care workers to encourage more donation.

-Working to make sure individual decisions to donate organs are carried out by family members and health care workers.

-Establishing nationwide networks for other types of tissues, such as bone tendons, corneas, skin and bone marrow. Bone marrow can be donated by living donors.

#90122u1603 05/02/1990 ~United Press International

ORLANDO, FL (MAY 2) UPI - One of three contenders interested in buying Braniff Inc.'s A-320 jetliners has bid $50 million for the undelivered aircraft, the bankrupt airline's chief financial officer said Wednesday. The 38 A-320s are considered to be Braniff's most valuable asset.

The manufacturer, Airbus Industrie of Toulouse, France, a consortium of European partners, has offered $50 million for the planes, said Kim Champney, Braniff's chief financial officer.

"We don't feel there's any reason for this deal to fall through for any reason. All we can do is get a better deal," said Champney. The agreement allows for the planes to go to a higher bidder, court records show.

Champney and Dan Gibbs, Braniff's chief executive officer, said Braniff had signed confidential agreements with Airbus Industrie and two other groups which had made "serious" inquiries. "There have been other inquiries, but they would not be characterized as serious," said Gibbs.

Before the company filed for Chapter 11 bankruptcy protection Sept. 28, 1989, Braniff agreed to buy 24 A-320s and lease 26 more from GPA Group PLC of Shannon, Ireland. GPA has reclaimed 12 jets for lack of payment. "They're gone. They're GPA's to lease or sell as they can," Gibbs said. The remaining 38 have not been delivered, but Braniff controls them and retains its option to buy 50 more.

U.S. Bankruptcy Judge C. Timothy Corcoran III has given Braniff until July 25 to resell or lease the planes. If it fails, its contracts would be void. Champney said a $50 million sale would reduce Braniff's debt to about $370 million.

Last week, Corcoran approved the sale of Braniff's trademark for $313,000 to BN Air Inc. of New York, a new company formed by Jeffrey Chodorow, one of Braniff's biggest stockholders. Chodorow said he had hired several Braniff executives.

Gibbs said Wednesday that Braniff's payroll had dropped to 75 employees. "With the moves that are under way, by mid-month it will be approximately 38," he said. When Braniff filed for bankruptcy, it had 4,800 employees.

#90122u1617 05/02/1990 ~United Press International

WARSAW, POLAND (MAY 2) UPI - West German President Richard von Weizsaecker arrived in Warsaw on an official mission of reconciliation Wednesday some 50 years after his first visit as a teenage soldier taking part in the Nazi invasion of Poland.

Solidarity's official newspaper said Weizsaecker, who later shot at a portrait of Adolf Hitler to protest the war, was a German whom Poles could trust.

''Inexpressible suffering have been inflicted on you by Germans, and today this weighs heavily on us,'' Weizsaecker told his hosts at a dinner in his

honor Wednesday evening.

During the day, he laid wreaths at monuments honoring Polish resistance to the Nazi invasion. He was to visit the former Treblinka concentration camp Thursday.

The German president, on a four-day visit at the invitation of his Polish counterpart Wojciech Jaruzelski, is the first West German head of state to come to Poland since the formation of the Federal Republic of Germany in 1949 and the second in the 1,000 years the two neighboring countries have existed.

An independent newspaper, Zycie Warszawy, said German emperor Otto III made a friendly trip to Poland 990 years ago, before a long series of wars between the countries that climaxed with World War II.

Weizsaecker said at a news conference five hours after he arrived that turmoil in the Soviet Union may effect the integration of Europe, and said it was in the best interests of both Poland and Germany for Soviet reforms to succeed.

''Both Poland and West Germany are vitally interested that the process of Soviet reforms are not a failure,'' he said, adding that he believed Soviet republics, such as Lithuania, should negotiate with Moscow.

The Polish News Agency said Polish-West German talks planned for Thursday would center on Lithuania, trade agreements and the German-Polish border.

The official Solidarity newspaper Gazeta Wyborcza said no agreements between the countries would be signed during Weizsaecker's visit, saying the main benefit of the trip would be its symbolism of reconciliation.

Its headline over a story on the German president read, ''Polish people can trust this German.''

Jaruzelski, accompanied by Solidarity Prime Minister Tadeusz Mazowiecki, welcomed Weizsaecker Wednesday morning at Okecie airport, where construction workers were busy renovating buildings according to plans drawn up by a West German company, a symbol of the growing cooperation between the neighbors after the years of bitterness.

At the dinner, Jaruzelski toasted the German president by invoking both the past and future.

''You in a German uniform entered Polish soil and I, in a Polish uniform, marched across German territory as far as the Elbe River,'' he said. ''It will be hard to build the unity of the continent without genuine reconcilation between the two biggest nations in Central Europe.''

Zycie Warszawy reported that Weizsaecker first came to Poland as a 19-year-old soldier, along with thousands of Nazi troops who invaded the country on Sept. 1, 1939. More than 6 million Poles died over the next five years at the hands of the Nazis.

The newspaper said Weizsaecker later became a crusader against the war and once fired a gun at a portrait of Hitler during a meeting of German officers in 1943.

Gazeta Wyborcza said Weizsaecker has strongly supported Polish demands that West Germany recognize the Oder and Neisse rivers as the Polish border.

Poland took over one-third of its present territory from Germany under the Potsdam agreement in 1945 following the war. But Poland had lost much of the same territory over six centuries of German expansion eastward.

''Poland's current western border is final,'' Weizsaecker said at the news conference.

#90122u1626 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - New technologies, increased deregulation, and political developments in Eastern Europe will dramatically change international communications and the world economy in the current decade, telecommunications specialists said Wednesday.

Delegates from Northern America, Europe, and Asia discussed technology developments, new regulations and their impact on the world economy at a two-day conference, "The future of world telecommunications and information technology," hosted by BusinessWeek, the flagship magazine of the McGraw-Hill Inc. publishing group.

"New rules and regulations will be set up, and not only because of technology developments," said Pekka Tarjanne, Secretary General of the International Telecommunications Union, a specialized agency of the United Nations. "They will be linked with the world's economy and trade."

Tarjanne pointed out that governments will have less room to regulate the telecommunications industry as technology developments will abolish frontiers, as sophisticated communications will unify the world into one single market.

The conference mentioned a number of developments which are already changing international business transactions, such as networking of computer systems, ability to retrieve information from databanks worldwide

video-conferences, real-time stock trading, direct broadcasting or transmission of tri-dimensional images.

The conference defined as "global information" the new industry sector which covers telecommunications and computers, two areas which have virtually merged because they rely on a common technology.

"Computers, broadcast and telecommunications now all come together and their frontiers are blurred," Tarjanne said. "Information technology and global networks are themselves linked with social and political events and to a certain extent even with ideologies."

Tarjanne predicted that international telecommunications tariffs will go down, reflecting fewer regulations and more efficient technology.

Tarjanne who described "access to information as a fundamental human right " deplored that "there are more telephones in Tokyo than in the entire Africa."

He stressed that Central and Eastern European countries need to quickly upgrade their communications systems in order to develop their economies. "It is extremely important for Eastern Europe to invest in basic telecommunications infrastructures and services, and to do so now, not in ten years," he said. "There is no economic growth without good telecommunications networks and services."

Several East European countries have already drawn plans to upgrade their communications systems. Hungary will invest up to $7 billion in the sector in the next ten years, including through business agreements with a number U.S. companies such as Northern Telecom Inc. and Digital Equipment Corp.

Czechoslovakia has budgeted $3.5 billion for improvements in the sector, while East Germany is upgrading its network with heavy West German investments.

The Soviet Union has embarked on an ambitious 15-year plan which would increase the number of telephones from 40 to 60 million, start production of fiber optics and upgrade broadcast facilities. The plan also covers developing the Soviet computer industry, a key element in modernizing telecommunications networks.

Another telecommunications market expected to change quickly is the European Community which will become a single economic zone beginning in 1993. U.S. long-distance carriers are already competing for an increased access to what will be the No. 1 economic market in the 1990s.

MIAMI (MAY 2) UPI - A Cuban exile charged with murder in a 1976 car bombing that killed former Chilean ambassador Orlando Letelier is innocent his wife and two co-defendants said Wednesday.

''Jose Dionisio Suarez is innocent, and he is not only being treated as a criminal but the institution has not been respecting his rights,'' his wife, Elizabeth Suarez, said at a news conference in Florida.

Suarez, 51, is charged with setting the car bomb that killed Letelier as he drove along Embassy Row in Washington D.C. Suarez was was charged with first-degree murder in a 1978 indictment, but remained a fugitive until he was arrested April 10 in St. Petersburg, Fla. Suarez, who is being held in Washington, D.C., was one of seven people charged in Letelier's death.

Elizabeth Suarez told a news conference that her husband had retained New York attorney Paul Goldberger for his defense, and she announced the formation of a non-profit corporation to raise money for legal fees.

The FBI alleged Suarez came to Washington, helped buy components for the bomb and then helped build the device. A U.S. citizen and former Chilean intelligence agent who served a prison sentence in Letelier's death told the FBI that Suarez activated the bomb, investigators said.

However, two other co-defendants who were cleared in the case, brothers Ignacio and Guillermo Novo of Miami, supported Suarez's claim of innocence. The Novos were found innocent of murder and conspiracy during a 1982 trial.

''In 1982, I and my brother stood trial and were found innocent by a jury '' said Guillermo Novo, 50. ''We are here now to help our friend obtain funds for his defense. We are ready to help him have a good day in court.''

The Suarezes were married in 1981, three years after the bombing indictment was returned, but Suarez said she believed that her husband's charges were dropped with the acquittal of the Novos.

She said she and her husband were not hiding from authorities and she did not know why the government singled out her husband after so many years.

''I really don't know understand, based on the fact that there was already a trial and they were found innocent,'' Suarez said. ''Do you think he would marry before a judge if he was hiding?

Investigators said Suarez and fellow Cuban Virgilio Pablo Paz, who is still a fugitive, followed Letelier's car for two days before Suarez detonated the bomb.

#90122u1641 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - Sen. John Breaux, D-La., was chosen Wednesday to serve on the influential Senate Finance Committee and Sen. Jeff Bingaman, D-N.M., was selected for the Labor and Human Resources Committee.

Both assignments fill spots left vacant by the death last month of Sen. Spark Matsunaga, D-Hawaii.

The selections were made during a meeting of the Democratic Steering Committee and must be approved by the full Senate - a step that is virtually automatic, since Democrats have a majority in the Senate.

Breaux, 46, heads the Democrats' formal Senate campaign committee and also serves on the Commerce and Environment committees. A former House member, he was elected to the Senate in 1986 and faces re-election in 1992.

The Finance Committee is one of the most coveted panels on Capitol Hill because it deals with the nation's tax laws.

Bingaman, 46, serves on the Armed Services, Energy and Governmental Affairs committees. He was first elected to the Senate in 1982 and re-elected in 1988.

The Labor and Human Resources Committee deals not only with labor laws but also with education and most health and social welfare programs.

LONDON (MAY 2) UPI - English fans convicted of soccer-related offenses during the World Cup finals in Italy this summer risk being banned from attending future matches abroad, the Home Office announced Wednesday.

It said new expanded powers under the 1989 Football Spectators Act will soon allow British courts to recognize sports-related convictions against British national overseas in imposing banning orders on offenders.

''I am very pleased with the cooperation we have received from the

authorities in Scotland and Italy to enable us to recognize football convictions there,'' said Home Secretary David Waddington. ''Let (this) be a firm warning not to make trouble, to those attending the World Cup.''

Scotland is generally is governed separately from England and Wales.

Under the old provisions of the Football Spectator Act courts were only allowed to impose two-year restriction orders on soccer hooligans convicted in England, Wales and Scotland. As of July 1, as World Cup matches are being played, they can also take into consideration offences committed in Italy.

Violations covered under the act include drunkeness, threats or use of violence, and criminal damage committed at a match. Violence or damaged committed on a journey to or from a match are also covered.

English soccer fans have a reputation for violence.

British fans started a riot at Belgium's Heysel Stadium in May 1985 that killed 39 people and injured more than 400 when a wall collapsed before a European Champions Cup final between English and Italian teams.

Fourteen Britons were sentenced last year to three years in jail for causing the riot.

English teams are still banned from taking part in European club competition.

Trouble involving stone-throwing English and West German fans also marred the European championships in West Germany in the summer of 1988.

Authorities in Scotland and Italy will be able to forward a certificate to Britain confirming an offender's conviction for a soccer-related offense.

Those who are subject to restriction orders will be prohibited from attending key matches outside England and Wales and will be required to report to a police station on those occasions.

The government intends to make similar arrangements with other countries, particularly in Europe.

#90122u1668 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - A declining junk bond market helped push U.S. merger and acquisition activity down almost one-third in the first four months of this year, compared with 1989, an information services company reported Wednesday.

So far this year, 512 U.S. companies have been targeted for acquisition, down from 590 companies in 1989, according to data compiled by IDD Information Services. The value of the deals slipped 16.6 percent to $79.2 billion, down from $95 billion, IDD said.

Merger and acquisition activity in the United States dropeed 31.2 percent from a year ago, IDD said. "This decrease indicates a depressed M&A market in the U.S. due to a lack of junk bond financing to fuel deals," IDD said in a statement. Merger and acquisition activity declined 38.9 percent in the month of April alone, IDD said.

Leveraged buyouts also dropped in popularity, IDD said. LBOs decreased so far this year by 57.1 percent to 30 deals totalling $5.1 billion, compared with 70 deals worth $15.4 billion for the first four months of 1989, IDD said.

There also has been a drop in deals valued over $100 million, IDD said. During the first four months of this year, 115 such deals were announced, compared with 157 in the same period of 1989, IDD said.

So far in 1990, foreign interests have announced offers for 163 U.S. companies valued at $32.9 billion, IDD said. Great Britain has led the way in foreign investment, making 62 bids valued at $10 billion. French concerns followed with 11 bids valued at $8 billion, and Canadian firms were third with 34 bids valued at $3.9 billion, IDD said.

The IDD surveys transactions with values of $1 million or above. Partial stakes, repurchases, self-tenders, recapitalizations and restructurings are not included.

(MAY 2) UPI - Relatives and officials say recently freed U-S hostage Frank Reed saw at least five other Western hostages during the nearly 44 months he was held by Lebanese kidnappers. Reed is in Wiesbaden, West Germany, for medical tests and military de-briefing. Family members say he reported seeing American hostages Terry Anderson and Thomas Sutherland a while ago and was angry to learn all the hostages had NOT been freed.

Iranian spiritual leader Ayatollah Ali Khamenei accused the United States of behaving arrogantly toward other nations, including the Soviet Union. In a speech broadcast on Tehran Radio, Khamenei says that Iran... for humanitarian reasons... will still help free Western hostages in Lebanon.

Some economists see March's index of leading economic indicators as a sign that the industrial sector is getting stronger. The Commerce Department reports that the index rose by nine-tenths of one percent following a one percent drop during February. Some economists believe a three-month decline signals an impending recession.

A study by the Centers for Disease Control says New York City has the

highest AIDS rate in the world. The study says one of every four men between the ages of 25 and 44 is infected with the deadly virus. A C-D-C epidemologist adds- ''There was NO hospital in the nation that did NOT have H-I-V cases.''

#90122u1721 05/02/1990 ~United Press International

KATMANDU, NEPAL (MAY 2) UPI - Nepal's prime minister said Wednesday the kingdom's new constitution will curtail King Birendra's absolute powers and give 18-year-olds the right to vote, a measure that will likely benefit the communists.

Birendra, one of the world's last absolute monarchs, bowed to violent democracy protests last month and agreed to disband his government and create a multi-party interim government empowered to create a new consititution.

Prime Minister Krishna Prassad Bhattarai said Wednesday that a drafting committee would be formed to draw up the actual constitution, but said the document would definately put an end officially to the absolute monarchy.

''The unlimited powers of the king have proven dangerous for the country '' Bhattarai told a meeting of journalists who were arrested during the pro-democracy movement. ''The king is aware of this and I am confident he will not oppose the idea.''

Bhattarai's Nepali Congress Party and the United Left Front, comprised of seven communists parties, have formed a provisional government to replace Birendra's no-party government.

''The constitution will be completed three months after the formation of the (drafting) committee,'' the prime minister said.

Movement organizers said the seven-week-long protest for a multi-party system was not intended to overthrow King Birendra, who is still generally popular and is regarded as a symbol of unity in the impoverished Himalayan kingdom.

The constitution drafting committee will include representatives of the Nepali Congress Party, the communist parties and the king.

Birendra, who lifted a 29-year ban on political parties, also has commissioned Bhattarai's provisional government to hold parliamentary elections within a year.

Lowering the voting age from 21-years to 18-years is likely to benefit the communists, who have strong support among the kingdom's youth.

#90122u1743 05/02/1990 ~United Press International

SEATTLE (MAY 2) UPI - Boeing President Frank Shrontz said the company may discipline more employees involved in a classified documents case that has led to one former executive being sent to prison, it was reported Wednesday.

An internal investigation into the role of other employees should be complete in about two months, and will be reviewed by a special committee of Boeing's board of directors, Shrontz told The Seattle Times.

Shrontz said the investigation's goal is "to understand whether there were other people involved, what the degree of involvement was, and ... to decide whether we need to take disciplinary action in any case."

Richard Fowler, a Boeing marketing analyst between 1978 and 1986, is serving a federal prison term for obtaining secret government budget planning documents for Boeing and for refusing to tell a grand jury who in the Pentagon gave him the papers.

Fowler, 64, was sentenced to two years, although his term is not expected to begin until later this year. He first must finish jail time for contempt of court in refusing to give the grand jury the information it requested.

Boeing's three-member investigative panel was set up in October, shortly before the company entered a guilty plea to two felonies in the Fowler case and agreed to pay the government $5.2 million in fines and restitution.

As part of Boeing's plea bargain, all company employees were granted immunity from prosecution for related actions known to the government at that time. In addition, Shrontz was ordered to write a letter of contrition.

The internal investigation was not conducted earlier because of the ongoing federal probe. Shrontz said he would not predict if other Boeing employees will be disciplined. "I don't want to prejudge what we learn, but clearly if they were involved to the degree of being a participant, I'd have to say yes," Shrontz said.

Evidence uncovered before and during Fowler's trial showed that some current Boeing employees knew what Fowler was doing at the time, and others were doing similar work for Boeing on a smaller scale.

Shrontz pointed out that other defense contractors were obtaining classified budget documents from the Pentagon without the required

authorization, until a 1985 indictment of a consultant for GTE Corp.

"Certainly by today's standards that conduct was not something we're even proud of or I would say was even legal," Shrontz said. "I do think it was common practice at the time."

#90122u1744 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - Education Secretary Lauro Cavazos said Wednesday that for the fourth straight year U.S. students have shown no overall improvement but that changes in the classroom and at home can reverse the situation.

The assessment, based on the conclusions of the Education Department's seventh annual state-by-state education performance chart, comes several months after Cavazos and President Bush convened an education summit with state governors.

''The 1990 (chart) indicates that there has been no overall improvement in student achievement, as measured by scores on college entrance tests, for a fourth straight year,'' Cavazos told reporters. ''These data, combined with the previous three years of little or no advancement, suggest that we have reached a plateau and that moving beyond this point will require more comprehensive and even radical changes in our school systems.''

The study found, for example, the national high school graduate rate has dipped; college entrance scores have declined, and the percentage of public school students qualifying on advanced placement examinations has dropped.

Cavazos said two key elements will be needed to improve the situation.

''We need to provide more rigor in America's classrooms, and we need to enhance the role of parents as decision-makers regarding what is best for their children's education,'' said Cavazos.

''Parents can press for a say in their children's schooling. Parents can set high goals. Parents can turn off the television sets. Parents can make sure that books and magazines are in the house or borrowed from a library '' Cavazos said.

Among the study's findings:

-The national high school graduation rate declined from 71.7 percent in 1987 to 71.1 percent in 1988. Minnesota had the nation's best graduation rate, 90.9 percent, while Florida had the worst rate, 58 percent.

-The average score in 1989 on the American College Testing Program Examination was 18.6, down from 1988's 18.8. The top ACT score is 36.

-The average score in 1989 on the Scholastic Aptitude Test was 903, down from 904 in 1988. The top SAT score is 1600.

-The percentage of public high school graduates who received a qualifying score on advanced placement tests was 8.6 percent in 1989, down from 8.8 percent in 1988.

-Average teacher salary improved slightly, with an estimated $29,567 in 1989, up from $28,008 in 1988.

-In 1989, there were an average 17.4 pupils per teacher, compared with 17.6 in 1988.

-Schools are spending more per student - $4,243 per pupil in 1988 vs. $3,977 in 1987.

-In 1988, 6.3 percent of schools' revenues came from the federal government, compared with 6.4 percent in 1987.

The current ''educational deficit'' can be erased, Cavazos said, ''if all of us in this nation acknowledge that the quality of our schools is everyone's responsibility, and if we direct our human resources to bringing about significant change in our educational system.''

#90122u1747 05/02/1990 ~United Press International

GREENBELT, MD (MAY 2) UPI - An engineer's ''oversight'' caused a door protecting the the Hubble Space Telescope's sensitive apparatus to close, sending the orbiting observatory into hibernation for 12 hours, NASA said Wednesday.

''Controllers indicated that 'anamolies' of this nature are expected of HST (Hubble Space Telescope) and other complex spacecraft during this verification process,'' a NASA statement said.

''The HST team is building confidence in dealing with them quickly and effectively as they occur without significant impact on the schedule,'' it said.

''The spacecraft operated just as it should have,'' the statement said. ''The problem was caused by ground controller oversight.''

The problem occurred at 7 p.m. Tuesday while engineers at the Goddard Space Flight Center in Greenbelt and the Marshall Space Flight Center in

Huntsville, Ala., were testing the telescope's pointing system.

''Engineers overlooked activating an aperture door ... inhibit switch and, operating as it should, (a telescope safety system) commanded the (door) shut,'' the statement said.

''Body motion created by the motion of the (door) triggered the (telescope) into a 'safe' mode,'' a hibernation-like state built in to the telescope to protect the craft, it said.

''This is essentially the same sort of safe mode entry that occurred several days ago when the (door) was commanded open,'' it said.

The event occurred just before engineers planned to sent commands to the telescope that would have ''desensitized'' the telescope's sensors and prevented such an occurrence, the statement said.

Ground controllers regained contact with the telescope ''just after midnight,'' sent commands to ''desensitive'' the telescope's gyroscopes and reopened the door, the statement said. The telescope was brought completely out of the safe mode by 7 a.m. Wednesday.

The problem put NASA engineers even more behind schedule in their painstaking, trouble-plagued efforts to slowly bring the $1.5 billion telescope to life.

In particular, the glitch forced workers to delay until 11 a.m. Wednesday starting to send computer commands from the Space Telescope Science Institute in Baltimore to the telescope to finally begin turning on its instruments.

The telescope was placed into orbit last week by the space shuttle Discovery for a 15-year mission to search for clues about the birth, structure and destiny of the universe by studying planets, stars and galaxies more clearly than before.

Problems in the initial steps of slowly starting the telescope forced NASA about a week behind schedule in the eight-month process, delaying the historic first image of the heavens until the weekend at the earliest.

The most significant problem involved one of the telescope's two ''high-gain antennas,'' which are needed to transmit the flood of data about the universe the telescope will collect.

#90122u1752 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - Former top housing official DuBois Gilliam told

Congress Wednesday he found a way to fund an ineligible ''special project'' in 1985 after being told that Vice President George Bush's office wanted it financed.

The project involved a $500,000 feasibility study for development of a Hispanic Trade Center to be located in Kansas City, Mo.

Gilliam, serving an 18-month jail term for accepting illegal payments as a high official in the department of Housing and Urban Development, was testifying before a House subcommittee for a second day under a grant of immunity from prosecution.

Gilliam also said former HUD Secretary Sameul Pierce personally approved an illegal potential multimillion dollar ''golden parachute'' severance package for him when he left HUD shortly before being indicted for abuse of HUD programs.

And he said top HUD officials routinely divided up funds for the agency's Section Moderate Rehabilitation program to help political favorites and friendly developers.

''If you didn't sit at the table, you didn't eat,'' he said.

Gilliam testified as part of a extensive investigation into the Regan era domestic scandal that has uncovered allegations of widespread political favoritism and possible wrongdoing on the part of top HUD officials. Pierce is currently being investigated by an independent prosecutor.

In the Hispanic Trade Center case, Gilliam said he was visited by Hector Barreto, head of the Hispanic Chamber of Commerce, seeking the money for the feasibility study from the Secretary's Discretionary Fund, generally used for emergency situations, special projects and technical assistance.

Gilliam said he told Barreto the study was not eligible for money under the technical assistance rules ''and that's when he told he had a meeting over at the vice president's office, where he was going.''

''A short while later - that afternoon - I received a call from (Pierce's executive assistant) Deborah Dean.'' She asked if Gilliam had a copy of the trade center study proposal. ''I indicated yes. She indicated to me that she had received a call from the vice president's staff people indicating their support and wanting to see the project funded. ... She also indicated to me, but it wasn't clear, something about Hector being on the vice president's plane for a conference in Puero Rico.''

Gilliam said he worked out the funding by convincing Kansas City officials to fund the project by swapping Community Development Block Grant Funds taken from a project eligible to receive the technical assistance funds

and sending $500,000 to replace the CDGB money.

The former HUD official also testified that Pierce had personally approved a lucrative arragement under which Gilliam would be able to control money to be used to rehabilitate 250 units of subsidized housing.

Gilliam testified that control of those funds were routinely divided up by top HUD aides to political supporters and friendly developers.

He said that when he was ready to leave HUD, under a cloud of investigation by the department's inspector general, ''I had a conversation with Secretary Pierce (and told him) that I was going to leave ... but I may need some help.''

Gilliam said Pierce was aware he was being investigated but, ''He told me he would help me in any way he could,'' Gilliam said, adding that he later told Dean he wanted 400 ''mod rehab'' units ''and I wanted that arrangement before I left.''

Saying such an arrangement ''would have given me a good start on leaving government,'' Gilliam said he could have made at least $500,000 from contractors who would have received the HUD money, and perhaps millions over the years.

However, the deal was never made.

''Deborah went and spoke to the secretary ... and came back and told me I had 250 units but couldn't have the 400 because I was too greedy,'' Gilliam said.

#90122u1753 05/02/1990 ~United Press International

(MAY 2) UPI - Two wildfires that have scorched nearly 9,000 acres in southern Florida raged out of control Wednesday and relief crews from out of state were brought in to battle the larger of the two blazes in the Everglades National Park.

The Everglades fire, driven by southeasterly winds, has burned out of control for three days. The source of the blaze, which has blackened 4,100 acres of parkland and 2,000 acres beyond the park's boundaries, was not known, officials said.

''Last night we had two small crews on,'' said Darlene Koontz, a park spokeswoman. ''We put on another 20-person crew this morning and we've got helicopters dropping buckets of water all day today. The winds have picked up today so they are going to really watch the fire this afternoon.''

Koontz said a 20-member crew is expected to arrive late Wednesday from either Virginia or North Carolina to relieve the firefighters who have been battling the blaze since noon Monday.

Norman Masencup, a Florida Division of Forestry supervisor, said five helicopters were dumping giant buckets of canal water on the flames while a fixed-wing plane monitored the spread of the fire.

''There are some hot spots and some active flames, but no great flame lengths,'' Koontz said.

Ground crews cleared scrub brush around the hammocks to eliminate potential fuel and have been digging fire lines, but none of the activity threatened the park's public operations.

''There are no smoke problems for the visitors. All facilities are open and there are no problems there,'' Koontz said.

The second fire west of Miami has scorched 2,700 acres and is burning out of control. Seven firefighters battled that blaze.

A third fire in Broward County apparently started by sparks from a catalytic converter has claimed 700 acres. Masencup said it is under control.

''Hopefully, we'll have that one out by tonight, if there are no flare-ups today,'' he said.

#90122u1758 05/02/1990 ~United Press International

(MAY 2) UPI - The State Department confirms that an American was kidnapped last weekend by Colombian guerrillas in Ecuador. He has been identifed by family members as Scott Heimdal of Peoria, Illinois. A government spokesman says the American worked for an Ecuadoran gold-mining company and was traveling by motorized canoe on a river near the Colombian border when he was abducted.

The African National Congress is poised for the first official talks with the white-controlled South African government. An 11-member A-N-C delegation is scheduled to meet with President Frederik de Klerk today. The A-N-C says it ''feels obligated ... to eliminate tensions between blacks and whites.''

Counselors are talking with students today at an Arkansas high school, trying to help them cope with the suicides of three classmates within 24 hours... and four students during the past five weeks. Counselor Marianne Frans says the students were stunned by the deaths. Police in Sheridan,

Arkansas, are investigating the possibility of a suicide pact between several students.

South Carolina state corrections officials have put the brakes on a plan by soul singer James Brown to put on his first concert since leaving a Columbia prison for a work release program. Brown is supposed to be working as a special outreach counselor, and a Corrections Department official says concert appearances don't fit that job description.

#90122u1776 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - The U.S. Environmental Protection Agency said Wednesday it had fined British Petroleum Co. $102,000 for a chemical spill, the largest penalty to date under a 1986 law requiring immediate spill

notification.

BP failed to notify immediately state and local authorities of the April 15, 1988 release of ethyl acetate at its Paulsboro, N.J. facility, said spokeswomen Kim Helper in EPA's New York office.

The company did not notify authorities of the accidental release of the chemical until the spill ended May 10, 1988, the spokeswoman said. She said EPA considers ethyl acetate a "hazardous substance" as defined by the law.

EPA initially proposed a fine of $300,000, but agreed to a settlement of $102,000 after negotiations with the company. "I still consider it a fine " Helper said.

"This is the largest settlement in the country" imposed under the notification provision of the 1986 Emergency Planning and Community Right-to-know Act, the EPA statement said.

Helper said it is also the first settlement imposed on a company in EPA's region No. 2, which includes New York, New Jersey, Puerto Rico and the Virgin Islands.

No comment could be obtained from BP America, which is headquartered in Cleveland. Payment of the fine will be equally divided between the U.S. Treasury and the government's environmental Superfund, EPA said.

The law also requires a company to notify the National Response Center "when it becomes aware of an accidental release of a reportable quantity of a hazardous substance," the environmental agency said.

#90122u1790 05/02/1990 ~United Press International

NEW BRUNSWICK, NJ (MAY 2) UPI - Students protesting threatened tuition increases occupied campus buildings at New Jersey's state university and a major state college for a second day Wednesday.

Administrators at both Rutgers University in New Brunswick and Montclair State College in Upper Montclair declined to take action against the sit-ins. But they also argued that cuts in state aid leave them with no choice but raising tuition.

Protestors at both schools directed their anger more at Gov. Jim Florio and the state Legislature than at university and college administrations.

''We've taken our concerns to the top-level administration at Rutgers,'' said Mia Ji, a spokeswoman for the Coalition for an Affordable Rutgers Education. ''Now it's our turn to focus our attention towards the state.''

Florio's proposed state budget for the fiscal year beginning July 1 includes a $81 million cut in aid to public colleges and universities and to the state Department of Higher Education. If the budget is approved by the state Legislature, Rutgers would get $216.5 million in aid, down $26.1 million from the current year, while Montclair would get $34.1 million, a cut of $4.3 million.

About 40 Rutgers students spent the night in Milledoler Hall, which includes the office of the dean of Rutgers College, an undergraduate school at Rutgers. Ji said that friendly staff members had invited them to use their offices, making them officially guests instead of trespassers.

Students at Montclair boycotted classes to protest a proposal for a 15 percent tuition hike. College spokesman Ivan Tolbert said most students appeared to be attending class, but Rob Campos, a reporter for the Montclarion, the student newspaper, said about half the classes were canceled and that 75 percent of the college's 13,000 students were honoring the boycott.

Several hundred Montclair students moved into College Hall about noon on Tuesday. At least 50 spent the night ''camped out'' in the lobby, Tolbert said.

''There have been no arrests, no conflicts of any serious nature at all,'' Tolbert added.

At Rutgers, Acting President T. Alexander Pond has recommended a 10.8 percent tuition increase, which would average $260 for in-state students, overruling a recommendation by a committee of staff, faculty and students for a 14 percent hike. University spokeswoman Ruth Scott said the board will probably take no action until July, waiting until the state budget is in its final form.

Last year, the board increased Rutgers tuition an average of 13 percent.

President Irvin Reid has recommended a 15 percent hike in tuition, Tolbert said.

-30- 2884

#90122u1793 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - Newly released hostage Frank Reed is rightfully angry about his long captivity and is free to speak out, a White House spokesman said Wednesday, adding there are no signs another hostage release is imminent.

Reed, set free Monday by militant pro-Iranian forces in Lebanon, was said

to be ''very angry at everybody who should have done something'' to secure his freedom and that of other American captives.

White House spokesman Marlin Fitzwater told reporters that Reed, now at a U.S. military hospital in West Germany, ''is free to say anything he likes.''

The hostages ''who come out of captivity certainly have a right to be angry and frustrated,'' Fitzwater said.

There had been reports that State Department officials had asked Reed - the second American released in just over a week - not to speak out because of concern for six other U.S. citizens still held in Beirut.

Reed, speaking Wednesday from the hospital balcony, said he was ''embarrassed'' to have been released, since some of the captives have been held more than five years. He was held 44 months.

Earlier, his wife had told reporters Reed was angry over the length of his and the other hostages' captivity. Asked if he was upset at the Bush administration, she said, ''He's very angry at everybody who should have done something. ... He did not specify who.''

But Reed, when questioned by reporters, said he was initially mad at the official U.S. hostage policy, but that was no longer the case.

''I tell you I am very, very angry that (Americans Terry) Anderson and Tom (Sutherland) are not free,'' Reed said. ''I am very, very angry that John (McCarthy) and Brian (Keenan, two British captives) are not free. These are the only people I knew.''

When asked whether ''things are moving,'' as President Bush had said Monday when welcoming freed hostage Robert Polhill to the White House, Fitzwater said, ''We don't have any other indications of another release.''

Without revealing the message Polhill was said to be carrying from his captors to the president, Fitzwater said Bush found his conversation with Polhill ''very useful.'' The spokesman added, ''Hopefully it was helpful.''

-30- 2407

#90122u1819 05/02/1990 ~United Press International

FLETCHER, OH (MAY 2) UPI - Rep. Donald ''Buz'' Lukens, R-Ohio, convicted of having sex with a 16-year-old girl, announced Wednesday he will stay in the race for re-election to Congress.

''I apologize,'' Lukens told reporters outside the Fletcher post office. ''I made a dumb mistake. I'm sorry. In spite of the stumble, I've

continued to work very hard at home and in Washington for my constituents.''

Lukens, 59, asked voters to consider his ''24 years of solid service.'' The congressman said he waited until Wednesday to disclose his plans because he had expected to have his conviction overturned on appeal by now.

''I apologize for the situation I allowed to be created ... (but) it's not evil and it's not criminal,'' Lukens said.

Aide Jim Dornen said the congressman, a hard-line conservative elected in 1986, chose Fletcher, population 515, to make his announcement because he helped the village settle a problem with a postal clerk who allegedly threw away third-class mail instead of delivering it. The woman was removed through Lukens' efforts, Mayor Robert Wyer said.

''He knew that we would support him because he came to our rescue when we needed him,'' said village resident Rita Hardman. ''I think there's a lot of undercover people that'll vote for him that just aren't saying.''

When Lukens was convicted in May 1989 of having sex at his Columbus apartment with the teenager, he refused to resign and vowed to fight the charges. Lukens had previously declined to announce his political plans, pending an appeal of his conviction of contributing to the unruliness of a minor.

The leading candidates in the May 8 Republican primary for the western Ohio district are state Sen. John Boehner and former Rep. Thomas Kindness, R-Ohio. Hamilton resident Morton Meier also is running, but he is unknown in GOP circles and is not expected to be a factor.

''I really believe it's winnable, or I wouldn't try,'' Lukens told reporters. ''This has been an unexciting and dull campaign. With me in it, it's no longer dull.''

-30- 2271

#90122u1828 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The U.S. economy expanded slowly in April with little evidence of a "credit crunch" by banks and other lenders, the Federal Reserve said Wednesday in its "beige book" report.

Trouble continued to plague residential real estate markets, automobile sales remained weak, and retail spending grew at a slow pace, according to the report compiled every six weeks by the Fed and its 12 regional banks. Public works projects kept the construction industry chugging along.

"Although virtually every district cites some specific cases of credit

tightening by banks, with the most significant action taken by New England banks, there is little evidence of a 'credit crunch,"' the Fed said.

"Many banks have reviewed lending policies in recent months, cutting back on loans to the real estate industry and newer small businesses, or tightening up lending requirements by increasing collateral requirements or shortening loan terms," the report said.

Cynthia Latta, an economist at the private forecasting firm DRI/McGraw Hill in Lexington Mass., agreed "it is certainly not a classic credit crunch ... when the Fed slams on the brakes on credit creation."

Latta said "this is a new found religion by bank lenders," who are under the close scrutiny of federal regulators. "Bankers are being much more careful," she added. But not all private analysts paid attention to the Fed report.

Lincoln Anderson, an economist at Bear Stearns & Co. in New York, criticized the manner in which the central bank gathers data, calling it "the worst kind of anecdoctal evidence." "It's basically very limited reports from small subsets of economic actors," Anderson said.

The "beige book" also concluded most farmers' fears of a drought have been eased by rains even though some suffered weather-related crop damage, and it found a healthy pace of exploration and drilling for oil and natural gas.

"Although oil and gas prices have fallen from year-ago levels, they remain at a level high enough to encourage continued drilling and exploration," the Fed said.

A modest improvement was reported in the nation's battered industrial sector, although many regions reported more disappointing results and factories operating below capacity.

"There has been little upward pressure on industrial prices," the Fed said. "Overall economic activity continues to expand slowly." Taking a look at the 12 Federal Reserve districts:

Boston - Manufacturing slowing. Retailers expect another difficult year. Real estate market remains slow, with large inventory of unsold homes. Small businesses anticipate problems securing credit.

New York - No clear signal of overall strength or weakening in economy. Pace of office leasing improving along with interest in purchase of new homes. Commercial loan demand weaker.

Philadelphia - Some signs of improvement. Retailers report marginal gains.

Bankers note steady growth in overall loan demand. More manufacturers expect rebound rather than further slowing.

Cleveland - Concern inflation will exceed four percent. Consumer spending better than expected. Manufacturing improving. Credit standards tighter, but no sign of "credit crunch."

Richmond - Economy grew at moderate pace. Manufacturing posted modest gains. Shipments stronger at seaports. Cold, wet weather "proved to be a mixed blessing" for farmers - helping some crops, harming others.

Atlanta - Slow, steady growth. No sign of added wage pressures. Raw material prices steady. Weak demand for consumer durable goods. Real estate markets generally soft. Clothing sales strong.

Chicago - Housing market shows signs of softening. Construction activity stronger than in other parts of the nation. Consumer spending holding up well in recent months.

St. Louis - Sluggish growth persists. Consumer spending flat. Export activity mixed. No evidence of widespread tightening of credit.

Minneapolis - Moderately good economic conditions reported. Labor marker fairly tight. Wage and price increases also moderate. Farmers still fear drought possible without spring rains.

Kansas City - Retail sales up. Auto sales picking up. Factories operating below capacity. Mortgage demand weak at thrifts. Loan demand at commercial banks slowing a bit.

Dallas - More slow growth. Auto sales down. Oil and gas drilling strong. Recent rains and rising prices have improved agricultural outlook.

San Francisco - Businesses doing relatively well. Wage and price increases in 3-5 percent range. Healthy activity in construction and real estate. Bankers report "good" and "stable" conditions.

#90122u1844 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - The American Stock Exchange said Wednesday it has named the agency of Follis & Verdi to launch a new, high-profile advertising campaign. The move to launch an aggressive ad campaign comes just a few months after James R. Jones assumed the position of chairman at the exchange.

"With new leadership and new products in place, this is an opportune time for the most innovative primary marketplace to get this message across to

its major constituencies: our product mix and propensity for creating new products, our outstanding sevice and international appeal, postition us as the marketplace for the 90's," Jones said in a statement.

Until now, the only advertising purchased by AMEX has been for put and call warrants on the Nikkei Stock Exchange - one of the exchange's most successful products - and, on a limited basis, for options, a spokeswoman said. There was no incumbent agency at the exchange, she said.

The exchange and the agency have not yet determined where the new ad campaign will run, the spokeswoman said. "The envisioned advertising program will encompass the exchange's long-range strategic goals as well as immediate promotion of the American Stock Exchange to its different and diverse constituencies," said Ellis Verdie, president of the two-year-old agency. Billings of the account were not disclosed.

#90122u1883 05/02/1990 ~United Press International

PANAMA CITY, PANAMA (MAY 2) UPI - Vice President Ricardo Arias Calderon, in a radio broadcast Wednesday, denied rumors of a coup attempt against the U.S.-backed government that were stirred up when armed guards surrounded the presidential palace.

''There has been no coup attempt,'' Arias Calderon said on RPC Radio in Panama City. ''There have been rumors from unknown sources that circulated (Tuesday) night, but which have no basis in the truth.''

A contingent of armed guards surrounded the presidential palace and blocked off nearby streets Tuesday night. Miguel Batista, vice minister of the presidency, was seen carrying a machine gun.

President Guillermo Endara, who was installed during the U.S. invasion in December that ousted Panamanian strongman Manuel Noriega, was in the United States, where he met Monday with President Bush.

On Wednesday, Endara was in New York for a private visit.

A spokeswoman for the State Department's Latin American bureau, Ann Sigmund, said in Washington the rumors of a coup and that one of the nation's two vice presidents was challenging the government ''are without foundation.''

With the current battered state of Panama's ecconomy, rumors were frequent but she said, ''There was no coup, no plotters.''

A spokesman at the presidential palace told United Press International late Tuesday night that the situation was calm and that the presidential guard was conducting exercises. RPC Radio, meanwhile, broadcast reports in an attempt to dispel the rumors.

But the newspaper La Prensa reported Wednesday the extra security measures were taken when a top government official called the presidential palace and warned that a coup attempt was in the works.

Arias Calderon said Wednesday that he had been in telephone contact with Endara and had met with Second Vice President Guillermo Ford Tuesday night.

''I can assure everyone that the country is in perfect order,'' Arias Calderon said. ''We do not know the origins of these rumors, but they do not have any truth.''

The coup rumors come on the heels of a recent controversy over the Public Force, Panama's new police unit composed of former members of Noriega's defeated Panamanian Defense Forces.

Leslie Loaiza, head of the investigative branch of the force, and several policemen have been accused of being involved in the murder last month of a grandson of Marco Justine, Noriega's former chief-of-staff.

Many observers believe the Public Force is disatisfied with its role as a police force following 21 years of military rule in Panama and that it could pose a threat to the newly installed civilian government.

Endara officials, however, maintain the Public Force is under control.

WASHINGTON (MAY 2) UPI - Jamaican Prime Minister Michael Manley complained

Wednesday that credit policies of the International Monetary Fund and the World Bank are causing his country a $200 million "negative flow" with the multilateral organizations.

Manley, at a Interamerican Development Bank luncheon, said that over 1989 and this year Jamaica would make $200 million more in loan repayments to the IMF and the World Bank than it would receive from the multilateral organizations. Neither the IMF nor the World Bank refinances loans to member countries.

Manley asked for help to alleviate the "$200 million negative flow," and noted the Caribbean nation has no such problem with the IDB. Jamaica's total external debt is $4.4 billion, according to the World Bank. Most of it is owed to donor countries and multilateral organizations. Manley was scheduled to meet with President Bush on Thursday.

WASHINGTON (MAY 2) UPI - A leading Soviet reform politician told a House subcommittee Wednesday that the pace of change in his country could be

slowed if the United States does not improve trade with Moscow because of the crackdown on Lithuania.

The Senate voted Tuesday in favor of a proposal by Sen. Alfonse D'Amato, R-N.Y., urging President Bush to delay action on granting the Soviets most favored nation trade status until they end the sanctions against Lithuania.

But Sergei Sankevich, deputy mayor of Moscow and a member of a reform wing in the Supreme Soviet, or parliament, told the subcommittee on Europe and the Middle East that improved trade is a key to the success of Soviet reforms.

''It would be better for the Soviet Union and for the forces of change in the Soviet Union and in Eastern Europe if the ... the American government can base their attitudes on two main principles,'' said Sankevich, speaking in English.

''The first is not to the damage the process because of unreasonable interference,'' he said. ''The second principle is to create a more favorable environment for a continuation of the process of change.''

Sankevich said Soviet republics should be allowed to become independent and criticized current Soviet laws for making that difficult.

But he said Lithuanian leaders made a mistake by declaring their independence and then seeking negotiations, instead of the other way around. The result, he said, is that neither side is willing to compromise and appear weak.

Sankevich said the most important thing U.S. policymakers could do is demonstrate ''adequate understanding'' of his country's difficulties, improve trade and help end other barriers to Soviet economic improvement.

U.S. and Soviet negotiators agreed to a trade pact last week, and the Bush administration has indicated it will seek most favored nation trade status for the Soviets once they pass a liberal emigration law.

Sankevich said he helped draft new emigration legislation and predicted it would be passed before President Bush's summit with Gorbachev starting May 30.

#90122u1912 05/02/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 2) UPI - The 16 NATO foreign ministers are expected to reaffirm their unanimous support at a special meeting this week to keep a unified Germany within the Atlantic Alliance, diplomats said Wednesday.

The meeting on Thursday brings all of the NATO foreign ministers together for their first formal talks since December. It comes just two days before the initial session for foreign ministers takes place in the ''two-plus-four'' talks on German unity.

A unified Germany's NATO status is expected to be the most crucial aspect of those talks Saturday in Bonn.

Diplomats at NATO headquarters said Wednesday's hastily arranged meeting would provide an informal opportunity to underline the 16 nations' support for a united Germany within the alliance.

Unlike twice-yearly formal meetings of NATO foreign ministers, the special meeting will not produce an official communique, but Secretary-General Manfred Woerner will announce the outcome.

The session was also designed to reassure the 12 NATO members excluded from the two-plus-four structure that they will be fully informed at every step in the process.

Several countries, especially Italy and Holland, were vocally upset when the two-plus-four roster - the two Germanys and World War II allies Britain, France, the United States and the Soviet Union - was agreed to in January at the Open Skies conference in Ottawa.

Soviet Foreign Minister Eduard Shevardnadze has called for a neutral Germany, but has recently suggested other approaches, including a Germany in both NATO and the Warsaw Pact during a transition period.

U.S. Secretary of State James Baker, in several recent meetings with Shevardnadze, has insisted on a unified Germany within NATO.

''A drifting, neutral Germany cannot be a solution, given the country's geostrategic position and its political, economic and military potential '' says Woerner, a former West German defense minister.

A compromise suggested by Hans-Dietrich Genscher, the West German foreign minister, calls for a united Germany in NATO but with no NATO troops on what is now East German soil.

The NATO foreign ministers were also expected to discuss preparations for this fall's expected summit of the 35-nation Conference on Security and Cooperation in Europe, or CSCE, as well as the Vienna talks on limiting conventional forces in Europe, or CFE, which have stalled over aircraft levels. The United States does not want a CSCE summit if there is no CFE agreement ready to sign.

Several NATO officials say they want the two-plus-four talks to be closely restricted to German unification in order to avoid a free-for-all negotiation on Europe's future.

With the Soviet Union occupying one of only six chairs in Bonn, compared to one in 23 chairs at the CFE talks, ''the Soviets will clearly seek to raise other issues'' due to their added leverage, a top NATO diplomat said.

''We feel the two-plus-four talks are simply not the appropriate forum to discuss other topics,'' he said.

#90122u1917 05/02/1990 ~United Press International

BLOOMINGTON, MN (MAY 2) UPI - Minnesota North Stars owners George and Gordon Gund ''struck a deal'' Wednesday to sell the NHL club to former Hartford Whalers minority owner Howard Baldwin and Budget Rent-a-Car executive Morris Belzberg, team president Lou Nanne said.

''The two parties have struck a deal,'' Nanne said. ''They agreed in principal to terms and conditions they will submit to the league on Tuesday for ratification.

''The terms of the deal won't be disclosed until after it is ratified by the league on Tuesday.''

The NHL Board of Governors is to hold a special meeting Tuesday in Chicago.

Nanne would not say but it is expected that the sale of the North Stars will be contingent upon the Gund brothers being given an NHL expansion franchise for the San Francisco Bay Area. The Gunds have signed a lease agreement for the Cow Palace near San Francisco for next season, with the apparent intention of moving into a new arena that would be built in San Jose.

Baldwin, Belzberg and the Gunds were not immediately available for comment. Belzberg, who is chairman of the executive committee for Budget Rent-a-Car, was playing golf in Palm Springs, Calif., where he has a home, his secretary said. Nanne described Baldwin as a ''charismatic fellow'' who will be moving to the Twin Cities.

Nanne said he could not comment on the situation further until it receives NHL approval.

''I'm very excited about it,'' Nanne said. ''It will keep NHL hockey in Minnesota. That is what we all want and were most concerned about.''

The Gunds stunned the Twin Cities sports community and their own employees

this past winter by announcing that they would either sell the club or move it to the West Coast because of mounting losses in recent years when the team has struggled on the ice and attendance has dropped.

Besides Baldwin and Belzberg, Detroit-based Compuware also indicated it was interested in buying the North Stars. In addition, a group of Twin Cities businessmen led by Harvey Mackay also considered submitting a bid if it proved to be the only way to keep the team in Minnesota.

The Gunds' expansion team would play temporarily in the 50-year-old, 11,500-seat Cow Palace until a new arena is completed in nearby San Jose.

The lease for the Cow Palace, located in Daly City not far from Candlestick Park, runs through the 1991-92 NHL season with an extension option, officials said this week.

#90122u1930 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The Bush administration, facing rising public anger over pollution at military bases and other facilities, signaled a willingness Wednesday to accept legislation giving states greater powers to force cleanup by federal agencies.

After months of arguing against the bill as a move that could tangle and slow cleanup efforts, a Justice Department official told the Senate Environment and Public Works Committee the administration could back the measure if some parts are weakened.

Richard Stewart, assistant attorney general for environment and natural resources, outlined the proposed changes in urging negotiations between the Justice Department and senators to craft a bill that ''will be effective and acceptable to all.''

The change in position was noted by Sen. John Warner, R-Va., who pointed to the administration's apparent past reluctance to give states a bigger say in cleanup efforts at hundreds of contaminated federal facilities.

''That reluctance is now gone, am I correct?'' asked Warner.

''Yes,'' Stewart replied.

Nevertheless, several senators opposed weakening the bill, saying the measure would merely give states the same powers over federal polluters they have over private-sector polluters.

Senate Democratic leader George Mitchell of Maine, a prime sponsor of the bill, accused President Bush of reneging on a campaign promise to ensure federal agencies comply with environmental laws. He quoted a May 16, 1988, speech in Seattle in which candidate Bush said, ''The government should live within the laws it imposes on others.''

Mitchell said Bush had abandoned that pledge in an effort to hold down the huge costs - at least $200 billion - of cleaning up thousands of sites at federal facilities.

The legislation would authorize states to impose civil fines on federal facilities that violate toxic waste disposal laws or drag their feet on required cleanups.

Several states already have sought to impose such fines, but the Justice

Department contends federal agencies are not subject to such penalties because of the legal doctrine of sovereign immunity, which that generally protects the government from liability stemming from its activities.

In the few cases have come to trial around the country, some judges have ruled for the states and others for the government.

The bill would clear the way for states to impose fines on federal facilities by waiving sovereign immunity for violations of toxic waste disposal laws.

Supporters of the bill say the threat of state penalties is needed to keep the pressure on federal agencies.

But Stewart said giving the states such power could disrupt efforts to direct cleanup money at the sites posing the most risk to public health - the ''worst first'' policy.

The most aggressive states, he said, could end up getting the most cleanup action, even if other states had worse sites.

Stewart also said agencies should not be penalizied if cleanup delays are caused by lack of money from Congress.

He suggested the bill allow states to fine federal agencies for non-compliance with toxic waste laws in current activities, but not for delays in cleaning up past problems, unless a formal cleanup schedule had been agreed to.

State officials criticized Stewart's proposal, saying the distinction between current compliance and cleanup is too vague and could undermine state enforcement powers.

#90122u1953 05/02/1990 ~United Press International

BOSTON (MAY 2) UPI - A non-hormonal drug with no toxic side effects apparently can slow the bone-thinning process that affects millions of older Americans, researchers said Wednesday.

A three-year study in Denmark showed a chemical compound called etidronate could stop the process of osteoporosis in women aged 65 and older, the researchers reported in The New England Journal of Medicine.

Osteoporosis affects up to 15 million Americans, more than 80 percent of them women, said Dr. Charles Chesnut of the non-profit National Osteoporosis Foundation.

Chesnut, a faculty member at the University of Washington, called etidronate an ''extremely promising'' treatment for osteoporosis, which causes up to $8 billion a year in medical costs, much of it the result of bone fractures.

In the study conducted in Copenhagen, etidronate reversed bone-thinning in 33 women who received small doses over a three-year period, said Dr. Tommy Storm, an associate professor at the University of Copenhagen.

Those who were given the drug had more bone mass and significantly fewer spinal fractures than a comparison group after three years, Storm said.

He said it was the first time a treatment other than the hormone estrogen has been shown to be effective in slowing or reversing the loss of bone in post-menopausal women.

For reasons that researchers do not fully understand, estrogen appears to stop large body cells known as osteoclasts from absorbing and removing bone tissue.

As a result, women who are beyond menopause, and thus no longer produce estrogen, frequently suffer bone loss and have spinal fractures.

In the Danish study, women who were given small doses of etidronate intermittently over a three-year period had slightly more bone mass, and more importantly, significantly fewer bone fractures, than women who were not given the drug.

In the study, Storm and colleagues reported that women who received at least 60 weeks of treatment with etidronate had nine times fewer spinal fractures than a comparison group after three years.

The study results ''really fulfill what we dreamt of when we started out '' Storm said in a telephone interview.

The women who received the treatment not only had fewer spinal fractures but did not experience the same loss of height that happens when bone is lost and the spinal column is compressed, he said.

Storm and Chesnut said the study results were especially significant for women who suffer from osteoporosis but have conditions such as breast cancer which make it unfeasible for them to receive estrogen therapy.

Chesnut said etidronate is one of a number of compounds in a chemical class known as diphosphonates that were first used on an industrial basis to clean metal pipes.

''Through a process of serendipity, someone discovered that etidronate

might work in bone culturees, and our laboratory started working with it in 1980,'' he said.

He said the chemical seems to coat bones - especially the vertebra of the spine - in such a way that osteoclasts cannot remove bone mass.

Currently, etidronate is licensed by the Food and Drug Administration only as a treatment for Paget's disease, a rare disorder that involves bone loss. Chesnut estimated that it may take a year or more for FDA approval of the drug as a treatment for osteoporosis.

He called Storm's results ''really exciting,'' not only because of etidronate's apparent ability to virtually eliminate spinal fractures in the women studied,but also because the drug seemed to cause no adverse side effects.

#90122u2001 05/02/1990 ~United Press International
SINGAPORE (MAY 2) UPI - The Goddess of Democracy, a ship whose crew is determined to broadcast pro-democracy messages to China from international water, docked Wednesday in Singapore and asked for permission to make a

future stop in Hong Kong instead of Taiwan to defuse tension between Taipei and Beijing.

''The pressure on Taiwan is very hard,'' said Christophe Nick, a French journalist and one of the originators of the project to sail the floating broadcast ship close to the mainland.

He said the crew wanted to dock at Hong Kong to refuel, resupply and bring transmitters aboard the vessel, thus eliminating the need for a Taiwan stopover.

Nick said he saw no reason for Hong Kong to refuse despite the touchy relations between Beijing and Hong Kong, which reverts to Chinese control in 1997.

''When a boat needs food, petrol and water, you don't deny it,'' he said. ''If Hong Kong authorities say no, it would be a strange precedent.''

The surprise announcement followed the arrival of the ship in Singapore Harbor earlier in the day with a crew of nine French sailors and one Taiwanese journalist. Nick and nine other French reporters then boarded for a scheduled departure Thursday.

The ship, named after a statue built by students in Beijing's Tiananmen Square last June before the pro-democracy movement was crushed by the Chinese military, was harassed by Chinese vessels during its voyage from Paris to Singapore, Vice Captain Cecile Corre said.

''We had to change course to avoid a collision with a Chinese merchant ship heading right towards us in the Straits of Malacca two days ago,'' Corre said.

It earlier survived a severe storm in the Indian Ocean, crewmen said.

Singapore port authorities allowed the 1,140-ton research vessel to pull up to Clifford Pier despite harsh criticism from Beijing directed at countries aiding the venture, which began March 17 in France. The ship's next stop was to have been Taiwan.

Singapore, which has no diplomatic ties with China but is hoping to establish them, said the Goddess of Democracy was allowed to dock because the island republic is a free port.

Nick and Corre said they were not afraid China would try to sink the boat before it was able to broadcast.

''The condemnation of the world would thwart such a course of action,'' Nickdeclared.

Taiwan officials have confirmed the radio ship would be allowed to dock and resupply at the port of Keelung, north of Taipei, and even said the military would protect the vessel if it came under attack in Taiwanese waters.

No country, however, has shown a willingness to handle transport of the transmitters.

Corre said it would take his ship 15 days to reach Hong Kong and the broadcasts could not begin until the middle of June at the earliest.

Nick said if Hong Kong rejects the request, Taiwan has not been ruled out. He also noted the alternative of using ships ''from friendly countries'' to resupply at sea.

''Our primary aim is to broadcast the truth to the more than 1 billion people on the mainland,'' Nick said. ''That is what we're trying to do.''

The Goddess of Democracy is sponsored by a coalition of groups headed by the French news magazine Actuel, with the cooperation of the Federation for a Democratic China, a Paris-based Chinese dissident organization.

Organizers stressed there are no Chinese dissidents aboard.

The route to Hong Kong or Taiwan includes a stretch of water where piracy is rampant. The boat will also pass by the disputed Spratly Islands in the South China Sea, claimed by China, Vietnam, the Philippines and Malayasia.

China has fought several skirmishes with Vietnam over the scattered chain of coral atolls.

#90122u2029 05/02/1990 ~United Press International
(MAY 2) UPI - Brent Musburger, fired by CBS Sports on April Fool's Day, Wednesday was hired by ABC in a move that may signal the exit of Al Michaels.

Michaels, who last week won his third Emmy as the top sportscaster, has filed a grievance to get out of his ABC contract after a suspension by ABC Sports President Dennis Swanson for violating a rule against using a family member on an assignment.

Swanson denied that Musburger, the most identifiable sports television personality, will move into Michaels' broadcast booth chair. He said Musburger's assignments would include college basketball, college football World League of Professional Football, ''Wide World of Sports,'' play-by-play on one of the two NFL wild-card games on ABC and host of the Super Bowl pre-game show.

''Al Michaels has a long-term contract with ABC Sports,'' Swanson said from Louisville, site of the Kentucky Derby. ''He'll be here in Churchill Downs. There has been a lot of speculation in the press. Al Michaels has

been involved in an internal personal matter. It's between the department and him. I don't think it's appropriate for us to comment on it publicly. I expect him on ''Monday Night Football'' and to do the 25th anniversary Super Bowl game next January in Tampa.

''Their schedules just don't conflict with each other. I've always wanted to be talent-rich, not talent-poor. We wanted for a couple of years to make a talent acquisition. The opportunity just hadn't presented itself.''

Neither Musburger nor Swanson would give specific financial terms on what they said was a long-term deal.

''It has significant dollars associated with it,'' Swanson said.

Musburger, who also had met with Ted Turner and officials from Turner Broadcasting, was dumped by CBS following an April 1 early-morning meeting between Musburger's agent, his brother Todd, and network officials. Musburger's 5 1/2-year contract that paid him $2 million annually was to run through July, but CBS Sports President Neal Pilson decided that Musburger's last assignment would be the NCAA Tournament final the following night.

The timing of the announcement in Denver was curious, but Todd Musburger reportedly had asked for a CBS decision on a new contract by April 1.

''Yesterday is gone,'' Musburger said Wednesday. ''I'm only worried about tomorrow. I don't think it was necessary, but that's history.

''It was a real easy decision for me to make. ABC expressed immediate and serious interest almost from the day after the announcement. They have through the years set a high standard we have all chased covering sports and their schedule is underrated. They have a great lineup of events.''

The highest profile event is ''Monday Night Football,'' where Michaels sits in the lead chair.

''I hope he stays there forever,'' Musburger said of Michaels. ''I think he's a heckuva broadcaster. I'm going to have no trouble co-existing with Al at ABC.''

Musburger's first ABC assignment will be in a yet to be determined role on a prime-time sports award show on June 25.

Musburger, a former newspaper sports columnist in Chicago, began hosting ''The NFL Today'' in 1975. The show rated higher than the NBC pre-game programs every year.

He also anchored the Masters, the NBA Finals, the Pan American Games and

late-night coverage of the U.S. Open tennis tourney.

Musburger was said to be overexposed and Pilson and CBS Sports Executive Producer Ted Shaker decided that they would spread the choice assignments around. It has been speculated that Jim Nantz, Greg Gumbel or Pat O'Brien will be Musburger's replacement on ''The NFL Today.'' The show lost reporter Will McDonough to NBC on Tuesday.

WASHINGTON (MAY 2) UPI - Japanese researchers reported Wednesday they have built a new scientific computer that performs as well as a commonly used U.S. supercomputer - but at a cost 10,000 times less.

In a study published in the journal Nature, a team headed by Toshikazu Ebisuzaki of Tokyo University said its new computer, which uses very large scale integration chips, can operate at a speed of about 120 million calculations per second, or 120 megaflops.

That performance ''is comparable to the Cray XMP-1 at a cost 10,000 times

lower,'' the researchers wrote.

Officials with Cray Research Inc. of Minneapolis could not be reached for comment on the report. The Cray XMP-1 is the second-fastest Cray supercomputer on the market, and is 10 times slower than the Cray YMP-1.

The Japanese computer, dubbed the Gravity Pipe or GRAPE, was designed specifically to carry out computer simulations of astrophysics problems involving many cosmic bodies, such as stars in a galaxy or galaxies in a cluster.

The achievement represents a different approach to meeting the enormous computer demands of many important scientific problems. Rather than designing better software for general-purpose supercomputers or systems to hook general-purpose machines together in parallel, the researchers built special-purpose hardware to accelerate their computations.

In a commentary on the Japanese work, Colin Upstill of Plessey Research in Romsey, England, said he expects the GRAPE approach, and similar efforts in the United States and elsewhere, could be adapted for many other types of scientific computation that require vast computer power.

But Upstill said he considers the new approach ''neither inferior nor superior to either general-purpose computers or reconfigurable parallel computers.''

''Each approach trades ease of implementation and general applicability for cost/performance in different ways,'' he said, noting that in comparison to software, it would be extremely costly to ''debug'' or remove an error in hardware like the GRAPE chip.

The Japanese team cites fluid dynamics and the folding movement of proteins as research areas that might benefit from GRAPE, which uses what computer experts term a ''pipeline'' structure to simulate particle systems influenced by long-range forces, like gravity.

''To describe such structures realistically we need greater numbers of particles and thus more computing power,'' the researchers wrote.

By itself, GRAPE only offers astronomers the power to work with models of a few thousand stars - far from a realistic simulation considering that our average-size galaxy alone contains 100,000 million stars.

But because of the new computer's design, a bunch of GRAPEs could be hooked together to work in parallel, boosting the computation power to the order of millions of million of calculations per second or teraflops.

''It is now becoming possible to tackle problems never previously

attempted, not because we did not know how, but because they were not computationally feasible,'' Upstill said.

#90122u2088 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - Jamaican Prime Minister Michael Manley began a working visit to the United States Wednesday with a plea for rescheduling his country's crushing debt repayments.

Manley said at an Interamerican Development Bank luncheon that over 1989 and this year Jamaica would pay $208 million more in loan repayments to the IMF and the World Bank than it is going to receive from the multilateral organizations.

Neither the IMF nor the World Bank permit rescheduling of their loans to member countries.

Manley told a news confererence that he would ask Treasury Secretary Nicholas Brady for help in changing the rules to permit refinancing such debts. He said that Brady can't do it alone, but he can bring pressure on other major lenders, including Japan, Germany and other countries of Western Europe.

He began his series of meetings with U.S. officials by meeting Brady Wednesday afternoon. Manley is to meet President Bush Thursday morning.

The Jamaican leader told a news conference, ''It's insane when the two primary lending institutions (the IMF and the World Bank) draw more money from debtor countries than they give.''

The United States, according to a senior administration official briefing reporters at the White House, will permit rescheduling of the approximately $800 million owed to the United States. Jamaica is scheduled to receive $70 million in economic assistance from the United States this year, but that has come into question because of new aid programs scheduled for Eastern Europe and Central America.

Jamaica's total external debt is $4.4 billion, according to the World Bank or about $1,700 for every Jamaican, one of the largest debt burdens in the Third World.

He estimates that in the five years between 1986 and 1991, Jamaica will pay back $1.1 billion more to creditors than it will receive from outside economic assistance.

Manley said he will also ask the United States to help find a way for other Caribbean countries to get investment funds from the ''936 Fund,''

an account meant to stimulate development in Puerto Rico.

The U.S.-government fund now contains some $18 billion, and is growing at the rate of $2 billion per year, but under the complex rules for drawing on those funds ''only a trickle'' reaches countries like Jamaica, Manley said.

Manley, a former doctrinaire Socialist who nearly led his country to economic ruin in the 1970s with a state-run system, has become an enthusiastic convert to free-market principles.

But he said his country will require some help in rescheduling its debt before it can succeed with expensive programs, including one to control drug trafficking and marijuana growing.

#90122u2107 05/02/1990 ~United Press International
WASHINGTON (MAY 2) UPI - The House Judiciary Committee completed work Wednesday on a bill that would bar discrimination against the disabled, clearing the landmark measure for a vote by the full House.

Earlier in the day, President Bush said disabled citizens have waited long enough for equality and he urged prompt House approval of the bill.

The Senate passed its version of the bill last September and the judiciary panel was the fourth and final House committee to act on the legislation granting broad civil rights protections to the disabled.

The Judiciary Committee approved the bill on a 32-3 vote. It could be scheduled for a vote by the full House later this month.

The bill would grant protections similar to those provided by the 1964 Civil Rights Act for blacks, women, ethinic and religious minorities. It would bar discrimination in employment, telecommunications, public and private transportation, and public accommodations.

The measure also requires actions to increase accessibility of public facilities for the disabled. All new cars bought by Amtrak, for example, would have to be designed for easy access and use by disabled passengers and new telecommunications equipment would have to be modified for use by hearing impaired people.

Bush, in remarks to The President's Committee on the Employment of People with Disabilities, said, ''No longer can we allow ignorance or prejudice to deny people with disabilities opportunity for employment.''

''We welcome you, the disabled, into the mainstream of American life,'' he added. ''I'm hopeful the House will take action soon just as the Senate has.''

''Disabled citzens have waited long enough for equality,'' he said. ''It's past time that people with disabilities are involved in the mainstream of life.''

Rep. Steny Hoyer, D-Md., one of the chief sponsors of the bill, said the bill was ''on track for receiving House approval as soon as possible on the floor, and will be sent shortly to the president's desk for signature.''

''At that point, 43 million Americans with disabilities will soon be able

to take their place in society as equal citizens,'' he said.

Refiling to correct codes

CHICAGO (MAY 2) UPI - Trading was choppy in the grain market Wednesday. Grain and soybean futures rallied to session highs, gave up some of the gains and then turned higher again on the Chicago Board of Trade.

Closing prices were at or near the highs.

Wheat was supported by news the Agriculture Department had targeted China for 2 million tons of export bonus wheat and Jordan for 350,000 tons. Commercials and commission houses dominated the buying in wheat.

Corn futures turned higher after some early weakness, partly on spillover from the soybean complex. South Korea bought 150,000 tons of corn.

The sharp rally in soybean oil carried over to soybeans. The demand for both soybeans and oil was based on ideas that Tuesday's losses were overdone.

Oil had additional support from the Census Bureau report for March, indicating a decline in soybean oil stocks.

Country movement was light.

At the close, corn was up 2 1/2 to 4 1/4, soybeans up 5 1/2 to 9 1/4, wheat up 4 to 6 and oats up 3 3/4 to 6.

WASHINGTON (MAY 2) UPI - The following is a list of states' 1988 high school graduation rates and their national ranking, and 1989 average college entrance examination scores, according to an Education Department study released Wednesday.

Twenty-eight states use the ACT entrance test - 36 is a perfect ACT score - while 22 states use the SAT entrance test - 1600 is a perfect SAT score.

Alabama - 74.9 percent (23rd), ACT score 17.9
Alaska - 65.5 percent (43rd), ACT score 17.9
Arizona - 61.1 percent (48th), ACT score 19
Arkansas - 77.2 percent (17th), ACT score 17.6
California - 65.9 percent (42nd), SAT score 906
Colorado - 74.7 percent (24th), ACT score 19.6
Connecticut - 84.9 percent (7th), SAT score 908
Delaware - 71.7 percent (32nd), SAT score 903
District of Columbia - 58.2 percent (50th), SAT score 846
Florida - 58 percent (51st), SAT score 887
Georgia - 61 percent (49th), SAT score 847
Hawaii - 69.1 percent (38th), SAT score 888
Idaho - 75.4 percent (22nd), ACT score 19.1
Illinois - 75.6 percent (21st), ACT score 18.8
Indiana - 76.3 percent (19th), SAT score 871
Iowa - 85.8 percent (5th), ACT score 20.1
Kansas - 80.2 percent (9th), ACT score 19.1

Kentucky - 69 percent (39th), ACT score 17.8
Louisiana - 61.4 percent (47th), ACT score 17.1
Maine - 74.4 percent (25th), SAT score 897
Maryland - 74.1 percent (26th), SAT score 914
Massachusetts - 70 percent (35th), SAT score 905
Michigan - 73.6 percent (29th), ACT score 18.6
Minnesota - 90.9 percent (1st), ACT score 19.7
Mississippi - 66.9 percent (40th), ACT score 15.9
Missouri - 74 percent (28th), ACT score 19
Montana - 87.3 percent (4th), ACT score 19.8
Nebraska - 85.4 percent (6th), ACT score 19.6
Nevada - 75.8 percent (20th), ACT score 19
New Hampshire - 74.1 percent (26th), SAT score 932
New Jersey - 77.4 percent (15th), SAT score 894
New Mexico - 71.9 percent (31st), ACT score 17.8
New York - 62.3 percent (46th), SAT score 890
North Carolina - 66.7 percent (41st), SAT score 836
North Dakota - 88.3 percent (2nd), ACT score 18.7
Ohio - 79.6 percent (10th), ACT score 19.1
Oklahoma - 71.1 percent (32nd), ACT score 17.7
Oregon - 73 percent (30th), SAT score 927

MIAMI BEACH, FL (MAY 2) UPI - A drug appears to slow the deterioration of Parkinson's disease patients, giving victims of the illness longer periods of productivity, researchers said Wednesday.

In patients experiencing the first symptoms of Parkinson's disease, the drug deprenyl appeared to delay disability by about a year, said Dr. Ira Shoulson, a neurologist at the University of Rochester in New York who conducted the study.

In addition, a study conducted at the Barrow Institute in Phoenix showed deprenyl, when used with the drug levodopa, or l-dopa, produced a moderate improvement in patients with more advanced cases of Parkinson's disease.

Shoulson and Dr. Abraham Lieberman, who headed the Barrow Institute study, presented the reports at an annual meeting of the American Academy of Neurology.

''Deprenyl clearly slowed the pace of early Parkinson's disease and was well tolerated by our patients,'' said Shoulson, whose study appears to confirmed the results of previous smaller studies.

''However, the true extent of the benefits observed in our patients remains unclear. Are they a short-term lessening of symptoms or a genuine slowing of the nerve cell loss which causes Parkinson's disease?'' he said.

Parkinson's disease affects about 500,000 Americans, mostly men and women over age 40. The brain disease causes a progressive loss of muscle control resulting in a debilitating trembling and shaking of the arms and legs, stiffness and loss of balance.

Victims experience the death of brain cells in a part of the brain known as the substantia nigra, which produces dopamine for a part of the brain that helps control motor function known as the caudate nucleus. The cause

of the cell death is unknown.

The 800 patients in Shoulson's study suffered from impaired dexterity, which often affected their handwriting, and slight tremors. That study was conducted at 28 treatment centers in the United States and Canada, beginning in 1987.

Patients in Shoulson's study, who were treated exclusively with deprenyl, were able to remain at work longer than victims of the disease in the study who were not treated with the drug.

Deprenyl, which was approved by the Food and Drug Administration in October 1989, currently is restricted - outside research studies - to use with the standard levodopa therapy for Parkinson's patients, Shoulson said.

''We followed 250 patients with the combined therapy, and we found an anti-Parkinson effect with deprenyl,'' Lieberman said. ''Combined with levodopa, deprenyl is an effective treatment for Parkinson's.''

#90122u2193 05/02/1990 ~United Press International

(MAY 2) UPI - Israeli caretaker Prime Minister Yitzhak Shamir met today with potential coalition partners from right-wing parties in a bid to form Israel's next government. Foreign Minister Moshe Arens says a Likud-led coalition will NOT end Israel's peace initiative. In the Israeli-occupied Gaza Strip today, soldiers shot and killed a masked Palestinian who was writing slogans on the outer walls of a mosque calling for a commercial strike.

A medical journal says the New York City metropolitan area has the highest AIDS rate in the world. The report... to appear in the Medical Tribune magazine... is based on a federal Centers for Disease Control survey of patients in 26 hospitals nation-wide. A C-D-C epidemiologist is quoted as saying there is NO hospital in the nation that did NOT have cases involving patients infected with the AIDS virus.

Police and prosecutors in Waco, Texas, say a member of Vice President Quayle's advance team in being investigated. An 18-year-old college student alleges that the man... an employee of the Republican National Committee... sexually assaulted her Sunday morning in his hotel room. The vice president's spokesman, David Beckwith, says the man has been ''relieved of his duties.'' Members of Quayle's advance team have been in Waco preparing for the vice president's visit today to attend a political fund-raiser.

#90122u2222 05/02/1990 ~United Press International

BONN, WEST GERMANY (MAY 2) UPI - West German opposition leader Oskar Lafontaine was discharged from a Cologne hospital Wednesday one week after narrowly surviving an assassination attempt by a knife-wielding woman who slashed his neck.

In Vienna, meanwhile, police said a mentally disturbed man arrested for allegedly plotting to kill Mayor Helmut Zilk apparently intended to imitate the attack on Lafontaine.

Lafontaine's assailant, Adelheid Streidel, 42, is currently undergoing examination in a psychiatric hospital. A spokesman for the Cologne police quoted Streidel as saying ''It was a private political decision.... I wanted to kill Mr. Lafontaine so I would be taken to court and appear in the press.''

The spokesman, Reinhard Fischer, said Streidel also told investigators she wanted to give ''a signal'', because ''there are human factories and underground depots in which people's functions are adjusted, with the knowledge of politicians.''

Lafontaine, 46, wore a brown scarf around his neck at a brief press conference held outside the Cologne University Clinic. He said he was grateful for the get-well messages he had received, especially those from children.

The Social Democratic leader said he would not be able to campaign for the May 13 West German state elections in North Rhine Westphalia and Lower

Saxony.

A statement by the hospital said doctors had recommended Lafontaine suspend all work until his recovery was complete.

In Vienna, police said Anton Zwinz, an unemployed city resident, was armed with a 12-inch bread knife when he was arrested during May Day festivities Tuesday in a square outside City Hall. Zilk was scheduled to visit the square later in the day.

Authorities were alerted to the alleged plot by a taxi driver, who said a man matching Zwinz's description had shown him a large knife and confided he planned to kill Zilk.

Zwinz, 39, apparently intended to mimic the attack on Lafontaine, who was stabbed in the throat during a political rally last Wednesday in Cologne, police said.

Zwinz, who authorities described as mentally disturbed, was placed in a psychiatric ward after the arrest. He allegedly told police he planned to stab Zilk and then douse himself with gasoline and set himself on fire.

The mayor was told of the alleged plot and arrest but decided to attend May Day festivities anyway.

''Those of us in public life must learn to live with these things,'' he said.

#90122u2236 05/02/1990 ~United Press International

BRUSSELS, BELGIUM (MAY 2) UPI - European Community officials proposed Wednesday to extend Western assistance now given to economic reforms in Poland and Hungary to five other East European countries.

The action plan was proposed by the EC Executive Commission after fact-finding missions to Bulgaria, East Germany, Czechoslovakia, Yugoslavia and Romania.

It will be submitted May 22 to a high-level meeting of 24 Western nations which agreed last year to make a special effort to help the flagging economies of Poland and Hungary.

The summit meeting of the seven leading Western nations in July 1989 in Paris asked the Commission to coordinate these efforts.

Commission experts said the other five countries should also qualify for the assistance because they have made significant strides toward

market-oriented economies and democracy.

The program for Poland and Hungary calls for improving the access of their goods to Western markets, food aid (for Poland), professional training, environmental protection and investments to promote economic restructuring.

The same basic principles would apply for assistance to the five other countries, with emphasis on specific sectors based on need as outlined in requests from their national authorities and reports of the fact-finding missions, the Commission said.

#90122u2249 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - The stock market posted its third straight advance Wednesday thanks to some favorable economic news, with prices closing sharply higher after a late surge.

The Dow Jones industrial average, which rose 12.16 Tuesday, gained 20.72 to close at 2689.64.

Among broader market gauges, the New York Stock Exchange composite index rose 1.12 to 183.34 and Standard & Poor's 500-stock index rose 2.23 to 334.48. The price of an average share rose 20 cents.

Advances led declines 858-608 among the 1,940 issues crossing the NYSE tape. Big Board volume totaled 141,610,000 shares, versus 149,020,000 shares traded Tuesday.

The market was modestly higher most of the day, reter several encouraging economic reports, before staging a late surge to close with sharp gains. The index of leading economic indicators for March advanced by a strong 0.9 percent, reflecting gains in the industrial sector, after a sharp one percent decline in February. The index was expected to rise 0.7 percent.

Separately, factory orders, reflecting a continuation of strong aircraft demand, increased 3.8 percent in March to $240.4 billion in the best showing since December 1988.

Private analysts had expected an increase of between 3.5 percent and 3.9 percent in March factory orders. The overall 3.8 percent gain in March orders was the best showing since an advance of 4.7 percent in December 1988.

Also boosting prices was a report from the Federal Reserve that the the U.S. economy expanded slowly in April with little evidence of a "credit crunch" by banks and other lenders. The findings were released in the "beige book" report compiled every six weeks by the Fed and its 12

regional banks.

As for the market's late jump, analysts said they could not attribute it to any one catalyst. "There's nothing specific developing," said Jerry Hinkle a trader with Sanford C. Bernstein & Co. "The market was just very oversold."

Chester Pado, director of technical research at Jefferies & Co. in Los Angeles, said the late gain was just "followthrough to what happened yesterday, but breadth was better. It looks like we should be able to make more headway in this rally."

Pado said the government reports early Wednesday showed an economy holding up well. "Fears of recession are not showing up in the numbers, but there's not a lot of enthusiasm. Everybody feels they have to get past the refunding before they get serious. They need to feel rates have peaked and until the refunding is held it's not likely rates have peaked."

The Treasury Department said after the market's close it would auction $30.5 billion in securities at its quarterly refunding next week to raise cash to run the government, bail out the thrift industry and settle maturing notes. The announcement was in line with bond dealers' estimates.

The size of the refunding is significant to the stock market since the more debt there is to be absorbed by the investment community, the greater chance there is that interest rates on the securities will have to rise to make them attractive to bond traders.

On the trading floor, American General was the most active issue, surging 7 1/2 to 47 5/8 after shareholders defeated a proxy fight from Torchmark Corp., but the company's board said it would put the Houston-based insurer up for sale. Torchmark then said it would make another bid for the company according to reports.

Ames Department Stores followed, up 3/8 to 2 7/8. A federal bankruptcy judge has given interim approval for the company to obtain a $25 million loan from Chemical Bank and hire Stephen Pistner as chief executive. Union Carbide was third, off 1/2 to 18 7/8.

Among the other blue chips, AT&T was down 1/4 to 40 1/8, IBM was up one to 109, Eastman Kodak was up 3/4 to 37 7/8 after reporting first-quarter earnings at the high end of expectations, and General Motors added 1/2 to 44 7/8. Boeing was up 3/4 to 73 after reporting a surge in earnings earlier this week, boosting its payout and splitting its stock.

Elsewhere, Rorer sank 5 1/4 to 64 1/2 before Friday's expiration of Rhone-Poulenc's tender offer, which is for a 50.1 percent stake at $78 a share. The offer is the first step in a merger between the two companies.

Chrysler was up 1/2 to 15 3/4. Its $71 million first-quarter profit reported Tuesday was above expectations of a break-even period.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 171,077,390 shares, compared with 176,145,100 shares traded in the previous session.

Prices closed mixed in moderate trading on the American Stock Exchange. The Amex Market Value index rose 0.91 to close at 343.23. The price of an average share gained 3 cents. Declines led advances 269-263 among the 804 issues traded. Composite volume totaled 13,640,800 shares, compared with 12,476,550 traded Tuesday. Echo Bay Mines led the Amex issues, down 1 3/8 to 12 1/4.

The National Association of Securities Dealers composite index closed up 1.73 to 423.58.

#90122u2251 05/02/1990 ~United Press International

MALDEN, MA (MAY 2) UPI - In the Boston suburb where Frank Reed grew up, residents were making plans Wednesday to celebrate his homecoming.

Citizens and local merchants hung yellow ribbons from trees and windows in honor of the former hostage, who was freed Monday after 44 months of captivity in Lebanon.

''The city will respond in a joyous way,'' a spokeswoman for Mayor James Conway said.

The 57-year-old educator was raised in Malden, where his 91-year-old mother still lives. Reed's Syrian-born wife, Fahimeh, and the couple's 9-year-old son Tarek have been living in Malden since last September.

Reed's daughter, Marilyn Langston, who also lives in Malden, said she planned to adorn the trees outside her home with yellow ribbons. Yellow ribbons also adorned trees in Malden Square and windows of the police station.

A yellow ribbon was draped atop a canopy on the first floor of the Dowling office building, and a large banner proclaimed, ''Welcome Home, Frank Reed.''

''It was a spontaneous gesture. Yellow ribbons have been showing up all over the city and especially in the downtown area,'' said Beverly Doucette a spokeswoman for Conway.

Doucette said Conway planned to meet with members of Reed's family to

discuss plans for a celebration, but said officials wanted to give Reed time to recuperate and wait for his family's approval before finalizing any arrangements.

''As soon as the family and the mayor meet, they will definitely be arranging something suitable. The mayor really feals he should defer to the family's wishes,'' Doucette said. ''We're definitely planning to have a special celebration the moment we feel it is appropriate.''

#90122u2261 05/02/1990 ~United Press International

KALAPANA, HI (MAY 2) UPI - Lava from Kilauea volcano repaved a street with rock Wednesday, cutting off the last road access to the eastern portion of a doomed rural housing area on the island of Hawaii, an official said.

''The lava moved across Pililani Street just above the intersection with Beach Road at about 4 a.m., closing the southern entrance to Kalapana Gardens,'' said Hawaii County Civil Defense Assistant Administrator Bruce Butts.

The road had been the only open street into the eastern section of the settlement since the north access along Pililani was covered earlier in the week.

About 15 homes remain standing in the now-isolated area, said Butts.

The last house to burn went up in flames at 1:20 p.m. Tuesday. It was the 126th structure destroyed since the current eruption of Kilauea Volcano began in January 1983.

The front of the flow was about 260 yards from the only store in the area and an additional 100 yards from the historic Star of the Sea Church, also known as the Painted Church, he said.

Officials from the Federal Emergency Management Agency conducted ground and aerial surveys of the lava flow Tuesday and met with county and state officials, including Gov. John Waihee.

''It's really tragic to see a special community and a lifestyle being destroyed,'' said Waihee, who also toured Kalapana Tuesday. ''Nobody tells Madame Pele (Hawaiian volcano goddess) what to do, but I hope she gives them a little while longer.''

Waihee last weekend declared portions of the southeast section of the island of Hawaii some 200 miles from Honolulu a disaster area.

The state does not expect any reaction from the FEMA team for at least four days, said adjutant general and director of state civil defense, Maj. Gen. Alexis Lum.

Whether it qualifies for federal disaster assitance depends ''on how strong a case we make,'' said Lum.

Damage to homes, property, and roadways in the seven-year-long eruption has been estimated at more than $25 million.

The Red Cross moved its emergency shelter for the victims of the rampaging lava from the Harry K. Brown Park in Kalapana to the Pahoa Community Center, some 10 miles away.

A shelter that can accommodate more than 50 people has been opened at the community center.

#90122u2269 05/02/1990 ~United Press International

MANAGUA, NICARAGUA (MAY 2) UPI - Interior Minister Carlos Hurtado announced Wednesday the capture of about 350 pounds of cocaine hidden in the reserve gasoline tank of a truck bound from Panama to Guatemala.

Hurtado estimated the value of the drug at more than $30 million.

''This is the first time we have found a shipment of this size in Nicaragua,'' he said. He said the truck had Guatemalan license plates, but that the drugs might have had an eventual destination outside Guatemala, possibly in the United States.

U.S. authorities have criticized Nicaraguan anti-drug efforts in the past, accusing the country of working in a triangle with both Panama and Cuba to traffic drugs to the United States. Hurtado denied the allegations.

''Nicaragua is not used as a point to traffic drugs in large quantities to the United States,'' he said.

National Police Chief Rene Rivas agreed, saying, ''There has not been a lot of attention paid to large drug shipments through Nicaragua in the past, because we have not encountered it. The most we have found has been at times small shipments being trafficked outside the country from the Bluefields area on the Atlantic Coast.''

Hurtado was appointed interior minister last week by newly inaugurated President Violeta Chamorro. Rivas was also the national police chief under the Sandinista government of former President Daniel Ortega.

Hurtado said Wednesday the new government will give anti-drug efforts a higher priority than did the Sandinistas.

''We are going to increase our efforts, in conjunction with international law enforcement agencies like Interpol, to fight drug trafficking,'' he said.

The 350-pound cocaine shipment entered Nicaragua from its southern border with Costa Rica on April 24 and was discovered later that day by police and customs authorities at the northern Los Manos border crossing to Honduras, Hurtado said. The driver of the truck was arrested and was being held in Esteli province on drug trafficking charges.

Hurtado said the cocaine was packed in 2.5-pound bags and stuffed into the truck's spare gas tank. He said authorities knew to look there because a similar shipment was uncovered earlier this year by authorities in Honduras.

#90122u2281 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - The dollar was mixed in thin and volatile trading Wednesday as players mostly ignored U.S. economic data in favor of keeping books square with key job figures and a Group of Seven session ahead.

Globally, the foreign exchange market was subdued with Japanese traders only partially active on the eve of yet another two Golden Week bank holidays and European participants gearing back up after May Day.

The Commerce Department said leading economic indicators for March advanced a strong 0.9 percent after a 1.0 percent decline in February, and factory orders rose 3.8 percent that month - also a favorable result.

But currency adviser Lori Poyner of the Harris Trust & Savings Bank said most players already were focused on national employment statistics to be released Friday, a weightier gauge of U.S. economic health.

Traders were wary too of surprises from a meeting Sunday in Washington of the Group of Seven industrial democracies.

Poyner said dollar bullishness was tied to chances the Federal Reserve might hike short-term interest rates to quell inflation - if national job data show a strengthening U.S. economy. Higher interest rates draw more capital to the United States, increasing demand for dollars.

In late New York trading, the dollar was quoted at 1.6850 West German marks, up from 1.6805 marks Tuesday. Against the Japanese unit the dollar fetched 158 yen, down the better part of a yen from 158.80.

Economist Jerry Jordan of First Interstate Bank in Los Angeles said the job data could be critical in swaying the Fed's interest rate policy board towards more stringent credit. Given rising inflation, he said, "The safer course of action may be to tighten for a month or two."

Other dollar rates: 1.4545 Swiss francs, off from 1.4550; 5.6530 French francs, up from 5.6355 French francs; and 1,235 Italian lire, up from 1,231.50 lire in late trading Tuesday. The British pound slipped to $1.6430 from $1.6440.

In Europe the dollar closed mostly higher against the main currencies despite lethargic activity after the May Day holiday, but was held in a tight range by the effects of West German mark-Japanese yen cross-trading.

Dealers expected European markets to remain quiet for the rest of the week as few government economic indicators have been released and markets in many nations, especially Japan, will close for holidays.

"Probably nothing very much will happen in Europe until after the G-7 meeting on Sunday and the U.S. treasury auctions next week," said Andy Baxter, chief London foreign exchange manager for the Bank of America.

In London, the only European market which opened on May Day, the pound was up against the dollar at $1.6430 compared with $1.6395.

The dollar moved up in Frankfurt, closing at 1.6820 Deutsche marks compared to 1.6775 Monday. It rose in Zurich to 1.4575 Swiss francs against 1.4525.

The dollar finished higher in Paris, Brussels and Milan, at 5.6560 French francs against 5.6385, at 34.74 Belgian francs against 34.68, and at 1,235.50 Italian lire against 1,231.45 Monday.

In Tokyo, the dollar eased against the yen in slow trading on the last day of market activity ahead of the release of the U.S. employment numbers, finishing at 158.55 yen compared with 158.90. Japanese markets were to close Thursday and Friday for the Golden Week holiday series.

Republic National Bank in New York closed cash gold at $369.75 an ounce, off from $370.25 Tuesday. The New York Commodity Exchange settled spot gold at $369.50 an ounce, down from $370. In Zurich gold closed higher at $370 an ounce compared with $367 Monday, the previous session. London gold moved up to $370.50 an ounce against $368.25 Tuesday.

Republic closed cash silver at $5.015 an ounce, down from $5.045. Comex spot silver ended at $4.988 an ounce, below $5.013. Zurich closed silver at $5.00 an ounce, up from $4.95 Monday. London silver moved up to $5.01

an ounce from Tuesday's closing price of $4.97.

#90122u2299 05/02/1990 ~United Press International

ANCHORAGE, AK (MAY 2) UPI - State officials eager to get Exxon's spilled oil off Alaska shores have approved a controversial Exxon Corp. plan to spray a toxic chemical that stimulates growth of oil-eating bacteria, but local officials said Wednesday remain opposed.

''For Kodiak Island, no, we don't want it,'' said Joanna Fujimoto of the Kodiak Borough oil spill office. ''I think they're acting very recklessly.''

Fishermen, environmentalists and officials of the Kodiak Island and Kenai Peninsula governments said they fear the liquid chemical Inipol might do more harm than good. The National Park Service already has prohibited use of Inipol for cleaning oily park shores because it is toxic.

Late Tuesday, however, the state granted Exxon conditional approval for spraying Inipol on oily shores, but said scientists must prove it works.

''If the monitoring program fails to demonstrate within the first six weeks that accelerated biodegradation of oil has occurred, we will not approve reapplication (of Inipol) and will insist that alternative techniques be used,'' state cleanup coordinator Randy Bayliss told the Coast Guard.

Exxon and federal officials had been pressing - some say pressuring - the state to OK use of the chemical. Coast Guard Rear Adm. David Ciancaglini, the federal on-scene cleanup coordinator, said he appealed to Alaska Gov. Steve Cowper to let Exxon use the chemical.

An aide to the governor, Ernie Piper, said there was ''a hard sell'' to get the state to approve Inipol.

Exxon and the Environmental Protection Agency acknowledged that Inipol was toxic, but argued that its benefits outweighed any harm and that it appeared to speed the otherwise slow breakdown of oil remaining from the March 24, 1989, Exxon Valdez oil spill.

When sprayed on beaches, Inipol is deadly to small creatures for up to two days, except to the tiny organisms that feast on oil. Inipol stimulates their growth, thus enhancing natural biodegradation of oil, a process known as bioremediation.

But state chemist Jon Lindstrom said Exxon's claims that beaches sprayed with Inipol recover five times faster are exaggerated.

Inipol was sprayed on 70 miles of shoreline last year - Exxon's 11 million gallons of spilled oil coated 1,200 miles of shore - in the first widespread experimental use of the chemical since it was developed by the French oil company Elf Aquitaine following the Amoco Cadiz spill off France in 1978.

Exxon spokesman Fred Davis said the company wants to spray Inipol on about 35 to 40 miles of shore this year. On some shores, Inipol will be the only treatment. Other beaches may be tilled to expose subsurface oil for Inipol spraying. The state expects Inipol to be applied at 160 locations.

Exxon launched cleanup vessels Tuesday and said workers should be on oily shores by this weeekend for a second season of cleanup. Bioremediation was expected to begin May 15.

Rear Adm. Ciancaglini said he will respect wishes of local land managers in making cleanup decisions, including use of Inipol, but he said, ''Bioremediation is an important oil spill treatment method.''

''With its use, we'll be able to more effeciently and effectively clean the shoreline,'' the admiral said. ''There's a lot of work to do and this is an important tool to have in our toolbox.''

#90122u2312 05/02/1990 ~United Press International

NEW YORK (MAY 2) UPI - Four workers with the city's Transit Authority workers have been arrested on charges they stole more than $200,000 worth of TA property, including bus engines and a new tractor-trailer cab, officials said Wednesday.

Among those nabbed as a result of a two-year undercover investigation, code-named ''Parts 'Ta Go,'' was a supervisor at a TA storage facility in Queens.

''This type of act will absolutely not be tolerated,'' said Metropolitan Transit Authority Inspector General John Pritchard III, whose office led the investigation by transit police and the TA's property protection department.

Stolen from four TA warehouses in Queens and Brooklyn were items ranging from shock absorbers, rear brakes and air guns to bus engines worth more than $1,000 each.

Also stolen was a 1989 white GMC tractor-trailer worth more than $100,000.

The new tractor-trailer was simply driven from a warehouse in broad

daylight and taken to an undisclosed location, where an undercover investigator posing as a buyer of stolen goods purchased it for $20,000, Pritchard said.

The alleged thieves typically sold items for about 25 percent of their wholesale value.

The inspector general said he ordered an investigation into theft among TA workers after he took office two years ago and learned that more than $2 million worth of equipment was being stolen from the authority annually.

''It's taken two years to bring down these results and we're very pleased '' Pritchard said, adding that more arrests were expected.

#90122u2324 05/02/1990 ~United Press International

SEATTLE (MAY 2) UPI - Teenagers who smoke crack cocaine more than 10 times have an increased chance of suffering potentially life-threatening seizures, a researcher said Wednesday.

Dr. Richard Schwartz of Georgetown University said 10 percent of 43 teenagers studied in treatment programs who smoked crack extensively reported suffering seizures similar to epileptic grand mal convulsions.

''If you smoke crack 10 times or more, your chances of having a seizure increase 10 percent,'' Schwartz said at an American Academy of Pediatrics meeting.

''And while a seizure itself has a very low instance of causing permanent brain damage, a cocaine-associated seizure is a brain insult. It's an electrical disturbance, which can cause strokes,'' he said.

Such seizures can cause twitching in relatively mild cases, and loss of consciousness, body rigidity, and loss of bladder and bowel control in more severe cases, Schwartz said.

''Afterward, the person has no recollection of having had a seizure,'' he said.

Crack - in which cocaine is combined with baking soda and water, then dried and smoked - hits the brain harder than cocaine does in any other form, Schwartz said.

Schwartz's study involved 464 middle-class suburban teens ranging in age from 14 to 19, 130 of whom had smoked crack. Ninety-five percent of them were white and all were enrolled in drug-treatment programs when they were interviewed.

Eighty-seven of the youths said they had smoked crack fewer than 10 times, while 20 indicated they had smoked it 10 to 50 times and 23 said they smoked crack more than 50 times.

The only youths who reported having seizures were those who had smoked crack at least 10 times, Schwartz said.

''None of those who snorted (inhaled) cocaine reported having seizures,'' Schwartz said. ''None of those who used crack less than 10 times reported seizures and those who had not used crack did not report any seizures.''

Physicians treating young people who have suffered seizures are increasingly alert to the possibility of crack use as a cause, he said.

''Doctors are wising up,'' Schwartz said. ''Previously, they didn't think this nice young kid they were treating had been smoking crack.''

''When you smoke crack, rather than inhale cocaine through the nose, you bypass the liver and go directly to the brain,'' he said. ''The cocaine causes the blood vessels to constrict, thus depriving the brain of oxygen and blood. That can cause some people to stroke out.''

Babies are particularly susceptible to the effects of crack and prone to seizures because their immune systems are less developed, he said.

''Infants are more suceptible to seizures merely by being in the same room where crack is smoked,'' Schwartz said. ''They inhale sidestream smoke.''

One in every 5,000 people lacks an enzyme - pseudo-cholinestrase - that metabolizes cocaine, thus increasing their risk of suffering grand mal-like seizures, he said.

Their bodies ''are unable to detoxify cocaine,'' Schwartz said.

According to National Institute on Drug Abuse research, the number of high school seniors who reported using cocaine dropped from 5.4 percent in 1987 to 4.7 percent in 1989, he said.

''And cocaine use by people aged 19 to 28 was 22 percent less in 1989 than three years previously,'' he said.

#90122u2375 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - Japanese researchers reported Wednesday they have built a new scientific computer that performs as well as a commonly used U.S. supercomputer - but at a cost 10,000 times less.

In a study published in the journal Nature, a team headed by Toshikazu Ebisuzaki of Tokyo University said its new computer, which uses very large scale integration chips, can operate at a speed of about 120 million calculations per second, or 120 megaflops.

That performance ''is comparable to the Cray XMP-1 at a cost 10,000 times lower,'' the researchers wrote.

Officials with Cray Research Inc. of Minneapolis said they had no comment on the report, but noted performance often falls when attempts are made to mass-produce devices that appear promising in the laboratory. The Cray XMP-1 is the second-fastest Cray supercomputer on the market, and is 10 times slower than the Cray YMP-1.

The Japanese computer, dubbed the Gravity Pipe or GRAPE, was designed specifically to carry out computer simulations of astrophysics problems involving many cosmic bodies, such as stars in a galaxy or galaxies in a cluster.

The achievement represents a different approach to meeting the enormous

computer demands of many important scientific problems. Rather than designing better software for general-purpose supercomputers or systems to hook general-purpose machines together in parallel, the researchers built special-purpose hardware to acclerate their computations.

In a commentary on the Japanese work, Colin Upstill of Plessey Research in Romsey, England, said he expects the GRAPE approach, and similar efforts in the United States and elsewhere, could be adapted for many other types of scientific computation that require vast computer power.

But Upstill said he considers the new approach ''neither inferior nor superior to either general-purpose computers or reconfigurable parallel computers.''

''Each approach trades ease of implementation and general applicability for cost/performance in different ways,'' he said, noting that in comparison to software, it would be extremely costly to ''debug'' or remove an error in hardware like the GRAPE chip.

The Japanese team cites fluid dynamics and the folding movement of proteins as research areas that might benefit from GRAPE, which uses what computer experts term a ''pipeline'' structure to simulate particle systems influenced by long-range forces, like gravity.

''To describe such structures realistically we need greater numbers of particles and thus more computing power,'' the researchers wrote.

By itself, GRAPE only offers astronomers the power to work with models of a few thousand stars - far from a realistic simulation considering that our average-size galaxy alone contains 100,000 million stars.

But because of the new computer's design, a bunch of GRAPEs could be hooked together to work in parallel, boosting the computation power to the order of millions of million of calculations per second or teraflops.

''It is now becoming possible to tackle problems never previously attempted, not because we did not know how, but because they were not computationally feasible,'' Upstill said.

#90122u2396 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The House approved a bill Wednesday authorizing up to $7.5 billion for construction of the superconducting super collider, one of the most ambitious scientific projects ever undertaken.

The House voted 309-109 to authorize the money for the gigantic particle accelerator that scientists hope will unlock the secrets of the smallest

building blocks of the universe.

The bill's sponsor, Rep. Robert Roe, D-N.J., chairman of the Science, Space and Technology Committee, said the super collider ''represents nothing less than American leadership in science. ... It's the most significant ground-based scientific project ever undertaken by the United States.''

Up to now, Congress has approved money for the super collider on a year-to-year basis, primarily for the research phase. Annual appropriations would still be necessary but the authorization measure provides a backdrop of congressional intent to see the decade-long project through to completion.

The bill, which was sent to the Senate, sets a $5 billion federal spending cap. The remainder of the $7.5 billion authorization would be made up of a special federal fund consisting of a $1 billion contribution already approved by voters in Texas, where the project is to be built, and contributions from participating foreign countries.

''Its funding should not be left to the vagaries of the annual appropriations processes,'' Roe said. ''We should provide the project with the stability that it needs to flourish.''

But opponents argued authorizing the project is ''premature'' before detailed cost estimates are provided by the Department of Energy, expected in June. Department officials have indicated the estimate may reach as high as $8 billion.

''Congress is being suckered on this,'' warned Rep. David Obey, D-Wis. ''The Department of Energy has consistently low-balled cost estimates on virtually every project under its command for the past 20 years.''

Early in the debate, the House easily approved several amendments aimed at reining in costs, including a provision for General Accounting Office evaluation and oversight of the project and a requirement that the Energy Department certify the project can be built without exceeding the $5 billion cap.

The House also approved a provision aimed at guaranteeing participation by minority contractors and an amendment requiring that Texas provide the land at the Waxahachie site in addition to its $1 billion, a stipulation already agreed to by the state.

But the debate dissolved into accusations of ''Texas bashing'' as Rep. James Sensenbrenner, R-Wis., proposed an amendment that would make the state forfeit its $1 billion contribution if the project is terminated before Oct. 1, 1995.

''There are fabulous benefits coming to the state of Texas as a result of this project,'' said Rep. Don Ritter, R-Pa. ''Is it not reasonable to expect Texas to absorb some risks? Is it all gravy?''

''Texas put that money up in a good faith effort to save federal dollars '' countered Rep. Joe Barton, R-Texas, whose district includes the super collider site.

''I think it's reasonable to expect that if the citizens of Texas have obligated their taxes, they should be reimbursed'' if the project collapses, Barton said.

Despite his argument, the amendment was approved 256-163.

#90122u2406 05/02/1990 ~United Press International

BOSTON (MAY 2) UPI - A drug that had raised hopes of offering the first effective treatment for Alzheimer's disease appeared ineffective in a new Canadian study released Wednesday.

Daily doses of the oral drug THA, given in combination with the natural compound lecithin, did not significantly benefit Alzheimer's patients who were given it over a two-month period, researchers reported in The New England Journal of Medicine.

Dr. Serge Gauthier and colleagues at McGill University in Montreal said tests of THA - tetrahydroamininoacridine - conducted with 52 people suffering from Alzheimer's did not produce any marked improvements in their conditions.

The researchers said they could not show that the patients received any ''significant clinical benefit'' from receiving a daily combination of THA and lecithin, an animal tissue found in egg yolks, bile and blood.

Alzheimer's disease, a devastating brain disorder that affects millions of Americans and kills thousands, is a gradual, irreversible erosion of brain cells that control thought and memory.

Victims usually begin with difficulty remembering simple things and regress to an infant-like state, needing round-the-clock attention. They sometimes become violent.

The immediate cause appears to be tangles in cells of the brain, destruction of other cells and strange bodies of protein found inside cells. The reason for the phenomena is unknown. There is no effective treatment.

Early studies that tested THA on small numbers of patients produced promising results. Subsequent studies, however, have produced mixed results.

The Canadian scientists said the patients they studied, who were in advanced stages of the disease, did not benefit from doses of THA given in quantities that did not cause toxic side effects.

However, the researchers did not rule out the drug's possible usefullness. Larger doses may improve Alzheimer's patients, the researchers said, noting that further tests of the drug need to be done.

A study released earlier this week predicted Alzheimer's disease, which primarily affects the elderly and mentally incapacitates its victims, could affect millions of baby boomers as they age and cost billions of dollars annually in health care cost.

#90122u2459 05/02/1990 ~United Press International

WASHINGTON (MAY 2) UPI - The Food and Drug Administration approved a test for the hepatitis C virus Wednesday, providing Americans with long-sought protection against the most common serious disease spread through blood transfusions.

FDA spokeswoman Faye Peterson said the agency is recommending all U.S. blood donation centers use the screening test, which will be marketed in a joint venture between Ortho Diagnostic Systems Inc. of Rahway, N.J., and Chiron Corp. of Emeryville, Calif.

Hepatitis C, transmitted predominantly by blood transfusions, infects as many as 150,000 Americans and about 700,000 people worldwide each year. Complications include chronic hepatitis, cirrhosis and possibly liver cancer.

Hepatitis C is one of three major types of hepatitis and is by far the most common form of the liver disease. About 1 in 20 blood recipients become infected with hepatitis C, compared to a 1 in 35,000 chance of becoming infected with the AIDS virus by transfusion.

About half of people infected with the hepatitis C virus recover relatively quickly, but the rest become chronically infected, leaving them at risk for liver damage.

Until recently, the disease was called ''non-A, non-B'' hepatitis because scientists could not find the virus that caused it. That meant there was no way to screen blood donors for the disease. There also was no treatment.

But in 1988, Chiron researchers discovered the virus and named it the hepatitis C virus or HCV. That led to the development of a test to identifiy carriers by detecting antibodies produced in response to HCV.

The American Red Cross, The American Association of Blood Banks and the Council of Community Blood Centers planned a joint news conference Thursday to discuss how the new test will improve the safety of the blood supply.

The test uses yeast clones of HCV to capture HCV antibodies circulating in the blood. After someone is infected with a virus, their body produces specific and long-lasting molecules, called antibodies, designed to fight off the infectious agent.

When the new test was used to screen people who donated blood to 10 patients who developed hepatitis C after transfusions, researchers found HCV-positive donors in nine of the 10 cases. In addition, all 10 of the transfusion-related hepatitis patients tested positive for HCV antibodies.

''The blood bank industry and doctors have really been crying out for a direct test'' for HCV, Chiron research Michael Houghton said when results of that were published in the journal Science last year.

Since 1987, blood banks have been using indirect tests, such as one to detect liver damage, in an effort to identify people at high risk for hepatitis C. But Houghton said such an approach has proven ''partially effective'' in screening out potentially infectious blood donors.

Houghton said the only major drawback of the new test is that picks up only about 50 percent of people in the acute, early stages of hepatitis. That is because it takes about three to six months for a person to develop antibodies after being infected with HCV, he said.

#90122u2468 05/02/1990 ~United Press International

(MAY 2) UPI - The British Foreign Office says newly released American hostage Frank Reed saw a British television journalist and an Irishman alive and in ''reasonable condition'' a few days before he was freed on Monday. Reed says he is ''very, very angry'' that his fellow British and U-S hostages have NOT been freed yet.

The Senate Budget Committee today approved a fiscal 1991 spending plan totaling one-point-two-TRILLION dollars. Among other things, the budget would cut next year's deficit by 43-BILLION dollars and slash defense spending by 43-BILLION dollars. The House approved its proposed budget plan yesterday.

The government had some good news to report today about the economy. The Commerce Department says the index of leading economic indicators made a strong nine-tenths of one percent gain in March, following a sharp one percent decline in February. Analysts say the news suggests that the industrial sector is coming back stronger.

Egyptian President Hosni Mubarak is holding lengthy face-to-face talks with Syrian President Hafez Assad in Damascus. Mubarak arrived in the Syrian capital today for the first visit to Syria by an Egyptian leader in 12 years. Assad and the entire Syrian Cabinet stood on the airport tarmac to welcome Mubarak and his delegation.

Hungary's first freely elected Parliament in 40 years opened its inaugural session today to choose its leaders. The 386 legislators sang the national anthem as they took their seats in the Parliament building. The solemn ceremony was hailed by one lawmaker as the ''start of a promising new age'' of Hungarian democracy.

#90122u2487 05/02/1990 ~United Press International
(MAY 2) UPI - West German President Richard von Weizsaecker arrived in Warsaw today for top-level talks with Polish leaders. Solidarity's official newspaper hailed the chief executive as a German Poles could trust. He was last in Poland as a teen-age soldier taking part in the 1939 Nazi invasion.

The State Department says an American citizen was kidnapped by Colombian guerrillas in Ecuador during the weekend. A spokesman says Scott Heimdal of Peoria, Illinois, was seized while traveling by motorized canoe on a river close to the Colombian border. He is employed by an Ecuadoran firm.

Former White House news secretary James Brady says Congress should stop acting like ''cowardly lions'' and pass gun control laws. A wheelchair-bound Brady contends that such laws would end incidents like last week's random shooting in an Atlanta Mall. Brady was shot and severely injured in an attempt on President Reagan's life in 1981.

The family of a black teen-ager killed in an allegedly racially motivated attack in New York City appealed for calm today. Their plea came as the trial of two suspects in last August's slaying neared an end. Yusuf Hawkins was shot and killed as he and three companions fled a threatening group of white youths.

Firefighters are battling a huge wildfire that's raging out of control in Florida's Everglades National Park. The three-day-old blaze, driven by southeasterly winds, has charred more than six-thousand acres in and

outside the park. Park officials have called in relief crews from out of state to help fight the flames.

-30- 1741

#90122u2518 05/02/1990 ~United Press International

SAN FRANCISCO (MAY 2) UPI - A warrant was issued Wednesday for the arrest of attorney Josue ''J.T.'' Prada, a suspected Colombian cocaine smuggling kingpin who prosecutors say skipped out on his $1.2 million bail.

''We do not know where J.T. Prada is right now. We can only assume he is back in Colombia by his willingness to give up bail money of $1.2 million '' Robert Bender, Drug Enforcement Administration agent-in-charge, said.

''We will submit Prada's name (to the Colombian government) as one of the most desirable people we want to get back through the extradition process '' Bender said.

Federal agents were alerted late last week that Prada failed to meet a five-day-per-week bail reporting requirement set by the court.

''In the Colombian cartel, $1.2 million is a small price to pay for freedom,'' Bender said.

Seven pieces of property were posted for his bail by nine relatives, including Prada's mother.

Prada, a Southern Californian who is Colombian-born, was allegedly linked to some of the highest ranking members of the Medellin drug cartel in Colombia, including Jose Gonzalo Rodriguez-Gacha, who was killed last year in Colombia.

Colombian druglords allegedly kept Prada on a $2 million-a-year salary and gave him access to a slush fund to bail out jailed drug dealers, Lyons said during his 1988 fight to revoke a $1 million bail set by a federal magistrate in Los Angeles.

Prada, 41, headed a list of 21 people indicted in October 1988 on charges of conspiracy to import and distribute 60 kilos of cocaine.

He was charged in 13 counts that included conspiracy, bribery, money laundering, importation and distribution of cocaine.

His trial along with five others accused in the case was set for May 22.

WASHINGTON (MAY 2) UPI - Philo T. Farnsworth, the ''father of television,'' was honored Wednesday when a statue of the late inventor was presented to Congress by his native state of Utah and unveiled in the Capitol Rotunda.

Farnsworth, who also pioneered development of radar, electron microscopes, infant incubators and other inventions, is the 95th recipient of such a tribute, taking his place beside famed personages ranging from George Washington to Will Rogers.

The life-size bronze figure was unveiled by its sculptor, James Avati of Salt Lake City, and Farnsworth's wife, Elma ''Pem'' Gardner Farnsworth, whose face was the first human image ever transmitted by electronic television.

The sculpture, depicting the inventor holding his early TV camera tube, known as the image dissector, will remain in the Rotunda for six months, before it is given a permanent place.

The statue likely will end up on the first floor of the Capitol just opposite the last figure inducted in the Statuary Hall collection - Jeanette Rankin of Montana, the first woman to serve in the House.

A few hundred spectators filled the Rotunda for the two-hour ceremony. The tribute featured a performance by a choir from Ridgecrest Elementary School, which initiated the effort to honor Farnsworth by presenting the Utah state legislature with a resolution on his behalf in 1986.

Under an 1864 law, each state can donate to the Capitol the statues of two natives typifying the qualities and personalities of that state.

A statue of Mormon pioneer Brigham Young, the first native son of Utah so honored, was unveiled in 1950 and stands in Statuary Hall itself, the old House Chamber.

Farnsworth, born Aug. 19, 1906, in a log cabin in Beaver, Utah, made history on Sept. 7, 1927, when his image dissector achieved the first

successful transmission of electronic television - the image of a black line on a glass slide.

The following year, he demonstrated the transmission of geometic figures and in 1930 the image of his wife's face. That same year, Farnsworth was issued patents for his television transmission and receiving systems.

''Those days were engraved in my mind because they were so exciting,'' Pem Farnsworth said after the ceremony.

Farnsworth first conceived his television system at age 13, and drawings of the concept he made for his teacher in 1918 proved pivotal years later in helping him prevail in a patent dispute against rival Russian-born inventor V.K. Zworkyn of RCA.

Both men have been acknowledged for their contributions in the field. But RCA, which had sought outright ownership of emerging television technology was later forced to license Farnsworth's patent for $1 million.

Although Farnsworth is best known as the ''Father of TV,'' he went on to make key contributions of other inventions, accumulating more than 160 patents.

Although his image dissector was largely outdated for commercial use, a miniature version of the device was used to transmit pictures of the first moonwalk in 1969.

''Few inventions in history have had a greater impact on the world ... than television,'' said House Speaker Tom Foley, D-Wash. ''In recent years it took us to the moon. ... In recent months, it took us to the capitals of Prague, Berlin and Moscow.''

Farnsworth died March 11, 1971, at age 64.

LONDON (MAY 2) UPI - A man brandishing a knife stole bonds worth $479 million from a messenger in central London Wednesday in what was believed to be history's biggest mugging, officials said.

Officials reported the certificates of deposit and treasury bills were not negotiable but said there are ways to turn the documents into cash.

Police reported the mugger intercepted the messenger from Sheppards money brokers as he walked through London's financial district.

The victim, when threatened with a knife, handed over a security-filled

briefcase to the attacker, who then fled into a crowded subway station and escaped, they said.

An official of Sheppards said the bag contained certificates of deposit worth 122 million pounds - $200 million - and Treasury bills worth 170 million pounds, or $279 million. The Treasury bills mature on July 30.

The messenger reported to police that his briefcase was stolen, but apparently was unaware of the value of its contents. Messengers typically are not told the value of the goods they carry.

Officials said they knew of no mugging anywhere in the world even nearing the value of Wednesday's heist.

The Bank of England issued a warning that anybody presenting deposit certificates to banks should be checked ''extremely carefully.''

It said the Bank of England planned to soon introduce an electronic transmission system that would eliminate the need for messengers to carry bonds and securities on the streets.

The Sheppards official said the stolen documents were bearer certificates and were not registered in an owner's name, but were numbered and could in theory be traded on the wholesale money markets or used as collateral for a loan.

Police said they were investigating whether the attack was a random mugging or the work of insiders who knew what was inside the case.

#90122u2886 05/02/1990 ~United Press International

(MAY 2) UPI - American hostage says he's ''embarrassed'' that he is free and the others are still held in Lebanon... the Senate Budget Committee approves a fiscal 1991 budget proposal.

The days' top news... from U-P-I.

Newly freed American hostage Frank Reed voiced annoyance today that hostages still are being held in Lebanon.

Reed told reporters at Wiesbaden, West Germany, that at one point in his three-and-a-half year captivity he was held with four other Western hostages. Two of them were Americans Terry Anderson and Thomas Sutherland, both kidnapped in 1985.

Reed said he was ''very, very angry'' to learn the two men remain in captivity. Added Reed- ''I am embarrassed that I'm out before they are.''

Reed was freed by Moslem extremists in Lebanon on Monday and arrived at a U-S facility in Wiesbaden on Tuesday from Syria. Reed said he had spent two years with Anderson, a journalist, and Sutherland, a professor at American University in Beirut.

In another development, a Tehran broadcast by an Iranian spiritual leader criticized the United States and belittled those calling for direct Iranian-U-S talks. But Ayatollah Ali Khameni said Iran still will help free Western hostages for humanitarian reasons.

The Senate Budget Committee today approved a one-TRILLION-dollar budget plan for 1991.

The panel voted 14-9, mostly along party lines, for the spending blueprint that cuts defense spending by 13-BILLION dollars and trims the fiscal 1991 deficit by 43-BILLION dollars.

Republican Senator Charles Grassley of Iowa was the only panel member to break party ranks and join the 13 committee Democrats in supporting the plan offered by committee Chairman James Sasser of Tennessee. The committee's nine other Republicans opposed it.

After the vote, Sasser said it's ''unclear at this point'' if his plan will pass the full Senate, where debate is expected to begin later this month. But he says he intends to fight for it- quote- ''hammer and tong, tooth and nail.''

G-O-P Senator Pete Domenici of New Mexico says he opposes Sasser's plan because- quote- ''I do NOT believe this budget is going to be implemented.''

President Bush has proposed only a three-point-two-BILLION-dollar Pentagon spending cut after inflation. That's about 10-BILLION less than the Senate plan.

#90122u2908 05/02/1990 ~United Press International

(MAY 2) UPI - A published report describes the New York metropolitan area as having the largest AIDS rate in the world.

According to the report, nearly one of every four men in the area between the ages of 25 and 44 are infected with the deadly virus. The report is based on a federal Centers for Disease Control survey of patients in 26 hospitals across the nation.

It says the survey included three hospitals in the New York metropolitan

area, including parts of New Jersey. The rate of patients testing positive for AIDS was eight percent.

The survey found the highest rate of AIDS infection... 24 percent... among men between 24 and 44. The report said the rate of H-I-V infection... which causes AIDS... was the highest in the nation and higher than reported in Africa.

The first freely elected parliament in Hungary in 43 years convened in Budapest today for its first session.

In an emotional eight-hour meeting, the lawmakers elected former dissident author Arpad Goncz provisional president. They also accepted the resignation of the old communist government and officially declared the 1956 Hungarian uprising- quote- ''a revoluton and a freedom fight.''

Bela Varga... president of the last democratic election in 1946-47... delivered an opening speech. Said Varga... now in his late 80s...''I thank providence that I was able to live long enough to see the fate of my country turning for the better.''

The 386 legislators, chosen in multi-party elections in March and April, sang the national anthem as they took their seats in the palatial Parliament building.

#90122u2939 05/02/1990 ~United Press International

(MAY 2) UPI - Historic talks are under way in South Africa between the minority white government and the African National Congress.

The two sides are meeting face-to-face at the negotiating table for the first time in talks intended to lead eventually to the abolition of apartheid, the country's racial separation policy.

Before the start of the session in Cape Town, A-N-C leader Nelson Mandela and President Frederik de Klerk shook hands in the garden of a centuries-old homestead as their delegations stood expressionless behind them.

Each spoke of the urgency of ''creating the right climate'' for meaningful negotiations. Mandela said both sides will have to overcome what he called the ''terrible tradition of a 'dialogue' between master and servant.''

Mandela also noted it's the first time in 78 years that ''a truly serious meeting'' is taking place between the A-N-C and the governments that have ruled South Africa for generations. He described it as- quote- ''sobering in its implications.'' The discussions are expected to last for

18 hours during three days.

Bowing to pressure from NATO allies and U-S industry, the Bush administration today announced that it will seek a reduction or elimination of controls on some high-technology Western exports to Eastern Europe.

The announcement had been long-expected.

The administration will seek liberalized restrictions on 43 technologies previously protected because of their potential military applications.

But the plan also seeks more effective control over powerful computers and other products that could still prove a threat in Soviets hands.

White House spokesman Marlin Fitzwater says the proposals, in effect, ''will build higher fences around fewer goods by focusing on those items that are the most sensitive in terms of our national security.''

#90122u3062 05/02/1990 ~United Press International

(MAY 2) UPI - President Hosni Mubarak is in Syria for the first visit by an Egyptian leader in 12 years. Mubarak's arrival in Damascus signals an end to a Syrian-Egytpian feud.

He is meeting with President Hafez Assad for wide-ranging talks. Sources say that among topics expected to be discussed are the chances for improved relations between Syria and neighboring Iraq.

The two leaders also are expected to discuss the outlook for Assad's attendance at a proposed Arab summit in Bahgdad that would be held in mid-May. Diplomats point out, however, that Mubarak has NOT confirmed whether he will attend the meeting in the Iraqi capital.

Mubarak has said he wants to carefully study the summit agenda before making a decision.

Two former dolphin trainers reportedly are charging that the Navy is using dolphins armed with .45-caliber weapons in a top-secret plan to guard nuclear submarines at Bangor, Washington.

Former dolphin trainer Rick Trout claims in a published interview that the Navy arms dolphins and sea lions with nose-mounted projectile devices to kill hostile swimmers by firing a 45-caliber bullet upon contact.

Congressman Norm Dicks denies that such a nose-mounted weapon exists. The Washington Democrat said in a television interview last night that he

could NOT discuss the security mission of the dolphins and sea lions because it is top secret. But he said the dolphins- quoting now- ''are NOT being trained to kill or injury anybody.''

Navy officials won't state for the record why Bangor and other sub bases require a defense using dolphins, though they presumably are being trained to detect enemy frogmen.

#90122u3141 05/02/1990 ~United Press International

(MAY 2) UPI - The British Foreign Office says newly freed American hostage Frank Reed has provided information on a Briton and an Irishman held hostage in Lebanon. Reed is said to have reported sighting the two men only a few days before he was freed on Monday.

The Hubble Space Telescope has hit another snag in its week-long orbit. NASA says a door protecting Hubble's sensitive apparatus was accidentally closed and sent the spacecraft into a dormant state for 12 hours. NASA blames an engineer's ''oversight'' for the problem.

Education Secretary Cavazos says American students are showing NO overall improvement for the fourth straight year. He says reversing the situation will require more comprehensive and even radical changes in the classroom and at home.

Nepal's prime minister says the kingdom's new constitution will officially put an end to King Birendra's absolute powers. Nepal's prime minister says the unlimited powers of the king have proved dangerous for the country.

West German President Richard von Weizsaecker was last in Poland as a teen-age soldier at the start of World War Two. Today, he arrived in Warsaw on an official mission of reconciliation with Polish leaders.

The number of Americans who donated organs for transplants dropped for the first time in 1989. Experts say the decline may be linked in part to AIDS and voiced concern about the already short supply of organs available.

Norway has asked the International Whaling Commission to re-classify the Minke whale to pave the way for a renewed commercial hunt. A Norwegian fisheries spokesman says an annual cull of two-thousand whales would NOT be detrimental to the species.

South Carolina corrections officials have torpedoed a scheduled concert in Charleston by recently released soul singer James Brown. He served nearly 16 months in prison for trying to run down police officers during a high-speed car chase in 1988.

-30- 2105
#90122u3320 05/02/1990 ~United Press International
(MAY 2) UPI - The White House says there are NO signs another American hostage will be released soon. Spokesman Marlin Fitzwater also said that newly released hostage Frank Reed has a right to be angry and frustrated about his long captivity in Lebanon. Reed's wife had told reporters today that he's ''very angry at everybody who should have done something'' to secure his freedom and that of other American captives.

A former top housing official has linked the office of then-Vice President Bush to a request for funding for a proposed project in Kansas City, Missouri. Dubois Gilliam testified before a House panel today that he was told that Bush's office had expressed interest in the matter, which involved a 500-thousand-dollar feasibility study for development of a Hispanic trade center.

Panamanian officials are denying rumors that a coup attempt was made against the U-S-backed government. In a broadcast statement, a vice president said NO coup attempt had been made. The rumors flared when armed guards surrounded the presidential palace last night and one official was seen carrying a machine gun. President Guillermo Endara is visiting the United States.

Hawaii's Kilauea Volcano kept up its destructive lava flow through a doomed rural housing settlement on the big island today. A civil defense official says red-hot lava pouring from the volcano repaved a street with rock... cutting off the last access road to the eastern portion of Kalapana Gardens. The official says about 15 homes remain standing in the now-isolated area. The last house to burn went up in flames yesterday.

A federal mediator says negotiators for Greyhound Lines and striking employees will resume talks in Washington, D-C, on Saturday. Earlier talks to end the two-month walkout broke down more than one month ago. The dispute involves some nine-thousand Greyhound bus drivers and other employees.

-30- 2081
#90122u3669 05/02/1990 ~United Press International
(MAY 2) UPI - The latest freed American hostage says he is ''very, very angry'' to learn that other hostages are still being held. Speaking to reporters in Wiesbaden, West Germany, Frank Reed expressed outrage that Americans Terry Anderson and Thomas Sutherland have been held since 1985. Iran today announced it's still willing to help free hostages, despite a State Department report this week labeling Iran as a supporter of terrorism.

South Africa's white minority government met in Cape Town today with the African National Congress. It's the first time the two groups have ever met at the bargaining table. The two sides are hashing out pre-conditons for talks about ending apartheid and writing a new constitution. A-N-C leader Nelson Mandela and President de Klerk both emphasized ''creating the right climate'' for talks.

Senate Budget Committee chairman James Sasser says he'll fight ''tooth and nail'' for the one-point-two-TRILLION-dollar 1991 budget his committee approved today. The panel voted 14-9, mostly along party lines, for the spending plan that cuts defense by 13-BILLION dollars and trims the deficit by 43-BILLION dollars. Sasser, who sponsored the budget proposal, says it's UNclear at this point whether his plan will pass the full Senate where debate is expected to begin later this month.

Los Angeles Mayor Tom Bradley today announced a mandatory water rationing program for the city. The plan would force residents to cut their water consumption by 10 percent or face stiff financial penalties. The program must be approved by the City Council. A four-year drought in southern California has led to a projected shortage of at least 10 percent in water supplies. Bradley said voluntary conservation has NOT saved enough water.

-30- 1938

#90122u3960 05/02/1990 ~United Press International

(MAY 2) UPI - Negotiations began today between South Africa's minority white government and the African National Congress. The two sides met at the bargaining table for the first time in history in a session intended to lead to formal talks to end apartheid. Following the four-hour meeting in Cape Town, the delegations issued a joint communique describing the talks as open and straightforward. The communique said a working dinner was scheduled tonight, and formal talks are to resume tomorrow.

Former hostage Frank Reed says he's ''very, very angry'' that other Westerners are still being held hostage in Lebanon. Reed told reporters today in Wiesbaden, West Germany, that he was held with four other Western hostages- including Americans Terry Anderson and Thomas Sutherland- at various times during his 44 months in captivity in Lebanon. Reed was released by Moslem extremists Monday and arrived in Wiesbaden from Syria yesterday.

El Salvador's leftist rebels launched a series of attacks in San Salvador today, firing shots at the home of President Alfredo Cristiani , crippling a power sub-station and killing three soldiers. It was NOT clear if Cristiani was home when the shots were fired. Assistant Secretary of State for Inter-American Affairs Bernard Aronson said the F-M-L-N attacks contradict the rebels' requests to negotiate.

The nation's top education official says U-S students overall showed NO improvement academically for a fourth year in a row. Education Secretary Lauro Cavazos said the country has reached a plateau, and may need ''radical'' changes in the school system in order to improve. He says the nation needs ''more rigor'' in the classroom, and more help from parents in turning off the television and getting children to read.

-30- 1945

#90122u3985 05/02/1990 ~United Press International

(MAY 2) UPI - Hungary's newly elected Parliament named its first president today. Former dissident author Arpad Goncz will serve as the country's acting president. Goncz was once sentenced to death after Soviet troops crushed Hungary's 1956 uprising. In an emotional meeting in Budapest, the legislators also accepted the resignation of the old communist government and declared the 1956 uprising a ''revolution and a freedom fight.''

In Lebanon, some 200 UNarmed Christian civilians formed a human buffer again today between warring Christian forces in a resort town 12 miles northeast of Beirut. It's the second straight day the crowd has set up a makeshift church in the middle of the town and prayed loudly for peace in a bid to stop months of bitter fighting. So far, the peaceful demonstration has been successful... as the guns were silent today and the atmosphere calm.

Panamanian officials are denying rumors of a coup attempt after a security guard was shot at the Presidential Palace in Panama city. A government spokesman says the guard was accidentally shot as about 30 guards surrounded the Palace last night and blocked off nearby streets. One Western diplomat said the shooting was probably the result of rampant rumors, calling Panama ''the rumor capital of the world.''

Scientists say that exposing people to bright light can reset their biological clocks so they adapt more easily to working at night. So says Dr. Charles Czeisler of Harvard University Medical School and Brigham and Women's Hospital in Boston. Czeisler studied eight healthy men and found that putting people in front of bright indoor lights for four days and keeping them in darkness while they slept could shift their clocks. It made them alert and able to function well in the early-morning hours.

-30- 1968

#90122u4101 05/02/1990 ~United Press International

(MAY 2) UPI - Talks between South African and the A-N-C open in Cape Town... freed hostage Frank Reed mad others are still captive in Lebanon... Senate panel passes budget plan... and water rationing ordered in L-A. U-P-I has it all, next:

South Africa's white-minority government and the African National Congress held historic talks in Cape Town today aimed at eventually ending apartheid.

It's the first time in history the two sides have sat down at the negotiating table. The talks lasted four hours and both sides issued a joint communique describing the session as- ''characterized by openness and straightforwardness.''

The communique also said both sides ''emphasized each other's determination to seek agreement'' without underestimating the complexities and differences that will have to be resolved.

The delegations were headed by A-N-C leader Nelson Mandela and President Frederick de Klerk, who opened their three days of meetings with a handshake in the garden of a centuries-old homestead. Their delegations stood expressionless behind them.

Each spoke of the urgency of ''creating the right climate'' for meaningful negotiations and overcoming formidable mistrust between the white ruling party and the A-N-C.

Formal talks resume tomorrow afternoon.

Freed American hostage Frank Reed today expressed frustration and embarrassment over the hostage crisis in Lebanon.

Reed says he was held with four other Western hostages- including two Americans- at times during his 44 months in captivity in Lebanon. And he says he's ''very, very angry'' and ''embarrassed'' to learn they are still held hostage.

Reed was released Monday by Moslem extremists in Lebanon. He says he spent two years with American hostages Terry Anderson and Thomas Sutherland, who were both kidnapped in 1985.

Reed told reporters during an impromptu news conference in Wiesbaden, West Germany- ''I am embarrassed that I'm out before they are.'' He added- ''For God's sake, it's nearly six years for these men.''

The 57-year-old lecturer also says he spent almost three years either in the same room or building with British hostages John McCarthy and Brian Keenan.

Reed says he was blindfolded much of his time in captivity. He was kidnapped in Beirut in 1986.

Earlier, Reed's wife told reporters he was angry over the amount of time he and the other hostages were held. She said he was ''very angry at everybody who should have done something'' to help win their release.

-30- 2695

#90122u4149 05/02/1990 ~United Press International

(MAY 2) UPI - Panamanian officials say rumors of a coup attempt against President Guillermo Endara are completely UNfounded.

Vice President Ricardo Arias Calderon said in a broadcast in Panama City today- ''There has been NO coup attempt.'' Calderon added, ''There have have been rumors from UNknown sources that circulated night, but which have NO basis in the truth.''

The rumors spread as a Panamanian security guard was accidentally killed at the Presidential Palace last night.

Government spokesman Rene Hernandez says the 23-year-old guard was shot when another guard accidentally fired his machine gun as about 30 guards surrounded the palace and blocked off nearby streets in the capital's San Felipe neighborhood in a routine exercise.

Hernandez said- ''It was an accident'' and that the incident is under investigation. He described the Presidential Palace as calm.

NASA says a ground controller's mistake caused a door to close on the Hubble Space Telescope, shutting down the orbiting observatory for 12 hours.

The problem occurred last night during tests by engineers at the Goddard Space Flight Center in Greenbelt, Maryland, and the Marshall Space Flight Center in Huntsville, Alabama.

A NASA statement says engineers forgot to hit a switch to keep the door open, so a telescope safety system commanded it to shut.

The door's motion sent the one-and-a-half-BILLION-dollar telescope into a hibernation safety safe mode. The same thing happened several days ago when the door was opened.

Engineers have since sent commands to the telescope to desensitize its sensors and prevent such headaches. They also reopened the door and brought the telescope back on-line.

#90122u4170 05/02/1990 ~United Press International

(MAY 2) UPI - The leader of Lithuania's independence movement is appealing for diplomatic recognition by the United States.

President Vytautas Landsbergis faxed a letter to New York Senator Alfonse D'Amato urging President Bush to establish ''as soon as possible'' diplomatic relations with the Soviet republic.

Lansbergis also urged that Bush demand the Soviet Union lift its economic blockade or open the republic's borders to the rest of the world to allow it to conduct foreign trade.

In the letter, dated yesterday, Lansbergis said the ''primary purpose'' of the blockade is to create massive unemployment as factories are forced to close. He said currently Lithuania has enough reserves of various raw materials and products to last almost two weeks.

Scientists reported today the AIDS virus may indirectly help them trace the causes of cancer.

Researchers at the National Cancer Institute say the AIDS virus releases a protein that appears to directly spur growth of a rare cancer, Kaposi's sarcoma. The process may provide clues to how other viruses may trigger tumor growth.

The study says the finding is believed to mark the first time scientists have found a virus-produced protein that acts like a hormone to directly promote the growth of UNinfected cells.

On another front in the AIDS war, a published report says the New York metropolitan area has the highest AIDS rate in the world.

The report says nearly one in four New York City men between the ages 25 and 44 are infected with the deadly virus.

The report is based on a federal Centers for Disease Control survey of NON-AIDS patients in 26 hospitals nationwide.

#90122u4340 05/02/1990 ~United Press International

(MAY 2) UPI - Two wildfires that have burned nearly nine-thousand acres in southern Florida raged out of control today. The larger of blazes is in Everglades National Park and relief crews were brought in from out of state to battle it. The other fire is west of Miami.

Afghanistan's President Najibullah says he has lifted a state of emergency that was imposed after last year's pullout of Soviet troops who backed his government. The move is seen as a sign of Najibullah's growing confidence.

A major drug bust in Nicaragua. The interior minister says about 350 pounds of cocaine was found in the reserve gasoline tank of a truck bound from Panama to Guatemala. He said the estimated value is more than 30-Million dollars.

West German opposition leader Oskar Lafontaine was discharged from a hospital in Cologne today- one week after surviving an assassination attempt. Lafontaine was attacked by a knife-wielding woman who slashed his neck.

Even presidents can make mistakes on their income tax returns. The White House says President Bush made a 26-thousand-dollar error of his return for 1989. He has mailed the Internal Revenue Service a check for 74-hundred dollars to cover UNreported income from a life insurance policy.

In Ohio, Representative Donald Lukens announced today he'll stay in the race for re-election to Congress. Lukens was convicted in May 1989 of having sex with a 16-year-old girl at his Columbus apartment. He apologized today for what he called the ''dumb mistake.''

-30- 1683

#90122u4528 05/02/1990 ~United Press International

(MAY 2) UPI - Accused Nazi war criminal Josef Franz Leo Schwammberger was extradited from Argentina to West Germany today to face trial for mass murder and torture. Schwammberger is charged with personally killing hundreds of Jewish inmates at concentration camps during the Second World War. The 78-year-old Schwammberger is the former commandant of two concentration camps in Poland. This will be the first major trial of a Nazi war criminal since the fall of the Berlin Wall.

Congress heard more testimony today from former HUD official DuBois Gilliam about funding favors at the Department of Housing and Urban Development during the Reagan administration. Gilliam says he found a way to fund an ineligible ''special project'' in 1985 after being told the office of then-Vice President Bush wanted it financed. The project involved a 500-thousand-dollar feasibility study for development of a Hispanic Trade Center to be located in Kansas City, Missouri.

A ship whose crew wants to broadcast pro-democracy messages to China from international waters is seeking permission to dock in Hong Kong instead of Taiwan... to defuse tension between Taipei and Beijing . The ship, dubbed the Goddess of Democracy, docked today in Singapore. French journalist Christophe Nick, one of the originators of the project, says the crew wants to make a future stop at Hong Kong to refuel, resupply and bring transmitters aboard the vessel.

SEATTLE (MAY 3) BUSINESS WIRE - Alaska Airlines, a subsidiary of Alaska Air Group Inc. (NYSE, PSE), reported Thursday that its April traffic increased 16 percent to 322.0 million revenue passenger miles (RPMs) from the 278.5 million flown a year earlier.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for the month was 49.6 percent, down from the 50.9 percent in April 1989.

Capacity during April was 649.1 million available seat miles (ASMs), 19 percent above the 546.9 million in April 1989. The airline carried 398,700 passengers in April, compared to 355,100 in April 1989.

For the four months ended April 1990, revenue passenger miles totalled 1.282 billion, an 18 percent increase from the 1.082 billion recorded a year earlier. The passenger load factor for the four months ended April 1990 was 49.1 percent, down from the 49.8 percent for the prior year.

Capacity for the four months ended April 1990 increased 20 percent to 2.609 billion, up from 2.174 billion in 1989. The airline carried 1,570,000 passengers, compared to 1,399,000 in 1989.

JACKSONVILLE (MAY 3) BUSINESS WIRE - Jacksonville area consumers who visit their local supermarket or convenience store Thursday will find an innovative addition to their dairy cases when Nescafe Mocha Cooler becomes available.

A refreshingly cold combination of rich chocolate, fresh coffee and 2 percent low fat milk, Nescafe Mocha Cooler is a ready-to-drink beverage that will be available in Jacksonville on a pilot market basis for the next twelve months.

The Jacksonville area is one of five pilot markets in the United States.

The introduction of Nescafe Mocha Cooler creates a new segment within the steadily growing ready-to-drink cold beverage category.

Research conducted by Nestle found that the majority of all consumers who tried the product said they would buy it.

A fully integrated marketing program unique to the dairy industry will support Nescafe Mocha Cooler's introduction. In addition to radio and outdoor advertising, a customized mobile truck will travel to area supermarkets and convenience stores to give out free samples of the product.

A variety of special events and promotions are planned utilizing the sampling truck. McCann-Erickson Advertising of New York is the advertising agency for Nescafe Mocha Cooler.

The product's packaging is just as innovative. Palm fronds, island mountains and a blue-green sea will bring eye appeal and added consumer attention to the normally generic looking dairy case. The product will be available in 12 oz. and 32 oz. pure-pack dairy cartons.

Using an advanced processing technology known as ultrapasteurization, Nescafe Mocha Cooler will have a 45-day shelf life.

An 8-ounce serving of Nescafe Mocha Cooler contains, by average analysis, approximately 150 calories, 23 grams of carbohydrates, 7 grams of protein, 245 milligrams of calcium, 100 milligrams of sodium and 390 milligrams of potassium.

Nestle Foods Corp., and the other companies within the Nestle Enterprises Inc. umbrella, have a long history of anticipating and fulfilling consumer desires.

From the introduction of soluble coffee in l938 to recent new product successes such as Nestle Crunch ice cream and Stouffer's Right Choice low calorie and low sodium microwaveable frozen entrees, primary emphasis has always been on providing value-added products linked to real consumer needs.

In addition to Jacksonville, other Nescafe Mocha Cooler pilot markets include Tampa/St. Petersburg; Orlando; Providence, R.I.; and Boston, Mass.
